TIMPIE
HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately $70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco
Federal Reserve Bank
Pacific Telephone and Telegraph Building
Central Bank, Oakland
Oakland Savings Bank
New Subway Terminal Building, Los Angeles

Sold by most progressive dealers throughout Pacific Coast.

Every page will interest YOU!

EVERY page of the Bulletin on COASTEEL Standard Buildings is worth the time of the man who has a one-story building to buy, build or use. These buildings are economical, they are permanent and they can be shipped and erected in a remarkably short time after being ordered. COASTEEL Buildings are **galvanized from floor to roof peak** and are carried in stock in San Francisco.

The Bulletin is a personally-conducted tour through the design, make-up and manufacture of COASTEEL Buildings. If you have a one-story building in mind, you can get helpful ideas from each page. If you are right up to the point of getting a building, the Bulletin will make final action an easy matter.

A request on your business stationery will bring a copy of the Bulletin in the return mail.

$11,500,000 BRIDGE BOND ELECTION SCHEDULED

Three bridge bond measures for a total of $11,500,000 will be placed on the ballot by the Multnomah (Oregon) County Commissioners at the general election to be held November 2. The projects included in the program are:

First: The Interstate avenue-Fremont street bridge to be located in the vicinity of Interstate avenue and Fremont streets. This will require an issue of $6,750,000 of bonds and will be for the construction of a bridge with a 18-foot roadway and two six-foot sidewalks of either suspension or cantilever type. The estimates of cost are based on a clear height of 183 feet in the center of the river and 173 feet at the harbor lines at low water. It will have no piers between harbor lines, thus requiring a span of approximately 1200 feet.

Second: The St. John bridge, which will required an issue of $4,000,000 of bonds for its construction, and will be of the same height and clearance as the Interstate-Fremont bridge, but will have a roadway of 30 feet width with two sidewalks of five feet each.

Third: For the improvement and enlargement of the capacity of the Broadway bridge a bond issue of $750,000.

UNIFORM CODE COMPLETED

The Pacific Coast Building Officials Conference held at San Jose, September 20th to 23rd presented to the building industry the final preliminary draft of its proposed Uniform Building Code for Pacific Coast cities.

On the second day of this meeting the California Development Association through Mr. C. S. Knight, manager of its industrial problems, enthusiastically renewed his offer of support to the Conference Uniform Code movement to hasten its early completion.

Almost immediately following Mr. Knight's speech the following resolution was presented:

WHEREAS: The Pacific Coast Building Officials Conference is engaged in the preparation of a Uniform Building Code for Pacific Coast Cities, final preliminary draft of which is now ready for consideration by and suggestions from organizations and individuals of the various building and allied industries and professions, and

WHEREAS: The California Development Association has, through Mr. C. S Knight, manager of its Industrial Department, renewed its offer of support to the Pacific Coast Building Officials Conference in its work above mentioned, and

WHEREAS. That support, extended by the California Development Association in the past has resulted in representations of organized industries definitely pledging their direct support to the Pacific Coast Building Officials Conference in its work of bringing to speedy and successful conclusion the final draft of said Uniform Building Code, and

WHEREAS: The Pacific Coast Building Officials Conference in annual meeting assembled, do hereby express to the California Development Association our sincere appreciation for the earnest and fruitful efforts as exemplified by the work of its Industrial Manager, Mr. C. S. Knight, and

BE IT RESOLVED: That we ask the California Development Association to continue in its effort in gaining support of those interested who have not already pledged their direct support to our efforts.

At the closing session of the Conference, Thursday afternoon, September 23rd, a plan was evolved whereby the combined effort of the entire building industry was to be enlisted toward the completion of the Uniform Building Code within the next twelve months period.

Representatives of the building industry, architects and engineers have given their support to this plan.

EDITOR'S NOTE—In tomorrow's issue of Daily Pacific Builder will be published a complete digest of the proceedings of the Pacific Coast Building Officials Conference held in San Jose, as reviewed by a Special Correspondent of Daily Pacific Builder who attended the Conference during the four day sessions.

RELIEF FUND DRIVE

A mass meeting of the San Francisco Builders' Exchange will be held today in the Exchange Rooms, 180 Jessie St., at 1 P. M., to consider and receive funds for the "Florida Sufferers." Members of the exchange are requested to put their subscriptions through their organization, making the checks payable to the American Red Cross.

OPEN SHOP PLAN PROPOSED ON NEW FRESNO SCHOOL

Actual operation of the American Plan in the building industry in Fresno may be attempted by the Valley Industrial Association in connection with building operations of the Edison Technical School, according to reports in circulation following the acceptance by the city board of education of architects' plans for the $200,000 school project.

While officials of the industrial association would neither deny nor confirm reports that their organization, which declared for introduction of the plan some time ago, would attempt operation of the plan in connection with the Edison School Building, they intimated that they have deferred operations until the school work is started.

It was specified by the board of education that bids will be advertised for in connection with construction work on the segregated bid plan. This will enable union and non-union contractors to submit bids for various construction work.

In the event a non-union contractor is awarded a bid for any particular job and employs a non-union craft or crafts, and union crafts continue to work with non-union men, the American Plan will be actually in operation.

That the Fresno Building Trades Council will vigorously protest any American Plan activities is the stand taken by union officials. The labor difficulties developed after the unions and employers, represented by the Fresno Builders' Exchange, failed in their attempt to renew the Fresno Plan agreement.

The belief of the Industrial Association is that non-union and union crafts can work on the same job, and the plan at Fresno does not call for making a construction job completely union or non-union as in the case of the San Francisco labor strife, according to those in close touch with the situation.

Despite the fact that the Builders' Exchange is moving in the direction of reorganization and another agreement with labor, the Industrial Association is continuing activities with its policy unchanged, officials announced.

SACRAMENTO TO PREPARE FOR A. S. C. E. CONVENTION

Preliminary steps for the national convention of the American Society of Civil Engineers in the fall of 1929, practically assured Sacramento, were taken at a recent meeting of the Sacramento chapter.

The following committee was appointed by President Everett N. Bryan to make the arrangements: Thomas E. Stanton, chairman; Paul Bailey, J. C. Boyd, Albert Givan, J. W. Gross, Edward Hyatt, Jr., and S. E. Pope.

George T. Seabury, national secretary, was impressed with the proposal that the national session be held in Sacramento during a recent visit. The decision is now before the national board of directors.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Rock Products Company has moved from 403 Hobart Bldg. to 209 Utah St., San Francisco.

John W. Cornelius, 69, formerly connected with the street department of the city of Fresno, as an inspector, died in that city, Sept. 26.

Paul Santana, well known in East Bay building circles, has rejoined the sales staff of the Aronsen's Hardwood Company, extending a special service to builders.

Atlas Hauling & Grading Company of San Francisco has been incorporated with a capital stock of $50,000. Directors are: M. Rosenberg, C. Fischer and A. Carlson.

Chester L. Barger, San Francisco contractor, has petitioned the Federal Court to be adjudged a voluntary bankrupt. He listed his liabilities at $5956, with assets of $250.

Edwin J. Symmes, architect, has been appointed a member of the Alameda City Planning Commission succeeding Henry F. Schlichting.

The Los Angeles County Board of Supervisors has authorized the expenditure of approximately $7,000,000 on county highways.

About sixty general contractors and sub-contractors of Tacoma, Wash., have adopted the open shop policy of employment. Since the adoption of the new regime, it is said, there has been no evidence of union opposition.

With combined resources of $2,264,391,156, California state banks rank fourth in national resources of the nation, according to the state banking department. New York, Massachusetts and Pennsylvania are the only states exceeding California in resources of state banking institutions.

Modification of the policy of the Oakland city council of not accepting streets of less than 50-feet width in new areas is announced. In special cases where the "lay of the land" makes it impractical to build streets 50 feet wide, the city will accept narrower streets.

Electrical exports from the United States have shown a steady gain in value during the past four years, reaching $87,318,087 in 1925. The 1925 exports were $6,780,099, or approximately 7.6% over the 1924 figure, and are now running at the rate of $96,000,000 for the present year, or approximately 11% more than in 1925.

Timothy A. Reardon, president of the San Francisco Board of Public Works, left last Saturday for Detroit to attend the annual convention of the metal trade workers of the American Federation of Labor which opens Sept. 29. Reardon represents the United Association of Plumbers and Steamfitters and shipyard organizations of the Pacific Coast. He was also elected by all organizations in San Francisco as delegate to the annual convention of the A. F. of L., which convenes

Work of salvaging 7,000,000 feet of valuable pine timber from the 700 acres of Weyerhaeuser holdings west of Klamath Falls, Ore., which were swept by fire early this summer, will be started at once, according to Jackson Kimball, representative for the Weyerhaeuser interests at Klamath Falls.

J. W. Dombert, former partner in the Graham Cement Pipe Manufacturing Company at Lodi, has purchased the entire business from Mrs. Kittie Graham, widow of the founder of the plant. Graham died four years ago.

San Bernardino has been chosen the 1927 convention city of the California State Federation of Labor. The selection came as one of the closing acts in the final session and ended a spirited contest between San Bernardino and Sacramento for the honor of entertaining the labor delegates next year.

Reno's (Nevada) new plumbing ordinance over which a battle has been waged for several months has been killed by the city council and a new ordinance will be drawn up. A delegation of plumbers headed by H. E. Van Horn, representing master plumbers and journeymen plumbers of California, spoke in favor of adoption of the proposed act.

The Bureau of Labor Statistics of the United States Department of Labor reports the following trades in the building industry working on the 5-day week basis: Glaziers, Newark; electricians, Seattle; lathers, Boston, Buffalo and Seattle; painters, Boston, Bridgeport, Newark, New York, Portland, Ore., Scranton and Seattle; plasterers, Boston, Buffalo, Philadelphia, Providence and Seattle; plumbers, Seattle; steamfitters, Seattle.

During the first 21 days of September, the Los Angeles building department had issued 2288 permits with aggregate valuation of $5,644,043, as compared with 2619 permits and $6,544,927 valuation for the corresponding portion of the same month last year. During the first 21 days of August this year there were 2096 permits with a valuation of $6,651,511. The year to date has shown an aggregate value of $91,758,322 in building permits as compared with $111,240,537 to the same date last year.

Business conditions in the Twelfth Federal Reserve District for the month of August, as reported by Isaac B. Newton, continued at high levels, although seasonally corrected figures of bank debits, a measure of total trade volume, declined slightly during the month. Productive activity increased seasonally and in most industries was above the levels of a year ago. Adequate supplies of credit here continued available at moderate rates of interest. Building construction continued active during August. Value of building permits issued in 20 principal cities of the district again declined, however, both as compared with the previous month and with the same month a year ago. A decrease of 8.4 per cent in the value of permits issued during August as compared with July, 1926, compares with an average increase of 14.4 per cent from July to August during the seven years, 1919-1925, inclusive. In comparison with August, 1925, there was a decrease of 12.3 per cent in the number of permits and 18.2 per cent in the estimated cost of construction involved. The cumulative figures of permits issued during the year-to-date show a decline of 12.1 per cent in number and 13.5 per cent in value for 1926 as compared with 1925. Activity in the lumber industry of the district was greater during August than during July and continued at higher levels than a year ago. Lumber production of mills reporting to four associations exceeded shipments and new orders received by 3.2 per cent and 9.1 per cent, respectively, and was 9.2 per cent larger than production during July. The volume of new orders received was less than shipments, and unfilled orders at the close of the month were less than at its beginning.

PIONEER BUILDER HONORED

In recognition of his work as a general contractor for the past sixty years, A. W. Josselyn has been presented with a life membership card by the Richmond Builders' Exchange. Josselyn was a charter member of the organization, joining at its inception six years ago. He has been a resident of Richmond for twenty-three years. The presentation was made by Vice-President Frank A. Mero in the absence of President E. H. Higgins.

PEACE MEET FRIDAY

Discussion of ways and means of halting strike violence in San Francisco will take place at a meeting of a special citizens' committee with Mayor Rolph in the Mayor's office next Friday morning. More than 100 citizens will be present, according to an announcement by Attorney T. T. C. Gregory, to give further attention to strike problems brought before the preliminary meeting held last week. Data and records of strike difficulties collected since the first session will be presented and those present will also consider the prosecution and disposition of strike cases.

CLAY PRODUCTION

The quantity of clay sold by producers in the United States in 1925, amounted to 4,030,420 short tons, valued at $12,736,632 or $3.16 a ton, according to a statement made public by the Bureau of Mines, Department of Commerce. These figures show an increase of nine per cent in quantity and eleven per cent in value compared with 1924. They represent only clay sold as clay or mined under royalty and do not include the much greater quantity of clay that was burned into clay products by the producers themselves from their own property.

ORIENTAL ELIMINATION IS PLAN OF LUMBERMEN

VICTORIA, B. C.—A delegation of lumbermen which protested to the British Columbia Cabinet against a law that takes effect November 1, announces that it had submitted plans gradually to eliminate Orientals in the industry in this province. The law was designed to accomplish this elimitation by requiring that workers receive the same wage regardless of race. The delegation proposed to the cabinet that Parliament enact a law requiring dismissal of 25 per cent of the Orientals annually for four years,

Los Angeles Plans Ordinance To Regulate School Construction

Although the Los Angeles Board of Education, the Superintendent of Schools, architects, engineers, contractors, and the Building & Safety Commission of Los Angeles are agreed that an ordinance regulating the construction of school buildings is necessary, the various groups have not been able to agree upon the type of ordinance that should be enacted. This fact was brought out at a recent meeting of the Building and Safety Committee of the City Council, composed of Councilmen Allen, Jahn and Shaw.

The proposed ordinance as presented to the committee would require all school buildings of two stories or more in height, to be of Class A construction.

In opposing the ordinance members of the Board of Education contended that they were perfectly willing to construct all buildings of three stories, or more, of type A construction, but to force them to construct two-story buildings of this type would seriously handicap future school building construction in Los Angeles.

C. L. Peck, member of the Board of Education, estimated that should the proposed ordinance, as presented, be passed it would require an additional expense of about 15 per cent. Of the $34,000,000 bond issue voted two years ago, there remains approximately $6,000,000 to be expended for school building construction, for which plans have been prepared.

The school building program provides for a number of elementary and high school buildings, which are to be built from the remaining portion of the funds. Should the ordinance be passed, it is stated by members of the Board, it would be necessary to eliminate about one-fifth of the buildings from the program or ask for another bond issue to cover the additional expense. The latter, they felt, was unwise, as the tax payers are now burdened with assessments.

Mrs. Dorsey, Superintendent of Schools begged the committee to give the proposed ordinance careful consideration bofore acting, as the ordinance would deeply embarrass the Board of Education. She stressed two main points against the ordinance, stating that the buildings now being constructed are safe, and that the necessity of Class A construction would mean unwarranted and unnecessary expense. "In the past twenty years, we have had but twelve fires in school buildings," said Mrs. Dorsey, "averaging a loss of approximately $250 each, and each of these fires was in the old type of building no longer being erected. The children are adequately protected from fire. The adoption of this ordinance would mean that we must either eliminate some of the school buildings promised, or ask a new bond issue."

The committee did not take any action with reference to recommending the proposed ordinance, the matter being held in committee for further study.

R. W. Lumber Interests Seek New Devices To Lessen Costs

"While only one employee in the Redwood lumber industry won a cash prize in the National Waste Prevention Contest ending last spring, for a new and practical milling device, the directors of the California Redwood Association are convinced that there are many more employees in the Redwood industry who have ability and ingenuity to perfect worth-while devices that prevent waste or reduce manufacturing costs and are entitled to some sort of recognition."

This statement was made by Secretary R. F. Hamatt of San Francisco when he announced that the California Redwood Association would hold a Regional Prize Contest for the two best, original devices or methods of operation, that would decrease waste in logging or milling, improve the quality of the lumber, or reduce logging or manufacturing costs, developed by an employee in the Redwood region and applicable to operations peculiar to the lumbering of that great wood.

"In order to encourage the employees of our mills and camps to give their thought to the development of waste prevention and cost reduction ideas," continued Mr. Hammatt, "the California Redwood Association will pay to the originator of the best device of the character and purpose mentioned above a cash prize of $50, and to the employee submitting the second best such entry $25. In addition, successful entrymen are usually in a position to receive additional rewards in the way of royalties from their inventions, and all who join in the competition, whether successful or not, are creating opportunities to promote their own welfare, and to assist the lumber industry in solving its waste problems.

"But what the successful entrant in our contest may receive in cash prizes does not stop here, for this local contest only supplements that held for many years by the National Lumber Manufacturers Association. Since the conditions of our own contest are the same as those of the National Contest, except it is open only to employees in the California Redwood region, and since all entries entered in the local competition will also be acceptable in the National Contest, everyone has a chance to win two cash prizes, one for $25 or $50, and one varying from $1,000 down to $50. In the National competition annual cash prizes amounting to $2000 are paid annually, and it was there that Chief Engineer Percy of the Union Lumber Company at Fort Bragg, won the highest prize of $1,000."

In commenting further on this, Mr. Hammatt emphasized the fact that entries which have won cash prizes in previous National Contests, where over $6500 has been paid to prize winners by the National Lumber Manufacturers Association, did not always involve complicated pieces of equipment, such as the winning device referred to above, but in many instances consisted of simple but effective pieces of equipment or methods of operation which could be developed or constructed and installed by any enterprising man familiar with logging and milling operations; moreover, the conditions were not burdensome for the Contest is held not for the "white-collar" men, but for the mill and woods workers themselves.

Entries, he said, could be forwarded either to the California Redwood Association, 24 California Street, San Francisco, California, or to the National Lumber Manufacturers Association, Transportation Building, Washington, D. C. Both contests will close March 1, 1927.

MOTOR VEHICLE REGISTRATION CONTINUES UPWARD

Motor vehicle registration figures still continue their upward climb, according to the Bureau of Public Roads of the United States Department of Agriculture, which reports 19,697,832 vehicles registered in the first six months of 1926. This is 1,927,141 more vehicles than were registered in the corresponding period of 1925 or an increase of 10.8 per cent. States showing the greatest increase are Florida 76.2 per cent, Michigan 24.3 per cent, Mississippi 21.0 per cent, Arkansas 19.0 per cent and Oklahoma 16.7 per cent. Increases between 14 and 15 per cent are reported by Georgia, Idaho, Nevada and North Dakota. Gross receipts from registration fees, licenses, permits, etc., amounted to $257,779,149 which is nearly all to be used for road purposes. State highway funds were allocated $179,531,469, local road funds $48,387,873, and $20,886,822 is to be used for payments on State and county road bonds.

DREDGING CONTRACT LET

United Dredging Company of Oakland has been awarded contract by the San Francisco Bay Terminals Company for dredging in connection with an artificial harbor to be known as Port San Francisco in San Mateo County near Belmont. The dredging contract will involve an expenditure of approximately $2,500,000. Other improvements contemplated by the terminals concern will involve an outlay of $7,000,000.

EAST BAY DISTRICT HOLDING UP IN BUILDING ACTIVITIES

The East Bay cities are holding their own with the principal cities of the United States in volume of building. A nation-wide survey reveals that in a list of 25 cities reporting the largest totals of building permits for August, the East Bay ranks sixteenth with $3,597,781. This figure is in excess of that of every other Pacific coast city except San Francisco and Los Angeles. It also shows an increase in permits over July of $183,000, reflecting a healthy increase of building activities. California ranked third in volume of permits for August, which were exceeded only by those of Illinois and New York. She state's total was $27,069,140. Pennsylvania, Michigan, Ohio, New Jersey, Massachusetts, Florida, Texas, Connecticut and Minnesota ranked next in the order given.

ARCHITECT SUES FOR FEE

Robert H. Orr, Los Angeles architect, has filed suit at Seattle for $16,448.31, alleged due for his services in connection with the building of the University Christian Church of Seattle. Orr's claim, according to the complaint, is based upon a contract entered into with the church authorities, whereby he was to be paid 6 per cent of the cost of the building. Orr claims that he was engaged to draw the plans and supervise the construction of the building.

Final Draft Of Pacific Coast Uniform Building Code Complete

Definite accomplishment and real progress toward the goal set—the production of a Uniform Building Code especially adapted to the needs of the Pacific Coast, considering every building material at its full value, with a background of competent and unbiased authority and based on the fair police powers of municipalities—that is what the fifth annual meeting of the Pacific Coast Building Officials Conference optimistically reported at the close of a four-day session in San Jose.

Pledges of aid in prosecuting the program for the completion of the code within the coming year poured in on the convention, running the gamut from technical aid pledged by research staffs of the material industries to legal aid vouchsafed by the entire legal section of the League of California Municipalities. There are other reasons why the skies are rosy for the members of the conference, who have devoted long and weary months of earnest labor in the preparation of the printed edition of the final preliminary draft of the code.

One is, that the work has already progressed to a point far in advance of any similar endeavor made in this field and the other is, that the closing days of the conclave brought into being a definite, comprehensive, detailed plan of procedure which will assure completion of the uniform building code within the coming year. The plan was formulated and unanimously adopted by the executive committee at the final session of the convention.

Details of Plan

This plan calls for the continuance of district meetings in the northern, southern and central district. The area included in the scope of the Conference was extended this year to include Idaho, and now totals six Pacific Coast states, including British Columbia.

Advisory Boards

An advisory board is to be formed in each district, and will function within the district on the task of completing the code.

Numerous representative branches of the building industry pledged their financial and personal support for the execution of this plan.

Public Hearings

Public hearings will be held in each district. All branches of the building industry will be requested to voice their suggestions for the improvement of the final preliminary draft of the code at these hearings. The final preliminary draft was formally presented and adopted for further study and revision by the Conference.

The advisory board of each district will be made up of engineers, architects and contractors, through their official organizations and members of the board will be requested to serve as technical experts.

One of the first steps to be taken in fulfilling the plan will be the appointment of a secretary-manager, whose duty will be to co-ordinate the work of the various district committees.

The secretary-manager will also receive and correlate the suggestions and criticisms for code improvement from trade associations, material manufacturers, contractors, engineers and architects, and all other branches of the building industry.

Outline Progress

A complete resume of accomplishments to date in the development of the Uniform Building Code is being prepared, and, together with an outline of the plan for the completion of this work will be submitted to the governing bodies of the various municipalities which have contributed toward the uniform building code work.

Limit Draft Uses

The Conference recommends that the final preliminary draft of the code should be used only in case of urgent necessity and then, with caution.

In its present form the Draft is not a complete document although it represents a compilation of the best data obtainable on building regulation at the present time. It is planned to distribute copies of the final preliminary draft to those actively interested in building activities.

Convention proceedings

The convention opened Monday morning, Sept. 20 under the chairmanship of M. C. Woodruff, Building Inspector of the City of San Jose. The session was held in the main banquet hall of the Montgomery Hotel.

City Councilman Joseph T. Brooks of San Jose welcomed the Conference, figuratively, at least, gixing them the keys to the city.

President R. L. Proctor, former Building Inspector of Seattle, Wash., responded cordially. Proctor took the gavel and presided over all sessions of the conference.

Proctor submitted his report for the year preceding and was followed by J. E. Mackie of Long Beach who submitted the reports of the secretary-treasurer and the executive committee.

A. C. Horner, former secretary-treasure of the Conference and former Building Inspector at Stockton and now of Los Angeles led a series of brief addresses discussing Conference activities. Other speakers were: C. E. Jenkins, vice president of the Conference, Building Inspector of Alhambra; H. E. Plummer, Chief Inspector of Buildings of Portland, Ore., and president of the National Building Officials Conference, and S. P. Koch, Berkeley Building Inspector.

The meeting was then thrown open to discussion from the floor marked by expressions of profound interest in the work of the conference by both new and old members.

The acceptance of F. L. McGrew, Building Inspector of Idaho Falls, as a member, marked the admission of Idaho to the Conference, other member states being California, Washington, British Columbia, Oregon and Arizona.

The chief feature of the report of the secretary-treasurer was the presentation of the Final Preliminary Draft of the proposed Uniform Code of the Conference.

One feature of the Draft was provision for special engineering supervision to be furnished by the owner or contractor under direction of a public official for all large and complicated structures.

Monday Afternoon

L. H. Nishkian of San Francisco, consulting structural engineer, spoke on "Engineering in Building Codes," defining the function of the engineer and urging that the code be made as simple as possible, limiting its requirements to quality of material, permissible stresses, loads and general engineering principles and submitting valuable suggestions for the consideration of the meeting. Nishkian urged that the Code make special requirements for design for structures to meet earthquake and other stresses.

Robert Johnston, District Manager of the Associated Lath Manufacturers' Association, in speaking on "The Relation of the Trade Associations to the Building Official," discussed the vast technical and research organizations of trade associations on which the Conference could draw.

The necessity for special regulations for hotels, apartments and dwellings was discussed by R. W. Kearney, Executive Director of the Commission of Immigration and Housing of the State of California, in a talk on "Housing Regulations."

Architect and Inspector

Ralph Wyckoff, San Jose Architect and Chairman of the Building Code Conference Committee of the San Jose Chamber of Commerce, in concluding a paper on "The Architect and the Building Inspector." urged sympathetic cooperation between the architect and resources and technical knowledge of the other when useful.

A. Bevan, assistant manager of the Red Cedar Shingle Bureau of Seattle, submitted suggestions on the uses of shingles, relating to fire districts, type of nails, thickness of butts and weather exposure. R. F. Hammatt, Manager of the California Redwood Association, also spoke, congratulating the Conference on the progress of the Code. The evening was devoted to special committee sessions and discussion of Code problems.

Tuesday Sessions

A lively discussion of the Final Preliminary Draft occupied both morning and afternoon sessions. A demonstration by the Thermotite Construction Co., manufacturers of concrete building blocks, was conducted by Prof. Moser of Stanford University immediately after luncheon.

R. L. Proctor presided at the Code discussion. Committee meetings again continued far into the night.

C. S. Knight, Manager of the Industrial Department of the California Development Association, was one of the chief speakers of the day and received an ovation when he pledged continued aid toward the completion of the Code, from his organization.

City Attorney H. E. Postlethwaite of San Mateo, chairman of the building codes committee of the attorney's section of the League of California Municipalities, and general secretary for the League, commended the Conference warmly for its work on the Code, pledged the aid of the League, and urged that special attention be given to moulding the Code in such form as

to make it available for use of small cities of the sixth class.

City Attorney Locke of Alameda, head of the legal section of the League of California Municipalities, added his compliments on the Code work and pledged the aid of the attorney's section of the League in studying out legal aspects of the Code and in thrashing out future legal problems.

Adopt by Conference

A feature of Locke's address which was greeted enthusiastically was his statement, "The best legal opinion of California and the Supreme Courts of many States indicate that it is possible to adopt the Conference Code, when complete, by reference, greatly cutting the publication costs, so burdensome to small cities."

Extend Sessions

Because of unexpectedly heavy pressure of business, the business sessions were continued, on unanimous vote, at Wednesday's meeting, for another day and the recreational features were pushed forward for one day.

Experts in the building inspection field spoke at the morning session on problems of special interest. C. J. Hogue of the West Coast Lumber Extension Bureau of Seattle spoke on "Dry Rot." Copies of his study were distributed.

S. P. Koch, Building Inspector of Berkeley, discussed the question of salaries for building inspectors, giving an analysis of salaries paid on this coast and comparing them with wages paid competent workmen.

J. G. Horne, Building Inspector of Tacoma, submitted a body of valuable information on new developments in his paper on "New Materials," attracting especial attention by comment on newly developed stuccos.

H. E. Plummer, Superintendent of Buildings of Portland and president of the National Building Officials Conference, spoke on "Sprinklers and Fire Prevention." This was followed by a discussion from the floor, and a talk by a sprinkler expert of the Pacific Coast Fire Underwriters' Board.

E. W. Bacon, Chief Building Inspector of Phoenix, Ariz., spoke on "Recent Court Decisions on Building Matters" and "Chemical Action on Reinforcing Steel."

Building Inspector C. M. Woodruff of San Jose spoke on "Masonry Requirement and Chimney Construction," urging the necessity for having chimney flues properly lined to reduce the generally prevalent fire hazards resulting from disintegration of chimney linings. Woodruff urged the use of the best grade of fire clay for linings, declaring that many brands of terra cotta—which disintegrates readily under heat—were being marketed under the name of fire clay.

Building Inspector Oscar G. Knecht of San Diego spoke on "Engineering Regulations,' emphasizing certain phases of material selection and use. Knecht also spoke on the inadequacy of the present architects' state license law, and the necessity for a contractors license and bonding law.

Stucco Demonstration

J. Kennedy of the Portland Cement Association conducted a demonstration of stucco in the convention hall illustrating the provisions of the Final Preliminary Draft of the Uniform Building Code, as related to stucco construction. The practicality of the regulations for use of this material as set down by the code was shown, and the fact demonstrated that these regulations ensured a good stucco job. He also demonstrated methods for securing beautiful color combinations and effects in stucco work and graphically illustrated the many possibilities and versatility of stucco.

A trip to Lick Observatory at Mount Hamilton was sandwiched in between the afternoon and evening special sessions and delegates looked over the stars through both the large and small telescopes, being extended the courtesies of the observatory generally.

Thursday Procedure

Phoenix, Arizona, was selected as the 1927 convention city, after spirited discussion from the floor, in which the merits of Tacoma, Stockton, Long Beach, Santa Cruz and Victoria, B. C., were argued. Building Inspector E. W. Bacon extended a rousing invitation for Phoenix and pledged himself personally responsible for the entry of delegates and members from Colorado, New Mexico and Texas at the next session.

Officers Elected

Without a single dissenting vote the convention elected the following officers to guide the conference destinies during the coming year: C. E. Jenkins, Building Inspector of Alhambra, Cal., president; S. P. Koch, Berkeley, Cal., vice president; J. E. Mackie, Long Beach, Cal., secretary-treasurer; J. G. Horne, Tacoma, and E. W. Bacon, Phoenix, executive committeemen for three-year terms; and J. Barf, Victoria, B. C., as executive committeeman for the one-year term created by the election of S. P. Koch as vice president.

Honorary Members

The distinction of being elected honorary members for special and meritorious service was conferred upon A. C. Horner, former secretary-treasurer of the Conference; Robert L. Proctor of Seattle, retiring President of the Conference and R. G. Kimbell of Washington, D. C.

A high light of the day was the presentation of a request from the Florida Building Officials Conference for copies of the Final Preliminary Draft of the Uniform Building Code. The Florida conference, organized after the example and pattern of the Pacific Coast organization, is attempting to prepare a uniform code and asks the aid of the previous investigations and deliberations of the Pacific body.

the building inspector, each to use the

Resolutions Passed

Among the more important resolutions passed were documents for the following purposes: To express sympathy to the Florida hurricane disaster sufferers; to extend sympathy to the bereaved family of the late E. E. Grow, former Building Inspector of Richmond, Cal.; to thank the city of San Jose and assisting host bodies for hospitality; to thank the California Development Association for past aid and future pledges; to thank the retiring president, Robert L. Proctor, for his faithful service; to thank the Portland Cement Association for conference publicity; to thank Lick Observatory for courtesies, and to thank A. C. Horner for his work on the Uniform Code.

Committee Reports

The report of the auditing committee was read and accepted. The report of the executive committee was accepted as read by H. E. Plummer, Portland Superintendent of Building.

Amendments to the by-laws were passed, and rules governing classification of memberships were altered and other changes vital to increased efficiency of operation of the conference were made.

The final executive committee session Thursday afternoon outlined the plan of procedure for the coming year.

Active Participants

Among those taking active part in the Conference were: A. C. Horner, Portland Cement Association, Los Angeles; H. T. Sturtevant, Deputy Building Inspector, Oakland; J. Barf, Building Inspector, Victoria, B. C.; A. J. Hurley, Building and Electrical Inspector, Richmond; H. C. Weisenbarger, Building Inspector, Watsonville; H. B. Arnold Jr., National Lime Association, San Francisco; R. F. Becker, Building Inspector, San Rafael; J. Losekann, Building Inspector, Stockton; R. F. Kimbell, National Lumber Manufacturers' Association, Washington, D. C.; R. F. Hammatt, Manager, California Redwood Association, San Francisco; A. Bevan, Assistant Manager, Red Cedar Shingle Bureau, Seattle; C. L. Baker, Building Inspector, Modesto; J. G. Horne, Building Inspector, Tacoma, Wash.; H. E. Plummer, Building Inspector, Portland; W. S. Decker, Building Inspector, Santa Ana; C. E. Jenkins, Building Inspector, Alhambra, Cal.; S. P. Koch, Chief Building Inspector, Berkeley, Cal.; A. E. Andres, Engineer, National Board of Fire Underwriters, San Francisco; L. H. Nishkian, Structural Engineer, San Francisco; Robert Johnston, District Manager, Associated Metal Lath Manufacturers' Association, San Francisco; A. F. Denton, District Engineer, Portland Cement Association, San Francisco; A. J. Evers, Secretary of the Northern District of California State Board of Architecture, San Francisco; R. W. Kearney, Executive Director of the State Commission of Immigration and Housing, State Building, San Francisco; Ralph Wyckoff, Architect, San Jose; C. W. Northrup, 104 S. Carondelet St., Los Angeles; Carol Aronovici, City Planing Consultant, San Francisco; R. C. Buell, Portland Cement Assn, San Francisco; W. L. Bryson, Celotex Co., San Francisco; H. R. Kingsley, Chicago; V. D. Hedden, Structural Engineer, Long Beach and Santa Barbara; C. E. Keas, Economy Products Corpn., Los Angeles; L. I. Pope, Building Inspector, Santa Barbara; H. A. Postlethwaite, Chairmon of the Building Code Committee of the League of California Municipalities, Oakland; William J. Locke, Executive Secretary of the League of California Municipalities, Alameda; M. E. Armstrong, Building Inspector, Redlands; R. W. Tempest, Common Brick Manufacturers' Association, Los Angeles; C. W. Boynton, Los Angeles Cement Gun Co., Los Angeles; S. F. Butler, Building Inspector, Salinas, Cal.; Robert Greig, Director of the State Housing and Immigration Commission, San Francisco; J. G. Holden, Paraffin Company, San Francisco; Joseph T. Brooks, City Councilman, San Jose; Robert L. Proctor, Conference President, Seattle, Wash.; M. C. Woodruff, Building Inspector, San Jose; Frank B. Marriott, Building Contractors' Association of Santa Clara County, San Jose; Frank Calahan, Coast Electric Co., San Jose; W. Howe, Secretary, San Jose Builders' Exchange, San Jose; J. E. Mackie, Secretary-treasurer of the Conference, and City Building Inspector, Long Beach; George R. Olshausen, Architectural Engineer with the City of Oakland; C. D. Ross, City Engineer, Aberdeen, Wash.; James Anton, Building Inspector, Fresno, Cal.; W. R. Williams, Fire Marshall, Fresno; F. C. Davis, Care Gladding, McBean & Co., San Francisco; M. C. Poulsen, Structural Engineer, Fresno; H. G. Hanse, Building Inspector, San Bernardino, Cal.; Oscar G. Knecht, Building Inspector, San Diego; F. L. McGrew, Building Inspector, Idaho Falls, Idaho;

Mrs. J. E. Fraser, Secretary California Retail Lumbermen's Association, San Francisco; E. W. Cunningham, Consulting Engineer, Los Angeles; W. L. Scott, Building Inspector, Burlingame; W. J. Howard, Secretary Pacific Northwest Brick Manufacturers Association, Seattle; A. D. Pilgrim, National Awning & Tent Association, St. Paul, Minn.; W. H. McLean, Pacific Coast Gas Association, San Jose; E. W. Bacon, Building Inspector, Phoenix, Ariz.; R. H. Hubbard, Building Inspector, Bakersfield; H. C. Vandewater, Superintendent of Buildings, Glendale, Cal.; Perry E. Jones, Plastoid Products Co., Los Angeles; W. H. Griswold, Plastoid Products Co., San Francisco; C. Stowell Smith, California White & Sugar Pine Assn., San Francisco; H. A. Holtgen, Utah Lime & Stone Co., Salt Lake City, Utah; George Finney, Secretary, Gas Furnace Association, Los Angeles; Bert Scott, Scott Heating Co., Los Angeles; J. L. Donnelly, California Brick Co., San Jose; S. S. Gorman, Board of Fire Underwriters of the Pacific, San Francisco; William Mooser, Architect, San Francisco; J. S. Dean, City Architect, Sacramento; C. J. Hogue, West Coast Lumber Trade Extension Bureau, Seattle; A. S. Tideman, General Fireproofing Co., San Francisco; N. P. Wright, Berger Manufacturing Co., San Francisco; F. W. Chrouch, California Reinforcing Steel Institute, San Francisco; William H. Bissell, Wickwire Spencer Steel Co., San Francisco.

"DYCROME" — SURFACE HARDNER FOR CONCRETE FLOORS

Dycrome, a surface treatment for hardening concrete floors and which at the same time produces by chemical reaction, beautiful cloud-like color effects, is announced by the Master Builders Company, Cleveland, Ohio, as the latest addition to the family of Masterbuilt Floors. The Dycrome treatment is applied to any clean cement floor, wall, or surface that is free from stain, oil, grease or foreign matter.

Colors produced include: Flemish Oak, Palmetto Green, Nile Green, Cordovon, Weathered Bronze, Jade, and duotone effects in which these colors are combined. Dycrome is the product of extended reasearch and laboratory and filed tests over a period of years. Complete descriptive data, architectural specifications, and samples are supplied upon request.

EAST BAY ARCHITECTS FORM NEW ORGANIZATION

Desire to design buildings that do not offend the eye and pain the soul but instead add charm and distinction to the city, resulted in the formation of the Society of Alameda County Architects.

The honor award system, which proved beneficial to Los Angeles architectural creations, will be adopted. Prizes will be given for the best examples in the various classes.

Oakland has a national reputation as a city of beautiful buildings, the architects say, and the society hopes to perpetuate this reputation.

John J. Donovan, member of the state board of architecture, is president. Other organizers are: Harris Allen, Charles W. McCall, William G. Corlett, James Narbett, W. E. E. Schirmer, C. I. Warnecke, R. F. Keefer, Howard Schroder, E. G. Bangs, Ralph M. Williams, W. R. Yelland, Chester H. Miller, David Olsen, Hugh White, E. W. Cannon, Andrew Haas, Charles F. Roeth, Albert J. Loubet, Hugh White and W. A. Rich.

Industrial Association Of S. F. Appoints New Wage Board

San Francisco's third Impartial Wage Board to fix wages in the building trades crafts for 1927 is announced by the Industrial Association. Those who constitute the Board are Archbishop E. J. Hanna, Judge Max C. Sloss and Selah Chamberlain.

Preliminary organization of the board for its arduous task of investigations and hearings will be started as soon as possible. The results of these investigations and hearings embodied in the board's wage scale recommendations will probably not be ready for submission before November 1fl

In announcing the creation of the board, President J. W. Mailliard, Jr., of the Industrial Association said, "appointment of the third Impartial Wage Board at this time is simply in fulfillment of the promise of the Industrial Association five years ago that it would set up such a board from time to time to survey conditions in the building trades and recommend wage scales to meet changing conditions and protect the equities of employes, employers and the general public. In no sense is this an arbitration board nor has it any connection with the Industrial Association other than that the machinery of the association was used to create it. Onr association will have no recommendations to make to the board which will function independently of all groups and interests in the building trades. Once the board's decisions are published, however, the Industrial Association will press their adoption in behalf of builders and members of the building trades crafts.

"The character of the men who have accepted service on the board and their lack of affiliation with either labor or employers in the building industry will he sufficient guarantee now, as in the past, to labor, capital and the public of a square deal to all individuals and groups concerned." President Mailliard pointed out that creation of this and the two previous Impartial Wage Boards is part of the San Francisco American Plan in the building trades industries. "Frankly," he said, "we had planned last February to provide for the organization of the board in June but the abortive strike called by the Indianapolis officers of the United Brotherhood of Carpenters against the right of non-union carpenters to work on jobs with union carpenters made postponement advisable until such a time as the strike could not operate as a factor in the board's deliberations. We believe that time has come and that our duty to both union and non-union members of the 57 other crafts in the building trades who have worked loyally under the American Plan for the past five years dictates the creation of the new Impartial Wage Board now."

Asked if he thought the board would recommend any changes in the present wage scales of building trades craftsmen, President Mailliard said, "I haven't the slightest idea and I doubt if the members of the board have at this time. Undoubtedly, as in 1921 and 1922, the board will first devote itself to fact findings and hearings and then on the basis of the conditions disclosed, will make its recommendations." Invitations to appear before the board will, no doubt, be extended to the various unions in the building trades crafts, to other craftsmen, to representatives of the Builders' Exchange, the General Contractors Associoation and the Home Builders Association and to any other interested parties who may want to be heard.

Wages And Hours In Lumber Industry Show Decided Change

How completely the old-time difference between wages East and West has disappeared is shown by a report of the Department of Labor on wages and hours of labor in the lumber industry, as reviewed by the research bureau of the National Lumber Manufacturers. This industry was formerly a typical high-wage industry in the West as compared with the East.

While Oregon mills report the highest average weekly earnings—$27.69. Pennsylvania is next with $26.80. Minnesota and Montana are tied for third place with $26.57, and Washington stands fourth with $26.43. Georgia foots the list with $12.89, negro labor being largely employed in that state. In fact, the wage contrast in the industry is now more between North and South than East and West.

Virginia has the longest work-week, 61.6 hours; while West Virginia, Washington, Idaho and Oregon are bunched together with the shortest work week of approximately 48 hours.

Taking the industry as a whole, wage rates have almost doubled since 1910 and weekly earnings are not far behind, with the average number of hours per week reduced 6 per cent; being now 58.1. Gang sawyers lead in the earnings gain with more than twice as much as in 1907. Head sawyers are the top earners of the industry, so far as this study shows—with an average for the whole country of $50.60 a week and the highest in Florida with $63.54. Common labor's earnings averaged $17.77 a week in 1925.

Employment in the lumber industry appears to be stable. The 279 mills involved in the Labor Department study operated in 1924-25, 273 days. Lack of markets closed them for only five days; holidays, lack of logs, repairs, bad weather and season shutdowns accounted for the rest of the closed days.

Increasing efficiency of the mills is indicated by the fact that the census shows that the value added by manufacture per employe was $1906 in 1919 as against $903 in 1914—but the intervening general price inflation detracts somewhat from the apparent increase. The study itself was confined to typical mills employing about 61,000 men, but references is made to the census showing that the 26,119 sawmills listed in the 1919 census employ 481,000 men, and that their output was rated at $1,387,000,000.

There are so many different occupations in logging camps and the duties of each occupation vary so much from camp to camp and region to region that generalizations are difficult. However, it is apparent that the fellers in some Oregon camps with as high as $1.90 per hour on a piece-rate basis, are the highest paid workers in the camps. Wages around 50 cents to a dollar an hour are common for some occupations in all parts of the country.

Road Show Program Is Announced

Officials of the Second All-Western Road Show have announced the programme for the highway exposition and road-builders' conventions to be held in San Francisco, October 7 to 15, inclusive, under the auspices of highway officials, road-making experts and manufacturers' representatives of eleven western states.

Ten thousand visitors are expected here for the Road Show and numerous road-builders' conclaves to be held in conjunction therewith. This year's exposition will cover approximately one million square feet of space. The show will again be staged on the Marina of the Panama-Pacific 1915 Exposition site.

The programme follows:

Thursday, October 7. Formal opening, Second All-Western Road Show, 10 A. M. Reception and registration of visitors. Band Concert, 2 to 5 P. M.

Friday, October 8. All-Western Road Show, 10 A. M. to 5 P. M. Annual convention of Western Construction Equipment Distributors Association, and gatherings of Western Dealers, 10 A. M., Convention Hall, Marina. Addresses by national, state and county officials. Band concert.

Saturday, October 9. All-Western Road Show, 10 A. M. to 5 P. M. Reception of Groups from Mechanical Classes of Universities and Preparatory Schools, tour of Road Show with special guides. Band concert.

Football. University of California vs. St. Mary's.

Baseball. Pacific Coast League, Los Angeles vs. Missions.

Evening. Road-Builders' Annual Smoker; high jinks, musical comedy revue, boxing, wrestling, vaudeville acts.

Sunday, October 10. All-Western Show, 10 A. M. to 5 P. M.

Educational Day, open to the general public. Band concert.

Addresses by state and civic leaders. Convention tent.

Various meetings and conferences; including Fordson Dealers' convention.

Monday, October 11. All-Western Road Show, 10 A. M. to 5 P. M.

Annual convention. Western Association of State Highway Officials.

Band concert. Golf tournament at Ingleside Links, open to all highway officials, road-builders, contractors, etc.

Tuesday, October 12. All-Western Road Show, 10 A. M. to 5 P. M.

Band concert. Contractors and Engineers' Day.

Evening. Informal Dinner-Dance, Entertainment and Revue, Palace Hotel, commencing 7:30 P. M.

Wednesday, October 13. All-Western Road Show 10 A. M. to 5 P. M.

County Officials' Day, Band Concert.

Thursday, October 14. All-Western Road Show, 10 A. M. to 5 P. M.

Rock Producers' Day. Band concert.

Friday, October 15. All-Western Road Show, 10 A. M. to 5 P. M.

Special events; conferences, demonstrations, etc.

Federal Aid Victory Insures National Progress

Passage by congress of the federal aid appropriation, which was recently approved by the President, means the continuation, unhampered, of the American road building program. Few things will make a greater contribution in the immediate future to the progress, prosperity, and solidarity of the nation. With this encouragement from the federal government the states will carry on construction of that great system of national highways first definitely established under the Highway Act of 1921.

Continuation of this wise policy of state and federal co-operation in highway building, although overwhelmingly supported in congress and generally favored by the people, was not accomplished without a nation-wide campaign by its supporters. The appropriation of $75,000,000 for each of the fiscal years 1928 and 1929 was strenuously opposed in the senate by a small group of eastern men who threatened a filibuster and who, apparently, from a national point of view, have no conception of the importance of highways.

Their rich constituencies are able, they assert, to build their own highways and for those beyond the borders of their states they have no concern. The need and desirability of continuous trunk highways, binding together all sections of the country, bringing the citizenship closer together, and providing, also, for the national defense, means nothing to them.

The West, whose great natural resources contribute annually to the wealth of the East, has ever been alert to the necessity of highway construction as a means of development. Alarmed by the growing hostility of certain eastern interests, the western states, in the face of the cry of sectionalism, began the campaign that rallied the friends of federal aid from every state in the union. Never before in the history of this legislation, reported Congressman Dowell, did an appropriation have such unanimous support as was accorded the 1926 federal aid bill.

The State of California will receive from this appropriation approximately $2,500,000 a year, a small share of what the state undoubtedly will expend for highway during the same period. California eventually could complete her highway system without additional federal aid, but she recognizes that progress in other western states, where great areas are still in federal ownership, would stop almost altogether without the helping hand of the national government; the continuity of the whole highway building program of the country, of far greater importance than actual cash contributions from Washington, would be destroyed.

The California Highway Commission is proud to have had a part in bringing about favorable action by the congress. In the dark hours when some went so far as to predict an overthrow of the federal aid policy by the recently adjourned congress, Chairman Harvey M. Toy, by personal appeal to civic organizations, governors, highway officials, congressmen, and senators, urged united action by the western commonwealths. The warning from the west found willing workers beyond the Rockies, who convinced congress that the great majority of the people of all classes throughout the country desired continuation of federal aid for roads. Eventually there came to its support the American Association of State Highway Officials, American Automobile Association, American Bankers Association, American Farm Bureau Federation, American Federation of Labor, National Grange, American Road Builders Association, National Automobile Chamber of Commerce of the United States.

It is to be hoped that the wisdom of federal aid, or the attitude of the people toward it, will not again be questioned until an improved highway connects every community in every state of the union.—Calif. Highways.

CALIFORNIA LEADS IN QUALITY OF ROADS SAYS ENGINEER

After an automobile trip extending over 10,000 miles from California to the Atlantic coast and return, including in its itinerary twenty-four states, E. E. East, chief engineer for the Automobile Club of Southern California, has returned convinced that California is still leading the Nation in road building. This is particularly true, East emphasises in his report, as regards riding qualities of pavements and the safety features which are now being embodied in the design and construction of State highways.

East said he was surprise to find on some of the principle transcontinental roads in the East grades that required second gear over long distances; sharp blind curves and innumerable sharp, vertical curves which completely obstructed the view of approaching vehicles — construction which would not be countenanced in California.

Bridge construction in many states, he says, is far below the standards of this state. Only on grade separations are the eastern states apparently making faster progress than is California, which, of course, is due here largely to lack of funds.

Quality, in recent years, has been the watchword of construction in California; standards of alignment and grade have been increased far beyond the plans of engineers a few years back; new pavements have a minimum width of twenty feet and vary in thickness from six to nine inches at the edges, with special reinforcing where necessary. Width and strength of bridges also has been increased with the increasing standards of other features of the highway.

ELECTRIC SUPPLY MEN FORM ASSOCIATION

Creation of the National Electrical Manufacturers' Association, consisting of 270 electrical manufacturers, with a grass annual business exceeding a billion and a half dollars, is announced at New York following the merger of the Electric Power Club, Associated Manufacturers of Electrical Supplies and Electrical Manufacturers' Council. Gerard Swope, president of the General Electric Company, was elected president, and J. W. Perry, vice president of the Johns-Manville, Inc., treasurer. The objects of the association include promotion of standardization and appearance in behalf of its members before legislative committees, governmental bureaus and other bodies.

SALARY BOOSTED

J. W. Calkins, city building inspector at Eureka, has been granted an increase in salary from $75 to $125 a month. Under a previous arrangement, the inspector handled the office on a part-time basis. With the increase in salary he will operate on a full-time schedule.

Building News Section

APARTMENTS

ontract Awarded.
APARTMENTS Cost, $17,000
SAN FRANCISCO. SW Dolores and Twenty-eighth Sts.
Three-story and basement frame (6) apartments.
Owner—F. Denucci.
Architect—Chas. F. Strothoff, 2274 15th St., San Francisco.
Contractor—F. W. Varney, 860 Bush St., San Francisco.

IN A fashionable hotel.
IN CENTRAL California.
MRS. SANDY and Sandy Pratt.
WERE ENTERTAINING friends.
CUSTOMERS SOME would say.
(AN ENGINEER and his wife).
LUNCHEON WAS being served.
IT WAS a warm day.
AND ALL ordered iced tea.
WITH PLENTY of sliced lemon.
LUNCHEON (SOME say lunch).
WAS PROGRESSING nicely.
AND CLARENCE Sandy Pratt, President.
OF THE Pratt Building Material Co.
WAS TRYING to be entertaining.
FOR THE gentleman guest.
HAD BOUGHT 14,000 cubic yards.
OF CONCRETE, plastering.
AND BRICK mortar sand.
AND 14,000 cubic yards.
OF PRATT'S clean sand.
IS NO small order.
SO SANDY was talking.
"99 MILES per hour.
FORDS DO your best."
AND SANDY ran out.
OF FUNNY stories.
AND FINALLY told a sad one.
ALTHOUGH SANDY.
DOES NOT believe.
IN TELLING only happy stuff.
BUT THE sad tale.
WAS ALMOST to an end.
WHEN SANDY saw.
MRS. ENGINEER crying.
SO SANDY decided.
IT WAS best.
TO TELL a lie.
AND SAY the story.
WAS NOT so.
BUT MRS. Engineer replied.
THAT SHE was not crying.
ABOUT SANDY'S story.
BUT THAT some lemon juice.
HAD SQUIRTED.
INTO HER eyes.
AND SANDY Pratt, producer.
OF CLEAN sand and rock.
AT SACRAMENTO, Marysville.
PRATTROCK (NEAR Folsom).
PRATTCO (MONTEREY County.)
(CENTRAL OFFICE—San Francisco)
WILL NEVER again.
TELL A sad story.
"I THANK you."

When Sandy went to school down in Tulare, one of the girls cried all the time. If the teacher looked at her, she would cry, and in the school yard every time the boys called her "crybaby," she weeped all the harder. If anyone had put lemon juice in her eyes, she would have cried two weeks past Christmas with all its candy and presents.

gas steam rads. in bungalows, hdwd., tile and cem. flrs., pine trim, mantels, incinerator, elevator, $100,000.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission Street, San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

10736—Hamburg, Germany. A buying and selling agent, well introduced in the Hamburg market and having close connections with the consumers and industries of Germany and neighboring countries, desires to establish connections with San Francisco merchants interested in importing German products and manufacturers, or in exporting to Germany. Will furnish references to interested firms.

10741 — Wagen, Westf., Germany. Manufacturer of steel castings, forged, pressed or swaged pieces of iron, rolled iron and springs, wishes representative in San Francisco.

10742—Dresden, Germany. Manufacturer of high-pressure packing, plates wishes representative in San Francisco.

10743—Kamenz, Saxony, Germany. Manufacturer of fancy pottery wishes connection with importers.

10744—Pforzheim, Germany. Gentleman having extensive commercial and technical knowledge and being well acquainted with the entire iron, engineering, chemical and electrical industries, wishes to establish business connections with San Francisco firms desiring to advance their business possibilities in Europe in the above lines, through sales organization, buying, the treating of financial affairs or other means. He will supply references, and will operate on an emloyment, agent or commission basis.

10748—Switzerland. A Swiss merchant located in one of the important industrial centers of Switzerland desires to represent a San Francisco or California manufacturer. He has good connections and is able to handle a number of lines.

10757—Manunui, New Zealand. A manufacturing chemist wishes to purchase soapmaking machinery, i. e., tabletting machines, moulds, etc. He is also in the market for supplies of resin, coconut and palm oils, and silicate of soda, and would appreciate receiving communications from San Francisco firms in a position to supply the above articles.

10759—Vienna, Austria. Firm, well established in Vienna, wishes to represent American manufacturers or exporters of office equipment of all kinds. Representative of firm now in San Francisco.

10760—Ahmedabad, India. Firm is desirous of securing the sole agency for India of an American manufacturer of Portland cement. Solicits samples of cement with terms of agency from firms interested in representation in India.

10762—Matanzas, Cuba. Firm having excellent business connections in Matanzas desires to represent San Francisco manufacturers or exporters wishing to market their products in that section of Cuba.

10763—Havana, Cuba. Commission merchant with 18 years' experience wishes to secure representation of California firms interested in exporting to Cuba, Haiti, Santo Domingo, Jamaica, and Porto Rico.

10766—Guatemala. Guatemalan firm wishes to represent California concerns handling chemicals, plumbing supplies, and any other lines suited to the Guatemalan market. Representative is now in San Francisco and will remain here about three months.

10767—Vancouver, B. C.. Firm of importers, exporters and manufacturers' agents, having salesmen covering British Columbia, are open to handle several lines in addition to that of the salt works, whose product they now sell. They would appreciate hearing from interested manufacturers and exporters.

D-2208—Hollywood, Calif. Firm of manufacturers' agents, having permanent headquarters in Hollywood, are desirous of getting in touch with San Francisco manufacturers for the purpose of securing the representation of their lines for Southern California.

EMPLOYMENT ON INCREASE

The September number of the California labor market bulletin issued by Walter G. Mathewson, commissioner of the bureau of labor statistics, shows an increase of 3 per cent in the number of persons employed in California industries during last month, compared with the corresponding month in 1926.

The labor market bulletin is based upon employment and payroll data secured from 670 representative California manufacturing establishments. Those establishments employed last month a total of 162,958 workers, with a total weekly payroll of $4,623,702.

TO ESTABLISH PLANT

Concrete Pressure Pipe & Construction Company will expend $20,000 in establishing a plant near the Southern Pacific right-of-way through Gilroy. The plant will manufacture pipe for all purposes, specializing, however, in concrete bell-end and irrigation pipe. Geo. W. Eastman and Harry C. Sholten are the owners.

BUILDING ECONOMY SUBJECT OF TALK TODAY

Standardization and elimination of waste in buildings will be discussed by Ray W. Hudson, chief of the division of Simplified Practice, United States Department of Commerce, at a meeting this morning at 10:30 o'clock in Room 237, San Francisco Chamber of Commerce.

Financial, commercial and industrial executives are invited to the meeting, which has been arranged by the California Development Association as a part of a series of talks to be given by Hudson throughout the state.

Hudson will urge the adoption and use of standards in the elimination of waste, promotion of safety and for the increase of business and industrial efficiency.

Official Proposals

NOTICE TO BIDDERS

(City Hall Painting—South San Francisco)

Sealed proposals will be received by the Board of Trustees of the City of South San Francisco **until 7:30 o'clock P. M. on Monday, the 18th day of October, 1926,** for doing the following work in the City of South San Francisco, County of San Mateo, State of California:

Painting with two (2) coats of paint all exterior wood work and metal work, which have been heretofore painted on the City Hall of said City of South San Francisco, and furnishing all labor and material therefor.

All paint used in said work shall be of the best quality of white lead and linseed oil, and shall be colored with coloring matter to produce the colors now existing where such painting is to be done.

The successful bidder shall, within ten (10) days after the award, enter into a contract with the City of South San Francisco for the performance of the work to be done under such award.

All proposals must be accompanied with a certified check upon a solvent bank of the State of California, payable to the City of South San Francisco, in an amount not less than ten (10) per cent of the aggragate of the bid, upon the condition that if the proposals be accepted and the contract awarded, and of the bidder shall fail and neglect to execute the contract and give the bonds required, the sum mentioned in said check shall be liquidated damages for such failure and neglect, and shall be forfeited to and paid into the treasury of the City of South San Francisco.

The bidder to whom is awarded a contract will be required to execute a bond for the faithful performance of his work in an amount equal to twenty-five (25) per cent of the amount of his undertaking, with at least two (2) responsible sureties in the full amount of the bid each; and will also be required, before entering upon the work, to furnish a good and sufficient bond as required by an act of the Legislature of the State or California, approved May 10, 1919, entitled "An act to secure the claims of materialmen, mechanics, or laborers employed by contractors upon state, municipal or other public work," and will also be required to exhibit to said Board of Trustees a policy of insurance showing that said bidder is insured against loss through accident or negligence, in such a way as to satisfactorily protect said City of South San Francisco under the provisions of the "Workmen's Compensation, Insurance and Safety Act of the State of California."

The contract must be entered into in compliance with and subject to the conditions imposed by Section 653c of the Penal Code of the State of California.

Sealed proposals will be delivered to the City Clerk on or before 7:30 o'clock o'clock P. M., on Monday, the 18th day of October, 1926.

All sealed proposals or bids will be opened by said Board of Trustees in public session on Monday, the 18th day of October, 1926,at 7:30 o'clock P. M., in the Council Chamber of said Board.

The Board of Trustees hereby reserves the right to reject any or all bids.

By order of the Board of Trustees of the City of South San Francisco, dated September 18, 1926.

DANIEL McSWEENEY,
City Clerk.

NOTICE TO BIDDERS

(Stockton—North Sewage Disposal Plant)

NOTICE IS HEREBY GIVEN, that sealed proposals are invited to be delivered at the office of the City Clerk of the City of Stockton in the annex to "The Stockton," (or if said office shall have been removed to the new City Hall, then at the last mentioned place) **up to and not later than 5:00 o'clock P. M., of the 4th day of October, 1926,** for the furnishing of a new pump, valves, pipe, fittings, extension shaft, coupling and head bearing plate for the North Sewage Disposal Plant of the City of Stockton, according to plans and specifications therefor, on file in the office of said City Clerk, to which reference is hereby made. All proposals or bids so received will be publicly opened by the City Clerk at 8 o'clock P. M., of said day in the Council Chambers. All bids shall be made upon printed forms prepared and furnished by the city.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate, 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

The contract for the performance of said work and the furnishing of said materials shall be executed within ten (10) days after the award thereof shall have become final, and the performance thereof shall be commenced within ten (10) days after the execution of the contract for the same, and completed within forty-five (45) days thereafter.

The successful bidder is required to give a bond for the faithful performance of the contract and also a labor and material bond, both in the sum of fifty per cent of the contract price.

All proposals shall be accompanied by a check certified by a responsible bank, payable to the order of the **City Auditor,** or by coin of the United States, for an amount not less than ten per cent (10%) of the aggregate of the proposal.

In the event that the person, firm or corporation to whom said contract may be awarded, fails, neglects or refuses to enter into a contract to perform said work and furnish said materials as hereinabove provided, then the certified check and the amount therein mentioned, or the coin, accompanying the bid of said person, firm or corporation, shall be declared to be forfeited to said city as liquidated damages.

Said contract will be let to the lowest responsible bidder, provided, however, the Council may reject ,any and all bids, and in that event, or in the event that no bids are made, may re-advertise for bids, or provide for the work to be done by the city, or for the supplies to be purchased in the open market, but in no case shall supplies be bought at a price as high as the lowest bid received from a responsible bidder.

Dated: September 21st, 1926.

A. L. BANKS,
City Clerk of the City of Stockton.

Side walls stippled.

Said bids to be received **up to 10 o'clock A. M., October 4, 1926.**

Each bidder must submit a proposal to the Clerk of the Board of Supervisors on standard forms, which may be obtained from the Office of the County Engineer, said proposal to be accompanied by a certified check of 10 per cent of the amount of the bid submitted, check to be made payabale to the Chairman of the Sacramento County Board of Supervisors.

Plans and specifications are on file in the Office of the County Engineer to which all prospective bidders are hereto referred.

The Board of Suprevisors reserves the right to reject any and all bids received as the public good may require.

By order of the Board of Supervisors, Sacramento County, dated September 20, 1926.

HARRY W. HALL,
Clerk and Ex-Officio Clerk of the Board of Supervisors.
By William Hickey, Deputy Clerk.

NOTICE TO BIDDERS

(Water Cooling Apparatus)

The Board of Trustees of the City of Coalinga desire bids as per the following specifications: To furnish an electric refrigeration apparatus consisting of a compressor and cooling unit of sufficient size to maintain a continuous flow of water for the City's Public Drinking Fountain (situated on West Elm St.), at a temperature of 50 degrees Fahrenheit or lower if desired. The cooling unit is to be installed in the City's present insulated ice box and the compressor completely enclosed is to be attached thereto, conveniently located for inspection. A sketch or diagram is to accompany the bid showing and stating necessary alterations of the present ice box. The bid shall include the price of alteration of the box, prepaid freight, and charges for installation and servicing for one year, also the guarantee for proper and complete operation of said apparatus.

(Signed) L. A. BUCHANAN,
City Engineer.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of **the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on October 25, 1926,** at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County, bridge across Eaton Canyon Wash on Foothill Boulevard at easterly city limits of Pasadena (VII-L.A-9-E), consisting of two 54 foot reinforced concrete spans.

San Diego County, a reinforced concrete girder bridge, 30 feet wide,

across Las Flores Creek near Las Flores (VII-SD-2-C), consisting of two 45'-8" spans and two 28'-4" spans on concrete piers and abutments or constructing a new substructure and moving existing superstructure of two spans approximately 46 feet long and two spans approximately 23 feet long. Approaches to be graded and paved with concrete.

Plans may be seen, and froms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission
R. M. MORTON,

Dated: September 27, 1926 .

NOTICE TO CONTRACTORS

(Technical School Addition)

Pursuant to an order of the Board of Education of the Fresno City High School District of the County of Fresno, duly made and entered in its minutes this 23rd day of September, 1926, public notice is hereby given that said Board will receive up to **5 o'clock P. M. on the 25th day of October, 1926,** at the office of the said Board in the Hawthorne School Building, 2425 Fresno Street, in Fresno, California, sealed proposals for the furnishing of labor and materials for the construction of an addition to the Edison Technical School Building as per plans prepared by Pelletier, Shaw & Franklin, Architects, Rowell Building, Fresno, California.

Segregated bids will be received for this addition.

Reference is hereby made to "General Information to Bidders," Building Form No. 6, for further particulars regarding all bids.

Plans and specifications, together with forms for submitting all bids, and further details regarding any and all bids may be obtained from the undersigned Secretary of said Board Education at the office of said Board above designated.

A bidder's surety bond or certified check equal to at least 10 per cent of the amount of the bid submitted must accompany all proposals.

The Board of Education of said School District reserves the right to reject any and all bids.

By order of BOARD OF EDUCATION, FRESNO CITY HIGH SCHOOL DISTRICT.

L. L. SMITH, Secretary.

NOTICE TO BIDDERS

(Del Paso Heights School District)

The Board of Trustees of the Del Paso Heights School District, County of Sacramento, State of California, will receive sealed proposals **at or before 7:30 P. M., Monday, October 11th, 1926,** at the Del Paso Heights School House, Sacramento County, California, at which time and place bids will be opened and read in public for building the labor and material for erecting and completing a proposed school building, in accordance with plans and specifications prepared by John W. Woolett, architect, 76 Mull Building, Sacramento, California.

Bids will be received separately for the following classes of work:

1. For the entire structure.
2. A combination bid or divisions of the work.
3. Alternate bids.

All bids must be accompanied by a check certified to by some responsible bank for 10 per cent or more of the amount of the proposal. In case this proposal is accepted, in whole or in part, and the bidder fails to enter into contract for the performance of said work or give an acceptable surety bond in the sum of 50 per cent of the amount of the contract to secure the faithful performance thereof, within fifteen days after such acceptance, then this certified check will be forfeited and retained by the Board of Trustees of the Del Paso Heights School District, as liquidated damages for failure to carry out this proposal. Such contract and bond shall be in such form and of such contents as shall be satisfactory to the Board of Trustees of the Del Paso Heights School District.

All bids to be made out on forms furnished by an Architect.

Plans and specifications may be obtained from John W. Woollett, architect, 76 Mull Building, Sacramento, California.

A deposit of $15 will be required from all contractors receiving plans, said deposit to be refunded when plans and specifications are returned in good condition.

The Board of Trustees of the Del Paso Heights School District reserves the right to reject any and all bids and to waive any informality in any bids received.

By order of the Board of Trustees of the Del Paso Heights School District, Sacramento County, California.

By GEORGE TROUGHTON, Clerk.
418 J. St., Sacramento, Calif.

NOTICE TO CONTRACTORS AND BUILDERS

(Manual Training Building—Santa Barbara)

The Board of Education of the Santa Barbara High School District, County of Santa Barbara, California, will receive sealed bids up to **5 P. M., October 11, 1926,** at the office of the Board of Education, 1235 Chapala Street, Santa Barbara, at which time and place said bids will be opened and read in public for furnishing all the required labor and material for the construction, erection and completion of a manual training building to be located facing Nopal Street on the High School site, in accordance with revised plans and specifications prepared therefor by W. H. Weeks, Architect. Bids will be received separately for each kind of work as follows:

1. General.
2. Plumbing.
3. Electric.

A cashier's or certified check or bidder's bond issued by a Surety Company accredited by the Board of Education for an amount not less than ten per cent of the amount of the bid, shall accompany each proposal, drawn payable to the Board of Education, as a guarantee that the bidder will within five days after being informed of the acceptance of his bid enter into a contract with said Board in accordance with said bid and that he will furnish the necessary surety bonds; said check or bond to be forfeited to the said Board should the bidder fail to execute contract and furnish bond as above mentioned.

All bids must be made out in forms furnished by the architect. Plans and specifications for all the above work may be seen at the office of the architect, W. H. Weeks, 369 Pine Street, San Francisco, or at the office of the Board of Education, 1235 Chapala Street, Santa Barbara. A limited number of plans will be loaned out to bidders upon deposit of $25.00 for each set, said deposit to be refunded to bidder when plans and specifications are returned in good condition.

Said Board of Education reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Education of the Santa Barbara High School District, County of Santa Barbara, California.

E. CARLOTTA DENGATE,
Clerk.
September 15, 1926.

NOTICE TO CONTRACTORS

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

TIMPIE
HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately $70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco
Federal Reserve Bank
Pacific Telephone and Telegraph Building
Central Bank, Oakland
Oakland Savings Bank
New Subway Terminal Building, Los Angeles

Sold by most progressive dealers throughout Pacific Coast.

Every page will interest YOU!

EVERY page of the Bulletin on COASTEEL Standard Buildings is worth the time of the man who has a one-story building to buy, build or use. These buildings are economical, they are permanent and they can be shipped and erected in a remarkably short time after being ordered. COASTEEL Buildings are **galvanized from floor to roof peak** and are carried in stock in San Francisco.

The Bulletin is a personally-conducted tour through the design, make-up and manufacture of COASTEEL Buildings. If you have a one-story building in mind, you can get helpful ideas from each page. If you are right up to the point of getting a building, the Bulletin will make final action an easy matter.

A request on your business stationery will bring a copy of the Bulletin in the return mail.

LEGAL NOTICE

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

OF BUILDING AND ENGINEERING NEWS, published weekly at San Francisco, Calif., for October 1, 1926.

State of California, City and County of San Francisco, ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared E. J. Cardinal and J. I. Stark, who, having been duly sworn according to law, deposes and says that they are the Publishers and Owners of the Building and Engineering News, and that the following is, to the best of their knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 411, Postal Laws and Regulations, printed on the reverse side of this form, to-wit:

1 That the names and addresses of the publisher, editor, managing editor, and business managers are:

Publisher, E. J. Cardinal, 665 19th Ave., San Francisco, and J. I. Stark, 1250 Francisco St., San Francisco.

Editor, E. J. Cardinal, 665 9th Ave., San Francisco.

Managing Editor, J. P. Farrell, 818 Mission St., San Francisco.

Business Managers, E. J. Cardinal and J. I. Stark.

2. That the owners are:

E. J. Cardinal, 665 19th Ave., San Francisco.

J. I. Stark, 1250 Francisco St., San Francisco.

(As Mercury Press) a copartnership, 818 Mission St., San Francisco.

3. That the known bondholders, mortgages, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: None.

E. J. CARDINAL AND J. I. STARK, Publishers.

Sworn to and subscribed before me this 30th day of September, 1926.

(SEAL) CHALMER MUNDAY,
Notary Public in and for the City and County of San Francisco.
(My commission expires Oct. 17, 1929)

DAM CONSTRUCTION APPROVED

Final approval of plans and specifications for the Coolidge dam, on the San Carlos Indian reclamation project in Arizona, and authorization of advertisements for bids for its construction has been announced by the Interior Department.

As soon as the plans and specifications have been printed the date for receiving bids will be announced through the district office of the supervising engineer of Indian Irrigation at Los Angeles. After receipt of bids the contract will then be let and construction commenced.

Plans for the dam provide a "multiple dome" type. To a considerable extent the specifications are based on the American Falls dam on the Minidoka irrigation project in Idaho and the Gibson dam on the Sun river irrigation project in Montana being constructed by the reclamation bureau of the Interior Department. The specifications have already been approved by a board of consulting engineers.

The Coolidge dam is the principal irrigation structure on the San Carlos project, which is designed to irrigate over 100,000 acres of land in the Gila river valley in Arizona, 50,000 of which will include lands belonging to the Indians in the Gila River Indian Reservation. The remaining area will comprise lands in private ownership belonging to white settlers and owners.

The construction of the dam was authorized by Congress at a cost not exceeding $5,500,000.

U. OF C. ENGINEERS STUDY ARCH DAMS

Reservoirs some day may be built in many places where it is not economically feasible to build them at the present time, as a result of the research activities of sixteen leading engineers appointed by the Engineering Foundation in 1922 to carry on an investigation of arch dam construction. Two University of California men, Professor R. E. Davis and Professor C. Derleth, Jr., of the College of Civil Engineering are in charge of important phases of the investigation, and under their direction the laboratory phase of the project is being conducted.

With the aid of the United States Bureau of Standards, the Committee on Arch Dam Construction erected the Stevenson Creek Test Dam on the San Joaquin River, about sixty miles from Fresno. To supplement the intensive field study there, it was necessary to carry on a great deal of laboratory work.

This laboratory work is being conducted entirely in the University of California Testing Laboratory under the direction of Professor Davis. The problems attacked were so new that special apparatus had to be constructed before the work could be started. This has been done, however, and the work has been proceeding since 1924.

In addition to funds for general investigation donated by the Engineering Foundation there have been numerous donations made by engineering societies, scientific societies, states, municipalities and private corporations. At the present time the engineers have expended $120,000 on the investigation.

The Portland Cement Association has just contributed $3000 to the project, to be used under the direction of Professor Davis in the Materials Testing Laboratory at the University of California.

Although a preliminary report on the laboratory work has been made by Professor Davis, a number of experiments requiring time to complete are still pending. It is expected that the findings of the Committee on Arch Dam construction will be of invaluable aid, not only to engineers but to all interested in irrigation and water and power supplies, as they give promise of supplying a cheaper method of dam construction.

LUMBERMEN OF NORTHWEST PLAN MERGER

The most important move to stabilize the lumber industry of the Northwest came to afocus Sept. 24 when members of an organization committee, who are leaders in the industry, prepared to leave Portland, Ore., for Kansas City to confer with representatives of several New York banks.

While details of the move were not made public it is understood that lumber and timber property valued at approximately $400,000,000 in Oregon, Washington and British Columbia are to be brought together in a co-operative organization for more economical production and marketing.

The plan, it is pointed out, does not involve anything that might be construed as restraint of trade, since less than 50 per cent of the timber holdings of the Northwest are represented.

It was learned, however, that an annual production of about 3,000,000,000 board feet of lumber will be coordinated and that the business will be placed on a firm financial foundation.

The plan involves economy in woods operations, control of production in accordance with market demands, greater efficiency and co-ordination in mill operations, and co-ordination in the shipping of lumber by rail and by water.

C. D. Johnson of the Pacific Spruce Corporation, is chairman of the organization committee, which includes Everett Griggs, Tacoma; James Tyson, San Francisco; Ray Danaher, Detroit, and Charles S. Keith, Kansas City, head of the Oregon-American Lumber Co.

31,000 FEET OF TIMBER IN ONE SUGAR PINE

Estimated to contain 31,080 feet of first-grade lumber, one of most perfect sugar pine trees yet cut rolled into the Tuolumne mill of the Pickering Lumber Company on nine flat cars. Measuring nine feet in diameter at the butt, the tree was 226 feet tall. The first limb branched out 102 feet from the ground. The tree was cut into twenty-foot lengths for hauling in from Camp 34.

Simple Business Law Every Contractor Should Understand

My experience with contractors has been that they are so engrossed in their work that no consideration is given the legal phases effecting their rights and the duties of administration are often most sadly neglected. In fact, the way some contractors conduct their business reminds me a great deal of the little girl to whom the preacher said: "You are a bright girl, do you know any passages from the Bible?" She said: "Sure I do," whereupon the preacher asked her to quote some and she replied: "The Lord is my Shepherd, and I should worry." The average contractor like other business men seems to be interested only in getting business and as to the rest he assumes the attitude that Divine Providence will enable him to get his money and protect him generally.

But this is not the case as many of you have probably found from experience, and it is my purpose to tell you in a rambling way of some of the important legal phases affecting your business.

Partnerships

Consider yourselves as about to enter into business with one or two other men.

The first thing that naturally suggests itself is the type of organization under which the business is to be operated. There are only two which are at all practical, a partnership or a corporation. Assuming that we have determined upon the partnership form of organization, the first thing to be done is to have partnership papers drawn. They need not be elaborate but should specify the names of the partners, the place of conducting business, the kind of business that is to be engaged in, the proportion in which the respective parties are to share profits or bear losses, for if no mention is made profits and losses are borne in the same ratio. This becomes important where a man is taken into partnership for a particular purpose and does not share equally in the business. For example, John Doe takes John Smith into partnership with him because John Smith is skilled in the installation of heating systems, whereas the other partner is more efficient at executive and general work and has advanced most of the money. In this case he would not care to have John Smith share equally in the profits. If any question arose as to the duties and responsibilities of John Smith there would always be written evidence that could be referred to. It is also important in the case of the death of a partner where the heirs may question the interest the decedent had and many times could cause great inconvenience if no written evidence could be produced.

Fictitious Names

The next thing that must be decided is the firm name. If the names of both partners, or if there be more, than all of the partners, are evidenced in the firm name so that there can be no mistake then nothing need be done in this regard but if the name is fictitious then the law requires that a certificate be filed in the office of the County Recorder stating the full names and addresses of the partners and the name under which they are doing business and this must be published in a newspaper of general circulation. Unless this be done no suits can be brought by the copartnership or any partner or even by an assignee of the copartnership. In order to clarify this explanation I will give you an illustration. If the names be John Smith and Henry Jones there can be no mistake, for the names are clearly indicated and no certificate would have to be filed but if the name be Smith & Sons, or The Plumbers' Supply Company, all the names are not indicated and such recordation would have to be made. In view of the fact that the cost is nominal it is advisable to file such a certificate in every case and then no question can be raised. The same rule would apply in the case of an individual doing business under a fictitious name. For exmaple, if John Smith is doing business under the name of Plumbers' Supply Company he would have to file his certificate stating that he is an individual doing business under the firm name and style of Plumbers' Supply Company. If this is not done and John Smith wishes to sue on a contract he cannot sue in his own name because the defendant could set up that the contract was made with the Plumbers' Supply Company and if the suit were brought in the name of the Plumbers' Supply Company the defendant could plead that they had not filed their certificate and therefore had no rights before the court.

Another advantage of recording the firm name of a copartnership, is that the name is protected in the county where the same is filed and no one else can use that particular name.

Being extracts from an address of Mr. Jefferson E. Peyser, Attorney for the Contractors' Service Bureau, before the California Sanitation Development League and the Master Plumbers and Heating Contractors of San Francisco. Mr. Peyser in his talk discussed lien laws, credits and collections, partnerships, corporations and other legal phases of the construction business.

Many Disadvantages In Partnerships

A partnership is no doubt the most common form of business organization and it is satisfactory for a small business, but there are so many disadvantages that if the business entails heavy financial responsibilities it is usually not advisable.

In the first place each partner in a partnership is responsible for the entire partnership liabilities. If a partner owes a thousand dollars the creditors, if they choose, can proceed against one of the partners in preference to both. Generally, also every partner is an agent for the partnership and can incur liabilities that the other partners or partner may not have consented to, and yet they are all responsible. These, however, are not vital matters unless one or more of the partners are dishonest or unless one partner is financially responsible and the others are not. The greatest disadvantage to the partnership form of organization is that there is no permanency of organization. One of the greatest assets of any buisness is its name and good will and it will be readily appreciated that if this may be impaired at any time years of hard work can be quickly destroyed. In addition to the fact that a partnership may be terminated at the will of any partner or by his withdrawal, it is automatically dissolved upon the death of any one of the partners. This immediately necessitates an accounting and court procedure unless those in charges of the estate of the deceased partner are congenial, and much time and money are lost unnecessarily in addition to necessitating a complete re-organization.

Corporation Form Favorable

The corporation form of conducting business on the other hand insures stability and permanency. Contrary to a very popular belief this form is just as adaptable to a small business as to a large one. It is true that there is a larger initial expense but this is greatly offset by the innumerable advantages obtained. Among the important benefits derived from such an organization is the fact that the name of the business is protected throughout the state instead of only in the county, as is the case in a partnership. Furthermore the organization is not affected by the withdrawal or death of a stockholder. In the matter of leases it is also important to note that even though a lease be not assignable by its terms, if it is made out to the corporation there can be a complete change of members without terminating the lease. For example, a non-assignable lease is made out to John Doe Corporation consisting of A. B. & C. If A. B. & C. sell their shares to X. Y. & Z. the lease is not terminated. This becomes very important in the sale of a business where the lease is a valuable asset by virtue of the fact that the location is important and good will has been established.

Stockholders Liable

But even greater than these advantages is the limited liability of the stockholders of a corporation. Each stockholder is only liable in the same proportion that the amount of stock owned by him at the time the liability is incurred bears to the whole of the subscribed capital stock. In other words, if I own ten shares of stock in in a corporation having a total of one hundred shares actually subscribed for, I am only personally liable for one-tenth of the obligations of the company incurred while I am a stockholder. And so, if the corporation owes one thousand dollars I am only responsible for one hundred dollars.

In the matter of income tax returns corporation form of management has also its decided advantages but time does not permit a discussion in view of the fact that it is a very intricate and technical one.

Agreements In Writing

Having our organization determined upon, our mythical firm will now proceed to do business, and the first problem that presents itself is the matter of contracts. In this connection I

cannot urge upon you too strongly the necessity of having all agreements for work or materials furnished in writing. First of all our law requires that contracts for an amount over Two Hundred Dollars must be in writing in order to be enforced and if they are not no recourse is possible for a breach of contract and secondly a written contract eliminates the uncertainty and the possibility of disputes as to terms and conditions. Assuming that we do a general business we will consider contracts under two classifications, first, construction contracts, and secondly those for repair and alteration. It is not necessary that the contract be such an auspicious document containing whereases and wherefores such as would frighten a prospective customer. In the case of construction contracts there should be a simple and concise statement of the parties to the agreement, the place where the work is to be done and the nature of the work, price agreed upon and the terms and conditions of payment. It should provide that in the case of default in the payment of any installment the contractor has a right to stop work and then there should be included the usual provisions for insurance and indemnity and a clause for protection in case of unforseen damage or destruction. Such an agreement will suffice in any case and affords ample protection to the contractor.

Oral Agreement Cause For Dispute

I have learned from my experience that the greatest difficulty encountered is in repair and alteration work for usually these agreements are oral and disputes subsequently arise. It is natural that it should be so for the greatest part of the charge in this work is made for time and labor. It is a strange fact that people refuse or dislike to pay for anything that they cannot see. Attorneys experience this every day. A client will come into the office and ask advice as to a matter involving thousands of dollars and as often happens, contrary to popular belief, by following that advice, the client saves a great deal of money. Yet when a charge is made he cannot see why he should pay, forgetting that attorneys stock and trade is their time and information. Whereas, the same person would not hesitate to pay a large fee if it were necessary to draw papers. And so where time and labor is involved a great majority feel that there should be no charge or at least a very small one. Whereas if it were necessary to bring out some pipe or other material no objection would be made.

In this repair work a simple contract would be very good and is advisable, but many times it is impossible to determine the exact cost of a job and also to specify just what is to be done. I always advise in such cases that an order blank be used and after the work is completed indicate the amount of time put in and the nature of the work done and then have the owner or tenant sign just as one would sign for the receipt of a package. Such a writing is just as binding as a ten page contract, and in the event of dispute is conclusive proof as to the work done and time put in.

Credit Allowance

Having obtained the contract the next matter for consideration in our business is determining the amount of credit to be give to our prospective customer. The credit problem is of ever increasing importance owing to the fact that promptness of payment is an essential to the profitable operation of a contractor's business. An average sized contractor cannot afford to finance very many jobs and less now than before because the greatest expenditure is for labor which must be paid for weekly. Statistics show that the cost of labor has increased greatly while the cost of materials has been on the decline. In the twelve months from July 1925 to July 1926 alone, the cost of labor has jumped six per cent. Futhermore, if collection must be enforced the cost of such collection increases the cost of doing business and the profits are accordingly diminished.

I would advise that before any great amount of credit is extended you determine the finnncial responsibility of the party and this applies in construction work even though the lien right of which I shall speak in a few moments, exists. In the sale of materials and in repair and alteration work it is even more essential for the property is probably already encumbered and the lien right is not very valuable.

No credit report can be accurate to the point of positiveness for they are all obtained on general statements of persons who are acquainted with the applicant for credit and their reports depend entirely upon their experience which may or may not be a true indication of the general financial condition of the applicant. It is therefore difficult to lay down any hard and fast rule as to the extent one should go in investigating. As a general rule a search should be made to see how much property the party owns and to what extent it is encumbered. If possible find out if the party has a bank account and then a general report as to the manner in which he has been meeting his obligations.

Another important factor to remember is not to give credit right up to the hilt. Do not encourage and wherever possible avoid long time accounts, for a man may be financially responsible today and through some unavoidable incident and without fault on his part may be irresponsible tomorrow.

Right and Enforcement of Claims

Our work is now completed and we are confronted with the most important task of all—the protection of our rights and the enforcement of our claim. We are very fortunate in having a law which as you know protects mechanics and material men who have performed labor or furnished material by giving them a lien on the property on which the work is performed, or the materials are furnished, and the courts have been very liberal in their construction but on exercising them particular care must be taken to conform strictly to provisions of the Code. Here the courts have no power and therefore this machinery must be set into operation within the time specified and in the manner therein set forth. We find that this branch of law is very technical yet not to such an extent as to hinder protection. A general contractor has sixty days after the completion of his contract and every other person performing labor or furnishing materials has thirty days after the cessation of such work or furnishing of materials and until thirty days after the completion of the work to file his lien. For example, a contractor finishes his contract on September 1st. He has sixty days from that date in which to file his lien. Assuming that a sub-contractor finishes his work on September 1st, he may file his claim of lien any time after that date and until thirty days after the completion of the work, which is construed to mean occupation by the owner, cessation of labor for thirty days, or filing the notice of completion by the owner. If the owner fails to file his notice of completion within ten days after the work has been finished or within ten days after occupancy on his part, then all claimants have ninety days from the actual completion of the work within which to file his lien. The claim of lien must be filed in the office of the County Recorder and must state the name of the owner or reputed owner, if known, the name of the general contractor, if the claimant be a sub-contractor, the date when the contract was entered into and when completed, if notice of completion has been filed, the date thereof and a statement that thirty days have not elapsed since the filing of such notice. There must also be a statement of the price, if any, to be agreed upon and a statement of the claim after deducting all just credits and offsets. This claim must be verified by oath of the claimant or some other person on his behalf. There must be also a description of the property where the work was done sufficent for identification, but in this connection I would avise that the the legal description be given wherever possible.

Results of Liens

This lien when properly filed becomes a cloud upon the title to the property and remains so far a period of ninety days within which if the amount of the claim is not paid a suit must be bronght to foreclose the lien. If not, the lien expires and the rights thereunder are lost. It is also important to remember that credit cannot be extended before the filing of the lien so as to extend the time within which the lien is to be filed. It must be filed within thirty and sixty day periods I have mentioned. After the lien is filed, however, credit may be extended and this prolongs the time within which suit may be brought. But no lien continues in force for a longer time than one year from the date the work is completed by any agreement to give credit and when action is instituted it must be brought to trial within two years or the court may dismiss the same for want of prosecution and unless otherwise stated in the judgment this removes such lien from the record.

Stop Notices

There is also another means of protection and that is by means of what is termed a stop notice. This is effected by the person performing the work or furnishing material serving a verified statement containing the same information as that for claims of lien upon the owner, in which case the owner withholds from the contractor out of the money that is due him sufficient to pay this claim when the lien is filed.

In the case of construction work it is important to ascertain the amount of the mortgage filed against the realty before the work is commenced for it is prior to any subsequent lien and the security for work and labor and material furnished is diminished by the encumbrances against the property.

There is a great deal more to lien law, but owing to the fact that it is very technical and intricate, I shall not attempt to discuss it. I have enumerated the essentials for your protection in the ordinary case and if carried out it will usually enable you to realize your money.

Collections

With regard to collections it is good policy to start collection proceedings after the usual thirty days. At first it is wise to send a bill, and if no response is made on the second statement make a gentle reminder that the account has probably been overlooked and a remittance would be appreciated. At the end of sixty days, the telephone

should be resorted to. This gives a personal contract and a great deal more can be accomplished than by letters. Further a promise to pay can be usually elicited from the party. If the party evades a telephone communication it is usually the case that there is no intention to pay and legal proceedings should be immediately resorted to. Except in cases where the party flatly refuses to pay or the account is in danger as where credit has been extended to persons just entering business, and by the way, this class of accounts will be found to be the most unsatisfactory unless there is large capital, all accounts generally can be cleared up without litigation if systematically pursued within the ninety-day period. Persistency, however, is necessary in all difficult or slow pay accounts and if the business man cannot take the time for that persistency it is well worth a service charge to him in time and money to have the account handled for him.

Litigation

The last legal phase of our business enterprise is the unpleasant one of litigation, but in very many instances it is the only manner in which one can obtain his just dues and in other instances it must be resorted to as a matter of principal. There are a great many who unnecessarily refrain from litigation because they believe it is too expensive and that it **is like a machine which one goes into a pig and comes out of a sausage.** On the other hand there are those, and too many of them, who believe that the only two sides to every question are the wrong side and our side. In this connection it is always well to remember the truism that a poor settlement is better than a good law suit. When any matter reaches the stage of litigation consult your attorney and rely on his judgment and except in the rarest instance you will find that his advice is sound.

Law's Protection

In conclusion I would like to impress upon you again the advisability and necessity of taking advantage of the protection which the law gives you in the conduct of your business, and while the advantages of enforcement of that protection are often criticised as lengthy and cumbersome, yet on the whole it represents a sincere effort on the part of legislators, judges and the legal fraternity, which provides you with a fair and just recourse. The protection which the law provides you as contractor and business man is present and available and it rests with you to see that it is used by you individually to your best interests.

CLARENCE PRATT BUYS VULCAN ROCK COMPANY'S PLANT

The Vulcan Rock Company, which formerly operated a rock crushing plant at Hoyt, Solano County, six miles from Benicia, has sold its interests to Clarence Pratt, president of the Pratt Building Materials Company and Pratt Rock and Gravel Company, which operates sand, rock and gravel plants at Sacramento, Marysville, Prattrock near Folsom and Prattco in Monterey County.

The property covers about thirty acres and is estimated to contain five million tons of cementing road rock. Next year Mr. Pratt plans to erect a rock plant with a spur track off of the Southern Pacific Company's Sacramento main line.

The Vulcan Rock Company was started in March, 1907, by George U. Hind, George Rolph, M. M. O'Shaughnessy, and Joseph A. Donohue. Operation ceased about ten years ago.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Palo Alto building permits in September involved an expenditure of $131,293 as compared with $112.343 for the same period in 1925. During September 14 permits were issued for residences costing $89,200 and 3 for business structures costing $25,564.

Thirty-fiv e thousand homes were built in California during the last four years through the co-operation of the 190 building and loan associations of the state. The assets of these institutions total $210,000,000. These figures are furnished by A. E. Falch, state building and loan commissioner.

Increase of more than 100 per cent marked building activities in San Jose last month over September 1925, according to City Building Inspector M. C. Woodruff. The total value of building for which permits were taken out in September, 1926, was $351,845. In September, 1925, the total was $160,455. A total of 129 permits were issued in September this year and 88 in the same month a year ago.

Oakland has started a war on old frame buildings. Following a recent inspection tour, ten frame structures were condemned by a Condemnation Board composed of City Commissioner Frank Colbourn, Fire Chief Sam Short and Building Inspector A. S. Holmes. The structures were declared fire hazards. Sixty days are allowed for their removal.

Exports of iron and steel products from United States totaled 171,588 gross tons in August, a decrease of 23,-129 tons from the July total of 194,717 tons. Total exports for the eight months ended August 31 were 1,394,888 tons, an increase of 224.267 tons, or 19 per cent over the 1,170,621 tons exported in the corresponding period of 1925, according to the department of commerce.

That the entire heating plant of the Santa Barbara city hall shows lack of knowledge in its installation; that the engineering work was, in his opinion, bad and that cheap materials were used in its installation—such is the report of J. Kenneth Veeder, consulting engineer brought from Los Angeles to Santa Barbara to make an inspection of the plant and recommend corrections to the city council.

The city of San Francisco has to date spent $46,647,488.17 on its Hetch Hetchy project, according to figures announced by City Treasurer John H. Theiler. Of the $42,000,000 realized, due to a slump in the bond market, from the $45,000,000 bond issue of 1910, but $15,-000 remains, and this is covered by outstanding bills. Theiler announces the city has left only $1,337,511.06 of the $3,000,000 obtained from sales of the 1925 bond issue. Of the $7,000,000 unsold balance of this issue, $2,500,-000 will be required within a few months to carry on tunneling in the foothill division. The city has paid off $7,000,000 of 1910 bonds and is paying off the remainder at the rate of $1,000,000 a year.

All firms or individuals having contracts in connection with the new $700,000 Santa Barbara county courthouse about to undergo construction will be required to pay workmen the prevailing wages, Wm. Mooser, architect, declared at the last meeting of the Santa Barbara county supervisors. All specifications call for the Santa Barbara wage scale as a guarantee for good workmanship, Mr. Mooser said.

Ben H. Covell, Sacramento City Building Inspector, reports the issuance of 260 permits during the month of September for improvements costing $414,973 as compared with 319 permits for the same period in 1925 when the total registered $653,920. The total number of building permits issued for the year to date is 2058, the work being valued at $6,408,650 as compared with 2403 permits in 1925 for improvements estimated at $8,185,095. Last month 67 permits were granted for one family dwellings costing $237,-480.

The longest 11,000-volt submarine cable of its capacity in the world will be laid this month across San Francisco Bay by the Great Western Power Company of California. It will be the fifth transbay cable of the Great Western, bringing hydro-electric energy from the Feather River into San Francisco, and will be approximately 41,-000 feet in length, stretching from Pier 39 to Point Isabel on the Contra Costa shore. The cost of this cable and the necessary equipment and tie lines at each shore-end is estimated to be over $275,000.

Chicago capitalists are reported to have completed tentative arrangements for a $2,000,000 colonization project in Glenn county. Plans proivde for subdivision of the land into 40-acre tracts with the entire area to be irrigated through laterals from the pumping plants of the Glenn-Colusa Irrigation District. New homes and improvements on a gigantic scale are planned by the developers. The project crowns the efforts of the Willows Chamber of Commerce which has long been endeavoring to colonize the area.

Permission to issue $150,000 worth of receivers' certificates is asked in a petition filed with County Clerk C. F. Belding at Oroville by Feutress Hill, receiver of the Hutchinson Lumber Company. The action to issue certificates was accompanied by the statement showing the financial condition of the company. The necessity for the receiver's petition, the petition states, is due to the depressed state in the lumber market, which makes it impossible to sell the stock of lumber on hand to meet the present demands, without a sacrifice in price that would not be to the interest of the company to make.

Karl L. Ludwick, for three and a half years manager of the Long Beach Builders' Exchange, has resigned. He will remain in Long Beach but has no definite plans for the future. In a letter to members he says he feels he is benefiting the Exchange by enabling it to save considerable in salary outlay.

ALONG the LINE

Gust Forsell, building contractor of Manteca, died in that city, Sept. 28, following an illness of two weeks. He was 54 years old and a native of Sweden.

George Welch, pioneer civil engineer of Tulare county, 96 years old, died at Three Rivers, Calif., Oct. 1. He was born in Courtland County, N. Y., and came to California in 1885.

Jas. S. Dean, city architect of Sacramento, addressed the Architects and Engineers Club of that city at the regular semi-monthly meeting of the organization in the Hotel Sacramento. He spoke on the uniform building code.

Five bonds of $1000 each, furnished by Pittsburg, Calif., plumbers in compliance with a recent ordinance, have been refused by the city manager who declared they were satisfactory except that they made them out to the state and not to the city.

Flood Control Office of the State Department of Public Works at Sacramento has been closed upon order of State Engineer Paul Bailey. The office was in charge of A. E. Bailey. Lack of funds is assigned by the state engineer for his action.

Southern California Chapter, Associated General Contractors, will wage an aggressive campaign for the enforcement of the Breed law providing for publicity on public work done by day labor. This law requires that an accounting shall be made on all public jobs costing in excess of $5000, and the report placed on record so that the public can have access to it.

Fred Locke, city manager of Grand Rapids, Ia., was elected president of the International City Managers' Association at the close of the annual meeting at Colorado Springs, Colo., Sept. 23. Other officers chosen were: A. M. Wilson, Colorado Springs, first vice-president; T. S. Scott, Niagara Falls, Ont., second vice-president, and E. E. McAdams, Waco, Texas, third vice-president. Dubuque, Iowa, was selected as the 1927 convention city.

TRADE NOTES

Thomas E. Carroll will operate from 3006 San Pablo Ave., Oakland, under the trade name of Dolan Electric Company.

Central Hardware & Glass Company succeeds the P. A. Smith Company, operating from 626-648 Fourth Street, San Francisco.

Chas. F. Hartley has repurchased his hardware business at Villa and Castro Sts., Mountain View, which he sold to the Miller Hardware Company about three years ago. Hartley has been operating a hardware business at Santa Cruz. Hartley plans to establish a chain of hardware stores in peninsula and coast cities, the Santa Cruz and Mountain View stores being the first stores in the chain.

Hunter Lumber Company with the principal place of business located at 2827 Shattuck Ave., Berkeley, has moved the principal place of business to 1207 Fife Bldg., San Francisco.

Wm. Berwick and Ray Raggeri will operate from 1769 Howard street, San Francisco, under the trade name of Western Artificial Stone Works.

Harry Ford, Frank McCarthy, Harry Ayers Booth and David C. Little will operate in the East Bay section under the firm name of Diamond Point Roofing Company with headquarters in Oakland.

Hogan-Foss Lumber Company of Oakland has been incorporated with a capital stock of $50,000. Directors are: F. W. Foss, Berkeley; Hugh W. Hogan, Wm. R. Foss, Russell D. Hogan and A. R. Rowell, all of Oakland.

Ben F. Dupuy, for the past two years manager of the road oiling business of the Besone Distributing Company of Los Angeles, has purchased the business and will hereafter operate it under his own name with offices and yards at 921 East 61st St., Los Angeles.

Forty-two wage claims against Christopher M. Cook San Jose contractor, adjudled bankrupt in Federal Court in San Francisco, have been filed with Deputy State Labor Commissioner George Moody at San Jose. The claims vary from $10 to $50 each and are only a fraction of the total number to be filed. October 11 has been set as the date for a hearing before George W. Waldorf, San Jose United States referee in bankruptcy.

Maisler Brothers Lumber Company has taken over a block of warehouses in Fresno formerly occupied by the Sperry Flour Company and will use the additional quarters for storage. The new quarters comprise two structures, one 50 by 150 feet and another 50 by 80 feet in addition to approximately 15,000 square feet of open storage space, all served by railroad facilities.

Weber Incinerator Co., 1446 West Slauson Ave., Los Angeles, manufacturing a concrete incinerator for burning household rubbish, under patents which the company owns with patents pending, is anxious to get in touch with interests in the San Francisco Bay district which will manufacture and market the incinerators, paying a very small royalty. Exclusive territorial rights will be given.

Sale of the office furniture and supplies business of Healy & Gilman, 1317 Van Ness Ave., Fresno, to C. F. Weber Co. of San Francisco, and continuance of A. M. Healey, R. S. Gilman and W. L. Collins as consignment agents for the company in Fresno, Tulare, Madera and Kings counties, is announced. Collins was formerly Fresno agent for the Weber Company, while Healey was in business on his own account and Gilman was representative of the Rucker-Fuller Desk Co., the latter consolidating as Healy & Gilman several months ago. The Weber Company will have the Healy & Gilman location as headquarters for the four counties. Stock carried in Fresno will be doubled.

A redwood tree said to be larger than General Sherman in Sequoia National Park has been discovered some five miles from Dyerville on the Redwood Highway.

UNIVERSITY NEEDS BUILDINGS

(Editorial)

At the University of California seventeen million dollars' worth of scientific collections are housed in old buildings, constantly exposed to the menace of fire. Some of these exhibits have so little space for display that students, to see them, must carry electric torches or light matches. Recordes must be carried to fireproof buildings or vaults every night to insure their safety. Most of this material not only is valuable, but irreplaceable. Yet at any time it may be lost, as there are forty or more of these old buildings on the campus at Berkeley that are veritable firetraps.

The University of California needs new buildings to replace these tinderboxes. Funds are provided in Amendment 10, which is before the people of the State for ratification in the election on November 2. New State buildings, also badly needed, are to be financed by this amendment, and the measure is one in which every citizen of California has a definite interest. A vote for Amendment 10 is a vote for economy of administration and for protection of higher education.

THE AGE OF STEEL

Earthquake proof, and now hurricane proof, seems to be the demonstrated quality of steel building, properly designed and constructed, as Santa Barbara and Miami have given testimony. In Santa Barbara's quake the difference between proper and improper design was emphasized. In Miami, fortunately, there seems at this writing to have been proper design, with isolated and not in the least culpable failure to allow quite enough for the possible wind pressure of tropical disturbances.

Movements of earth and air are now pretty well reduced to measurement, so that engineers have developed structural practice to accommodate itself to such natural forces. Science is producing many new types of building material for walls and partitions. More and more it is approximating the fireproof qualities of stone and brick, with the flexibility and lighter weight of lumber. All this tends to reduce the liability of walls to be cracked and crumbled out of the steel framework.

The skycraper of the future will be fireproof, soundproof, quake and hurricane proof, up to the measure of a convulsion of such nature as to completely change the face of the landscape, and remodel the terrain. And there is every prospect that new metals and new materials will accomplish all this with reduced weight, lower cost and much greater facility of construction. — Copyright—The Evening Bulletin, Philadelphia, Pa.

MUNY WATER PAYS

The Hayward, Calif., municipal water system is valued at $306,000, owes $182, has earned $140,000 in six years of its operation as a municipal plant, paid interest, depreciation and bonds as they have come due. In addition to this it is said to be the only municipal plant that has not raised its rates since 1920. These facts were disclosed by Wm. Dolge, certified public accountant of San Francisco, who has audited the books of the city's water system for many years.

Emil Newman, a civil engineer, formerly of Newman, died in Los Angeles recently. He was at one time connected with the San Joaquin Light & Power Corporation.

ORGANIZATION NEWS

FRESNO MEETING POSTPONED

The meeting of members of the Fresno Builders' Exchange, scheduled for Oct. 4 for the purpose of reorganizing the exchange, has been postponed until Oct. 11. The action was taken due to a meeting of the Fresno Community Chest on the evening of the 4th. Members of the exchange voted two weeks ago to reorganize and were to meet to complete the work.

LUMBERMEN ELECT

Arthur A. Hood, Minneapolis, was chosen grand snark of the universe to head the order of Hoo Hoo, a national organization of lumbermen at a meeting Sept. 30 in Kansas City. His cabinet, members of the supreme nine, are; James Brown, Spokane; W. W. Brock, Miami, Fla.; Theodore Spanks, Winnipeg; Mark M. Elledge, Corinth, Miss.; A. F. McDonald, Vancouver; Thomas Jenkins Jr., New York; Dwight Hinckley, Cincinnati, and Phil B. Hart, Sacramento, Calif.

NAPA EXCHANGE TO BANQUET

The semi-annual banquet of the Napa Builders' Exchange will be held in that city October 28, it is announced by C. C. Money, secretary of the organization. A committee consisting of Vice-President Ed. Arnitz and Past-President Fred Jaekle has been appointed to secure suitable entertainment for the affair. S. J. Cinnamond is president of the Exchange.

FRESNO OPEN SHOP BODY SEEKS MEMBERS

Recent action of the Fresno Builders' Exchange in approving an educational campaign in favor of the Fresno Plan of industrial relations has brought no change in the attitude of the Valley Industrial Association in advocating the so-called American Plan, a bulletin issued by that organization declares.

In support of its position, the Industrial Association has launched a membership drive and has opened a labor bureau, countering a membership campaign by the Exchange.

Contrary to claims of the Exchange that its new policies have received the endorsement of a decided majority of the builders and contractors, the Industrial Association bulletin asserts that sentiment favoring the educational campaign is "not pronounced" and that "only a few small sub-contractors are advocating such a policy."

Included in the bulletin is a strong plea for the American Plan, accompanied with the statement that "if labor is allowed to continue its monopoly without restraint, Fresno is destined for the commercial scrap heap."

The Exchange meets October 4th to elect a new board of directors.

NEW ELECTRICAL CODE

A new electrical code, stipulating that everything electrical sold in the city of Walla Walla, Wash., must be approved by the city electrician, is included in an ordinance now being considered by the city commissioners of that place. The code was worked out by John Casey, city electrician, with the advice of the Electrical Bureau of the Board of Insurance Underwriters.

PAINTERS OF WEST TO CONVENE IN PORTLAND

The first annual convention of the Western Painting & Decorating Association is to be held at Portland, Ore., November 4, 5, and 6, it is announced by W. F. Blaesing, vice president of the coast organization. A committee of 13 members has been appointed to arrange the program of events.

Tentative plans for the convention include a general meeting of the craft from California, Oregon, Washington and Montana, which will be presided over by Horace Mann, of Los Angeles, president. Men prominent in the paint industry as as paint, varnish and wall paper manufacturers will give talks of interest. Exhibits will be arranged, to which the public will be invited.

Display of the skill and ability of the Portland craftsman will be shown and an effort is to be made to inform the public of the adaptability of different finishes, designs, color schemes.

AMEHICAN CONSTRUCTION COUNCIL MEETS NEXT MONTH

The Fifth Annual Convention of the American Construction Council will be held at the Hotel Cleveland, Cleveland, Nov. 8, 9 and 10.

Under the auspices of the Council at this time will be a series of conferences dealing with the fundamental relations of the construction industry to the public on such vital subjects as the permanency of building construction in relation to hazards of life and investment; public and private plans for housing financing, methods of certifying building materials; good workmanship; and town and city planning and city building in relation to city growth, city values and community standards. These and other topics having to do with the general problem of better building, a subject which the American Construction Council has been bringing vigorously to the attention of the American public nationally for several years, will constitute the key-note of these conferences.

Other topics of national importance, as for example those having to do with practical methods of reducing construction peaks and depression not only in relation to the construction industry itself but also their effects and counter effects upon transportation and the allied producing industries of the nation as well as the consuming public, will receive attention.

Speakers of national prominence will address the gatherings which will be conducted as a common conference table or forum open to the public.

The Council's officers are: President, Franklin D. Roosevelt; Vice Presidents, Harry A. Wheeler, Pres. Union Trust Co. of Chicago, George A. Harwood, vice-Pres. N. Y. Central Railroad and D. Knickerbacker Boyd, architect; Treasurer, Wright D. Goss, Chairman Empire Brick & Supply Co.; Dwight L. Hoopingarner, Executive.

NEW BULLETIN ISSUED

The Engineering Experiment Station, University of Illinois, Urbana, Ill., has issued Bulletin No. 155 entitled "Cause and Prevention of Embrittlement of Boiler Plate." Copies will be furnished without charge on request to the Station.

STOCKTON BUILDERS' EXCHANGE TO OPPOSE CHARTER CHANGES

The Stockton Builders' Exchange is on record as opposed to three amendments to the Stockton city charter dealing with building and will make every effort to defeat these proposed amendments at the polls at the municipal election on October 12.

The amendments to which the builders take exception are those providing for the building inspector, electrical inspector and plumbing inspector becoming the heads of their respective departments independent of each other and answerable only to the city manager.

The builders want all building operations under one head so that they may deal with but one official in securing permits and taking up other matters with the city. They say to be compelled to have to visit three offices for a one-job permit is neither a sane or efficient way of doing business.

City councilman Karr C. Brueck and Grover A. Grider attended the session of the Exchange at the invitation of the officers and members. It seems that in framing the proposed amendments the council left that phase of the proposed changes to Councilman Grider and the exchange was not consulted. Now the members are up in arms and have appointed a committee to seek an audience at each of the service clubs to present the viewpoint of the exchange on the three proposed building amendments to the charter.

This committee consists of J. M. Burke, Earl Lewis and W. F. O'Keeffe.

OAKLAND VOTES OUT CITY PLANNING COMMISSION

Without warning as to its intention and over the vote of Mayor John L. Davie, the Oakland city council adopted an ordinance dissolving the city planning commission.

A letter accompanying the ordinance declared the commission no longer necessary.

The letter set forth that the commission was organized with two objects: formulation of a comprehensive city plan, and the stimulation of public interest in the plan.

Both objects have been attained and the work since has been going ahead under three organizations: a traffic committee, a property owners' council and a major street and highway committee, under the direction of Harlan Bartholomew, city planning expert, the letter stated.

Under these circumstances, it was said, the council is unwilling to proceed further under the direction of the city planning commission, believing that recommendations for specific projects should come from the committees named.

CERTIFICATES GRANTED TO PRACTICE ARCHITECTURE

At the meeting of the State Board of Architecture, September 28, 1926, the following were granted certificates to practice architecture in this State:

Leonard H. Ford, 1435 Harrison St., Oakland.

William Clement Ambrose, 9 Brookside Ave., Berkeley.

Harry J. Devine, 1405 41st St., Sacramento.

Thaddeus Joy, 2816 Derby St., Berkeley.

Andrew H. Knoll, 222 Kearny St., San Francisco.

Jan Hendrik de Lange, Aptos, Calif.

Ernest R. De Chenne, 4128 Gilbert St., Oakland.

Building News Section

APARTMENTS

To be Done by Day's Work.
APARTMENTS Cost, $20,000
SAN FRANCISCO. NE Fulton St. and Thirty-first Ave.
Two-story and basement frame (8) apartments.
Owner—T. I. Strand, 595 22nd Ave., San Francisco.
Architect—None.

General Contract Awarded.
APARTMENTS Cost, $20,000
SAN FRANCISCO, E Sanchez St. 75 S 14th Street.
Three-story & basement frame apartment building (12 apts.)
Owner—Emil Staude, 50½ Sanchez St., San Francisco.
General contract awarded to C. W. & H. H. Haun, 3919 23rd St., S. F. at $23,-900.

General Contract Awarded.
APARTMENTS Cost, $45,000
SAN FRANCISCO, N Vallejo 150 E Polk
Three-story and basement frame apartments, 18 2-, 3- and 4-room apts.
Owner—A. Ramazotti, 1450 Vallejo St., San Francisco.
Architect — W. H. Armitage, 72 New Montgomery St., S. F.
General Contract awarded to John Harder, 870 39th Ave., S. F. at $31,-250.

Plans Complete.
APARTMENTS Cost, $27,000
BERKELEY, Cal., 1835 to 49 Spruce St.
Two-story 23-room frame and brick veneer (8) apartments.
Architect—W. R. Yelland, Athens Athmont Ave., Berkeley.
Architect—W. R. Yelland, Atsens Athletic Club, Oakland.

Concrete Contract Awarded.
APARTMENTS Cost, $250,000
SAN FRANCISCO, Hyde Street near Greenwich Street.
Ten-story and basement class A steel frame community apartment building (1 apt. to a floor).
Owner — Joseph Greenback, Hearst Bldg., San Francisco.
Architect—C. O. Clausen, Hearst Bldg., San Francisco.
Exterior will be finished in stucco with terra cotta trimmings.
Concrete Work—Mission Concrete Co., 123 Kissling St., San Francisco.
As previously reported, structural steel was awarded to Herrick Iron Works, 18th and Campbell, Oakland.

Structural Steel Contract Awarded.
APARTMENTS Cost, $150,000
SAN FRANCISCO. SW Turk and Hyde Streets.
Six-story steel frame and concrete apartment building.
Owner—H. C. Keenan.
Architect—H. C. Baumann, 251 Kearny St., San Francisco.
Structural Steel—Central Iron Works, 2050 Bryant St., San Francisco.

Plans Completed.
APARTMENTS Cost, $32,000
SAN FRANCISCO, SE Alhambra and Mallorca.
Three-story and basement frame (4) apartments.
Owner—G. L. Nelson, 290 Alhambra St. San Francisco.

NOTE:—The following K.C.B-like story was written by a "Sacramento Bee" reader of Sandy's Pratt's near-comedy, ("Pratt's Concrete Mix") and it is so flattering that Sandy producer of clean sand, rock and gravel is printing it here. You will agree that it is much better than most of Sandy's "near Literature."

Tahoe City, California.
September 27th, 1926

Clarence Sandy Pratt,
Central Office, 518 Hearst Bldg.,
San Francisco.
Deary Sandy:

AFTER READING your "Concrete Mix."

IN THE Sacramento Bee.

I AM prone to think.

YOU ARE wasting your talents.

IN THE sand business.

HOWEVER SHARP it may be.

IT MIGHT cut some ice.

IN THE building line.

BUT IT is not sharp enough.

TO CUT wood.

WE KNOW.

FOR WE tried it.

IT SEEMS to me.

THAT IF I ever.

BECOME FAMOUS.

BY WINNING a beauty contest.

OR JUMPING.

OFF THE Brooklyn Bridge.

OR MAKING a self-opening can.

THAT COULD readily be opened.

OR A one-man top.

THAT ONE man.

COULD PUT up.

OR INVENT a non-skid soap.

I WOULD want you.

TO WRITE the ads.

AND FURNISH the publicity.

TO MARKET the same.

TOGETHER WE would.

CLEAN UP the "rock."

(NOT "PRATTROCKS" from Prattrock),

BUT THE **real money kind.**

THAT YOU get in exchange.

FOR YOUR clean, sharp sand.

AND HARD **rock and gravel.**

ONLY MORE **of them.**

BELIEVE ME, Sandy.

P. T. BARNUM and you.

PRODUCER OF sand and rock.

WOULD HAVE made.

AN UNBEATABLE advertising team.

SO SANDY, dear.

WHY NOT leave your business.

TO THE hired man.

AND OPEN an office.

AND WRITE ads.

FOR ALL of us.

AND I am sure.

YOU WILL have.

A GREAT future before you.

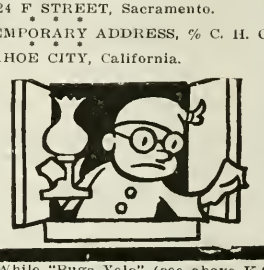
"I THANK you."

(SIGNED) BUGS YOLO.

1424 F STREET, Sacramento.

TEMPORARY ADDRESS, % C. H. C.

TAHOE CITY, California.



While "Bugs Yolo" (see above K.C.B like story) likes Sandy's stuff, Sandy is still watching for the mail man to bring an offer from the editor of some metropolitan newspaper or national magazine.

Propositions 2 and 3 deduct.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission Street, San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

D-2214—Boston, Mass. Manufacturers of METAL TIME STAMPS, UTILITY STAMPS, AMOUNT CERTIFIERS and kindred stamps for office use, desire to appoint a representative in San Francisco to handle the sale of their products.

D-2215—Erie, Pa. Various Erie industries are desirous of appointing agents in San Francisco. As Erie is an iron and steel town the manufacture of STEAM ENGINES, STEAM BOILERS, STEAM SHOVELS, and allied foundry products predominates, and it is for these lines that representation is required.

D-2217 — Cleveland, Ohio. Manufacturers of an ELECTRIC HEATING PAD are seeking a representative in this territory.

10769 — United Kingdom. A firm of British manufacturers is desirous of appointing an agent in this district for the sale of CAMEL HAIR BRUSHES, suitable for artists, sign writers, porcelain painting, etc.

10773—Amsterdam, Holland, Firm is desirous of establishing business connections with San Francisco firms which are in a position to export GALVANIZED CORRUGATED and FLAT STEEL SHEETS to the Dutch East and West Indies and to South America. They state that although business of this kind is usually one on a cash basis, they are in a position to supply first class bank and trade references.

10774—Denmark. Firm wishes to be put in touch with California exporters of FOREST TREE SEEDS.

10778 — Hamburg, Germany. Manufacturers and wholesalers of ANTI-CORROSIVE PAINTS, with aluminum oxide as base, are desirous of establishing a market for their products in this territory.

10779—Hamburg, Germany. Exporter desires to appoint a representative in San Francisco.

10780—Ludenscheid, Germany. Large manufacturer of PLAIN AND ORNAMENTAL DOOR KNOBS and FURNITURE KNOBS, BRACKETS, METAL HANDLES, SCREW HOOKS and kindred metal articles, wishes to secure services of a suitable agent in San Francisco.

10781—Manila, P. I. Manufacturers' representative is open to handle the representation in the Philippines of a line of HARDWARE, and is interested in PLUMBING, FIXTURES, PIPES, ELBOWS, TEES, etc.

10789—Mexico City, Mexico. Firm wishes to get in touch with San Francisco buyers of FINE HEAVY MEXICAN LUMBER, suitable for the manufacture of furniture and other articles.

10793—San Francisco, Calif. American with many years experience in export trade abroad, leaving shortly to establish offices in Australia, wants to represent local firms on a commission basis.

10794—Auckland, New Zealand. Representative of a New Zealand firm, who is in San Francisco at the present time, wishes to interview San Francisco manufacturers or exporters who are interested in appointing a representative to handle the sale of their products in New Zealand. The firm is in a position to undertake the sole agencies for American firms in almost any line of business.

BERKELEY LACKS PAVEMENT

Berkeley has only one-third the amount of hard surfaced streets that a city of its size should have, according to the annual report of A. J. Eddy, city engineer of Berkeley. Only 11 per cent of the streets of the city are covered with hard surface pavement, while it is estimated that 35 per cent should be of this type. Comparative figures show that although the initial cost of hard surfaces is high maintenance costs are so low that the actual annual cost of the better class of pavement is less than that of oil macadam, the city engineer stated. Berkeley has 193 miles of streets, only 21 miles of which are covered with hard surface pavements, or 11 per cent. Oil macadaam surfaces cover 162 miles of the city's streets and 10 miles are unimproved. Eddy advocates 60 or 70 miles of hard pavement or 35 per cent of the total mileage. A paving program of five or six miles a year is urged for adoption by the City Council.

THE BUILDING SITUATION AS SEEN FROM NEW YORK

The New York Journal of Commerce reviews the building situation as follows:

Current reports indicate that the decline that has taken place during the past month or two as compared with last year, is pretty largely, although not by any means exclusively, a matter of curtailment in New York City. Nevertheless, the volume of construction work is growing smaller and the significance of that fact is enhanced by general conditions in the market for new buildings and for accommodations. On the other hand, activity in this branch of business is still large and is likely to be considerable for some little time to come. The immediate outlook is therefore not by any means alarming. From the standpoint of activity as such it is not even discouraging.

Those who are inclined to take a longer time view of the situation are, however, much more inclined to base their conclusions upon what plain indications suggest ought to be done rather than upon what actually is being done. Thus figures of available space in building already constructed taken in comparison with probable demand and other similar facts have long ago led careful students to the opinion that construction ought to proceed more carefully than it has been doing. If, therefore, there is now a discernible tendency for activity to slacken it may be construed as favorable in one sense of the word as well as unfavorable in others. Such a development, however, may be the beginning of a movement that before it is ended will bring a marked change over the face of the building situation.

STRUCTURAL STEEL SALES ARE ON THE INCREASE

The August bookings of fabricated structural steel were 214,580 tons, compared with 190,031 tons in July and 209,752 tons in August, 1925, according to reports to the Department of Commerce from principal manufacturers. August shipments totaled 250,100 tons, against 268,400 tons in July and 244,000 tons in August of last year.

In the first eight months of 1926 shipments of structural steel were 1,912,350 tons, compared with 1,778,150 tons in the corresponding period of 1925 and 1,626,150 tons in the 1924 period.

August sales of fabricated steel plate were 44,178 tons, against 30,150 tons in July and 29,594 tons in August, 1925. In the eight months bookings of plate were 288,130 tons, compared with 217,452 tons in the corresponding 1925 period.

Ernest A. Blackman, F. Anderson and Clarence Blackman will operate from 4149 East Fourteenth St., Oakland, under the firm name of Blackman, Anderson Mill & Lumber Company.

Official Proposals

NOTICE TO BIDDERS

(Steel Lockers—Shasta Union High School District)

Bids are hereby requested for steel lockers, 12 inch by 12 inch by 60 inch to the number of 60, by the board of trustees, Shasta Union High School District. Bids to be sealed and marked "Bids for Lockers" and mailed or delivered to the secretary of the board of trustees of said school, on or before 12 o'clock noon, **Tuesday, October 12, 1926.**

By order of the board of trustees, Shasta Union High School District.

M. E. LUTON, Secretary.

NOTICE TO CONTRACTORS

(Washington Union High School)

Notice is hereby given that sealed bids will be received by the Board of Trustees of Washington Union High School District, of Alameda County, California, at the office of the President of said Board, Mr. **Fred F. Dusterberry**, in the present High School Building, in the town of Centerville, Alameda County, California, **until Saturday, the 16th day of October, 1926, at two o'clock P. M.**, at which time said bids will be opened for furnishing all labor and materials and mechanical workmanship required for the erection and completion of a one-story concrete shop building for the Washington Union High School District, to be erected on the grounds of the Washington Union High School Building, at Centerville, California, in said High School District.

Bids will be received on each of the following departments of the work:

Department 1.—A general contract, including all work excepting plumbing and electric work.

Department 2. — Plumbing work, drains, etc.

Said work shall be completed in accordance with the complete plans and specifications for said work on file and open to inspection at the office of the architect, Henry H. Meyers, 1201 Kohl Building, San Francisco, California, and on file with the President of this Board at said High School Building, hereinbefore mentioned. Copies of said plans and specifications may be obtained at either place by depositing with the undersigned Secretary of the Board, or with said architect, the sum of twenty ($20.00) dollars. Contractors will be restricted as to the length of time they may retain the plans and specifications to twelve (12) days for Department 1 and to six days for department 2. Material men and subcontractors who secure these plans by making the said deposit will be restricted to three (3) days' time. If the plans and specifications are not returned to the President of said Board or to said Architect within the time specified or are returned in a multilated or damaged condition, the deposit shall be retained by the said High School District as agreed and liquidated damages for said multilation or detention and will be immediately used for the purchase of a new set of blue prints and specifications. Contractors may submit bids on any one or both departments. The Board of Trustees reserves the right to award the contract as a whole or in separate contracts as may appear to the best interests of the District.

Each bid must be made on proposals obtained at the office of the Architect or at the office of the President and must be signed by the bidder and accompanied by a certified check for at least ten per cent. (10%) of the amount of the bid or proposal, certified to by some responsible bank or banker and made payable to the Washington Union High School District of Alameda County, California, to be retained by said High School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give the bond required for the faithful performance of the contract or any bond required by law.

Bids will be opened by the said Board of Trustees of Washington Union High School District on Saturday, the 16th day of October, 1926, at the hour of two o'clock P. M., at the office of the President, located in the present High School Building in the town of Centerville, Alameda County, California, in said High School District.

The Board reserves the right to reject any and all bids or any or all items of such bids.

Dated: September 16th, 1926.

F. V. JONES,
Secretary of the Board of Trustees of Washington Union High School District of Alameda County, California.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of **the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on November 1, 1926,** at which time they will be publicly opened and read, for construction in accordance with specifications therefor, to which special reference is made, of portions of State Highway as follows:

Santa Barbara County, across Gaviota Creek about 2½ miles north of Gaviota (V-SB-2-E), a reinforced concrete girder bridge 24 feet wide, composed of three 54-foot spans and one 30-foot span.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of the work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,

(Pier 45—State Harbor Commission)

Office of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, California, September 30, 1926.

Sealed proposals or bids will be received at this office at or prior to **10 o'clock a. m., Wednesday, October 13, 1926,** for furnishing necessary materials, labor and equipment and constructing Pier No. 45 and adjacent Bulkhead Wharf, on the water front of the City and County of San Francisco, in accordance with plans and specifications approved by the Board Aug. 26, 1926, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consists in removing such portions of abandoned existing structures as are within the lines and which will interfere with the construction of the new work, furnishing all necessary materials (except Portland cement, rails and creosoted piles, which will be furnished to the Contractor by the Board), labor, tools, machinery and equipment for the construction of Pier No. 45 and adjacent bulkhead wharf.

The materials to be used in this work shall consist of the requisite quantities of Portland cement, rails, creosoted piles, concrete aggregate, diatomaceous earth, steel reinforcement, castings, structural steel, class A rock fill, class B rock fill, heavy treated Douglas fir lumber, light treated Douglas fir lumber, untreated Douglas fir piles, eucalyptus pile butts, asphaltic paint coat, fittings, bolts, spikes and miscellaneous materials, Portland cement, rails and creosoted piles will be furnished to the Contractor by the Board. All other materials shown on the plans or called for in these specifications shall be furnished by the Contractor.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the

OFFICIAL PROPOSALS

NOTICE TO BIDDERS

Richmond Union High School District

Notice is hereby given that the High School Board of the Richmond Union High School District of Contra Costa County, California, hereby calls for sealed proposals to be delivered to the Secretary of said Board in the Lincoln School, 235 Tenth St., Richmond, California, **until the 25th day of October, 1926, at 8 o'clock P. M.,** at which time and place said proposals will be opened, for the supplying of all material and the construction of a group of high school buildings to be erected on a portion of lot 99 of the San Pablo Rancho, located at 23rd and Tulare Streets in said High School District, in accordance with plans and specifications prepared by Louis S. Stone and Franklyn E. Warner, authorized architects, 337 17th Street, Oakland, California.

Said plans and specifications may be seen at the architects' office, at the office of the High School Board, at the Builders' Exchange of Contra Costa County, 248 14th St., Richmond, California, or at the Builders' Exchange, 354 Hobart St., Oakland, California, during office hours.

Sealed proposals will be received on the following divisions of the work: Div. 1, General Work; Div. 2, Plumbing; Div. 3, Electrical Work; Div. 4, Heating; Div. 5, Linoleum; Div. 6, Pumping Plant. Proposals must be signed by the bidders on blanks obtained from the Architect.

Proposals must be addressed to W. T. Helms, Secretary of the said High School Board, and must be accompanied by a certified check, certified to by some solvent bank, and made payable to the Richmond Union High School District, to be retained by said high school district as agreed as liquidated damages should the party or parties to whom the contract or contracts are awarded fail to enter into the contract within ten (10) days after the date of award, or give the bonds required by law for the faithful performance of said contract. The amount of said certified check shall be for at least ten (10) per cent of the total amount of the highest bid submitted by the bidder. A bidders bond will be accepted in lieu of a certified check.

The Board reserves the right to reject any or all bids.

The Architect will require a deposit of $50 for Division 1, and a deposit of $25 for each of any of the other divisions, when plans and specifications are taken from his office.

By order of the High School Board of the Richmond Union High School District, California.

W. T. HELMS, Secretary.
Richmond, Calif., Sept. 13, 1926.

NOTICE TO CONTRACTORS

(C. I. Pipe—Hanford, Cal.)

Persuant to a motion duly made and adopted by the Board of Trustees of the City of Hanford, County of Kings, State of California, on the 27th day of September, 1926, notice is hereby given that said Board will receive **up to 8 o'clock P. M., Monday, October 18, 1926,** sealed proposals for the sale to the City of Hanford of the following:

3000 feet, more or less, of 4 inch cast iron pipe, Bell and Spigot type, and 10 cast iron "T's" (4 inch), size 4x4x4.

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

FILIPINO ARCHITECT EXHIBITS STUDIES HERE

A collection of oil and water color sketches by Juan M. Arellano, a prominent Philippine architect, will be on exhibit on to those interested in the architectural profession in the club rooms of the San Francisco Architectural Club at 523 Pine Street today and tomorrow, between the hours of eleven-thirty and one-thirty.

Mr. Arellano is a graduate of the University of Pennsylvania and has studied abroad. He ranks as one of the best authority in his profession in the Islands and holds the position of consulting architect for the Government.

The sketches were granted by his generosity to the club on his stop over in the city on a tour of this county, to study our present day construction.

BRIDGE TALK

Chas. W. Gullick, engineer for the Davis-Pearce Co., at a recent meeting of the Stockton Chapter, American Association of Engineers, gave an interesting talk on the history of bridge construction, dwelling on the various types of bridges built from the year 4000 B. C. to the present type.

L. A. BUILDING IN SEPTEMBER TOTALS $8,163,581

Building permits issued in Los Angeles for the month of September reached a total of 3335 in number and a valuation of $8,163,581. Figures for the same month last year were 3704 permits valued at $11,071,923.

Dwellings and apartment houses lead the list in both number and valuation, the total number of dwellings being 971 valued at $3,870,000 and apartment houses 35 valued at $1,205,850. There were also 973 permits issued for private garages costing $268,542, along with the dwellings.

Superintendent Backus of the building department estimates that accommodations for 1525 new families will result from the month's building, apartment buildings taking care of 473 families, single dwellings 890 and double dwellings 162.

GALVANIZING STANDARDS ARE TO BE DEVELOPED

Organization of a committee to carry on the work of standardizing the quality of zinc coatings for iron and steel products has been completed by the American Society for Testing Materials under the auspices of the American Engineering Standards Committee. The following six technical sub-committees are ready to begin their work: (1) Hardware and Fastenings, R. F. Hosford, chairman, American Telephone & Telegraph Co.; (2) Sheets' and Sheet Products, J. T. Hay, chairman, United Alloy Steel Corp.; (3) Plates, Bars, Structural Shapes and Their Products, V. F. Hammel, chairman, Electric Bond & Share Co.; (4) Pipes, Conduits and Their Fittings, F. N. Speller, chairman, National Tube Co.; (5) Wire and Wire Products, J. C. Johnson, chairman Pennsylvania Railroad System; (6) Methods of Testing, C. D. Hocker, chairman, Bell Telephone Laboratories.

The scope of the committees' work includes a wide range of products and methods of general industrial importance, including electrical fittings, conduits, "galvanized" sheet and plates, water pipes, valves and fittings, agricultural tools and hardware, rivets, screws, nails, fencing material and woven wire cloth. All types of zinc coating, including the spray process, hot-dip and electro-galvanizing, sherardizing, electroplating, etc., will come under the work of this committee.

SIERRAS TO SEA HIGHWAY IS FURTHER ADVANCED

Providing that $200,000 should be the limit of expenditure required from the county the Kern County Board of Supervisors has passed resolutions endorsing the Maricopa-Ventura coast highway. Under the plan this will make another route from the Sierras to the Sea, and the expense of its construction, estimated at $1,200,000 in the engineers report submitted, will be borne by a joint highway district comprising Kern, Ventura and Santa Barbara counties and the federal government. The federal government may be induced to bear one-half the expense of construction. Much of the distance, 74 miles, is through the Santa Barbara National Forest. The highway will be from Maricopa to Ventura and thence connect with the state highway from Ojai through Casitas Pass to Santa Barbara.

C. W. KNIGHTS ELECTED CHIEF OF BERKELEY EXCHANGE

Charles W. Knights, plumbing contractor, was elected president of the Berkeley Builders' Exchange at the annual meeting of the organization, Oct. 9.

Other officers selected to serve during the ensuing year were: Carl Fox, vice president; Fred L. Holbrook, treasurer and J. Ralston, secretary. The board of directors is composed of Charles W. Knights, Carl Fox, E. A. Mitchell, M. J. Ralston, C. W. Conner, C. P. Anderson and Fred L. Holbrook.

In the president's chair, Knights succeeds E. A. Mitchell, one of the founders of the exchange and an ardent worker for the organization who is credited with building up the exchange to its present strength.

A joint meeting of the old and new boards will be held on Tuesday, Oct. 12, at which time President Knights will outline the standing committees for the ensuing year and a program of work will be formulated.

New buildings and improvements for state hospitals of California totaling in excess of $5,000,000 are requested in a tentative budget prepared for the next biennium being prepared by E. G. Twogood, acting director of the State Department of Institutions.

Lewis N. Hager has adopted the trade-name of Hager Sash & Door Company and will operate a plant in Berkeley.

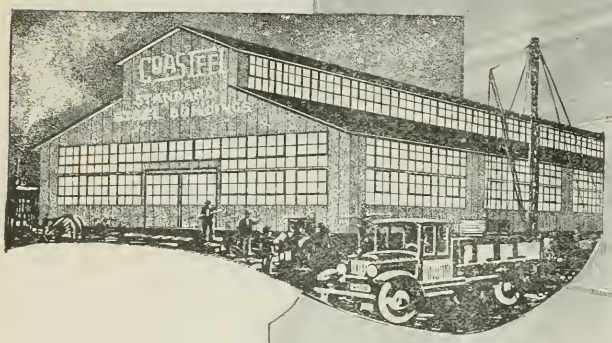
COASTEEL



The Manufacturing Organization behind COASTEEL Buildings

A Copy for You

COASTEEL Standard Buildings, in their entirety, are the product of a specialist organization. Years of experience in steel manufacture, steel fabrication and steel erection go into each individual job.

All of the steel—for trusses and columns, side wall and roof and window sash—is manufactured by the Coast pioneer, Pacific Coast Steel Company. The sheets for doors, side wall and roof are rolled by Pacific Sheet Steel Corporation. All sash in Coasteel Buildings is "California" Steel Sash, manufactured by Michel & Pfeffer Iron Works. Fabrication of COASTEEL Buildings is done by Pacific Coast Steel Company.

Backing up this manufacturing arrangement is the combined service given by the capable, experienced engineering staffs of the three contributing companies.

PORTLAND CEMENT ASSOCIATION ANNOUNCES FREE COURSE

A free evening short course covering recent developments in design of concrete mixtures and field control of concrete will be held for engineers, architects, contractors, inspectors and other construction men in the bay district, beginning October 20, it is announced by A. P. Denton, district engineer of the Portland Cement Association. Sessions will be held in the Pacific Gas & Electric Company auditorium at 245 Market street, San Francisco.

This course is given local construction men through the courtesy of the Portland Cement Association under the auspices of the San Francisco section, American Society of Civil Engineers. Officials of the Portland Cement Association will send an experienced representative from their research laboratory at Chicago to take charge of the seven sessions, Denton said. No charge of any sort is made and the instruction is open to all interested in concrete construction.

"The instruction is purely educational, intended to give a clearer understanding of the factors which affect the strength and quality of concrete, and also to provide practical exercises in actual design and proportioning mixtures to meet given strength specifications. No attempt will be made to prescribe construction methods not to design reinforced concrete structures," Denton said.

The instruction will include lectures on general phases of concrete work, demonstrations of tests, using cement, sand, and stone from local material yards. The problems in design involve arithmetic only, and the field tests are not difficult to apply. It is desired that all who wish to attend the sessions notify the San Francisco district office of the Portland Cement Association, in order that ample accommodations may be arranged.

U. OF C. LEADS UNIVERSITIES FOR POOR BUILDINGS

The University of California has on its campus at Berkeley 41 antiquated, ramshackle, temporary buildings used for academic purposes. This is more than twice the number of such buildings on the combined campuses of twelve of the leading universities of the United States, according to a survey just completed by Dean Baldwin M. Woods.

In comparison with the 41 old wooden buildings at the University of California, the twelve other universities have but 16. The University of Wisconsin has eight wooden buildings, most of which are barns used by the College of Agriculture. The University of Michigan, the University of Chicago and the University of Illinois each have two. Harvard and Stanford each have one. Cornell, University of Pennsylvania, Johns Hopkins, Princeton, Yale and Columbia have none.

California has a larger student body than any of these institutions, and is listed now as the largest, in point of attendance, of the American universities. Its growth, it is pointed out, has been much greater than that of its buildings. There are but 13 modern buildings on the Berkeley campus, and of these, nearly half the cost has been paid by private funds, donated by friends of the institution. Had it not been for these donations, six of these modern buildings would not now be in existence.

"Certainly," says Robert G. Sproul, Vice-President and Comptroller, "the University of California has not been a burden to the people of the State for buildings. The legislature has provided for badly needed buildings by passing Proposition 10, which would give $3,000,000 to the University at Berkeley for this purpose. This amendment provides also $3,000,000 for buildings on the new site of the Southern Branch at Westwood, $1,250,000 to complete the capitol extension buildings at Sacramento, and $1,250,000 for a State office building in Los Angeles."

SUGAR PINE LUMBER COMPANY TO INCREASE CAPITAL

Proposals to increase the capital stock of the Sugar Pine Lumber Company from $2,500,000 to $5,000,000 will be voted on by the stockholders of the company at a meeting to be held in Fresno next Tuesday.

The company now has outstanding 15,000 shares of common stock of par value of $100 a share and 10,000 shares of preferred stock with the same par value. It is proposed to increase the common stock of the company by 25,000 shares, giving a total of 40,000 shares of common stock at $100 par, leaving the preferred stock as at present.

According to B. A. Cannon, general manager of the company at Fresno, the new common stock will be taken up by the present stockholders of the company, according to the pro rata of their present holdings, and the proceeds will be used to pay off obligations the company now has.

BIDS ASKED FOR SIX MILLION DOLLAR DREDGING PROJECT

Bids will be considered by the Bureau of Yards and Docks, Navy Department, at Washington, D. C., on December 1, under Specification 5282, for dredging at the Naval Operating Base, Pearl Harbor, T. H. The work includes dredging to increase the depth and width of the channels adjacent to and at the Base and includes also the disposal of the dredged material. The entire project involves approximately 8,624,000 cubic yards. The specifications provide for the receipt of proposals for the entire work and also upon four subdivisions each of which involves from 1,486,000 to 2,670,000 cubic yards. The cost of the work is roughly estimated at $6,000,000. The dredging period will extend over a period of three years.

NEW EFFECTS IN WALL SWITCH PLATES ANNOUNCED

New effects in wall switch plates are now being obtained through the use of Pyradiolin, a synthetic plastic recently developed by chemical engineers of the E. I. Du Pont De Nemours & Co. of Wilmington, Delaware. Wall fixtures of this material can now be procured in colors to match the woodwork of the room, or to harmonize with the decorative scheme. Mahogany, walnut, ivory, and marine pearl in blue, rose, green and white are among the most popular colors used in the new switch plates. These new effects can be had for all the standerd push-button and toggle plates, as well as floor-plug plates for lamps and other accessory attachments. The material is said to be practically indestructible, as it will not chip or crack. It retaines its original color through long use, will not tarnish and is easily kept clean by wiping with a cloth.

CONTRACTORS WOULD REFER ALL CLAIMS TO AUDITOR

Following action taken by the Santa Barbara Board of Supervisors to put on a contract basis all large pieces of county work which have been underway or planned on the day labor system, contractors are suggesting another change in policy which they claim is in line with the better business methods they see in the contract and cost accounting methods now adopted

The contractors suggest that it become the accepted practice to refer to the auditor before any contract is commenced, or before any big piece of equipment is delivered, the contract or the bill and secure from the auditor a ruling on the claim's validity before it is submitted to the supervisors.

One contractor who has had twenty years of experience in contracting with other counties including San Francisco said:

"It has been the custom in other counties for years for the contractor or salesman to consult the auditor before beginning work or delivering goods The auditor is the last court in the settlement of all bills and by consulting him all chance of a mixup in payments is avoided. The practice increases the dignity of the auditor's office and gives better recognition to the wide powers of that office."

Wood Flour—Its Manufacture And Principal Uses

Mr. Harry Steidle, Research Assistant, National Committee on Wood Utilization, Department of Commerce.

Approximately twelve million pounds of wood flour is imported annually from Europe into the United States.

This is made from nothing more than sawdust, shavings and other mill-waste which in this country is generally regarded as a liability and a fire hazzard. While American operators are spending money to dispose of this class of material, European lumber manufacturers are converting it into wood flour, exporting it to this country, paying duty and evidently selling it at a profit.

European wood flour is claimed to have certain advantages over the domestic product, but the validity of the claim is questionable, and increased experience and care in the selection of raw material on the part of American manufacturers should result in a product in every way equal to that produced by foreign mills.

Wood flour has been known and produced in this country for some time, but the production was limited to a very few companies, and little attention has been given it as a phase in the utilization of sawdust, shavings and other milling waste until recently sponsored by the National Committee on Wood Utilization.

Uses are Numerous

The uses of wood flour are numerous and diversified, ranging all the way from dolls to dynamite. New uses are constantly being developed and it promises to become an important industrial product as well as a profitable economic solution for the disposal of material that has heretofore been frowned upon.

The wood substance of various species of trees differs very little in composition. The wood substance of hickory is not unlike that of poplar, the chief difference in the two species being in the physical structure of the material. However, there are certain infiltrations of gums and resins in some woods, and in others certain coloring, that precludes their use as wood flour for some products. Spruce, fir, and pine are the chief woods used in Europe to produce the highest grades of wood flour. Similar species are represented by our true firs, white pines and spruces. Little investigation has been undertaken regarding the suitability of American species for the manufacture of wood flour, but from casual observations the wood of maple, ash, white birch, and basswood, in addition to the species now in use, should be capable of producing a good grade of wood flour, since they are entirely devoid of resin and possess the necessary light color.

Manufacturing Process

Wood flour, as the name implies, is a finely ground or pulverized form of wood. In Europe it is ground chiefly by stone mills, which are an adaptation of the old burr stone mills used for the grinding of wheat and other grains. They consist of two large mill stones, one of which is stationary while the other is connected to a vertical shaft and revolved.

The grinding stones are entirely enclosed in a wooden or steel structure, except for an intake at the top. The upper grinding stone has a sizable opening in the center through which the chipped trimmings and sawdust are conducted by means of the intake feed pipe. This material is deposited on the lower stone, which is flat. The stones grind firmly against each other, except at the inside, where the grinding surface of the upper stone is somewhat concave, forming a space for the coarser wood material when it first enters between the grinding stones. The material is thus gradually reduced and finally deposited as flour in the encasing at the periphery of the stones. Here it is drawn or blown off, and after screening is put into sacks. Steam or water in limited quantities is introduced into the mill to prevent excessive heating from friction.

Wood Flour—nothing more than mill waste—in the United States regarded as a liability and a fire hazard, is shipped into this country by European lumber manufacturers who pay duty and reap a profit. Mr. Steidle in the accompanying article disensses the manufacturing end of the product and its uses. "The manifold uses of this increasingly important product", he says, "should enlist the attention of every wood using plant where sawdust or other wood substance is being discarded".

Another type of mill, used chiefly for the conversion of sawdust into wood flour, is the steel burr roller mill. This consists of a series of corrugated steel rollers, each succeeding roller having teeth of increasing fineness. The rollers are closely set and revolve in opposite directions at different rates of speed. The sawdust is passed through the series of rollers and ground to the required degree of fineness.

American Pulverizing Machine

Among other patented devices of American manufacture is a wood pulverizer for the conversion of shavings, sawdust, and hogged wood into wood flour. The material is fed through a hopper into a grinding chamber in which a high-speed grinding wheel operates. The material is pulverized by action of the grinding wheel against the sides of the chamber, which is likewise lined with a grinding surface.

One of the features of this machine is the absence of screening apparatus. A current of air is used to draw the material from the grinder. In the upper portion of the machine this current of air is allowed to expand into a somewhat larger chamber. Here the air on expanding loses part of its lifting power and the coarser particles which were held in suspension fall back into the grinding chamber. The dust-laden air is conducted on to a large settling chamber where the wood flour is finally precipitated to the floor. In this manner, the fineness of the flour is closely regulated — the slower the air current, the finer the product drawn off.

Uses of Wood Flour

There are many different products into which wood flour enters as an important constituent. Chief among them are the following:

Linoleum — Approximately 20,000,000 pounds of wood flour is used annually in the linoleum industry. It is employed chiefly in the manufacture of inlaid types, although it is also used in smaller proportions mixed with cork flour, in the production of the "battleship" and printed linoleums.

The light fluffy nature and consequent space-filling proportions of wood flour make it particularly desirable as the filling constituent in linoleum. It is intimately mixed with cementing materials consisting chiefly of resins, linseed oil and Kauri gum. The resultant mass is of a tough, doughy consistency. This is rolled into layers, cut into the desired figures, and cemented to a burlap backing under intense pressure and heat.

Because of the necessity of imparting different colors to the various figures of inlaid linoleum, it is essential that the filler be light in color and capable of taking pigments. Wood flour possesses these characteristics which adds materially to its importance as one of the chief constituents in the manufacture of inlaid linoleum.

Both imported and domestic wood flour are used by the manufacturers of linoleum. The imported product is somewhat finer than the domestic, but is less uniform in its properties, and, contrary to general opinion, is not as light in color as the best grades of domestic manufacture. The extremely fine European wood flours produce a linoleum that is susceptible to a higher surface polish, although the fluffy, slightly fibrous nature of the domestic wood flour offsets the above advantage in that the minute fibres have a tendency to become felted in the cementing of the finished product.

Another claim made for European wood flour is that it contains less resin. This, however, is not true when compared to the best domestic grades. However, for use in the linoleum industry the constancy of the resin content rather than the amount is the most important feature.

Generally speaking, domestic wood flour is preferred by the linoleum industry by reason of its uniformly light color, fluffy, slightly fibrous nature, and unvarying quality. Furthermore, the users are in closer and more intimate contact with the producers and can purchase in the quantities desired and for delivery as needed.

Explosives—In the manufacture of explosives, wood flour has its greatest usefulness as a constituent of dynamite. Nitroglycerine in its natural state is extremely sensitive to shock and dangerous to handle, and is therefore, barred from transportation on common carriers. However, when

diluted with carbon carriers such as wood flour, and oxygen carriers such as sodium and ammonium nitrate, this sensitiveness is greatly reduced. Such mixtures are known as dynamite. A standard 40 per cent "straight" dynamite contains:

Constituent	Per Cent
Nitroglycerin	40
Sodium Nitrate	44
Calcium Carbonate	1
Wood Pulp	15

Kieselguhr, a fine siliceous earth, was the original absorbing medium used in the manufacture of dynamite, but this has given way almost entirely to the use of active constituents, of which wood flour, in varrying degree of fineness, supplemented in some cases with wheat, flour, corn meal, and sawdust, enter as the most important materials. These constituents have a dual role to fulfill. Beside the physical absorption of the liquid nitroglycerin, there are also important combustibles and are known as active carbonaceous "dopes".

Since the force of an explosion is dependent on the sudden generation of a large volume of highly heated gases, the effectiveness of the explosive is enhanced by the use of active "dopes". Such inert materials as sand of kieselguhr do not enter into the reaction, while the active carbonaceous "dopes," such as wood flour, furnish in part the carbon and hydrogen to react with the excess oxygen of the nitroglycerin, thus approaching a complete reaction.

Miners, quarrymen, and other users have learned to associate light color with fresh, high quality dynamite, and for that reason the wood flour entering into the manufacture thereof must be light in color. The situation is unfortunate, because many species of slightly colored woods could be made into equally good wood flour. The demand for light colored dynamite is another example of custom and prejudice overruling facts.

Bakelite—Among the newer industries demanding wood flour as a raw material is the manufacture of Bakelite. In its purest form, the substance is familiar as material from which pipe bits and sparkling amber-like beads are made.

Dr. Baekeland, the chemist who discovered the formula for producing this synthetic resin, knew that the commercial success of the substance depended on its introduction into industrial uses. However, he found the material excessively brittle, which was a drawback in moulding it. He set about to find a filler that would reduce the brittleness and make it more resistant to shock. After long experiments with many kinds of pulverized and fibrous fillers, he finally settled upon the use of wood flour.

Bakelite is sold under several different trade names and the list of its possible uses is too long to include here. However, some of the more common applications of the moulded products are seen in radio dials, cementing material around incandescent electric bulbs, and in automobile ignition blocks, radiator caps, lever balls, etc.

Other Uses of Wood Flour

In the making of "oatmeal" wall papers, wood flour is used as a surfacing. Colored wood flour is likewise used in the manufacture of velvet wall papers. The colored material is sifted onto the paper, to which an adhesive is first applied.

Chief among the other uses of wood flour is its application as a filler in the manufacture of composite materials which vary widely in their consistency and properties. The binding materials used to unite the compound are wide in range and varying in proportion. The more important application of these synthetic compounds includes their manufacture into unbreakable dolls, brush backs, candlesticks, checkers, bowling balls, toys, graphophone records, and countless other objects.

The manifold uses of this increasingly important product should enlist the attention of every wood using plant where sawdust or other wood substance is being discarded. Under present conditions the greatest demand is for wood flour of light color, but with its growing importance as a filler in moulded articles, color will become of lesser importance.

Various types of grinding machines are being perfected for the manufacture of wood flour and there seems to be no valid reason for American manufacturers to discard their sawdust, trimmings, etc., while their European competitors are selling such material in the form of wood flour here in the United States.

Pacific Logging Congress To Convene At Vancouver, B. C.

Seventy-two nations have been invited to send representatives to the 17th annual session of the Pacific Logging congress to be held at Vancouver, B. C., October 27 to 30, it is announced by Secretary Archibald Whisnant of Portland, Ore. Acceptances have been received from Chile, Belgium, Republic of Panama, Costa Rica, Mexico, Venezuela and India.

Clyde S. Martin, chief forest engineer for the British government in India, will come from Chepauk, Madras, India, for the conference. Panama will send M. P. Morris, Hawaii will send C. S. Judd. Belgium and Mexico will send two representatives each. The United States department of agriculture will send two men.

Six foreign nations have taken exhibit space in the biannual machinery show, which will be held in the Northern Pacific railway freight terminal at Vancouver. Three Diesel engines of foreign manufacture will be shown.

The program for this year's congress has been divided into three parts, Whisnant announces, preparation, operation and perpetuation. All the meetings will be of the open forum style for the consideration of logging operation methods.

More than 2000 logging operators, superintendents, foremen and representatives of foreign countries are expected to attend this year's sessions. This would be the largest attendance ever recorded by the congress.

The Pacific Logging congress is this year international for the first time, following the adoption of a resolution by the 16th congress, which met at Seattle last October.

Pacific Portland Cement Company Plans Expansion

The Pacific Portland Cement Company will reduce its dividend rate from 50 to 25 cents a month, beginning with the November 5 payment, according to an announcement to stockholders by Robert B. Henderson, president of the company. The reduction is stated to be temporary and for the purpose of diverting a part of the earnings to the enlargement of the Redwood City plant. Preparations are being made, Mr. Henderson announces, to do about $1,000,000 worth of financing.

In a letter to stockholders, Mr. Henderson states:

> Your president, by order of the board of directors, under date of March 20, 1924, addressed a letter to the stockholders outlining the plans for further improvement and development of the properties of your company.
>
> Since that date, the capital stock has been increased from 60,000 shares to 100,00 shares. There also has been issued and sold bonds in the amount of $2,000,000; this being the only indebtedness of your company.
>
> Your company is in very satisfactory financial condition, and in spite of adverse marketing conditions existing for more than a year, the earnings for the year 1925 showed a surplus of 33 per cent over dividends; the earnings for 1926 to date are equal to the earnings for the same period during 1925.
>
> The two plaster plants referred to in the letter of March 20, 1924, are completed and being operated in a very satisfactory manner. The supply of raw materials both for the manufacture of plaster and cement, and the geographical location as regards the markets which our plants serve, are second to none on the Pacific Coast.
>
> Disinterested engineers, familiar with our industry, have stated that the three new plants of your company are the most modern, well designed and efficient installations of which they have any knowledge.
>
> Our new cement plant located at Redwood City has been operating almost two years. The first year's operations were no exception to the rule; we encountered numerous difficulties inherent to the starting of any new plant. All of these problems have been solved and the plant has been operating for almost a year in a highly satisfactory manner.
>
> In view of the satisfactory operation of the plant, low cost of manufacture, ample supply of raw materials, favorable location as to rail and deep water transportation and close proximity to large consuming markets, your directors consider it very unwise to defer increasing the capacity of the Redwood City plant.
>
> It is proposed to increase the present capacity by an additional 3000 barrels per day. This will enable us to hold our old plant in Solano County as a stand-by and reserve, and will effect a substantial savings in cost.
>
> The work on the new plant unit at Redwood City has already begun, and it should be ready for operation about one year from date. This additional installation will cost about $1,650,000. We expect to provide from cash on hand and earnings $650,000, and to raise approximately $1,000,000 through new capital financing.
>
> As a matter of conservative policy and after careful study and analysis of the entire situation, your directors unanimously feel it would be to the best interests of the company that a portion of its construction costs be paid out of the company's earnings, by reducing temporarily the present monthly divident from 50 cents to 25 cents per share per month, beginning with the dividend payable November 5, 1926. As old stockholders will recall, this procedure was followed during the year 1914 very much to their advantage.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Meetings of the Architects and Engineers Club of Sacramento will hereafter be held on the first and third Fridays of each month, it is announced by C. H. Kromer, president.

Concrete ship Peralta, the sister ship of the Palo Alto, built in 1910 has been towed to Monterey where it will be used as a fish meal battery by a Monterey fishing concern. The boat will be equipped with machinery for grinding fish.

Berkeley Board of ducation has set December 11 as the date to bond the city for $2,900,000 to finance the erection of new schools and additions and alterations to standing structures. The proposal to submit the proposition at the November general election has been abandoned.

Voters of the city of Stockton at a recent election refused to reduce the pay of City Manager Chas. Ashburner from $20,000 to $10,000 a year. The proposition was defeated by a vote of three to one.

On September 18, 1926, there were 52 strikes before the Department for settlement and in addition 9 controversies which had not reached the strike stage. Total number of cases pending 61—9 of which are new. The 9 new cases may be compared with 14 and 5 of the first and second weeks preceding.

After six years of work, the report on California's water resources will be ready for submission to the 1927 Legislature, according to Paul Bailey, State Engineer. Authorization for the survey was first given by the 1921 Legislature, which voted $200,000 for this work. Subsequent appropriations by the Legislature brought the total for the survey to $440,000.

During the first five days of October, 1926, the Los Angeles city building department issued 633 permits with an estimated valuation of $1,372,143. For the corresponding period in September the number of permits was 568 with an estimated valuation of $1,346,-161, while the five days of October, last year, the number of permits was 731 with an estimated valuation of $2,668,-606. The October total last year was $11,655,786. For the current year up to and including Oct. 5, Los Angeles' building total was $95,650,003, as compared with $118,436,139 for the corresponding period last year.

Making it practically certain that the land owners of the proposed San Joaquin River Water Storage District will be given an opportunity to vote upon the formation of the district, the Board of Directors at its meeting in Los Banos, Oct. 11, adopted a resolution stating willingness to accept the prices asked by Miller & Lux for water rights and physical properties, which the district proposes to take over. The total of the prices for these properties and right is almost $11,000,000. The district would irrigate 550,000 acres in Madera, Fresno and Merced counties. The total cost of the project would be $24,000,000.

PORTLAND, Ore. will be called upon at the election November 2 to pass on requests for authority to issue $64,935,000 in bonds for state, county and city projects that will be on the ballot. City and county projects for improvements, however, are dwarfed by the project of the Housewives' council calling for the acquisition of electric power plants in any part of the state, a project that will give authority to issue bonds to the extent of $52,000,000.

Criminal action against F. M. Chrisman, manager of the Sims Lumber & Box Company, for alleged failure to pay his employees, was taken at Redding, Oct. 8 by representatives of the state labor commission. Simultaneously, proceedings were started to foreclose loggers' liens on the company's property at Sims in behalf of 73 workers claiming $6629 due for wages. The workers claim they have not been paid in nearly three months.

Reports for August indicate that the building materials market was healthier than it has been for some time. The check to the downward trend which started in July, continued for the most part through August. With the exception of a slight reduction in the price of cement at two of the Eastern mills, declines in the price of common brick at Cleveland, Denver and Seattle, and increases in the latter material at Boston, Los Angeles and Kansas City, few changes were reported. The structural steel market was very active, awards during the last week of August being the largest of the year. The lumber market experienced a noticeable change for the better.

The Master Plumbers Association of Boston has received a notice from the laborers union to the effect that in the future on all plumbing work where a helper is required a member of the union must be employed. According to the Building Trades Employers Association of Boston this is the first time that such a demand has ever been made and is quite a departure from the heretofore known jurisdiction claims of the laborers union.

Tests conducted by the American Bridge Company and the Federal Bureau of Standards on the substitution of electric welding in place of riveting of structural steel members in building construction has proven that the first named process is entirely practicable. In conducting one of these tests a girder fastened together by welding instead of riveting was made from flat steel plates instead of rolled shapes. It was intended to carry a load of 410 tons but exceeded expectations in the load carrying capacity.

There will soon be published by the Department of Labor a bulletin entitled, "Hand Book of American Trade Unions." This bulletin will contain a section headed "Organization and Membership of Trade Unions." From this source it is learned that there are 156 trade union organizations in the United States, 107 of which are affiliated with the American Federation of Labor and 49 of which function outside of the Federation. It is stated that the aggregate membership of organizations covered in their study is 4,443,523 of which 3,383,907 are in the Federation.

H. E. Godegast, former city engineer of Santa Cruz, has filed a claim against that city for $6000 for survey and map work, made in preparation for the construction of the proposed Laveaga-Branciforte East Santa Cruz drainage district, proceedings on which were abruptly halted when residents protested the construction. The engineer seeks three and three-quarters per cent of the construction contract price. The present city engineer estimated the work at $186,000 while the lowest bid received totaled $215,953.59. Engineer Godegast based his claim against the city engineer's estimate.

The sale of 200,000,000 feet of virgin pine timber to the Pelican Bay Lumber Company, largest lumber concern in Klamath, by the Day Brothers interest and Chester and Richard Hovey, of California, is reported at Klamath Falls. The tract is located north of Bonanza. Figured at $6 per 1000, a conservative figure, the deal involved approximately $1,200,000. To tap the timber tract, it was said, a spur line of the Oregon, California & Eastern Railroad will be built through Bonanza and then north to the holdings.

TRADE NOTES

The Bush-Pa Dalford Manufacturing Company, manufacturing oil burning systems, has opened quarters at 4114 Linden St., Oakland.

C. A. Wille will operate in Stanislaus county under the trade name of Wille Electric Company with headquarters at 917 Eye St., Modesto.

After 60 years in business, the hardware firm of Boeseke & Dawe of Santa Barbara, is preparing to retire from the field.

Barrymore Concrete Mixer Corp., capitalized for $20,000 has been incorporated in San Francisco. Directors are: O. C. Barrymore, W. E. Hoag and R. A. Daddisman.

Alhambra Mission Stucco Company, capitalized at $90,000, has been incorporated in San Francisco. Directors are: E. H. Peterson, H. C. Martin, T. W. Simmie, J. H. Morris and Edward Matson.

Concrete Pressure Pipe & Construction Company of Gilroy has been incorporated with a capital stock of $25,-000, and will engage in the manufacture of general cement products. Directors are: Harry C. Scholten, Geo. Eastman and L. Scholten, all of Gilroy.

The Frederick Steel Company has taken over the steel bar fabricating shop formerly operated by Rhodes-Jamieson Company located in West Alameda, together with the entire stock of steel bars. The new company has equipped its plant with the latest machinery for fabrication of steel bars. A complete stock of corrugated bars will also be carried, according to W. J. Ashley, manager of the Frederick interests at Webster street and Stanard Ave., Alameda.

Morris Rosenberg will operate from 938 Howard street, San Francisco, under the trade name of American Painting & Decorating Company.

Albert L. Pedersen and Henry C. James have formed a partnership and will operate from 901 Eye St., Modesto, under the firm name of Modesto Hardware Company.

Red Mountain Magnesite Co., capitalized at $300,000, has been incorporated in San Francisco. Directors are: F. Clemens, J. Claiborne, K. O'Toole, J. T. Boynton and C. C. Boynton.

Wagner Manufacturing Company, Cedar Falls, Iowa, marketing elevator door hangers and closers, have entered the field with a complete line of elevator accessories including pneumatic door operators, signal and interlocks. To accommodate the Pacific Coast trade the company has opened an office at 77 O'Farrell St., San Francisco.

Fires have been started on the first run of brick in the new yards near Fallon, Nevada. The plant is in charge of Harold Deppe, recently of Smithfield, Utah. The Fallon Brick Association, backing the enterprise, includes E. S. Berney, Carl Dodge, R. L. Douglass, Obie Harrell and M. B. Johnson. The first brick produced will be used in a new fraternal hall about to undergo construction in Fallon.

Recent developments in modern heating equipment were a subject of discussion at a meeting of architects and heating engineers at the Bellevue Hotel, San Francisco, October 7. The architects were guests at the dinner, which marked the close of a convention of California dealers of the Oil-O-Matic Corporation of America, builders of heating apparatus. C. U. Williams, president of the corporation, and Grover C. Pledger, secretary, were the principal speakers.

John P. McNeill has opened offices at 512 Sharon Building, 55 New Montgomery St., San Francisco, to give San Francisco Bay district architects and contractors first hand information and prompt estimating service on all products manufactured by the A. J. Bayer Company of Los Angeles. These products include ornamental iron and bronze for all branches of the building industry as well as hollow metal doors, trim, elevator fronts and cabs. Mr. McNeill has been with the Bayer organization for the past fifteen years as chief engineer, estimator and sales engineer and is anxious to be of service to the clients of the Bayer interests.

Schumacher Wall Board Corporation of Los Angeles reports the shipment of four carloads of plaster board to Salt Lake City, Utah, three cars to Denver, Colo., and one car to Tonopah, Nev. During the month of September, approximately 300,000 square feet of the product, or three carloads, was shipped from the Sacramento warehouse to supply the demand in Northern California, according to Earl Schmidt, sales manager. Schmidt points out that the Tonopah shipment was the sixth carload sent to that city within the last year. The Denver shipment was made up of 193,000 sq. ft. of plaster wall board, and the Salt Lake City consignment consisted of approximately 240,000 sq. ft. of the product.

Architects Turn Attention To Design And Arrangement In New Structures Rather Than Height

With the skyscrapers of each year being lost in the shadows of the taller ones erected in the next, the designer who wishes to plan a distinctive building no longer can rely upon superior height alone.

Most of the cities of the United States are seeing their "tallest buildings" eclipsed, one after the other, as the result of a construction trend which has been gaining momentum for several years.

In the past, especially in the early part of the century, the erection of a building taller than any of its neighbors, or taller than any other in the same town, was a guarantee that it would stand out prominently, for a considerable time.

In New York City, several buildings, successively acquiring the title of "tallest," held it long enough to gain national reputation. The American Surety Building, one of the first downtown skyscrapers, was followed by the Flatiron building, and then by the Singer building. The title of "world's talles" was then captured by the Woolworth which held it unchallenged until the planning of the eighty-one story of the new Book Tower in Detroit.

Most of the cities of America today are witnessing similar processes of "overtopping." In Cleveland, the new Union Terminal Tower will rise 711 feet, considerably higher than the previously tallest buildings, except the Woolworth building.

The peak of the Brooklyn skyline was for years at 23 stories, the height of the Chamber of Commerce building. Suddenly it went to 28 stories with the Court Remsen building, and scarcely was this completed when work was begun on a new 30-story structure, and another which is to go to 35 stories, all within a few blocks of one another. In nearly every section of New York City, buildings which previously stood out as isolated skyscrapers, are today surrounded by taller ones, like groves of trees.

When this overtopping occurs, a structure can still hold its rank as one of the "leading buildings" through distinctive features other than height. Architects now plan to insure permanent prestige for the buildings they design by modern floor plans and lighting effects, exteriors made attractive by skillful use of decorative materials, efficient elevator facilities, and generally convenient equipment throughout.

Care is also being taken to avoid the buildings' ever assuming an appearance of "oldness" by the use in many cases, of facing materials which can be washed with soap and water.

California's Mineral Industries In 1925 Show Increase In Values

Compilation of the final returns from the mineral producers of California for 1925 by the statistical division of the State Mining Bureau, under the direction of Lloyd L. Root, State Mineralogist, shows the total value for the year to have been $434,519,660, being an increase of $59,898,871 over the 1924 total of $374,620,789. There were fifty-five different mineral substances, exclusive of a segregation of the various stones grouped under gems; and all of the fifty-eight counties of the state contributed to the list.

Of the structural group: cement advanced from 11,655,131 barrels, worth $23,225,850 to 13,206,630 barrels, worth $25,043,335; granite from a valuation of $1,241, 046 to $1,853,859. Brick and hollow building blocks or tile decreased in total value from $9,137,908 to $7,503,976, due mainly to common brick, through all classes showed drops except fire-brick which advanced slightly in values for a slightly smaller quantity. Lime and magnesite both dropped off slightly.

The distribution of the 1925 output of California by substances of particular interest to the construction fraternity, is shown in the following tabulation:

SUBSTANCE	AMOUNT	VALUE
Asbestos	a	a
Bituminous rock	a	a
Brick and Hollow building tile		$ 7,503,976
Cement	13,206,630 bbls.	25,043,335
Clay (pottery)	537,587 tons	674,376
Granite		1,853,859
Gypsum	107,613 tons	172,444
Lime	61,922 tons	685,528
Limestone	319,977 tons	494,625
Magnesite	64,623 tons	872,944
Marble	35,664 cu. ft.	116,105
Mineral paint	669 tons	6,969
Onyx and Travertine	19,940 cu. ft.	16,120
Sandstone	14,704 cu. ft.	14,362
Silica (sand and quartz	12,498 tons	96,780
Stone, miscellaneous (b)		17,409,854
Unapportioned (c)		1,957,484

a. Under "Unapportioned."

b. Includes macadam, ballast, rubble, riprap, paving blocks, sand gravel, and grinding-mill pebbles.

c. Includes calcium chloride, bituminous rock, antimony, asbestos, graphite, infusorial and diatomaceous earth, iron, shale, oil, sillimanite-andalusite.

ALONG the LINE

President Coolidge has signed an order approving the Owyhee river irrigation project in Idaho and Oregon. It will cost $17,715,000, and will irrigate 124,000 acres.

F. W. McCarton, city engineer of Modesto, is confined to the Robertson Hospital at Modesto, suffering from rheumatism aggravated by a nervous condition. He has been in the hospital for the past ten days.

The offices of city engineer and street superintendent of Alhambra have been consolidated and hereafter City Engineer Harry E. Blake will assume the duties of both positions, H. Clyde Amesbury retiring from the office of street superintendent.

M. L. Cook, former county surveyor of San Bernardino county, died in San Bernardino, Oct. 7. From 1894 until 1910 Mr. Cook was San Bernardino county surveyor and later retired to private practice. He was identified with many development projects in the San Bernardino Valley.

Carl Heintze, Sacramento contractor, died in the Sutter Hospital, that city, Oct. 11, following a brief illness. He had been engaged in construction work at Truckee, Nevada county, when stricken ill and was rushed to Sacramento. He was 40 years of age.

Engineers' Club of Fresno is outlining plans for a membership drive, according to L. J. Moore, president of the club. A campaign program will be mapped at the next regular luncheon meeting of the organization.

Architect H. Roy Kelley of Pasadena was awarded first prize of $1000 in an architectural competition conducted by the "Own Your Own Home" magazine. Plans were submitted for a seven-room two-story house of Spanish-Mediterranean style.

L. V. Campbell was elected president of the Sacramento chapter, American Association of Engineers at the business meeting of the chapter held Oct. 7 in the Hotel Sacramento. Other officers chosen for the ensuing year are H. D. Stover, first vice president; Fred Grumm, second vice president; Paul Dunckhorst and L. D. Packard, directors. Retiring president R. E. Pierce will also be a member of the board of directors.

Charles E. Jenkins has resigned as building inspector of Alhambra, and L. E. Richardson has been appointed to succeed him. Jenkins was recently elected president of the Pacific Coast Building Officials' Conference and will devote much of his time during the next year to the duties of that position in connection with the proposed uniform building code.

Frederick W. Williams, former San Francisco architect, has opened offices at 809 Commercial Bldg., San Jose. Mr. Williams was in the Hawaiian Islands for ten years. He is the fifth of five brothers who are all architects. He learned his profession in the office of his brother, James Leonard Williams, F. R. I. B. A., Staple, Inn, London. He was 10 years in the United States before going to the Hawaiian Islands.

$384,143,274 Is September Construction Total For P. C.

Permits were issued for new buildings to cost $384143,274, in 96 principal cities of the eight Pacific Coast States during the first nine months of this year, as shown by tabulations of official reports comprised in the National Monthly Building Survey of S. W. Straus & Co.

Although there has existed a general impression that building operations throughout this area have been appreciably reduced, owing to a carpenters' strike affecting several cities and a policy of conservatism on the part of speculative builders, the nine months' total is but 7% below that of last year.

An analysis of the reports from building inspectors show that, of the major cities, San Francisco, Vancouver and San Diego show an increase and that 51 other cities also show gains over last year's record.

Eliminating the dominant influence of the Los Angeles figures, amounting to approximately 25% of the whole, the 1926 reduction amounts to but 3%. Significant, also, is the fact that the slowing down of building operations is chiefly evident in the larger communities.

San Francisco, issuing $43,943,708 in building permits during the first nine months of this year, records an increase of 11% over last year's figures. The September total shows a 26% gain over the total for September of last year, although the strike of carpenters has been most in evidence in this city.

Los Angeles, with a three-quarter-year total of $95,277,860, shows a 17% reduction from last year's activity and the September figures are 26% below the comparable record for 1925.

Of the twelve municipalities comprising the San Francisco Bay area, seven show increases, although the area, as a whole, reports a reduction, for the nine months' period, amounting to 8%. In the Los Angeles Metropolitan area, fourteen municipalities show a reduction of 11%, although eight report increases.

Seattle, with a nine months' total of $26,403,800 in building permits issued, gained 1% over the 1925 record, while the September figures are greater by 2% than the totals for August and for September of last year.

Portland issued $26,301,925 in building permits between January 1 and October 1 of this year, 15% less than the unprecedented record of last year. The September total, however, is 3% above the comparable figure for 1925.

Following are the official construction cost figures for September, 1926, and for the first nine months of 1926, as reported by building department executives from 96 cities comprised in the Pacific Coast Section:

City	September, 1926 No.	Cost	September, 1925	First 9 months 1926	First 9 months 1925
CALIFORNIA					
Alameda	95	$135,624	$2,143,509	$1,487,165	$3,308,794
Alhambra	105	298,000	287,900	2,509,429	2,442,808
Anaheim	28	25,997	97,118	340,973	409,175
Bakersfield	78	116,388	179,086	1,556,217	1,724,185
Berkeley	327	670,584	839,312	6,048,075	7,838,114
Beverly Hills	125	569,625	1,046,685	6,808,099	6,989,041
Burbank	79	127,701	156,675	2,019,790	1,316,005
Burlingame	38	224,667	182,370	1,485,557	1,735,901
Colton	20	65,550	20,750	255,710	190,315
Compton	65	117,337	53,575	1,253,848	1,301,184

Construction Industries Council In South Prepares For Organization

Plans for permanent organization of the Construction Industries Council of Southern California were laid at the initial meeting of delegates from associations which have ratified the proposed constitution held Sept. 29. Twelve eligible associations have named delegates and alternates, and all but two of these were present at the meeting.

William Simpson of the William Simpson Construction Company, was elected temporary chairman to serve until a permanent organization has been effected. Melville Dozier, Jr., manager of Southern California Chapter, Associated General Contractors, was appointed by the chairman to serve as temporary secretary. Authority was given the temporary chairman to appoint the necessary committees on organization, and the following were named:

Committee on credentials—E. W. Hokom, chairman; H. H. Mann and K. R. Bradley.

Constitution and by-laws — R. W. Stewart, chairman; F. J. Twaits and Edwin Bergstrom.

Nomination of officers—J. E. Dwan, chairman; C. E. Noerenberg, J. J. O'Connor, F. J. Twaits and Harold McGee.

The credentials committee will canvass and report upon the associations which have ratified the proposed constitution and upon their delegates.

The committee on constitution and by-laws will revise the construction to meet the reservations and changes proposed by member associations and draft by-laws and rules to cover future procedure.

The committee on nominations will report back suggested nominations for permanent officers in accordance with the constitution.

A general discussion of the work of the council showed splendid unanimity among the delegates and the Council voted unanimously to carry on and continue through the proper departments or committees the work already started during the last two years by the committees handling legislation and day labor, better business relations and arbitration.

Acting upon a communication from representatives of Stanford University, the Council voted to co-operate in the matter of including a course on construction in the new department of business administration now being organized by the university. A committee consisting of Arthur S. Bent, chairman, John C. Austin and Frank Olmsted was appointed to co-operate with the University authorities.

It was decided to hold the next meeting of the Council Oct. 20, at which time the committees will make their reports and opportunity will be given other associations to come in as charter members before the permanent organization is completed.

Following are the associations which have ratified the proposed constitution of the Council: Southern California Chapter, American Institute of Architects; Southern California Chapter, Associated General Contractors; Surety Underwriters' Association of Southern California; American Association of Engineers; Heating and Piping Contractors' Association; Master Painters and Decorators' Association; Contracting Plasterers' Association; Building Specialty Contractors' Association; Ornamental Iron Association; Millworkers' Institute of California; Merchant Plumbers' Association; Associated Sheet Metal Contractors.

Request was made by the Associated General Contractors that the Builders' Exchange be admitted to charter membership, that association not being included in the original list. David Woodhead and Matt Bright have been named as delegates by the Exchange in the event it is admitted by the Council.

BUILDING MATERIAL DEALERS HOLD DINNER MEETING

The Building Material Dealers Association held an old time Italian dinner at Charley's Restaurant, San Francisco, October 5th and were represented as follows:

Holmes Lime & Cement Co., by William J Feary; Lennon Lime & Cement Co. by James A. White; Eclipse Lime & Cement Co. by E. J. Snell and E. H. Aigeltinger; J. S. Guerin Co. by Steve I. Guerin; Spring Valley Lumber Yard by Charles Meyers; John Cassaretto by John Harper; G. Mazzera by Louis Mazzera; Golden Gate Atlas Materials Co. by J. G. Murphy; Felix Gross Co. by Felix Gross; Howe's Lumber Co. by E. M. Howe; San Mateo Feed & Fuel Co. by Carl Stoner; San Francisco Building Material Co. by Ralph Rupert.

After dinner a number of the members gave talks on the dealers' conditions from the retail standpoint. Frank L. Hatch, secretary of the association, explained the objects of the meeting.

Mr. J. B. Murphy, of the Golden Gate Atlas Materials Co., after addressing the members, recited some poetry which brought round after round of applause. Elmer Gallagher told stories and rendered a solo.

A vote of thanks was extended to Louis Mazzero and James White who made arrangements for the dinner.

The meeting adjourned in a spirit of good fellowship and showed the dealers working in a spirit of cooperation.

DAYTON EXCHANGE TO TRAIN CARPENTERS IN SCHOOL

The advisory committee of the Dayton (Ohio) Builders' Exchange has planned to have a day school for carpenter apprentices to take the place of the night school which has been in operation for the past year.

It is planned to have the apprentices attend school four hours each week over a period of years to be determined. During this time the student will retain his position and his pay shall continue the same as if he were working on the job.

The rate of the students' pay will be 40% of the current scale for the first six months and increasing each six months until it has reached 90% of the current scale in the fourth year.

ENGINEER GIVES LECTURE

H. W. King, professor of hydraulics at the Michigan University, addressed the student branch of the American Society of Mechanical Engineers, at the University of California last Wednesday evening. His topic was "Formula For Flow in Open and Closed Conduits."

Completing Plans—Ready for Bids in Two Weeks.
NURSES' HOME Cost, $160,000
STOCKTON, San Joaquin Co., Cal.
Two-story brick nurses' home.
Owner—San Joaquin County Hospital.
Architect — Davis-Pearce Co., Delta Bldg., Stockton.

California — New buildings and improvements for state hospitals totaling in excess of $5,000,000 are requested in a tentative budget for the next biennium being prepared by E. G. Twogood, acting director of the Department of Institutions. The largest single request for new buildings is from the Norwalk State Hospital at Norwalk which seeks $1,964,000. Four new patients' buildings will cost $350,000; $100,000 for additional farming land; $75,000 for assembly hall; $30,000 for industrial building and $75,000 for nurses' and attendants' building. Other appropriations will be requested for the following:

Napa State Hospital—new buildings, $709,432; chief expenditure for 4 cottages for female patients with capacity of 386 persons, est. cost $300,000. Other units include: $45,000 for employes' quarters; $60,000 for four additional wings at the decrepits' cottages; $100,000 for tuberculosis hospital (for patients in Superior California); (an allowance of $100,000 also to be made for a similar structure to be erected at Patton, Los Angeles county, for patients in Southern California.

Stockton State Hospital — total requests, $440,000. Two new buildings on hospital farm, 5-mi. north of Stockton, est. cost $173,000; hospital for sick patients $100,000; industrial building, $25,000; repairs to power and water systems, $57,000.

Preston School of Industry, (Ione, Amador County)—Total requests, $426,000. Hospital and receiving unit, $160,000; water supply storage reservoir, $110,000; classroom building, $65,000; gymnasium, $35,000; additional farm lands, $26,000.

Mendocino State Hospital, (Mendocino county)—total requests $550,275; $175,000 for two patients' cottages; $97,500 for attendants' building; $80,000 for addition to custodian building; $70,000 for additional farm lands.

Agnews State Hospital, (Santa Clara County). Total requests $247,000. $396,000 for new patients' cottage; $45,000 for employes' quarters; $40,000 for employes' cottages.

Pacific Colony at Pomona. Total requests $404,500. For two patients' cottages, $96,000; additional farm lands, $80,000; employes' building $75,000; schoolhouse and gymnasium, $45,000

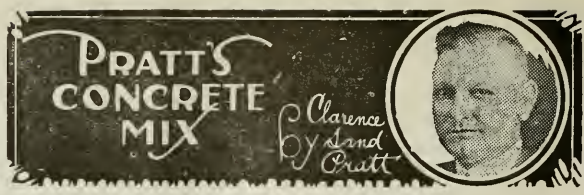
Southern California Hospital at Patton—Total requests $800,000. A kitchen, bakery and cold storage unit, $150,000; cottage, $90,000; group building for 220 patients, $90,000.

Other proposed building project appropriations are sought as follows: Ventura School for Girls at Ventura, $55,500; Whittier School of Industry at Whittier, $217,000; Industrial Home for Adult Blind, Oakland, $16,850.

Plans and specifications for all of the above improvements, when the funds are made available, will be prepared by the State Department of Public Works, Division of Architecture, Forum Bldg., Sacramento. Geo. B. McDougall is state architect.

FRESNO, Fresno Co., Cal.—American Legion Posts of state contemplate erection of orphans' home in San Joaquin Valley to house orphan children of members from California, Washington, Oregon, Arizona, Nevada, Idaho and Utah. Sites for the proposed home have been offered in San Francisco and Los Angeles but none have been accepted. The amount to be expended in construction has not yet been determined.

DINUBA, Tulare Co., Cal. — A. C Stine, conducting the Dinuba Hospital in East Tulare St., has leased the Barrett residence at Alta Ave. and El Monte Way and will remodel the structure for a private hospital. Equipment is now being purchased.



SUGGESTION GIVEN—OPINIONS WANTED

"Builders' Day" Outing—insofar as the year 1926 is concerned—is but a memory and can recall nothing but the thoughts of three grand and glorious days of pleasure on the seashore at Santa Cruz. Everybody, as always, had a good time.

Conversation regarding the 1926 Outing is fast drawing to a close. The Builders and their friends are running short of conversation and the Committee on Arrangements is completing the financial wind-up of the three-day festival.

Now comes Clarence F. Pratt, better known as Sandy Pratt—the "mayor of Westwood Park"—originator of "Builders' Day" and president of the Pratt Building Material Company of San Francisco, with offices in the Hearst Building, Phone Number Douglas 300, which is "easy to remember."

Sandy, as you might already know, is one of California's ardent boosters for the State Fair held annually at Sacramento. Also Sandy has a rock plant somewhere in the vicinity of Sacramento and he does a big business in this city. Naturally he is a booster for the Capitol City.

Well, Sandy says the builders need a change of climate over the usual three-day event and suggests Sacramento as the most appropriate location in the State to stage the 1927 "Builders' Day" Outing.

Sandy says Sacramento is the central distributing center of Northern California for materials used by the construction industry when San Francisco and Oakland is not considered. Sandy further declares they undertake some large construction projects in the Capitol City and are at the present time leading other cities of similar size on the Pacific coast when it comes to piling up a monthly construction valuation.

In addition to this, Sandy points out, Sacramento will be staging the state fair when the builders and their friends are in that city to celebrate their annual holidays.

Headquarters would be maintained at the Senator Hotel, Clarence says, rated as one of the most modern west of Chicago. An excellent table at all hours coupled with moderate prices would make the Senator an ideal place for the outing, according to Clarence.

HERE YOU HAVE A SUGGESTION—WHAT IS YOUR OPINION?—From Daily Pacific Builder of Sept. 17, 1926.

SACRAMENTO CHAMBER OF COMMERCE
E. C. Porter
Secretary-Treasurer
September 27th, 1926

Mr. Clarence F. Pratt,
Hearst Building,
San Francisco, California,
Dear Sandy:—

We are counting on you to bring the next annual convention of the California Builders' Exchanges to Sacramento.

I am enclosing a copy of a letter which I am sending out to the members of the Builders' Exchanges and we urge you to do everything in your power to reinforce our invitation.

We will be glad to do everything possible to give your people a wonderful time and to make the next annual convention a very distinctive and interesting one.

E. C. PORTER, Secretary Manager.

READ THE above.

ABOUT "BUILDERS' Day."

OR THE annual outing.

OF THE engineers, architects.

CONTRACTORS AND building material men.

OF ALL California.

JACK FARRELL of the "Builder."

WROTE ALL the above.

EXCEPT LIVEWIRE Porter's letter.

FROM THE Chamber of Commerce.

OF SACRAMENTO (Los Angeles No. 2).

SANDY PRATT favors Sacramento.

FOR OUR next September outing.

SACRAMENTO HAS its capitol.

SURROUNDED WITH over thirty acres.

OF BEAUTIFUL trees and flowers.

OUR (NOT their) State Fair.

WILL BE in full swing.

AND THE Hotel Senator.

IS THE last word.

IN GOOD hotels.

WITH WONDERFUL food and everything.

AND BESIDES you.

CAN GO out one mile.

TO THE American River.

AND SEE the sand plant.

OF THE Pratt Building Material Co.

OR DRIVE twenty miles.

TO PRATTROCK (near Folsom).

AND SEE Sandy's rock plant.

THAT PRODUCES rock and gravel.

FROM THE boulders.

LEFT BY the gold dredgers.

"I THANK you."

"Builders' Day" (originated by Sandy Pratt) has always been held at or near Santa Cruz where bathing girls abound. Sandy suggests we go to Sacramento next September and have a chariot race for girl stenographers who work for firms in the building world. Cleopatra used to go "driving" with her friend, Mark Anthony, or we could have a horse race between a contractor and an engineer.

HOTELS

Plans Being Prepared (Bldg. Leased)
HOTEL Cost, $480,000
SAN FRANCISCO. N Eddy St. — W Taylor St.
Twelve-story and basement steel frame Class A hotel building (Coffee shop on 1st floor; garage in basement; 240 rooms).

Official Proposals

NOTICE TO CONTRACTORS

(Dredging—Pearl Harbor)

The Bureau of Yards and Docks invites attention to the fact that it will open proposals, December 1st, 1926, on Specification No. 5282, "Dredging, Naval Operating Base, Pearl Harbor, T. H." The work includes dredging to increase the depth and width of the channels adjacent to and at the Naval Operating Base and includes also the disposal of the dredged material. The entire project involves approximately 8,624,000 cubic yards. The specifications provide for the receipt of proposals for the entire work and also upon four subdivisions each of which involves from 1,486,000 to 2,670,000 cubic yards.

In the event that this work is of interest to your firm, you should forward immediately to the Bureau of Yards and Docks, Navy Department, Washington, D. C., to the Commandant, Naval Operating Base, Pearl Harbor, T. H., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for $50, payable to the Chief of the Bureau of Yards and Docks, as security for the safe return of the drawings and specification, which will be forwarded as soon as available.

Prospective bidders on the West Coast should make application at the Navy Yard, Mare Island, Calif., for the bidding data.

NOTICE TO CONTRACTORS

(Bolinas Public Utility District — Marin County)

Notice is hereby given that on the 5th day of April, 1926, the Board of Directors of Bolinas Public Utility District adopted a report of the engineer of the district for the construction of a public utility, to-wit: a water supply system for the district, and that thereafter, on the 9th day of August, 1926, the Board of Directors of the district adopted a supplemental report of said engineer as part of said report for the construction of said public utility and that both of said reports, as so adopted, are now on file with the clerk of Bolinas Public Utility District at his office in the Town of Bolinas, Marin County, California, and are open for examination by all who may desire to make bids for the construction of said public utility for the district.

Notice is further given that said Board of Directors of said District, by resolution adopted on the 4th day of October, 1926, has called for bids for the construction of said public utility, that said bids shall be sealed and shall be accompanied with a certified check payable to the district in the sum of ten per cent of the amount bid to be retained by the district in the event that the bidder is the successful bidder and shall fail thereafter to enter into a contract with the district for the construction of said public utility, that said bid shall be delivered to the clerk of the district at his said office not later than **October 18th, 1926 at 6 o'clock P. M.**, that said bids will be opened at the regular weekly meeting of the Board of Directors of the district on October 18, 1926, at the hour of 8 o'clock P. M., and at that time or at the weekly meeting thereafter, to-wit, on October 25, 1926, at the hour of 8 o'clock P. M., the contract for the construction of the project will be awarded to the successful bidder. Notice is further given, however, that the Board of Directors reserves the right to reject any and all bids.

Said bids shall be for the construction of said public utility system in accordance with the said report of said engineer and the supplement thereto as aforesaid, and in accordance with plans and specifications and working details adopted by said Board of Directors on October 4, 1926.

Copies of said reports, plans, specifications and working details may be seen at the office of Harmon S. Bonte, the district's engineer, in the Balfour Building, San Francisco, California.

By order of the Board of Directors.
Dated: October 4, 1926.
(Seal) GEORGE L. SMITH,
Clerk of Bolinas Public Utility District

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rates: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section

NOTICE TO CONTRACTORS

(Merced Irrigation District)

Notice is hereby given that sealed proposals for the doing of the work and/or for the furnishing of the equipment or materials described in the schedules hereinafter set forth will be received by the Board of Directors of Merced Irrigation District, at its office in the Barcroft Building, in the City of Merced, State of California, at any time up to **10 o'clock a. m. of Tuesday, October 26, 1926,** at which time and place all bids so received will be opened in public by said Board. Thereafter said Board will let said work, either in sections as indicated in the schedules below, or as a whole, to the lowest responsible bidder or bidders, but said Board reserves the right to reject any or all bids and readvertise for proposals or proceed to construct the work under their own superintendence.

The work for which proposals are hereby invited is divided into seven schedules as follows:

Schedule No. 1.—Drilling and casing of ten, more or less, drainage wells situated in the vicinity of Atwater, Winton and Livingston.

Schedule No. 2—Furnishing seven, more or less, drainage pumps and motors complete.

Schedule No. 3—Clearing of approximately one mile of Livingston drain, south of Livingston.

Schedule No. 4—Clearing of approximately four miles of the Atwater drain, south of Atwater.

Schedule No. 5—Construction of approximately 11 miles of open drain southwest of Merced, consisting in part of the deepening and widening of certain natural water-courses.

Schedule No. 6—Construction of three reinforced concrete siphons on the Fairfield canal.

Schedule No. 7—Consisting of approximately 3½ miles of concrete lining of canals.

Said work is more particularly described in the specifications and plans therefor, which may be seen at said office of said distrct. Copes of said specifications and plans may be obtained at said office upon deposit of Five Dollars for each copy, the deposit to be refunded upon the return of the specifications and plans in good condition not later than the date of receiving bids.

Any bidder may submit a proposal for doing the work in any or all of said schedules. A bidder to whom a contract for any of said work may be awarded must furnish bonds as provided by law, to-wit: A bond in the sum of at least one-half the estimated contract price to secure the payment of the claims of materialmen, mechanics and laborers, and a bond in the sum of at least one-fourth of the estimated contract price conditioned upon the faithful performance of the contract, except that the contractor on Schedule No. 2 will be required to furnish only the bond for faithful performance of the contract.

Each bid must be accompanied with cash or a certified or a cashier's check, payable to Merced Irrigation District, for an amount equal to at least five per cent of the amount of the bid as a guaranty that, if the bid is accepted, the bidder will, within five days after its acceptance, enter into a contract with the district in the form attached to said specifications and furnish the bonds aforesaid.

The quantities given in the aforesaid schedules are approximations only but will be used in computing the amounts of the deposit and the bonds hereinbefore required.

Bids must be on the proposal forms attached to the specifications, and must be in sealed envelopes addressed to the Board of Directors of Merced Irrigation District, and marked to indicate that each is a proposal for the doing of said work.

Dated at Merced, California, October 6, 1926.

By order of said Board of Directors.
H. P. SARGENT,
Secretary of Board of Directors of Merced Irrigation District.

ing fixtures and other work specified in detail under this Department.

Contractors desiring to secure copies of plans and specifications as specified in Department No. 1 will deposit with the County Clerk the sum of Twenty-five Dollars ($25.00) and will be restricted as to the length of time they may retain these plans and specifications for Department No. 1, to 12 days.

Contractors desiring to secure copies of plans and specifications as specified in Department No. 2 will deposit with the County Clerk the sum of One Hundred Dollars ($100.00) and will be required to return said plans and specifications for Department No. 2 in good condition to the office of the County Clerk not later than the fifth day after the bids are open for the above specified work.

Deposits of Contractors failing to return said plans and specifications to the office of the County Clerk within the time limit as specified in this notice will immediately become forfeited to the County of Alameda.

Each bid must be accompanied by a check for at least ten per cent (10%) of the total amount of the bid or proposal certified to by some responsible bank and made payable to Geo. E. Gross, clerk of the Board of Supervisors, to be forelfed to the County of Alameda as agreed and liquidated damages should the party or parties to whom the said contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract.

The Board reserves the right to reject any and all bids.

Dated: October 4th, 1926.

GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County, California.

NOTICE TO DEALERS IN ELECTRICAL APPARATUS

(Transformers—City of Alameda)

2 For painting the interior and exterior of the Court House buildings.

3 For re-roofing the Court House Building with a composition roof.

All work to be done in the alterations and additions on the Marin County Court House, situate in the City of San Rafael, County of Marin.

All in strict accordance with the plans and specifications therefor dated October 5, 1926.

Each bid shall be accompanied by a certified check drawn on any responsible bank or a contractor's Bond for an amount not less than ten per cent of the aggregate of the proposal and made payable to the order of the Chairman of the Board of Supervisors of Marin county as a guarantee that the bidder will enter into a contract for the performance of said work.

The successful bidder must, at his own cost and expense, furnish a bond satisfactory to the Board of Supervisors of Marin county in an amount not less than 50% of the amount bid, for the protection of laborers and material men, also a bond not less than 25% of the amount of his bid as a guarantee of faithful performance of contract and shall give satisfactory assurance that such bidder is fully covered by insurance under the Workman's Compensation Act.

The Board reserves the right to reject any or all bids.

Dated: October 5, 1926.

ROB. E. GRAHAM,
Clerk of the Board of Supervisors, of Marin County.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the California Highway Commission, at the office of the Division Engineer, 211 State Building, San Francisco, California, until **2 o'clock P. M. Monday, October 18, 1926** at which time they will be publicly opened and read, for performing work as follows:

Marin and Sonoma Counties (IV Marin-Sonoma 8 A) the following structures to be constructed at the Petaluma Creek Bascule Bridge:

Two (2) pile and timber fenders, complete.

Four (4) pile dolphins.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the Commission. Each bid must be accompanied by cash, or a certified check made payable to the "Secretary, California Highway Commission", for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CALIFORNIA HIGHWAY COMMISSION
R. M. MORTON,
State Highway Engineer.
By Jno. H. Skeggs, Division Engineer, Division IV.

Dated: October 6, 1926.

NOTICE TO CONTRACTORS

(Shasta Union High School District)

Notice is hereby given that sealed bids will be received by the Board of High School Trustees of the Shasta Union High School District for the erection of a group of buildings in accordance with plans and specifications on file in the office of the Secretary of the Board of Trustees in the High School Building at Redding, California, and also in the office of Dean & Dean, Architects, 1406 California State Life Building, Sacramento, California.

The said work is to be done on the property owned by the District, about one mile Northwest of the business district, situated in the City of Redding, State of California.

On a deposit of $20 with the Board of Trustees, or the Architects, complete sets of plans and specifications may be had by any prospective bidder, and retained for a period of 20 days. The deposit will be returned to the bidder on the return of the plans and specifications in good condition.

The work is segregated under four separate heads, and bids are to be received for each division separately, as follows: (1) General Contract; (2) Plumbing; (3) Heating and Ventilating, and (4) Electrical Work. Contractors applying for plans must give the name of the work in which they are interested.

Bids must be made on proposals obtained at the office of the Architects, and be signed by the bidder, accompanied by a certified check for at least 10% of the amount of the bid or proposal, certified to by some responsible bank or banker, and made payable to the Secretary of the Board of Trustees of the Shasta Union High School District, said check to be forfeited to and retained by the District, should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award, or to give bonds as required. Bids must be plainly marked on the exterior "Proposal for (name of segregation) for Shasta Union High School Buildings."

All bids must be filed with the Secretary of the Board of Trustees of the Shasta Union High School District, Redding, California, **not later than 7:45 P. M., Tuesday, Nov. 9th, 1926.**

The Board of Trustees of the Shasta Union High School District reserves the right to reject any and all bids.

BOARD OF TRUSTEES,
Shasta Union High School District, M. E. Luton, Secretary.

NOTICE TO BIDDERS ON SCHOOL FURNITURE

(Berkeley School District)

Notice is hereby given that the Board of Education of the City of Berkeley and of Berkeley School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, 2133 Allston Way, Berkeley, California, **until the hour of 8 o'clock P. M. Monday, October 25th, 1926,** for the furnishing of three hundred and fifty (350) auditorium chairs, according to the specifications therefor on file at the office of said Secretary to which reference is hereby made.

All bids must be made on forms furnished on application to said Secretary at the address above given and must be signed by the bidder and accompanied by a certified check certified to by some responsible bank or banker and made payable to the Berkeley School District of Alameda County to be retained by said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract or any bond required by law. The amount of said certified check shall be for at least ten (10%) per cent of the amount of the bid. Bids will be opened by said Secretary on Monday, October 25th, 1926, at the hour of 8 o'clock P. M., in the Board rooms, 2133 Allston Way, Berkeley, California.

The Board reserves the right to reject any and all bids or any or all items of such bids.

By order of the Board of Education, October 4th, 1926.

GEORGE S. MOUSER,
Secretary of the Board of Education.

NOTICE TO CONTRACTORS

(Bulkhead Wharf—Piers Nos. 23 & 25)

Office of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, California, October 13, 1926.

Sealed proposals or bids will be received at this office at or prior to **2 o'clock p. m., Thursday, November 4, 1926,** for furnishing necessary materials, labor and equipment and constructing Bulkhead Wharf Building for Piers 23 and 25, on the Waterfront of the City and County of San Francisco, in accordance with plans and specifications approved by the Board August 26, 1926, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consists in removing such portions of existing structures as are within the lines and which will interfere with the construction of the new work, furnishing all necessary materials (except Portland cement, which will be furnished to the Contractor by the Board), labor and equipment for constructing Bulkhead Wharf Building for Piers 23 and 25.

The materials to be used in this work shall consist of the requisite quantities of Portland cement (which

will be furnished to the Contractor by the Board), sand, hydrated lime, metal lath, Douglas fir lumber, redwood lumber, sugar pine, structural steel, castings, roofing materials, galvanized iron, glass, painters' materials, rods, bolts, spikes, nails, window frames, fiber, etc.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary, at the office of the Secretary, Room No. 17, Union Depot and Ferry House at or prior to 2 o'clock p. m., on Thursday November 4, 1926, at which time and place the bids be publicly opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing $10.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for Constructing Bulkhead Wharf Building for Piers 23 and 25."

WM. A. SHERMAN,
JOHN B. SANFORD,
J. SHERMAN McDOWELL,
Board of State Harbor Commissioners.
FRANK G. WHITE, Chief Engineer.
J. L. PHELPS, Secretary.

NOTICE TO CONTRACTORS

(Washington Union High School)

Notice is hereby given that sealed bids will be received by the Board of Trustees of Washington Union High School District, of Alameda County, California, at the office of the President of said Board, Mr. Fred F. Dusterberry, in the present High School Building, in the town of Centerville, Alameda County, California, **until Saturday, the 16th day of October, 1926, at two o'clock P. M.**, at which time said bids will be opened for furnishing all labor and materials and mechanical workmanship required for the erection and completion of a one-story concrete shop building for the Washington Union High School District, to be erected on the grounds of the Washington Union High School Building, at Centerville, California, in said High School District.

Bids will be received on each of the following departments of the work:

Department 1.—A general contract, including all work excepting plumbing and electric work.

Department 2. — Plumbing work, drains, etc.

Said work shall be completed in accordance with the complete plans and specifications for said work on file and open to inspection at the office of the architect, Henry H. Meyers, 1201 Kohl Building, San Francisco, California, and on file with the President of this Board at said High School Building, hereinbefore mentioned. Copies of said plans and specifications may be obtained at either place by depositing with the undersigned Secretary of the Board, or with said architect, the sum of twenty ($20.00) dollars. Contractors will be restricted as to the length of time they may retain the plans and specifications to twelve (12) days for Department 1 and to six days for department 2. Material men and subcontractors who secure these plans by making the said deposit will be restricted to three (3) days' time. If the plans and specifications are not returned to the President of said Board or to said Architect within the time specified or are returned in a mutilated or damaged condition, the deposit shall be retained by the said High School District as agreed and liquidated damages for said multilation or detention and will be immediately used for the purchase of a new set of blue prints and specifications. Contractors may submit bids on any one or both departments. The Board of Trustees reserves the right to award the contract as a whole or in separate contracts as may appear to the best interests of the District.

Each bid must be made on proposals obtained at the office of the Architect or at the office of the President and must be signed by the bidder and accompanied by a certified check for at least ten per cent. (10%) of the amount of the bid or proposal, certified to by some responsible bank or banker and made payable to the Washington Union High School District of Alameda County, California, to be retained by said High School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give the bond required for the faithful performance of the contract or any bond required by law.

Bids will be opened by the said Board of Trustees of Washington Union High School District on Saturday, the 16th day of October, 1926, at the hour of two o'clock P. M., at the office of the President, located in the present High School Building in the town of Centerville, Alameda County, California, in said High School District.

The Board reserves the right to reject any and all bids or any or all items of such bids.

Dated: September 16th, 1926.

F. V. JONES,
Secretary of the Board of Trustees of Washington Union High School District of Alameda County, California.

NOTICE TO BIDDERS

Richmond Union High School District

Notice is hereby given that the High School Board of the Richmond Union High School District of Contra Costa County, California, hereby calls for sealed proposals to be delivered to the Secretary of said Board in the Lincoln School, 235 Tenth St., Richmond, California, **until the 25th day of October, 1926, at 8 o'clock P. M.**, at which time and place said proposals will be opened, for the supplying of all material and the construction of a group of high school buildings to be erected on a portion of lot 99 of the San Pablo Rancho, located at 23rd and Tulare Streets in said High School District, in accordance with plans and specifications prepared by Louis S. Stone and Franklyn E. Warner, authorized architects, 337 17th Street, Oakland, California.

Said plans and specifications may be seen at the architects' office, at the office of the High School Board, at the Builders' Exchange of Contra Costa County, 248 11th St., Richmond, California, or at the Builders' Exchange, 354 Hobart St., Oakland, California, during office hours.

Sealed proposals will be received on the following divisions of the work: Div. 1, General Work; Div. 2, Plumbing; Div. 3, Electrical Work; Div. 4, Heating; Div. 5, Linoleum; Div. 6, Pumping Plant. Proposals must be signed by the bidders on blanks obtained from the Architect.

Proposals must be addressed to W. T. Helms, Secretary of the said High School Board, and must be accompanied by a certified check, certified to by some solvent bank, and made payable to the Richmond Union High School District, to be retained by said high school district as agreed as liquidated damages should the party or parties to whom the contract or contracts are awarded fail to enter into the contract within ten (10) days after the date of award, or give the bonds required by law for the faithful performance of said contract. The amount of said certified check shall be for at least ten (10) per cent of the total amount of the highest bid submitted by the bidder. A bidders bond will be accepted in lieu of a certified check.

The Board reserves the right to reject any or all bids.

The Architect will require a deposit of $50 for Division 1, and a deposit of $25 for each of any of the other divisions, when plans and specifications are taken from his office.

By order of the High School Board of the Richmond Union High School District, California.

W. T. HELMS, Secretary.
Richmond, Calif., Sept. 13, 1926.

SAN JOSE LUMBERMAN IN BAD CHECK TANGLE

Said to have been adjudged a bankrupt in the United States District Court at San Francisco recently, C. M. Cook, president of a San Jose lumber concern, was arrested in the latter city on a charge of issuing a worthless check.

H. C. Cronkhige alleged that Cook had given him a check for $75 for labor and that it had been returned from the First National Bank of San Jose marked "no funds."

Hearing upon Cook's affairs is to be held in San Jose next week before George W. Waldorf, referee in bankruptcy. At the time he is said to have been adjudged a bankrupt, Cook's liabilities are reported to have been listed at $397,000 and his assets at $200,000.

LAMP LOCK BEING MARKETED

The Ren-Lock, a lock for electric light bulbs to prevent them from being removed by unauthorized persons, is being manufactured and marketed by the Ren Manufacturing Company, Lyceum Bldg., Winchester, Mass. The Ren-Lock fits standard brass and porcelain sockets but not molded composition sockets. There are only two parts, a coiled spring and a grooved ring. A special punch is used to attach the lock to the socket. Standard electric light bulbs of all sizes may be used with the lock as it grips the base of the lamp only.

LUMBER CHIEF DIES

James P. Barber, president of the Northwestern Lumber Company, died in Eau Claire, Wis., Oct. 11. He was 79 years old. Barbar was a member of the Missouri delegation to the Republican National Convention which nominated James G. Blaine for president.

APPRECIATION OF ARCHITECTURE

Members of the Oregon Chapter of the American Institute of Architects have induced the Portland School Board to carry out a contest between students, the prizes going to those who are able to name the types of architecture carried out in that city's best designed buildings. The competition will prove of benefit to the students and will impart to them a keener appreciation of well planned structures. Architects should sponsor similar contests in other American cities.

The average business man has about as much knowledge of architecture as a grand opera star has of the art of hog calling. And for that reason there is altogether too little appreciation of good building design. Almost anything passes today with those who do not take pleasure in viewing structures that have been given careful architecture treatment. Conglomerates of every known type of architecture are found abutting architecturally perfect structures. If school children were given sufficiently interesting instructions to permit them to distinguish one type from another, the effect of that teaching would be strikingly evidenced in future buildings that they will build when they occupy the positions now held by their fathers. Box-like edifices with no ornamentation other than a stock cornice would not meet with the approval that they do now.

Architects throughout the country should follow Portland's example and endeavor to impress the younger generation with an appreciation of good architecture. The move is entirely practical and should do much for architecture in the days to come.—Seattle Journal of Commerce.

BRICK STRUCTURES SURVIVE FLORIDA HURRICANE

"Not one brick structure was damaged by the Florida hurricane," said Major L. B. Lent, Engineer of the Common Brick Manufacturers' Association of America, who recently returned from an inspection of the storm ridden section of Florida.

As soon as it was possible to get to Florida after the storm, Major Lent was in Miami with a camera, taking pictures and investigating the effects of wind and water upon various types of building construction.

"Miami and surrounding territory teaches the same lesson that did Santa Barbara, Tokio and other cities recently visited by disaster," said Major Lent. "All kinds of good construction performed satisfactorily and all kinds of cheap construction disappointed. Miami built in a hurry and went down in a hurry. Although the Miami building code offers adequate protection against flimsy construction, the growth was so rapid that complete or thorough inspection on the part of the building department was apparently impossible.

"The great havic was wrought in synthetic products which 'got by,' in the high-pressure demand for materials. Concrete block and synthetic brick failed miserably, but real brick, the burned clay material, scored 100%. The number of brick buildings was not large, because Miami is far removed from the source of brick supply, but it was used in some of the most substantial downtown buildings, and in a few of the better residences in Miami and Miami Beach. These buildings were in the very heart of the storm area. In some cases brick buildings which had been enlarged with additions of other material had their additions completely torn away while the original brick building stood undamaged. Brick walls withstood the wind pressure and the rush of the waves which were blown ashore by the storm."

LEASE ASSURES CONSTRUCTION OF FORD PLANT

At the end of three years the Ford Motor Company will be operating a $2,000,000 plant on the Richmond waterfront, employing a minimum of 800 men, Fred Parr of the Parr Terminal Corporation, told the city council of Richmond in accepting a 50-year lease of the outer and inner harbor of Richmond.

He read to the council a telegram from J. Crawford, assistant to the superintendent of the Ford plant in Detroit, accepting Parr's plan for the erection of the plant as soon as the property is available. The property, developed tide land, will not be available in time to have the plant in operation in less than three years, Parr said.

The lease of the harbor, which the council approved, gives title to the outer and inner harbor to Parr and the Parr Terminal Corporation at a cost of about $2,000,000. When Parr offered some time ago to take over the harbor, he guaranteed to develop the land and invite big industries to locate there. His announcement concerning the Ford plant was in affirmation of that guarantee.

The lease is drawn on a percentage basis, the city and Parr to share in the profits. Under it the city agrees to make certain improvements, including the dredging of the channel and the maintenance of the property, at an expense of about $25,000 a year. It is provided that any such improvements will be made under bond issues voted by the people.

$4,248,192 SPENT FOR SCHOOLS IN OAKLAND

Of the $9,600,000 voted in 1924 for new schools, expenditures and appropriations made to date total $4,248,192.72, Donald B. Rice, business manager of the Oakland Board of Education, announces.

Rice, reporting to the Board, said that 13 schools containing 129 classrooms and costing $1,059,018.76, have been completed and occupied. Thirteen other buildings having a total of 201 classrooms and estimated to cost $1,846,272.70 are under construction.

Plans and specifications for 36 more classrooms, 18 of which will be in the Elmhurst addition, are ready for approval by the board, while plans for the new Oakland high and additions to Lakeview and Lowell junior high schools are in the hands of architects.

The last named group is expected to cost $1,395,000.

Out of bond funds improvements amounting to $147,272 have been made at 28 schools, and $177,605 has been spent on equipment for new structures.

Rice stated that overhead expenses in connection with the building program have been held down to 6 per cent.

ALL WOOD HOME DESIGN PRIZE IS OFFERED

A prize of $2500 is offered by C. W. Stimson, Seattle lumberman, for an all wood home design which will best present the possibilities of woods native to the Pacific Northwest. Stimson offers the prize through the West Coast Lumber Trade Extension Bureau of Seattle. It is to be awarded in a nation wide contest. The contest will begin in January and close July 1, 1927. Other prizes in proportion, the bureau officials state, will be awarded.

TURLOCK DISTRICT TO BOND FOR ADDITIONAL POWER

Petitions are being circulated in the Turlock Irrigation District, Stanislaus County, seeking an election to vote bonds of $600,000 of which $514,000 would finance the construction of two additional units at the Don Pedro power plant and $86,000 to purchase a second bank of transformers for the Turlock substation and the construction of approximately 26 miles of distribution lines.

STUDY CONCRETE AGGREGATES

The Delaware State Highway Department is engaged in research to determine the relative strength of four kinds of crushed stone and of a number of different sands in concrete.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

Fresno Builders Gain Members For Reorganization of Exchange

Reorganization of the Fresno Builders' Exchange is virtually assured as a result of a meeting on Oct. 11 of more than twenty-five members of the exchange.

The reorganization committee, chosen some time ago, reported that funds sufficient to carry on work of the exchange have been raised, with practically all old members enrolled and many others pledged to membership. The question of finances entered into the movement to disband the organization several weeks ago.

Election of directors and officers, scheduled for Oct. 11, was postponed until Oct. 24th. The exchange members also decided to select a secretary with an intimate knowledge of building conditions.

The reorganization committee will continue its work of securing members and raising finances and will submit a complete report at the next meeting.

Whether the reorganized exchange will vote to sign an agreement with the Fresno Building Trades Council to govern working conditions and wages of union crafts employed in the building industry is still a matter of conjecture. There appears to be a difference of opinion among the members as to whether it would be feasible to renew the Fresno plan agreement in view of activities of the Valley Industrial Association, American plan body, it is said.

After the directors and officers are elected, it is believed a vote will be taken to determine whether an agreement will be sought.

The trades council appointed a committee some time ago to negotiate with the exchange for an agreement, but the entrance of the industrial association into the labor controversy, and the proposed disbanding of the exchange have forestalled action on the unions' overture.

SEEKS STATE REFORESTATION

A plea for a definite state reforestation program was made before the third annual conference of home builders and subdividers at Del Monte by Mark Daniels, San Francisco landscape engineer and former superintendent of national parks. The conference was in conjunction with the state realty dealers' convention. Daniels asked that forests destroyed by fire and lumbering operations be replanted, both for the protection of watershed and with an eye to making them even more beautiful than they were in their primal state.

L. A. SPECIALTY CONTRACTORS NAME OFFICERS

At the annual meeting of the Los Angeles Building Specialty Contractors Association J. E. Dwan and W. C. Lea were re-elected chairman and vice-chairman respectively. E. R. Kuns was elected secretary-treasurer succeeding G. R. Brandin who had served in that office the past year. H. F. Hallock was elected assistant secretary-treasurer and the following were elected to serve as executive committee for the coming year. Norwood W. Howard, L. G. Brodfield, Frank R. Peck and C. P. Helpman.

The building specialty contractors are affiliated with the Construction Industries Council of Southern California, which recently effected permanent organization to promote in all matters of common interest the general welfare of the construction industry. The construction council is composed of delegates from associations of architects, general contractors, specialty contractors, material dealers, bankers, insurance and bond companies and all other elements engaged in the construction business in Southern California.

PUBLIC WORKS CONTRACTORS OF NORTHWEST TO MEET

The Public Works Contractors Association of Washington will hold its annual convention on October 29 at Vancouver, B. C., at the same time as the Pacific Logging Congress. The Association is aiding the work of the Associated General Contractors of America and attempting to solve some of the problems with which public work contractors have to deal, such as day labor, promotion of contract work, engineers' specifications and inspection.

1926 CONSTRUCTION LOSS WILL RUN INTO MILLIONS

Widespread losses running into millions of dollars will occur this year as a result of muddled conditions in the construction industry, it was reported at the Kansas City, Mo. meeting of the Associated General Contractors of America.

"Practices which have been allowed to exist for years are to exact their toll upon the seven billion dollars which it is estimated will be spent for construction during 1926," declared Gen. R. C. Marshall, Jr., Washington, general manager of the organization. "The building public, as well as those actively engaged in construction operations, will feel the effect of promiscuous issuance of surety bonds, misuse of lien laws, incomplete or perplexing contract provisions and disregard of the competitive contract system by many public officials," Gen. Marshall stated.

ELECTRICAL MEETING SCHEDULED

The next meeting of the Pacific Coast Electrical Association, commercial section, will be held at Santa Cruz November 12 and 13. Decision to hold the next meeting of this body in Santa Cruz was arrived at at its recent meeting in Fresno.

QUALITY NOT QUANTITY IN THE MEMBERSHIP IS AIM

"Quality of membership rather than quantity is a necessity if the Berkeley Builders' Exchange is to develop into the kind of organization we want and one which will command the respect of the community," declares Charles W. Knights, new president of the organization at the Oct. 12 meeting of that organization.

"The better the men in the association the stronger it will grow," said Knights. "We should only look to the best men in our community and those who are not only interested in the building industry but in the city. Only men whose responsibility and foresight prompts them to support local institutions will make the highest type of members.

"Confidence must be thoroughly established with the public. Then a recommendation to the public from the Berkeley Builders' Exchange will mean more. Our policy should be to charge a fair price for competent work. We must be conscious of fair dealing and fair charging. Then we will build well."

Captain George Baldwin, one of the oldest engineers of the Pacific Gas and Electric Company, gave an interesting description of hydro-electric development in California at the meeting. His address was illustrated with picture slides.

PRATT ROCK & GRAVEL COMPANY PURCHASE SECOND PLANT

Clarence (Sandy) Pratt, President of the Pratt Building Material Company and the Pratt Rock & Gravel Company, producers of sand, crushed rock and gravel, announces a second purchase for his companies of another plant. The latest addition is the sand and gravel plant of the American River Sand & Gravel Company, located at Mayhew, Sacramento County. This company was owned and operated by the late William S. Hatch, President of the Hatch Warehouse Company, and George S. Tyler. This new property has rail connections and controls over a half mile of land along the American river, and a deposit of over 2,500,000 tons of gravel and sand is on the property.

About two weeks ago Pratt announced the purchase for his companies of the Vulcan Rock Company's property at Hoyt, Solano County, where a cementing road rock, for state and county highways is produced.

From the new Pratt plant on the American river, sand and gravel for building and road construction will be shipped.

Besides the above properties the Pratt Company has sand, crushed rock and gravel plants at Sacramento, Marysville, Prattrock (near Folsom) and Prattco (Monterey County). Their central office is in San Francisco and Howard W. Senter is secretary and Clarance Pratt president of the four above companies.

Mrs. Fred L. Gribble, wife of Fred Gribble, Bakersfield general contractor, died at the Lane Hospital, San Francisco, Oct. 18, following an illness of two months.

Survey Of Home Building For First Six Months Of 1926 Completed

(Special Correspondence to Daily Pacific Builder)

The Bureau of Labor Statistics of the United States Department of Labor has just completed the compilation of data relating to building permits issuer during the first six months of 1926, in 78 cities which had a population of 100,000 or over, according to the Census Bureau estimate of July 1925. In these 78 cities with an estimated population of 31,577,223, permits were issued for new housekeeping dwellings to accommodate 207,231 families in the first half of 1926. This is at the ratio of 65.6 families per 10,000 of population. The average per capita expenditure for new housekeeping dwellings in this six months' period was $28.43.

Nine of these cities provided housing for 100 or more families to each 10,000 of population, Los Angeles leading with 177.9. New York City provided for 67,944 families or at a rate of 114.7 families to each 10,000 of the city's population. Other cities with ratio of more than 100 families to each 10,000 of population are San Diego, Calif., 157.1; Houston, Tex., 125.1; Yonkers, N. Y., 144.8; Detroit, Mich., 116.9; Dallas, Tex., 108.4; Portland, Oreg., 102.7; and Oakland, Calif., 101.2.

The largest per capita expenditure for new dwellings was shown in Yonkers, where $100.81 was spent.

Other cities showing a per capita expenditure of over $50 for new housekeeping dwellings were Los Angeles, $56.41; New York, $52.36; and Washington, $50.21.

A year ago similar figures were obtained for 68 of these 78 cities. There were 201,685 families provided for by all classes of housekeeping dwellings in the 68 cities in the first half of 1926 as compared with 209,969 in the first half of 1925, a decrease of 3.9 per cent.

In the 68 cities one-family dwellings provided for 89,807 families or 42.8 per cent of all families provided for by new dwellings in the first half of 1925 and for only 74,029 families or 36.7 per cent of all families in 1926. In striking contrast multi-family dwellings (apartment houses) provided for 74,236 families or 35.4 per cent of all families in the first half of 1925, and for 94,330 families or 46.8 per cent of all families provided for by new dwellings in the first half of 1926.

More money was spent in the 68 cities for apartment houses, hotels, factories, public buildings, public works, utilities and schools in the first six months of 1926 than in the corresponding period of 1925, while less was spent for one-family dwellings, two-family dwellings, office buildings and stores. While the amount of money spent for amusement buildings in the 68 cities increased from $45,259,987 in the first half of 1925 to $47,438,929 in the first half of 1926, or 4.8 per cent, the amount spent for churches decreased from $22,212,351 in the former period to $14,431,190 in the latter, a decrease of 35 per cent.

Pacific Coast cities included in the survey of the Department of Labor include Los Angeles, Oakland, San Diego, San Francisco; Portland, Ore., Seattle and Spokane, Wash.

The survey of these cities discloses the following facts: (a) estimated population as of July 1926; (b) families provided for in new housekeeping dwellings; (c) ratio of families provided for to 10,000 of population; (d) amount spent for new housekeeping dwellings; (e) city's per capita expenditure for new housekeeping dwellings:

Los Angeles, (a) 576,673 population as of 1920 census; (b) 10,257; (c) 177.9; (d) $32,531,530; (e) $56.41.

Oakland, (a) 261,000; (b) 2642; (c) 101.2; (d) $8,269,315; (e) 31.68.

San Diego, (a) 110,000; (b) 1728; (c) 157.1; (d) $5,328,087; (e) 48.44.

San Francisco, (a) 567,000; (b) 4348; (c) 76.7; (d) $14,611,318; (e) 25.77.

Portland, Ore., (a) 282,383, estimated population as of July 1, 1925; (b) 2901; (c) 102.7; (d) $11,439,175; (e) 40.51.

Seattle, Wash., (a) 315,312 population as of 1920 census; (b) 2803; (c) 88.9; (d) $9,410,885; (e) 29.85.

Spokane, Wash., (a) 109,000; (b) 369; (c) 33.9; (d) $1,213,269; (e) 11.13.

Eliminate Small Town Stuff From Building Laws–J. P. Horgan

(By John P. Horgan, Chief Inspector of Buildings, San Francisco Department of Public Works)

About 98 per cent of those who forever are running around advocating new building ordinances with a lot of new-fangled, untried ideas are kidding only themselves.

It would be amusing to watch them rant if it were not for the fact they do harm to the business of building. They keep prospective builders thinking that some change will be made that might effect their projects. They do harm to themselves too, but, like the printer who was so everlastingly busy turning out work he never took time to figure how he was prospering and didnt know he was losing money continually, these self-sufficient persons don't find that out.

The fundamentals of good building practice, safe construction and proper use of building materials constitute an age old art. About 95 per cent of all the recent ideas and untried modes of building advocated by persons unversed in the design and construction of buildings are nothing more than visionary dreams, theoretical. These persons seem either to take themselves too seriously or have a selfish end to serve.

Worthwhile new materials and worthwhile new methods of assembling materials ,are the exception, not the rule. When discoveries of this sort prove meritorious no difficulty is experienced in getting due recognition and proper amendments in building ordinances become almost automatic.

There have been innumerable federal, state and municipal commissions which have endeavored in vain to devise better and uniform building codes. A good many of these commissions have been self-appointed. They have tried to change classifications by designating buildings by some new high-sounding name or serial number, yet a school remains a school, a brick structure a brick building, and a steel frame is still Class "A" construction.

Every time some salesman fails to sell his product on the basis of merit and performance he begins to advocate new buildings laws or initiates a movement for changes in all building codes. He does not get very far with experienced building officials. Once in a while he might be clever enough to flatter a building official of a smaller city, but that is about all. If the building official accepts such bunk it shows small-town training.

By way of example, San Francisco, Oakland and Los Angeles may be cited. In the past 20 years these three cities have built more than 500,000 structures, ranging from insignificant garages to the most magnificent skyscrapers, the aggregate cost running into billions of dollars. The building ordinances in these cities regulating fundamentals of design and construction are all of 20 years or more standing. They have been in operation longer in many other cities.

Here is more than ample proof there is nothing radically wrong with these building ordinances. They have withstood the test of time. They have made possible the upbuilding of three great metropolitan cities. Any one or all of these building ordinances used in Los Angeles, Oakland and San Francisco could be copied and used profitably by other California cities. San Francisco enjoys the reputation of having as good a building law as any city in the country. Its phraseology is consistent with the law of the state as interpreted by the courts. Its form, arrangement and terms are understood by architects, builders and engineers.

It is a matter of history that when building laws are written by persons unversed in the technique of building and law enforcement such laws prove impractical and unworkable. A glaring example is furnished by the original state housing laws passed in California. The original laws proved so cumbersome and odious that practical experts had to rewrite them in the form of the acts of 1917, 1921 and 1923. This uncalled-for and unnecessary confusion kept builders in turmoil for several years. It was only two years ago that the housing laws were straightened out in a somewhat reasonable manner. And even now there are in the making more amendments to undo some erroneously-written provisions that serve no good purpose but do hamper the design of good building practice.

If a lot of new-fangled ideas were written into the building ordinances of California cities and their entire form and arrangement were changed in the manner that has been suggested by certain interests it would cause no end of confusion and it would take years to restore building construction to an even keel. Instead of pouring more bunk into the building laws, it is highly desirable to take the bunk out.

PORTLAND CEMENT ASSOCIATION MAKES APPOINTMENTS

The Portland Cement Association announces the following appointments in its general office staff at Chicago: C. R. Ege, manager advertising and publications bureau, succeeding H. C. Campbell, resigned; G. S. Eaton, assistant manager advertising and publications bureau; W. E. Hart, manager highways and municipal bureau (formerly highways bureau); F. R. McMillan, manager structural and technical bureau (formerly structural bureau); T. J. Harris, manager general educational bureau.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Application of 36 teamsters and chauffeurs, who handle building materials for the city, to have their wages increased from $7 to $8 a day is being considered by the San Francisco Department of Public Works. The request is endorsed by Material Teamsters' Union No. 216.

Cement shipments contributed 7,490,423 tons to the revenue freight carried by Class 1 railroads during the second quarter of 1926, figures just released by the Interstate Commerce Commission show. Brick and artificial stone contributed 5,850,360 tons, while asphalt to the extent of 827,373 tons was shipped.

Production of electric power in the United States for August, 1926, was 197,000,000 kilowatt hours per day average, a gain of 3.5 per cent over July and of 12 per cent over production of August, 1925. Water furnished 34 per cent of the power prodced this year in August against 32 per cent last year.

The cost of living in the United States which has been declining since November, 1925, from June to July decreased another eight-tenths of one per cent, and indications are that it may decrease further or at least remain fairly stable for the next few months, according to the monthly study of living costs made by the National Industrial Conference Board.

In engineering construction 1926 is destined to be the record year in the history of the industry. Contracts awarded from January 1 to October 1 for the entire country reached the unprecedented total of $2,178,579,000, against $1,848,907,000 for the corresponding period last year, Engineering News-Record reports. Minimum costs observed are $150,000 for commercial, residential, educational and other buildings, $40,000 for industrial buildings, and $15,000 for road improvements.

The greatest year in the history of building and loan associations was experienced during the twelve-months' period ending June 30, according to the report of A. E. Falch, building and loan commissioner. In the report he says: "During the last year the assets increased over $50,000,000, or more than the entire assets of the associations in 1920. During this time, too, more associations were licensed than during any previous pear, twenty-six corporations qualifying for charters, making the total at the close of the year 189, or 99 more than in 1920."

The "five-day week with six days' pay" has reached San Francisco David Crowley, general manager of the Crowley Shipbuilding Company, announces that he is preparing to put the new plan into effect in the shipyards in Oakland where the company employs approximately 200 men. In putting the five-day week into effect Crowley is also bidding for the services of more expert shipwrights, of which there is a dearth at this time. The shorter week without pay change will appeal to these skilled workers, Crowley says.

Plans to free itself from what it terms "judicial enslavement" were made at the Annual Convention of the Bricklayers, Masons and Plasterers International Union recently held at Atlantic City. The reference was to the injunction handed down by Federal Judge Hand at Washington, D. C., in 1922. The decree established working rules for the union and provided that the union could not limit the amount of work done by its members.

Paving of secondary roads to relieve over-burdened trunk line highways in congested districts will be one of the subjects to receive chief consideration at a joint meeting of the American Society for Municipal Improvements. The Asphalt Association, the Association of Asphalt Technologists and other organizations to be held in Washington November 8 to 12, next. The meeting wil bring together between two and three thousand road and street experts for the discussion of many problems confronting the municipalities of the country.

Moving swiftly to provide housing for growing population, 72 of the principal American cities spent nearly $900,000,000 for new dwellings the first six months of this year, the labor department announces. Permits were issued for new dwellings to accommodate 207,231 families, a survey showed. These will provide for 65 families in every 10,000 of population. Building of homes for single families has fallen off sharply in the last year. It was shown in comparative figures for 68 of the cities.

One of the largest flood prevention, irrigation and hydro-electric enterprises ever undertaken in Mexico has been announced in a contract signed by the Mexican Government and the Mexican Light & Power Company, according to word from Mexico City. The project calls for an expenditure of approximately 18,000,000 pesos. A concrete dam soon will undergo construction in the River Lerma near Contepec, in the State of Michoacan. The dam will impound 500,000,000 cubic meters of water which will be used to irrigate more than 50,000 hectares as well as furnishing power to a great hydro-electric plant.

The United States Attorney General has announced that the Supreme Court will renew the indictment of 1921, in order to reinstate the conviction of a number of Chicago contractors and members of the Carpenters Union and certain millwork manufacturers in the conspiracy to violate the Sherman Anti-Trust Act. In a statement given to the press, the Attorney General states that it was proved at the trial in the summer of 1923 that during 1918 the contractors of Chicago had agreed with the carpenters employed by them that no non-union millwork would be installed in Chicago. The case will probably be argued before the Supreme Court this month and a decision will be rendered in November.

Entering the second day of their meeting in Kansas City, Mo., the building contractors unit of the Associated General Contractors of America, devoted the entire day to the discussion of the quantity survey system designed to prevent radical errors from entering into the preparation of estimates of the amount of materials entering into structures. Leaders from all parts of the country outlined the experiences which they have met in this connection. The following resolution was adopted:

"Resolved, That the building section of the A. G. C. looks with interest on the advisability of bureaus of quantity survey in and under the supervision of chapters of the A. G. C. The section believes standardization of methods and results are essential and to this end advises that ways and means be provided to direct and educate all chapters as to its use, cost, utility and its limitations."

TRADE NOTES

Wm. J. De Boom will operate from 523 Commercial St., San Francisco, under the trade name of De Boom Paint Company.

Joe Lunardelli will operate from 1218 Le Conte Ave., San Francisco, under the trade name of Santa Rosa Concrete company.

W. E. Miller, manufacturer of gas floor furnaces, has purchased a site at East Seventh St. and 37th Ave., Oakland, and will erect a plant.

Walter M. Twohig and Jas. E. Guthrie wil operate from 1529 Pine St., San Francisco, under the firm name of General Sheet Metal Works.

A. Donald McLean, Geo. B. Lewis and James H. Crosett will operate from 661 Golden Gate Ave., San Francisco, under the trade name of M-C Hardwood Floor Company.

Clover Valley Lumber Company is constructing ten dry kilns as an addition to its plant at Loyalton, Sierra county. The new kilns will be ready for the coming Winter.

Table Mountain Clay Products Company of Thermalito, Butte County, has started burning 200,000 bricks, its initial output. H. M. Gamble of Santa Maria is in charge of plant operations. As soon as the 200,000 brick have been marketed the company will burn an experimental kiln to produce roofing tile, building blocks, face brick and other clay products. Lou F. Riley is president of the company.

Seabeach Electric Company, formerly operating from 1021 Guerrero St., has moved to new and larger quarters at 2625 Mission Street, near Twenty-second Street, San Francisco. The company does a retail electrical business as well as a contracting business and carries a complete line of lamps and fixtures.

The September issue of "Shapes of Clay," a monthly magazine published by Gladding, McBean & Co., 660 Market St., San Francisco, is off the press. The issue contains reproductions of some of the most outstanding buildings in the state which have recently been completed, featuring the use of terra cotta and pressed brick.

ALONG the LINE

City Manager A. J. Eddy of Berkeley recommends a $149,605 bond issue to finance construction of storm sewer extensions.

J. J. Jessup, former town engineer of San Anselmo, has received judgment against that town for $2550 due him for preparations of proceedings to improve streets in Morningside Court.

Dr. B. A. Skumokov, Russian irrigation engineer and professor of agriculture at Novecherkassakon-Don University, in Russia, was a recent visitor in Turlock to inspect irrigation and drainage methods in the Turlock Irrigation District.

Charles Kyson was elected president of the Architects' League of Hollywood at the annual meeting Oct. 6. John J. Roth was chosen vice-president and Horatio W. Bishop secretary-treasurer. These officers will serve for one year. The following directors were elected to serve for two years: Walter H. Parker, Ellet Parcher, Harold Miles, Rollin S. Holbrook and Edwin D. Martin.

Thirty members of the engineering department of the College of the Pacific at Stockton, recently made an inspection trip to the Carquinez Straits bridge at Crockett and the plant of the Pittsburg Steel Corporation at Pittsburg.

Henry E. Godegast, former city engineer of Santa Cruz, has secured payment from the city of his $6000 claim for engineering work in connection with the proposed Laveaga-Branciforte-East Santa Cruz drainage district project. When bids for the work were received by the city council they were rejected as being too high and the project indefinitely shelved by the city council.

East Side Water District of San Jose, at a recent election, voted bonds of $210,000 to finance construction of three reservoirs to feed from deep wells of the San Jose Water Company. The water will be lifted from the main in Alum Rock Avenue by a series of booster stations.

William T. Montgomery, former deputy housing inspector for the San Francisco Board of Health, has been appointed chief inspector to succeed E. J. Spaulding, resigned. Montgomery passed highest in a recent civil service examination for the position he has been promoted to. Spaulding resigned to take up work outside the municipal service, and Charles Roberts has been appointed to fill the vacancy of deputy housing inspector.

S. F. CONTRACTOR SUES SCHOOL BOARD FOR PAYMENT

V. Fassio, San Francisco contractor, doing business under the name of the Mission Concrete Company, has filed suit against the Alameda High School District and the Alameda Board of Education for $11,077. Fassio alleges that on October 31, 1924, he entered into a contract with the Board of Education to make certain alterations to the Alameda High School building and was to receive $38,980. He claims that $11,077 remains to be paid.

Ancient Stadiums Unsurpassed By Those Built In America

Although the United States has the largest stadiums built in modern times, and frequently fills them to overflowing, the records set by the ancients in this respect have not been surpassed. There are ten stadiums in the country at present each with a seating capacity of 50,000 or more. The largest of these are the Yale Bowl, with a capacity of 80,000; the Grant Park Stadium at Chicago, holding 100,000, and the stadium at the Sesquicentennial in Philadelphia, which has held the record-breaking crowd of 140,000.

In contrast to these, the famous Greek stadium of Olympia, where the Olympian games were held, seated 45,000 at most. A larger stadium was built at Athens, whose capacity was claimed to be 69,000, although some records place it at 47,000. These stadiums were, in most cases, originally built of wood, and later rebuilt with marble at enormous expense. Some of the largest were built several centuries B. C. and were rebuilt and used continuously until 1150 A. D. and even later.

The great stadiums of the Romans did not appear until a comparatively late date. They were at first built of wood, anticipating the "bleachers" of modern American baseball parks. Julius Caesar was probably the first to erect stadiums on a large scale to the delight of the populace. The stadiums grew rapidly in favor, and in 81 A. D., during the reign of Domitian, a stadium was built on the Palatine Hill seating 30,000. The track in the stadium was exactly 600 Greek feet, or 606 feet 9 inches in length.

The most familiar of the Roman amphitheatres, the Coliseum, is elliptical in form, the longer axis being 615 feet and the shorter axis 510 feet. The arena measures 281 feet in length, with a shorter axis of 177 feet. It is believed to have accommodated at one time 87,000 people, including the standees, who were numerous. Some reports place the original seating capacity at 45,000.

The largest structure in history for accommodating assemblies of spectators was doubtless the familiar Circus Maximus at Rome. The original structure was built as early as 329 B. C. It was made of wood and was burned in the fire which Nero is reported to have fiddled at. It was rebuilt with more durable material. According to the historian Pliny, it had a seating capacity of 250,000 and was often crowded to capacity. Some writers of ancient Rome place the capacity of the Circus as high as 485,000. Most of the structures of the past enjoyed the services of excellent press agents and have been described for future ages in glowing prose.—N. Y. Times.

1925 Portland Cement Output Exceeds All Records–Survey Shows

Final figures relating to the Portland cement industry in 1925, compiled by the Bureau of Mines, Department of Commerce, show that the production of Portland cement in 1925—161,658,901 barrels—was the largest quantity manufactured thus far in any year, exceeding that in 1924, the next highest year in production, by 8 per cent.

Shipments of Portland cement from mills in 1925 increased 8 per cent in quantity and over 5 per cent in gross value. The average factory price per barrel in bulk in 1925 was $1.77, a decrease of 4 cents per barrel as compared with 1924.

Stocks at the mills also increased, reaching a total of 18,515,384 barrels on December 31, 1925, the greatest at the end of any year during which official records of stocks have been kept. They were about 31 per cent higher than at the end of 1924.

From reports of the producers showing mill shipments of Portland cement into the various States estimates of per capita consumption in the accompanying table have compiled. These are at best but approximations as they represent only the records of mill shipments into States; they do not include the imports, which would increase the consumption in States nearest the seaports and in certain States near the Canadian border, nor do they make allowance for a variable but considerable stock of cement at all times in transit, in warehouses at distributing points, and awaiting use at jubs.

The total manufacturing capacity of all the active plants at the end of 1925 was 193,391,000 barrels, according to manufacturers' reports supplemented by a few estimates. This total, which is subjected to revision, includes the annual capacity—about 5,800,000 barrels of finished Portland cement— of six new plants that began operating during the year. They are located as follows: one each in Georgia, Michigan, Texas, and Virginia, and two in Ohio.

A summary of the monthly estimates of output of Portland cement in 1925, compiled from the monthly reports of producers, was published early in January, 1926, by the Bureau of Mines. These estimates, which indicated a production of 161,202,000 barrels and shipments of about 156,724,000 barrels, were within 0.3 and 0.4 per cent, respectively, of the final figures for 1925.

STRUCTURAL STEEL BUSINESS SHOWS DECLINE

New inquiries for and awards of fabricated structural steel as reported at New York as the accumulation of last week are the smallest of any similar weekly report this year. Although awards of the previous week had been larger than the average, fabricators feel that the present record does not begin to compensate for it. Therefore, the feeling grows that business in this line of steel consumption is definitely falling off. With the exceptions of 1924 and 1925, orders and inquiries invariably fall off at this season of the year, to pick up in December. Fabricators state that they will actually welcome some cessation as it will give then a chance to give a much needed overhauling to machinery and equipment. If the next two weeks also show a low ebb of business it will be safe to conclude that there is a definite falling off in structural business, a thing which bankers and economists have already stated has happened.

Brancusi, Famed Sculptor, Says U. S. Architecture Is "Poetic"

Constantin Brancusi, modernist sculptor, whose work has caused a storm of controversy on both sides of the Atlantic, and who is to hold an exhibition in New York in November and December, declares that he did not care for the statues in the public squares and parks of New York, although he had found many specimens of architecture very pleasing.

"The statues that one usually finds in public places and parks in any city, and which fill the museums as well," he said, "are very heavy and dull, but in New York one sees their ridiculous side.

"The statues in the public squares and gardens have absolutely nothing to do with the background of architecture, and they appear to me as if they had been thrown against the wall. To creat the proper harmony it would be necessary to take them away or destroy the buildings.

"Outside of that, however, I have found America in positive advance of the rest of the world. The architecture of New York—the great skyscrapers—gives me the sensation of a great new poetic art."

The sculptor, who is rated by many as the most brilliant pupil of Rodin, arrived from Paris several weeks ago to look after his exhibition, and is staying at the Hotel Brevoort.

"I have found the Grand Central Terminal," the artist continued, "one of the most beautiful specimens of modern architecture. The varying decorations give me as much pleasure as if I had done them myself, although some of them remind me of a peasant woman who puts a basket of vegetables upon her head in order to be beautiful."

Brancusi is short, has iron-gray hair and wears a bushy beard. He was born a Rumanian, but has been working at his art for the last twenty-five years in Paris. Photographs of his atelier there show an environment harmonizing with his art—the reduction of plastic form to a unified mass with perfect three-dimensional quality.

He believes that an artist's work should be slow and solitary and spends many years working on one piece. He has never taken any pupils and blames had teaching for much of the poor art created today.

The exhibition of his sculptures, which are to arrive from Paris shortly, will be held at the Brummer Galleries, 27 East Fifty-seventh Street, under the auspices of Marcel Duchamp, the French painter. —(N. Y. Times).

Closer Co-Operation Urged Upon Clay Products Industry

Thirty Northwest manufacturers of clay products attended a meet in Seattle recently at which William Schlake, president of the Common Brick Manufacturers' Association, was the principal speaker.

President Schlake pleaded for co-operative effort on the part of manufacturers in putting their product more to the front and in the most advantageous position possible in the building material field.

"The trend toward fireproof and semi fireproof construction is a natural process," stated Mr. Schlake. "Government statistics show that the use of brick is more universal now, having increased from 11 to 17 per cent in total construction according to federal figures," he added.

"Brick is and always has been, down through the ages, one of the outstanding fireproof building materials in use throughout the world. Brick will become more popular with builders as time goes on, because of its adaptability, its strength and its fire-resistance qualties."

Mr. Schlake told of the extensive research work carried out during recent years by brick manufacturers. He stated that the the present time the United States bureau of standards has under investigation 160 brick panels. Strength tests are being carried out continuously in greater laboratories in many parts of the country. The necessity for the closest co-operation among the clay products men was stressed by the speaker. He said that in no other manner could those allied in the industry obtain necessary information in connection with the scientific properties of their product, so that valuable service may be afforded the building public and the best possible advice given buyers and users of brick. Brick, Mr. Schlake explained, had, until recently, too long been penalized because of insufficiency of scientific data.

Co-operative effort among members of the industry is still in its infancy, but eventually lower production cost will be effected through exchange of information by manufacturers, the speaker asserted. He believes that co-operation produces better business man through mutual consideration of problems confronting their industry and that the fruit of co-operation among the clay products manufacturers is shared by all in the business and most certainly by the building public.

Doubts Expressed As To Any Great Drop In Building Costs

Increasing ability of people to buy homes will automatically limit any great decline in building costs or in the present volume of building operations, says the Harmon National Real Estate Corporation. The index of building material costs stood at 194 for August, the same level as for the previous month and an increase of four points over August a year ago. Building wages were indexed at 227, an increase of nine points over August, 1925.

The predicted halt in building activity has not materialized in spite of these increasing costs. For the first eight months of 1926 new construction has totalled about nine per cent above the corresponding period in 1925. August of 1926 actually showed an increase of eighteen per cent over contracts awarded in July of this year, while in New York and Northern New Jersey contracts in August were thirty-nine per cent greater than the July figures.

Factors governing future activity in the building industry are almost identical with those in automobile manufacture. A constantly-broadening market for automobiles has resulted from two causes: A decrease in the cost of the automobile and an advance in the average income. Both causes have so greatly increased the number of potential purchasers that talk of a "saturation point" in the automobile market, which was universally spoken of when 8,000,000 cars were registered in the United States, has practically istration of about 20,000,000 cars.

In the building industry there has been a steady increase in costs since 1921. This increase has not courtailed demand for new housing because of an equally steady rise in national income. Total personal incomes in the United States reported for tax purposes increased from approximately $12,000,000,000 in 1917 to $31,000,000,000 in 1923.

There is no reason for believing that any sudden halt will occur in this annual gain in national income to curtail the constant demand for better housing. Nor are there indications that costs of building labor will show material decline from present figures; incomes in all industries, as measured by buying power, are on an upward trend.

The cost of building materials, on the other hand, is due for a slight decline. General commodity prices have dropped steadily since September, 1925; the index of the Bureau of Labor Statistics has fallen from 160 in that month to 149.2 for August, 1926. Due to steadily improving production methods, a similar decline is in order in building material price schedules.

Unless such a decrease is absorbed in higher labor costs it should serve to stimulate the housing demand in the same way that lower automobile costs expanded the automobile market. This expansion in number of potential home buyers should effectively limit any decisive decline in either material costs or property valuation.—Boston Transcript.

U. S. GOVERNMENT WANTS MORE ARCHITECTS

The United States Civil Service Commission reports that the execution of the $165,000,000 public buildings program recently authorized by Congress is well under way in the office of the Supervising Architect, but that additional associate and assistant architects are needed for the work. Preliminary plans have been outlined for many of the larger buildings, including some of the monumental structures to be erected in Washington, and by December 1 at least twenty of the several hundred smaller Federal buildings to be scattered over the country will be under contract. Bids have already been asked on many of the projects. The Civil Service Commission is now receiving applications for positions of associate and assistant architects for the Supervising Architect's Office. Competitors are not required to report for examination at any place, but will be rated on their education, training, and experience, and specimens of their drawings.

Building News Section

APARTMENTS

Sub-Bids Being Taken.
Apartments $1,000,000 or more
SAN FRANCISCO, SW Jones and California Sts.
Fifteen-story class A apartment house 100 2 to 5-room apartments.
Owner—Jones-California Inc.
Architect—Weeks and Day, 315 Montgomery St., San Francisco.
Contractor—Cahill Bros., 55 New Montgomery St., San Francisco.
As previously reported, structural steel was awarded to Central Iron Works, 2050 Bryant St., S. F.; excavating to Granfield, Farrar & Carlin, 67 Hoff Ave., S. F.
Sub-bids are being taken on other portions of the work.

Plans To Be Prepared
APARTMENT BLDG. Cost, $30,000

SANDY PRATT'S COMPANY BUYS SECOND PLANT

Clarence (Sandy) Pratt, President of the Pratt Building Material Company and the Pratt Rock & Gravel Company, producers of sand, crushed rock and gravel, announces a second purchase for his companies of another plant. The latest addition is the sand and gravel plant of the American River Sand & Gravel Company, located at Mayhew, Sacramento County. This company was owned and operated by the late William S. Hatch, President of the Hatch Warehouse Company, and George S. Tyler. This new property has rail connections and controls over a half-mile of land along the American river, and a deposit of over 2,500,000 tons of gravel and sand is on the property. Mr. Tyler will continue as superintendent at Mayhew.

About two weeks ago Sandy Pratt announced the purchase for his companies of the Vulcan Rock Company's property at Hoyt, Solano County, where a cementing road rock, for state and county highways is produced. There are 5,000,000 tons of road rock at Hoyt.

From the new Pratt plant on the American river, sand and gravel for building and road construction will be shipped.

Besides the above properties the Pratt Company has sand, crushed rock and gravel plants at Sacramento, Marysville, Prattrock (near Folsom) and Prattrock (Monterey County). Their central office is in San Francisco and Howard W. Senter is secretary and Clarence (Sandy) Pratt president of the four above companies.—San Francisco and Sacramento News Item.

Official Proposals

NOTICE TO CONTRACTORS

(Duke School District)

Notiie is hereby given that the Trustees of the Duke School District, Fresno County, California, will receive sealed bids for the construction and completion of a school building containing two class rooms, toilet rooms and library in accordance with the plans and specifications prepared by E. W. Peterson, architect, Mason building, Fresno, California.

Bids will be opened at a meeting to be held by the said board of Trustees at **4 p. m., on Thursday, October** 28, 1926, at the present Duke schoolhouse, near Conejo, California.

All bids to be accompanied by a certified check or bidder's surety bond in the amount of 10 per cent of the amount of the bid made payable to the Duke School District on condition that said check or the penal sum of said bidder's bond shall be paid to and retained by the said school district as agreed and liquidated damages, should the party or parties to whom the contract should be awarded fail to enter into a contract within five days after the award of said contract or fail to furnish the bonds in the total amount of 75 per cent of the contract price.

Plans and specifications may be obtained from the architect.

The Board of Trustees reserves the right to reject any and all bids.

J. M. RUTHERFORD,
Clerk of the Board of Trustees of the Duke School District.
Route A, Box 285, Selma, Callfornia.

NOTICE TO BIDDERS

(Pipe—City of Taft)

Notice is hereby given that the Board of Trustees of the City of Taft will receive sealed bids for the furnishing of the following, quotations to be in separate items:

1040 ft. of six inch high pressure pipe for welded fire line, to test 600 lbs. pressure, F. O. B. location on South Fourth St., Taft, strung.

514 ft. of the same, F. O. B. location on North Eighth St., Taft, strung.

700 ft. of four inch, same quality and test, F. O. B. location North Eighth St., strung.

Sealed bids will be received for furnishing of the pipe as above, in separate quotations, and also in separate items for the furnishing of the pipe and all labor complete, including ditch digging, welding, and connecting onto present fire line. Ditches 48 inches deep.

The Board reserves the right to reject any or all bids.

Quotations must be accompanied by certified or cashiers' checks for 10% of the amount.

In the event of a bid being accepted for the labor, a bond will be required of the successful bidder.

Opening of bids **7 P. M., Monday, Nov. 1, 1926.**

C. A. PAGE, City Clerk.

NOTICE TO BIDDERS

(Book Stacks—Library, University of California)

SEALED BIDS will be received at the office of the Comptroller, University of California, Berkeley, California, **at or before 10 A. M., Wednesday, November 3, 1926,** for general construction of South East Block of Stacks, Library, University of California, Berkeley.

Drawings and specifications may be obtained at the office of John Galen Howard and Associates, Architects, Crocker First National Bank Building, San Francisco, on deposit of $50.00 for each set of drawings and specifications taken out. Checks given as deposits are to be in favor of the undersigned. Deposits will be refunded on submission of a regular bid for the work and on the return of said drawings and specifications in good condition. No bids will be considered unless accompanied by a certified check or bond in favor of the undersigned equal to 10% of the bid to secure execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

NOTICE TO CONTRACTORS

(Lyon and Washoe Counties, Nevada State)

Sealed proposals will be received by the undersigned on November 10, 1926, for constructing portions of the state highway system in Esmeralda, Lyon and Washoe counties as follows:

(1)—Bids received until and opened at 1:30 p. m., for grading, construction of structures and placing of surfacing material between Goldfield and Millers Cut-Off Road in Esmeralda Co., a length of 15.75 miles.

(2)—Bids received until and opened at 2:30 p. m. for (a) grading, construction of structures and placing of surfacing material between Fernley and 3 miles East, Lyon County, a length of 2.82 miles; (b) the placing of surfacing material between Wadsworth and ¾ Miles East, Washoe County, a length of 0.74 miles.

Plans may be examined and form of proposal, contract and specifications secured in the office of the undersigned; also may be examined in the county clerk's office in the county in which the work is located; the division officers at Elko, Reno, Ely and Las Vegas; and the district office of the Bureau of Public Roads, 461 Market Street, San Francisco For copy of each set of plans, undersigned requires a deposit of Fifteen Dollars ($15.00), Ten Dollars ($10.00) of which will be refunded upon return of plans in good condition within thirty days (30) days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of five per cent (5%) of bid.

Each bidder must accompany his bid with certificate from a surety company duly authorized to do business in Nevada, stating that such surety company will provide said bidder with bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN, State Highway Engineer, Carson City, Nevada.

INFORMATION TO CONTRACTORS

(Lassen Volcanic National Park Rond Project)

The Director of the National Park Service, U. S. Department of the Interior, through the District Engineer, U. S. Bureau of Public Roads, 807 Sheldon Buildings, 461 Market St., San Francisco, California, proposes to open bids about Dec. 15, 1926, for additional road work in the Lassen Volcanic National Park to be constructed during the season of 1927. The proposed work consists of surfacing with crushed rock the 5.3 miles completed this year on the Northwest and Southwest Entrance Road projects, and the grading and surfacing with crushed rock of an additional 2 miles on the Southwest road project toward Lake Helen.

Approximate quantities are as follows:

Clearing, 8 Acres.

Excavation, unclassified, 81,000 cu. yds.

Corrugated metal pipe, 1200 lin. ft.

Crushed rock surfacing, 11,000 cu. yds.

As the country will soon be covered by snow, contractors who will want to file bids on formal advertisement are urged to go over the work not later November 6, 1926. An engineer is now on the Southwest Entrance project in the vicinity of Mineral, California, who will conduct contractors over the work during such time as it remains open for inspection.

STEPHEN T. MATHER,
Director, National Park Service.
October 15, 1926.

said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by same responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland High School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand ($5000.00) Dollars, but for all bids of less than Fifty Thousand ($50,000.00) Dollars, said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 2nd day of November, 1926,at 9:45 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of Oakland, California.

NOTICE TO CONTRACTORS

(Courthouse—Santa Barbara County)

Pursuant to an order of the Board of Supervisors of the County of Santa Barbara, State of California, made on the eighteenth day of October, 1926, notice is hereby given that sealed bids will be received **until 10 A. M. on the fifteenth day of November, 1926,** by the Board of Supervisors of the County of Santa Barbara, State of California, at their rooms in the County Court House, in the city of Santa Barbara, County of Santa Barbara, State of California; said bids then and there will be publicly opened and read for furnishing all paint, material and labor and doing the work required, for the construction and erection of the Court House, Hall of Records and Jail Building on the Court House site in the City of Santa Barbara, County of Santa Barbara, State of California, and all in accordance with the plans and specifications therefore, made by William Mooser Company, Architects, copies of which may be obtained on application from the Architects, Nevada Bank Building, San Francisco, California.

Such bids will be received for the work as follows: separately;

1. ONE GENERAL BID — Items listed under "Ornamental Iron."

2. ONE GENERAL BID—(A) Items listed under "Concrete Work." (B) Unit prices.

3. ONE GENERAL BID — Items listed under "Main Entrance, Arch, Stone, etc."

All proposals must be submitted on forms similar to the one hers attached as prepared by the Architects, William Mooser Company, Nevada Bank Building, San Francisco, California.

Cash, a Bidder's Bond, or a Certified Check in the sum of at least Ten per centum (10%) of the amount of the bid must accompany each bid, and be payable to the Chairman of the Board of Supervisors of the County of Santa Barbara, as a guarantee that the Bidder whose proposal is accepted will enter into a contract with the County of Santa Barbara, for the work bid upon, otherwise said Cash or Bidder's Bond, or Certified Check, will be forfeited to the County of Santa Barbara.

A deposit of Fifty Dollars cash or certified check will be required for plans and specifications, the deposit to be returned immediately on the return of plans and specifications in good condition to the Clerk of the Board of Supervisors, County Court House in the City of Santa Barbara or to the Architects, William Mooser Company, Nevada Bank Building, San Francisco, State of California.

RIGHTS RESERVED

The County of Santa Barbara reserves the following rights: (a) To reject any or all proposals; (b) to waive any informalities in any proposal; (c) to award this contract to some other than the lowest bidder, as this clause expressly puts the bidder on notice that his financial and business standing and ability properly and expeditiously to carry out work hereunder, or the consideration of desired alternates, makes his proposal more advantageous to the County of Santa Barbara; (d) to accept any alternative or any independent part of any proposal submitted by the successful bidder at the price stated in such proposal for such alternate or separate parts of the work, under the provision; (e) to deduct any separate item mentioned in any proposal at the price therein stated therefor; (f) to make any additions to omissions from changes in, or substitution for the work or materials or articles called for by the contract, subject to the requirements of the paragraph thereof headed under the particular item and without notice to the sureties on this bond, if any, guaranteeing the performance of the contract.

All bids must be addressed to the County Clerk of the County of Santa Barbara in the City of Santa Barbara, State of California, and have endorsed thereon.

Proposal for Court House, Hall of Records and Jail Building, for the County of Santa Barbara, California, and the particular part of the work bid upon.

C. L. PREISKER,
Chairman of the Board of Supervisors of the County of Santa Barbara.
C. A. HUNT,
County Clerk and Clerk of the Board of Supervisors of the County of Santa Barbara.

NOTICE TO CONTRACTORS

(Millbrae School District—San Mateo County)

Notice is hereby given that the undersigned trustees of the Millbrae Grammar School District, San Mateo County, Calif., will receive sealed bids **up to the hour of eight (8:00) o'clock P. M., on Tuesday, the 9th day of November, 1926,** at the Millbrae Grammar School, Millbrae, at which said time and place said bids will be publicly opened for the construction of additions to the Milbrae Grammar School building.

All bids will be submitted on form provided and addressed to the Clerk of the said Board of Trustees and must be accompanied by a certified check made payable to the order of aforesaid clerk in amount equal to at least ten (10%) per cent of the largest bid so submitted, and no proposal will be considered by said Board unless accompanied by such check.

The said check to be forfeited to said School District, as ascertained and liquidated damages in case the successful bidder falls or refuses to enter into a contract to perform the work and give satisfactory bonds required, within ten days after the date of the award.

The plans and specifications for said work may be examined at the office of E. L. and J. E. Norberg, architects, 407 Occidental Avenue, Burlingame, and a limited number will be loaned to contractor if a deposit of $10.00 is made.

The said Board of Trustees expressly reserves the right to reject any and all bids.

Done by the order of the Board of Trustees of the Millbrae Grammar School District, San Mateo County, California.

G. J. DAVIS,
Clerk.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of **the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on November 1, 1926,** at which time they will be publicly opened and read, for construction in accordance with specifications therefor, to which special reference is made, of portions of State Highway as follows:

Santa Barbara County, across Gaviota Creek about 2½ miles north of Gaviota (V-S.B-2-E), a reinforced concrete girder bridge 24 feet wide, composed of three 54-foot spans and one 30-foot span.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of the work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: October 4, 1926.

NOTICE TO CONTRACTORS

(Technical School Addition)

Pursuant to an order of the Board of Education of the Fresno City High School District of the County of Fresno, duly made and entered in its minutes this 23rd day of September, 1926, public notice is hereby given that said Board will receive up to **5 o'clock P. M. on the 28th day of October, 1926,** at the office of the said Board in the Hawthorne School Building, 2425 Fresno Street, in Fresno, California, sealed proposals for the furnishing of labor and materials for the construction of an addition to the Edison Technical School Building as per plans prepared by Felchlin, Shaw & Franklin, Architects, Rowell Building, Fresno, California.

Segregated bids will be received for this addition.

Reference is hereby made to "General Information to Bidders," Building Form No. 6, for further particulars regarding said bids.

Plans and specifications, together with forms for submitting all bids, and further details regarding any and all bids may be obtained from the undersigned Secretary of said Board Education at the office of said Board above designated.

A bidder's surety bond or certified check equal to at least 10 per cent of the amount of the bid submitted must accompany all proposals.

The Board of Education of said School District reserves the right to reject any and all bids.

By order of BOARD OF EDUCATION, FRESNO CITY HIGH SCHOOL DISTRICT.

L. L. SMITH, Secretary.

Architects — Engineers City and County Officials

How about bidswanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it? If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

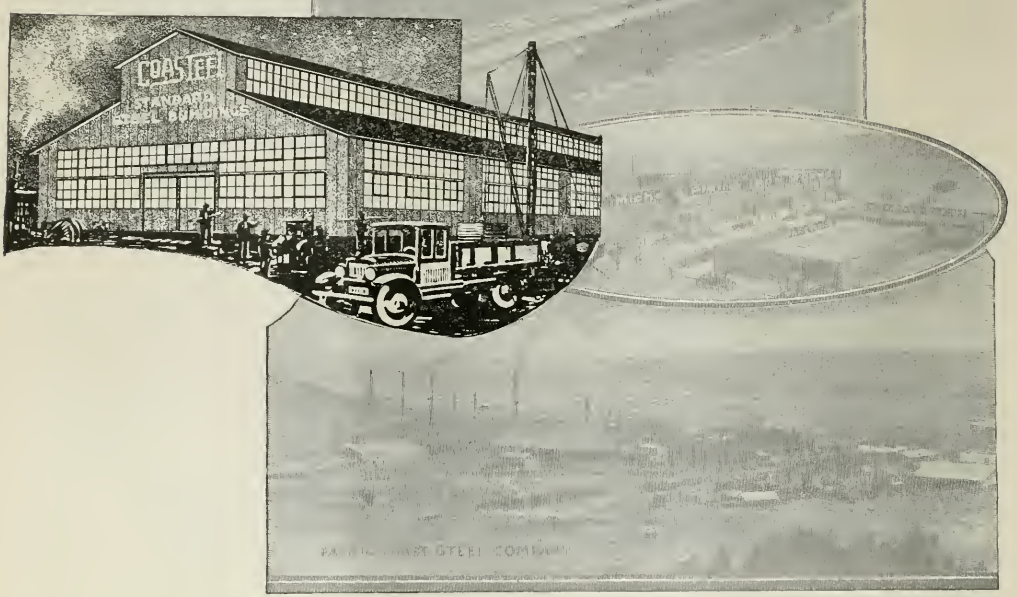
COASTEEL



The Manufacturing Organization behind COASTEEL Buildings

A Copy for You

COASTEEL Standard Buildings, in their entirety, are the product of a specialist organization. Years of experience in steel manufacture, steel fabrication and steel erection go into each individual job.

All of the steel—for trusses and columns, side wall and roof and window sash—is manufactured by the Coast pioneer, Pacific Coast Steel Company. The sheets for doors, side wall and roof are rolled by Pacific Sheet Steel Corporation. All sash in Coasteel Buildings is "California" Steel Sash, manufactured by Michel & Pfeffer Iron Works. Fabrication of COASTEEL Buildings is done by Pacific Coast Steel Company.

Backing up this manufacturing arrangement is the combined service given by the capable, experienced engineering staffs of the three contributing companies.

OVERHEAD OF STATE HIGHWAY DEPARTMENT REVIEWED

In the preparation of the biennial report of the California Highway Commission, which will be ready for filing with the Governor in the near future, the accounting department has prepared a table of figures showing overhead expenses, it is announced by State Highway Engineer R. M. Morton.

The table covers the period from March 1, 1912, when the accounts were first set up, to June 30, 1926, and includes in the overhead expense the cost of both engineering and administration.

For the last fiscal year, ending June 30th, the overhead was 8.78 per cent of the total expenditures, the lowest for any one year in the history of the department.

"We are gratified at the showing made during the past fiscal year," said Mr. Morton. "We are beginning now to attain the result sought several years ago, when a reorganization of the department was initiated and various economies, particularly with reference to the accounting system, were placed in effect.

"Every effort has been made to lower the overhead by increased efficiency and as the effect of these changes is more fully realized the overhead of the department should continue to decrease."

The report shows that for the period from March 1, 1912 to December 31, 1918, the overhead of the commission averaged 12.79 per cent.

From January 1, 1919 to December 31, 1922, it averaged 10.89 per cent.

The average from January 1, 1923 to June 30, 1926, was 9.59 per cent. For the last twelve months of this period it was 8.78 per cent.

Defeat Sectional Highway Measure—Says H. J. Brunnier

Stressing the necessity of defeating No. 8, the sectional highway measure of certain Los Angeles interests, as well as adopting No. 4, the gasoline tax plan for completion of the state highway system, H. J. Brunnier, San Francisco engineer, vice president of the California State Automobile Association and head of the campaign against Eight and for Four explains that passage of both measures on the November ballot will result in Eight taking precedence over Four.

"The scheme of the small group seeking to secure control of highway funds and administration through No. 8 is so carefully worked out that this un-American measure provides that if the gasoline tax measure also is adopted the funds raised thereby shall be expended according to the unfair sectional provisions of No. 8," Brunnier said.

"Attorneys who have made a close study of both measures assure us that if both are adopted the vicious provisions of No. 8, dividing the state into two highway and voting districts will govern the expenditures of money raised by No. 4.

"The unfair and arbitrary classification of highways in favor of southern counties and the inequitable and unjust allocation of funds so that the south gets the lion's share would apply to the more than $10,000,000 annually raised by No. 4 if No. 8 is also adopted.

"After adding 100 miles of highway to the system in the southern 'division' of the state, No. 8 would 'freeze' the entire state highway system into its present form. Thus it would be almost impossible to meet future needs of district growth or traffic increase. At the same time the funds raised by the gasoline tax for construction of new highways on a state-wide basis would be distributed under the hard-and-fast allocation of No. 8 providing for superboulevards for certain counties and inadequate roads for other counties.

"Thus the adequate, equitable and sound plan of financing provided in No. 4 would be virtually nullified unless No. 8 is defeated.

"The workability of the gasoline tax, its practical value for financing highway construction, its fairness to all and its ease of collection without placing an undue burden on the taxpayers have been proven not only in California but in forty-four states where it is in effect.

"Passage of No. 4 is essential to the continued development and prosperity of California.

"The calamitous effect of failure to adopt No. 4 would be exceeded only by the catastrophe to the good roads cause resulting from the adoption of No. 8."

Architect's Contract On S. B. Courthouse Questioned By County

On the ground that the contract between William Mooser, San Francisco architect, for the new Santa Barbara county courthouse under construction and the Board of Supervisors is not plain and apparently contradictory within itself County Auditor Albert Eaves is preparing to submit Mr. Mooser's claims to the district attorney for investigation before they are paid.

The contract which is not clear to the county auditor is that entered into between the architect and supervisors January 4 of this year, in which Mr. Mooser was hired at 6 per cent of the cost to plan a $600,000 courthouse. Some county officials declare this contract to contain statements so contradictory as to invalidate it. Should their contention be correct the contract signed between the supervisors and the architect September 7, in which the architect is hired for an additional four per cent to supervise construction on the building is also invalidated, since the second contract contains a clause making it a part of the first contract.

Under the first contract Architect Mooser has collected two claims, one for $7000 and one for $11,000, without question. Since these payments the county auditor twice has withdrawn the Mooser contracts from the county clerk's files for study, and announces that he expects to study the two documents further in an attempt to discover what payments his office can legally make to Architect Mooser from county funds.

In addition to the possibility that the courthouse architect's claims will be withheld from payment by the auditor, recent study of the architect's contracts indicate that the generally admitted fact that the new courthouse will cost more than $1,000,000 instead of $600,000 will cause both contracts with William Mooser to be broken by the county under a clause of the first contract providing for termination of the contract without cost to the county if any provisions of the contract are broken.

A tri-county road district for the purpose of building a highway connecting the San Joaquin valley with the sea became effective when Ventura county joined Santa Barbara and Kern counties in plans for the new Ventura-Maricopa highway. A limit of $250,000 was placed on Ventura county's participation. The total cost is estimated at $1,195,000. The new highway, to be 74 miles in length, connects with the Pacific Coast highway near Santa Barbara and with the Valley highway at Maricopa.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

S. F. IMPARTIAL WAGE BOARD TO MEET

The San Francisco Impartial Wage Board, under the chairmanship of Archbishop E. J. Hanna, held its organization meeting Oct. 26.

The two new members, Judge M. C Sloss and Selah Chamberlain, met with Archbishop Hanna, who :etains the chairmanship he held during the two previous hearings.

At the conclusion of the meeting the board issued a statement as follows. "On two previous occasions, in 1921 and 1923, this Impartial Wage Board established wage scales which proved satisfactory to every interest involved and under which the city of San Francisco enjoyed a long period of prosperity and harmony in the building trades. There is now some danger that this situation might be upset and the board has reconvened in the confident expectation that it will duplicate its previous successes.

"The present board, under the same chairmanship, has undertaken to hear all interested parties that an adjustment may be reached enabling our city to continue its wonderful building program with profit to all concerned in it.

"This board represents the public interest and trusts that the personnel serving on it guarantees its impartiality.

"The Impartial Wage Board in taking on this delicate and difficult task feels that it is justified in appealing for the utmost support of the public. The board hopes that everyone interested will present his views freely as the members feel that they will need all the help possible in preparation for their decision.

"The board will make every effort to arrive at an early decision. The times and place of public meetings will be fixed shortly and all organizations and persons desiring to be heard will be given notice of these meetings and invited to present their claims and suggestions."

S. F. MASTER PAINTERS GRANT INCREASE

The Master Painters' Association of San Francisco at its regular monthly meeting held in the Builders' Exchange last Wednesday evening voted to grant the painters a five-day week and an increase of $1 a day in pay. The new schedule will become effective January 1, 1927, according to Frank La Torres, secretary of the Master Painters' Association.

FOREST EXPERIMENT STATION FOR BERKELEY

The Secretary of Agriculture announces his decision to locate the headquarters of the new California Forest Experiment Station at the University of California, Berkeley.

"Berkeley has been chosen as the headquarters of the California Forest Experiment Station," said Secretary of Agriculture Jardin, "primarily because the State Agricultural College and the State Agricultural Experiment Station form a part of the University of California, and these divisions of the University use many lines of investigation which must also be undertaken for the production of timber crops. At Berkeley there will be an excellent opportunity for close co-operation with the Forest School, which is a part of the University, while through the Extension Service the results of the forest research can quickly be made known. Berkeley will also be advantageous because of its central location from which all the forest region of the State can be quickly and easily reached. It is expected that this station will be able to aid materially in the development of sound practices for the management of the timber and watershed sources.

STATE RETAIL LUMBERMEN ELECT OFFICERS

Paul Hallingby of Los Angeles was elected president of the California Lumbermen's Association, succeeding C. W. Pinkerton of Whittier, who had headed the lumbermen for four years. Pinkerton was not in the race for re-election, stating to the convention that the press of personal business demanded that he not run for the office.

C. P. Curran of Pomona was elected vice-president of the southern district and Elmore King, Bakersfield, was named to the north vice-presidency, J. E. Fraser, San Francisco, was re-elected secretary and J. E. Neighbor succeeded himself as treasurer.

Nine directors were elected to serve on the directoral body of twenty-seven for three-year periods. They were George Wood, Santa Cruz; A. E. Ficking, Long Beach; Frank Burnaby, Beverly Hills; J. L. Ott, Santa Ana; Charles P. Curran, Pomona; E. T. Robie, Auburn; Earl White, Oakland; Elmore King, Bakersfield; George Bentley, Glendale.

A recent report by Roger Babson, suggesting that the Florida authorities prohibit the erection of frame buildings in that state, was condemned by the association in a resolution as based on insufficient data.

END OF BUILDING STRIKES IS PREDICTED

End of all strikes between unions in the building industry through the National Board for Jurisdictional Awards is predicted in the report of a joint committee of the American Institute of Architects and the American Engineering Council. An investigation by the architects and engineers, it was asserted, shows "really remarkable accomplishment in wiping out labor dissentions since the Board was organized in 1919.

"It is clearly apparent from all information obtainable," the report says, "even from the ranks of those who have looked askance upon the work of the Board, that its work has enormously reduced the number of jurisdictional strikes and the economic losses associated therewith. It is stated upon good authority that the decisions of the Board have reduced by some 85 to 90 per cent the number of jurisdictional strikes within the building industry. The economic gain, due to this accomplishment, is estimated to be many millions per year. It is said on good authority, that if the Board is sustained and continues to function that it is only a question of a relatively few years until there will be no such thing as jurisdictional strike within the construction industry."—Cleveland Federationist.

FRESNO BUILDERS' EXCHANGE ELECTS OFFICERS

T. M. Robinson was elected president of the Fresno Builders' Exchange at the first meeting of the newly organized board of directors, held Oct. 25. O. H. Lyons was elected vice president and A. L. Loper was named treasurer.

The matter of selection of a secretary was postponed until Oct. 30. In the meantime members of the directorate will interview persons desirous of the secretaryship.

Robinson announced after the meeting that the directors have not discussed the feasibility of signing an agreement governing wages and working conditions of union crafts with the Fresno Building Trades Council, but this matter rests in the hands of the entire membership and may be brought up for the consideration at a meeting of the members late next month.

Robinson also said the exchange was reorganized on a service basis.

The directors elected are: E. H. Mellencamp, general contractors; T. M. Robinson, electricians; A. L. Loper, planing mills; D. A. Moore, brick men; Frank Minard, lumbermen; M. E. Summers, plasterers; Ben Tyre, glass men; Otto Baty, cement men; C. B. Cochrane, building material dealers; James E. Harrison, painters,and O. H. Lyons, tile setters.

It is planned to select a secretary who is acquainted with local conditions.

SESSIONS IN CONCRETE PROVD SUCCESSFUL WITH BUILDERS

Five hundred building construction men, engineers, architects, and contractors of San Francisco and bay cities were present Oct. 21 at the second session of the course in design and control of concrete mixtures, given this week and next by the Portland Cement Association co-operating with the local chapter, American Society of Civil Engineers.

J. W. Kelly, concrete expert from the Chicago laboratory of the Portland Cement Company, who is in charge of the course, lectured. The principles he is demonstrating in the course were evolved by Professor D. A. Abrams.

The lectures and demonstrations are being given in the auditorium of the Pacific Gas & Electric Building.

SUES HARDWARE FIRM

Esther Adams of Burlingame has filed suit in the Superior Court at Redwood City against the Burlingame Hardware Company. The woman alleges she received permanent injuries as the result of an accident in Burlingame last January, caused by negligent operation of a delivery truck belonging to the hardware concern. She seeks $11,100 damages.

Strengthen Lien Law And Material Compulsory By Making Bond For Labor

(By E. M. Scofield, vice-president of the Scofield Engineering and Construction Company Address on "California Lien Law" before the Los Angeles Builders' Exchange Luncheon Meeting, October 7, 1926)

Original Intention. The California lien law, originally intended primarily for the protection of the laborer, has by repeated amendment come to protect the material man more effectively than it does the laborer. The man who is shy a week's wages can get very little comfort out of his right to lien when the cost in time and legal expense is more than the week's wages, and no more comfort out of his right to lien when he finds that the material man has already pre-empted all the equity.

Two Evils. In the course of time two undoubted evils have grown up around the lien law: **First**, that it does not afford the laborer a certain and inexpensive method of securing his wages, and **second**, that it frequently operates to make the unwary owner pay twice for his home or lose it altogether because the irresponsible contractor has walked off without paying his bills.

Two Proposed Remedies. Both of these matters are evils which ought to be corrected and two principal methods of correcting them have been suggested: **First**, to license contractor and require all licensed contractors to put up with the state a small bond, say about five thousand dollars, to make good any wages or unpaid bills which he may leave behind him; **second**, to make the "material and labor bond," which is now optional with the owner, compulsory so that material and labor is bound to be paid for.

Arguments for and Against Licensing. In favor of licensing is the fact that it has been applied to real estate agents, lawyers and doctors, and in some places to engineers, and that only a small bond is required so that the expense is slight, although this expense falls upon the contractor.

Opposed to licensing is the fact that where engineers have been licensed, the system has operated to strengthen the irresponsible and untrained engineer rather than to safeguard the public against his services. The inexperienced and untrained engineer who, after a more or less perfunctory examination, displays on his stationery and window the fact that he is licensed by the state, is more apt to mislead the unwary client than if he were not licensed. The same difficulty is likely to arise in connection with licensing contractors. Instead of eliminating the irresponsible, it is apt to strengthen his position. It is also impossible to fix a size of bond that is satisfactory in all cases. A five thousand dollar bond would be a sufficient safeguard in many cases, but it would be utterly inadequate in many others. If the bond were made adequate to cover the situation at all times, it would become a serious burden to the small contractor.

Arguments for and Against Compulsory Bond. Opposed to the compulsory bond is the fact that it involves considerable expense, although not more in proportion than the community has paid for the elimination of unrequited accidents by compensation laws. Out of a total of 230 million permits in Los Angeles county in 1924, the liens filed were 13,491 in number and approximately 9 million in amount, but there is no information available as to the actual losses sustained because of these. Many of them were undoubtedly friendly liens which did not result in actual loss. The present cost of material and labor bond is ¾ of 1 per cent, but inasmuch as only about 30 per cent of construction is bonded, the compulsory bond would undoubtedly bring down the rate to ½ of 1 per cent, and probably much lower. At ¼ of 1 per cent, however, it involves an annual expense in Los Angeles county, based upon 1924 permits, of approximately $335,000. The bulk of the large work is bonded anyway. The cost is largely made up of $30 to $75 items for the small owner, who, in his effort to get his home as cheap as he can, is apt to leave himself open to the loss of his home altogether. Sound public policy would seem to justify safeguarding this situation, just as it did in the case of compensation.

In favor of the compulsory bond is the fact that it could be done with a minimum modification of the lien law, that it would tend to weed out the irresponsible and crooked contractor, that it would absolutely protect the laborer in his wages and the owner against paying twice for his house, and leave the protection of the material men as great as it is now. In fact, it would make the material man much safer than at present, because under present conditions the first mortgage frequently takes the property, and so leaves the loss on the shoulders of the material man. The small claims court could be given jurisdiction so far as one week's wages is concerned, so as to secure quick and inexpensive collections of labor claims, which is one of the shortcomings of the present arrangement. The collection of liens might also be equally simplified without sacrificing anything of present protection.

Conclusion. There are undoubted evils arising from the present law. There is plenty of room for difference of opinion as to the best method of correcting them. On general principles that method is best which involves the least extension of bureaucracy and the fewer possibilities of bureaucratic interference with business, provided the expense is not prohibitive. The speaker believes that the compulsory bond has advantages both in effectiveness and in freedom from bureaucratic possibilities which entitles it to serious consideration. Unfortunately, the speaker has been unable to get any definite data as to the actual losses sustained by labor and material men in proportion to the total volume of construction work, and further investigations of this phase of the matter should be had.

The total cost of insurance would probably be twice the actual losses, but they would be distributed as a very small number over the entire industry and the disastrous sacrifices which now frequently occur would be no longer possible, and the irresponsible contractor would no longer have an advantage over the responsible contractor.

The courts at first held the compensation laws of the various states unconstitutional, but finally passed them under increasing public pressure. There might be a question of constitutionality in compulsory bond, but the justification for it is apparently just as strong as in the case of compensation and it would undoubtedly be held constitutional in the end. In the meantime, the present law will not be interfered with until the other is finally passed, and then changed only for the better, as the change involved in the law in order to make the material and labor bond compulsory is a very slight change indeed. In order to make the law constitutional, it might be necessary for the state to provide an alternative method of insurance as they have done in the case of compensation.

This change ought to be a comparatively easy one to get through as there is no considerable interest which has not much to gain from the change. The laborer would be better off; the material man would be better off; the owner would be safeguarded against large losses which are frequent under the present system, for which he would pay only a small item of insurance; the insurance company would be better off because of the vast increase in the volume of insurance, although the rate would undoubtedly be radically affected; and the reliable contractor would be better off.

MANUFACTURERS HIT FIVE-DAY WEEK PROPOSAL

The National Association of Manufacturers, New York, makes public a symposium of opinions expressed by executives of thirty-two leading industrial organizations throughout the country on the five-day labor week.

The consensus, summarized by the association, was that general adoption of the reduced basic working week, proposed by Henry Ford and endorsed by the American Federation of Labor at its recent convention, would:

Increase the cost of living, increase wages by 15 per cent and decrease production, prove impracticable for all industries, create a craving for additional luxuries to occupy the additional spare time, causing a "trend to the arena—Rome did that, and Rome died," react against the best interests of workmen who desire to advance, make the United States more vulnerable to economic onslaught from Europe.

The only approximate favorable reply noted by the association was that the scheme "would be all right to meet a sales emergency, but would not work out as a permanent thing."

SANTA BARBARA BUILDERS TO REVISE BUILDING CODE

Revision of the present city building code in connection with the proposed new city charter will be discussed at the next meeting of the Santa Barbara Builders' Exchange. The builders contend that the present charter is an obstacle to any revision of the present building code and that either an entirely new code must be adopted or the city must continue under present regulations. Building contractors state that the new code is in a large part useless so far as modern construction is concerned, and offers an unnecessary hardship on persons investing in newer construction.

"The present code cannot be amended either by additions or subtractions," said one builder in explaining the stand of the contractors, "because of the present city charter. We should have an elastic code that will make it possible for the city to keep up with the developments of construction.

"For instance, it formerly was considered necessary for steel buildings to have from ten to twelve-inch filler walls. This has now been found only a useless expense. Depths and sizes of foundations as now found by the best building practice are a violation of the building code. There are many other sections of the code which need revision, and yet because of our city charter, revision is not possible."

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Declaring that the lumber industry is suffering from over-production, Frank H. Lamb, president of the Washington State Chamber of Commerce, predicts the early closing of many Washington lumber camps and mills.

The British Columbia legislature has fixed a minimum hourly wage of 40c in sawmills. Hindu roustabouts have been paid 25c. The idea was to have the mills utilize white labor exclusively. The mills object to the method, but are willing to dispense with the Hindus gradually.

Studebaker Automobile interests are reported to be making negotiations for the purchase of a 500-acre site in Pittsburg, Contra Costa County, for the manufacture of automobiles for the Pacific Coast and Pacific export trade. A plant costing $5,000,000 is contemplated, according to reports.

Exports of electrical apparatus for the first eight months of 1926 were valued at $62,701,131, an increase of more than $7,000,000 over the corresponding period of 1925. Average for the first eight months of 1925 was approximately $6,940,000 a month, while that of the same months of 1926 was $7,840,000.

T. Beverly Keim Jr., Los Angeles architect, was found dead in his offices in that city, Oct. 23, shot through the head and with a pistol clutched in his hand. Farewell notes to his wife, a brother and a business associate were found near by. Keim had been despondent over ill health, relatives said.

Proposition No. 22 on the November ballot will, if passed, aid greatly in bringing about reforestation of cut-over and burned over timberland areas in California. Proposition No. 22 places timber in a farm crop basis which is considered essential if trees are to be grown for future use and the lumber industry perpetuated in California.

The Alameda County Board of Supervisors has ratified the appointment of a joint tunnel engineering commission to make surveys for the best location for a new tunnel through the hills to connect with the Victory highway. It appointed James Eddy, city engineer of Berkeley, to work with the commission in an advisory capacity. The original commission is composed of the county surveyors of Alameda and Contra counties, the city engineer of Oakland, and John R. Graham and Harry B. Butler, engineering experts. The supervisors have appropriated $2500 to finance the survey.

Skintled brickwork, a departure from old line brick laying which was inaugurated six or seven years ago in Chicago, is winning instant favor wherever it is introduced. Within the last six years there have been some 1500 brick houses built of common brick in Chicago and its environs, more than half of them skintled, and ranging in price from $15,000 to $150,000. Common bricks, skintled, give in mass effect the tapestried appearance found individually in rough cut face brick.

California's public utilities paid out $103,727,520.77 in dividends during the year of 1925 as compared with $92,502,-874.61 in 1924, and approximately $86,-000,000 in 1923. This is shown in a report issued by the state railroad commission. On their California business alone the utilities had operating revenues amounting to $553,714,000 for last year, an increase of $35,591,000 over 1924. On all their business, the companies increased their earnings by $63,295,000. On the other hand, the operating expense increased only approximately $26,000,000, from $653,725,-786.28 in 1924, to $679,605,881.31 in 1925.

Sacramento Chapter, American Association of Engineers, at its recent luncheon meeting, adopted a resolution lauding the service of Harlan D. Miller, late bridge engineer of the California State Highway Commission, who died in Sacramento, October 19. Though Miller was not a member of the Chapter, the resolution stated that the members held profound respect and admiration for his services with the highway commission and that his loss would be keenly felt.

Involving expenditures aggregating $4,000,000 and providing for extensive improvement and expansion of electrical service to the San Joaquin Valley, the San Joaquin Light & Power Corporation has completed the development program outlined for the valley in the 1926 budget, it is announced by A. Emory Wishon, vice president and general manager. The program covered by the budgeted expenditures is the most comprehensive that has ever been undertaken in a single year and includes erection of eight new substations and improvements to many existing stations, construction of 169 miles of transmission lines and 594 miles of distribution lines, and a number of other improvements essential in the extension of power service to new lands and wider development of lands already under cultivation.

Los Angeles' building operations for the current month will produce a very satisfactory total, according to present indications. Up to and including the 19th the city building department issued 2245 permits with an estimated valuation of $5,106,361. This amount was increased by more than one and a half million dollars by permits issued on the 20th, which included one for the height limit Security Title Bldg. to be erected at southeast corner of Sixth St. and Grand Ave., estimated to cost $1,000,000. During the first 19 days of September, 1926, the number of permits issued was 2022 and the estimated valuation was $4,477,732, while for the corresponding period in October, 1925, the number of permits issued was 2423 and the estimated valuation was $7,-443,287. For the current year up to and including Oct. 19, Los Angeles' building total was $99,384,221 as compared with $123,210,820 for the corresponding period last year.

Concrete streets are rapidly replacing the asphalt street in North Pacific Coast cities, according to T. A. Reardon, president of the San Francisco Department of Public Works, who recently returned by a northern route from Detroit where he attended the convention of the American Federation of Labor. "The cities of Oregon and Washington have discovered, as many other cities have discovered, that concrete streets and highways are cheaper than those of black base, are more substantial, give better traction and are much safer in wet weather," Reardon said.

TRADE NOTES

Hasler sawmill at Kelsey, El Dorado county, destroyed by fire some months ago, has been rebuilt and has started operations.

Fire of unknown origin threatened to destroy the pottery plant of N. Clark & Sons, Fourth street and Pacific Ave., Alameda, on Oct. 26. Prompt action of the fire department limited the damage to approximately $1500.

The name of the Pacific Gas Radiator Company has been changed to Pacific Gas Heating Company, according to announcement by President A. J. Hartfield. Headquarters will be maintained at 1732-40 W. Washington St., Los Angeles.

Turlock Plumbing Co., operated by Olson MBrotbers, 119 Lander Ave., Turlock, has been appointed sales agent for the Sterling water pressure system. The Sterling line is augmented with the Hoosier plunger type of water system for small needs, which furnishes 240 gallons of water per hour from a quarter horse power motor.

John D. Cain, doing business as the Cain Electric Company of Berkeley, has petitioned the Federal Court to be adjudged a voluntary bankrupt. He lists his liabilities at $7729.64, with assets of $1006.13.

Announcement is made by the Edgar W. Anderson Company, 3103 San Pablo Ave., Oakland, of the installation of equipment for the manufacture of Kalamien metal-covered doors and trim. This is the first plant of its kind to be established in the East Bay district, according to officials of the company.

Enwood Sand & Rock Company, just east of Roseville, Placer County, will start construction at once of a new rock crushing and gravel plant on the lower end of its holdings. The material at this location runs about 80 per cent rock, while the material where the present grader is located runs about 80 per cent sand, and as the demand for rock has greatly increased, the new plant is necessary.

With building operations virtually completed, the California Pottery Company has opened for business its new $25,000 plant and offices at Ventura and H Sts., Fresno. One of the features of the new structure is the construction of the office building and fence, in which are incorporated many of the company's products, including various kinds and colors of tile and plaster. The plant will be illuminated by a system of vari-colored flood lighting.

F. W. and J. R. Jones will operate from 1743 Sacramento St., San Francisco, under the trade name of National Glass & Glazing Company.

Cornell Iron Works, Inc., 71 Marion street, Long Island City, N. J., has issued a new 32-page catalogue featuring steel rolling doors and shutters. The catalague covers details of construction with dimensions and specifications and is well illustrated. Copies will be forwarded on request to the company.

Holbrook, Merrill & Stetson of San Francisco, has established a branch in Fresno as a distribution point for the San Joaquin Valley with A. J. Le Duc in charge. The company will maintain warehouse quarters at 801 H St. The company, which has been in business on the Pacific coast for the past 76 years, has other branches at Oakland, Los Angeles and Sacramento, Fresno making the fourth branch.

E. L. Snell, general manager of the Eclipse Lime & Cement Company, specializing in plasterers and masons supplies with headquarters at 145 Landers St., San Francisco, announces the appointment of E. H. Aigeltinger as sales manager for that concern. Mr. Algeltinger was formerly connected with the Felix Gross Company of San Francisco and knows the lime and cement business from the raw material to the finished product, having been in the building material business for the past thirty years. He is well known among the members of the construction fraternity and will prove a valuable addition to the Eclipse forces. Coupled with the experience of Snell, who has had thirty-six years of dealing in the lime and cement business, Eclipse products should find a ready market.

ALONG the LINE

President Coolidge has approved the Vale reclamation project in Oregon. It embraces 32,000 acres, and will cost approximately $3,590,000.

R. J. Pavert, East Bay contractor and president of the R. J. Pavert Co., Inc., of Berkeley, died at the Lane Hospital, San Francisco, Oct. 24. A widow and infant daughter survive.

Jas. A. Hutton, Berkeley civil engineer, 38, died in that city Oct. 23 following a year's illness. Hutton was on location work in Arizona where he was taken ill about a year ago. He came to Berkeley thinking his condition might improve.

John V. Mueller, assistant state engineer of Nevada, has resigned to accept a position with the D. M. Linnard Hotel Interests. H. M. Payne has been appointed to Mueller's place and S. N. Dondero, field engineer, will assume the position vacated by Payne. H. McCuiston, acting temporary field engineer, will succeed Dondero as field engineer.

Superior Judge F. B. Brown of Santa Clara County has granted judgment of $400 to Joseph L. Stewart, San Francisco architect, against H. A. and Annie H. King for services rendered in August, 1925, in the preparation of plans and specifications for a residence at Palo Alto.

Col. Edward Beach Elliott, 60, nationally known electrical engineer and president of the Chicago Board of Education, died of pneumonia in Chicago, October 26.

Reuben C. Nelson, 66, for twenty-two years superintendent of the electric lighting plant at Healdsburg, was instantly killed, October 23 when his automobile collided with the Overland Limited near Trowbridge.

Avon J. Hanford, 40, president of the Rodeo-Vallejo Ferry Company and the American Toll Bridge Company, died at his home in Berkeley, Oct. 26. Death was due to a paralytic stroke.,

Herman W. Bauer, San Jose painting contractor, has left for a tour of Europe with Germany as his main object, where he will visit his old home and several of his relatives. He plans to return about the first of July.

The Highway Research Board is planning to have an exhibit at the Convention and Road Show of the American Road Builders' Association to be held at Chicago, January 10 to 14, 1927.

Architect Arthur G. Scholz, formerly of San Francisco and more recently of Southern California, has moved his offices to Suite 4, Washington Building, 6900 Washington Blvd., Culver City In addition to preparing plans for the proposed Ocean View Beach Club to be erected at Culver City, Mr. Scholz has plans for several residences on the boards.

Harlan D. Miller, bridge engineer for the California Highway Commission and one of the best known men in his profession in the West, passed away Oct. 19, at his home, 1514 Twenty-ninth St., Sacramento. Death came after Miller had made a fight for life extending over many months. He kept in touch with the duties of his office almost until the day of his death. He was 46 years of age. Miller first became identified with the California Highway Commission in 1919 when he was appointed assistant bridge engineer, a position he held for four years. On February 1, 1924, he was advanced to the position of acting bridge engineer, succeeding H. E. Warrington. On November 1st of the same year he was named bridge engineer by State Highway Engineer R. M. Morton.

WANTED

Man of 38 years, wishes to purchase interest, and take active part in management of small manufacturing plant in San Francisco or vicinity. Has has 12 years' experience in all branches of business management, purchasing, sales, service, and shop. Best references, and bond if required. Box A., D. P. E.—Adv.

HARDWARE MEN ELECT

Brace Hayden, president of the firm of Dunham, Carrigan & Hayden, San Francisco hardware merchants, was elected first vice president of the National Hardware Association of the United States. The association is holding its annual convention in conjunction with the Sesqui-Centennial Exposition at Philadelphia. W. H. Donleuy of Philadelphia was named president and A. H. Nichols, Detroit, second vice president.

HOMES FOR 500,000 IN R. R. WOOD SAVING

Timber enough to build 100,000 six-room houses, or sufficient to provide homes for a city of half a million people, is being saved annually by the railroads through the practice of treating ties with preservatives which prevent decay, according to W. H. Kirkbride, engineer of maintenance of way and structures for Southern Pacific.

"More than 36,500,000 ties in our roadbeds alone," Kirkbride said, "represent a weight of over 2,700,000 tons of wood or about 1,500,000,000 board feet. Each year more than 3,000,000 new ties are required for replacements.

"By establishing extensive creosoting plants now in operation for the treatment of ties and other wood, the life of the average tie used by the company will be lengthened from less than ten years to approximately twenty years of useful service. This means a saving of approximately 50 per cent in the cost of renewals.

"Railroads have made greater strides in the conservation of wood than any other great timber using industry. Rapid depletion of America's forests, caused not only by the demands of industry, but by destructive fires as well, makes the conservation of wood extremely important to all consumers of forest products."

SUIT FILED TO BLOCK VALLEJO MUNICIPAL WATER PROJECT

Seeking an injunction to prevent the City of Vallejo from impounding water in the Gordon Valley Reservoir in Napa County, and from interfering with the flow of water from Gordon Valley into Suisun Creek, a suit has been filed in the Napa County Superior Court by fifty plaintiffs, including the town of Suisun, a municipal corporation.

The suit charges that the City of Vallejo constructed a dam across the Gordon Valley branch of Suisun Creek, which will impound all the waters that otherwise would flow into the creek, and has constructed an aqueduct from the reservoir to the City of Vallejo for the purpose of diverting waters permanently from Suisun Creek.

It alleges that this diversion of water would materially injure the plaintiffs. A permanent injunction is sought preventing such action on the part of the City of Vallejo.

"HOME TOWN" CEMENT FAVORED AT REDWOOD CITY

The value of the Pacific Portland Cement Company's plant to Redwood City was recognized by the city trustees of that place when they adopted a resolution recommending the use of "Golden Gate" cement in all public work and requesting the contractors to use the local product in work for the city. The resolution, offered by Trustee D. R. Stafford, was unanimously adopted. It follows:

"Whereas, there is located at Redwood City the plant of the Pacific Portland Cement Co., manufacturing the 'Golden Gate' brand of Portland cement, and

"Whereas, said plant employs a large number of residents of Redwood City and is of great benefit to the city, Now therefore,

"Be it Resolved, by the Board of Trustees that we recommend the use of 'Golden Gate' brand of Portland cement in all public work in said city and requesting all contractors to use said brand of cement."

Locker and shower rooms will be provided. **See call for bids under official proposal section in this issue.**

ORLAND (Glenn Co.), Oct. 25.—Every high school in Glenn County will close tomorrow night for an indefinite period if intention announced verbally at an indignation meeting of the principals and teachers in the county held in Orland Sunday afternoon, is carried into effect.

The entire teaching force has declared a strike because they cannot draw their pay.

Sixteen instructors and 225 pupils will be affected in the Orland High School, and fifteen instructors and 200 students in the Willows High School, six instructors and sixty pupils in the Hamilton City School, and about an equal number in the Elk Creek branch of the Willows High School.

Drastic Action

There will not be a high school class called in the entire county.

The drastic action was taken following a refusal by County Treasurer Ed S. Ball to cash warrants for salaries of the teachers in the Willows and Orland High Schools for the school month just ended, giving as a reason that the salary funds for the two schools was depleted.

The teachers took the stand that they had the right to demand their pay when it is due, and that there is no law to compel them to continue to work when such pay is refused.

The question was made a court matter last June in the case of Schall versus Ball, the county treasurer. Superior Judge Claude F. Purkitt held with the plaintiff against the county treasurer, handing down the decision that the law permitting such transfers is legal and pointing out from which particular fund the warrant in question could be paid.—From Sacramento Bee.

SANDY PRATT can see all.
OF THE Glenn County children.
CRYING THEIR eyes out.
BECAUSE THEY are compelled.
TO TAKE a vacation.
WHEN SANDY Pratt, president.
OF THE Pratt Building Materlal Co.
AND PRODUCER.
OF CLEAN, sharp sand.
AND CLEAN gravel and rock.
WAS A school boy.
IF SOME county official.
DID SOMETHING.
TO CLOSE the schools.
HE WOULD have been showered.
WITH GIFTS and praise.
AND A fund.
WOULD HAVE been raised.
TO HIRE a fleet.
OF SMART attorneys.
TO HELP the friendly official.
KEEP THE schools closed indefinitely.
SANDY REMEMBERS years ago.
WHEN A school house.
BURNED TO the ground.
AND ALL the kids.
OF THE town.
GATHERED AROUND the blaze.
DANCED WITH joy.
AND WANTED.
TO MOB the volunteer firemen.
FOR TRYING.
TO EXTINGUISH the blaze.
SO THE grand jury.
AND CITIZENS of Glenn County.
MUST NOT expect much support.
FROM THE school kids.
'I THANK you."

Abe Lincoln used to walk miles to borrow a school book to improve his mind, but nowdays we have school busses to take the children to school and Sandy Pratt, producer of sand, gravel, rock and concrete mix (sand and gravel mixed) at Sacramento, Marysville, Mayhew (Sacramento County), Prattrock (near Folsom), and Prattco (Monterey County)—central office, San Francisco, thinks County Treasurer Ed. Ball should lend the schools some money because Judge Purkitt, a friend of Sandy's, decided it was OK.

COURTLAND, Sacramento Co., Cal.—Until Nov. 5, 2 p. m., bids will be rec. by L. C. Peck, clerk, Bates Joint Union School District, to erect 2-classroom addition to Oriental school. R. E. 10844—New York, N. Y., an American, born in China and having had twenty-five years' business experience in that country, with a thorough knowledge of the language, customs, market and trade conditions, is now in New York, but will return to Shanghai shortly. He desires to get in contact with an American firm for the purpose of representing them in China on a salary and commission, devoting his entire time to their interests; or to obtain the agency for several business houses, each of which would pay a monthly sum towards maintaining an office, etc., and pay a commission on the business done. He will supply references to interested firms.

SOMOZIDED LUMBER SHIPMENT ARRIVES AT OAKLAND

A. M. S. Pierce, manager of the E. K. Wood Company, announces the arrival in Oakland of the first shipment of "Somozided" lumber. "This lumber," Pierce states, "is chemically treated to make it fire resistant, by immersion in tanks of patent chemicals for 24 hours. The lumber is in this way inpregnated with the "Somoziding" fiuld so that it will not support combustion, its fire resisting qualities become closely comparable to tile or slate. Shingles are treated by the same method.

"This first shipment of 50,000 square feet, is to be used for the construction of the new Boyle Manufacturing Company plant in Alameda."

Pierce anticipates installing his own plant for the fire proofing treatment of lumber and shingles at the Oakland yards of E. K. Wood Company.

Official Proposals

NOTICE TO CONTRACTORS

(Tulare County Hospital)

NOTICE IS HEREBY GIVEN: That sealed bids will be received by the Clerk of the Board of Supervisors of the County of Tulare, at his office in the courthouse in the city of Visalia, above county and state, **up to the hour of 2 o'clock p. m., November 23, 1926,** for the furnishing of all labor and materials necessary in the erection, construction and completion of a General Hospital Building and Power House, known as Job No. 1302, including works according to plans and specifications prepared for the same by Kump & Johnson, Architects & Engineers in strict accordance with bid proposals and alternate bids asked for in specifications, under segregated contracts particularly described as follows:

Contract A—General Construction consisting of Excavating and grading, Concrete and Cement Work, Glass and Glazing, Carpentry, (the placement of Finished Hardware, Structural Steel, Miscellaneous & Ornamental Iron, Steel Partitions and Sash) Rough Hardware, Metal Doors, Frames and Sash.
Contract B—Masonry.
Contract C—Steel and Iron.
Contract D—Roofing.
Contract E—Plastering.
Contract F—Tile and Marble.
Contract G—Painting.
Contract H—Sheet Metal.
Contract I—Plumbing.
Contract J—Heating.
Contract K—Refrigerating Plant.
Contract L—Linoleum.
Contract M.—Finished Hardware.
Contract N—Electric Work.
Contract P—Elevators.

EACH BID PROPOSAL: Must be accompanied by a certified or cashier's check equal to at least 10% (ten per cent) of the total amount of the bid to do the work mentioned, payable to the Chairman of the Board of Supervisors of the County of Tulare. Such check is to be received on the condition that if the proposal of the bidder be accepted, he will enter into and execute a contract for the faithful performance of the work described in the plans and specifications and file required bonds within ten days from and after notice of award. Plans and specifications for this work are on file in the office of the Board of Supervisors and also in the office of Kump & Johnson, Architects and Engineers, City of Fresno, 532 Rowell Bldg., at which latter place copies must be obtained.

ALL BIDS: are to be made out on blank forms furnished by the Architects. The sucessful bidder will have to give surety bonds in the sum of 50% (fifty per cent) for the protection of material, men and labor and 25% (twenty-five cent) bond guaranteeing faithful performance of contract, as required by the terms of an Act of Legislature of the State of California entitled, "An Act to secure the payment of claims of persons employed by contractors upon public works and that claims of persons who furnish materials, supplies, teams, implements and machinery used or consumed by such contractors in the performance of such works, and prescribing the duties of certain public officers with respect thereto." Approved May 10, 1919. (Stats. 1919, p 487, and acts amendatory thereto). All bid proposal blanks in accordance with Building Form 3-8 incl. adopted by the Board of Supervisors, copies of which are on file in the office of the Board of Supervisors and also in the office of the Architects at which latter place copies must be obtained.

The Board of Supervisors of the County of Tulare reserve the right to reject any and all proposals or to accept the proposal considered by them best for said County of Tulare. By order of the Board of Supervisors.

GLADYS STEWART.
County Clerk and ex-officio Clerk of the Board of Supervisors.
(SEAL) By A. W. FROST, Deputy.

A call for bids published in this section indicates that bids are desired from other than local bidders Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rates 10 cents per line, per insertion.

The Casing to be dipped in California Asphaltum on the Pacific Coast. Price quoted to be f. o. b. Oakdale, Calif.

Bids will be opened at **8 o'clock P. M. on the 5th day of November, 1926,** or as soon thereafter as convenient, and all bids must be filed with the City Clerk prior to the hour aforesaid.

All bids should be addressed to C. E. Wood, City Clerk and marker "Bid on Pipe." The Board reserves the right to reject any or all bids.

By order of the Board of Trustees of the City of Oakdale.
Dated October 19, 1926.

C. E. WOOD,
City Clerk of the City of Oakdale.

NOTICE TO CONTRACTORS

(Elmhurst School Addition)

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, **until Tuesday, the 9th day of November, 1926, at 9:45 A. M.,** at which time said bids will be opened for the erection and completion of the Elmhurst School Addition No. 1, of the Oakland School District, to be erected on the southeastern side of 98th Avenue opposite the intersection of Cherry Street. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

Separate bids will be received for:
(1) General Work.
(2) Awning Type Window Fixtures and Hardware.
(3) Slate Blackboards.
(4) Plumbing, Heating and Ventilating Work.
(5) Electrical Work.

On a deposit of Twenty-five ($25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and General Contract Plans shall be returned within ten (10) days, and all other plans shall be returned within five (5) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not be less than ten (10%) per cent of the amount bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand ($5000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 9th day of November, 1926, at 9:45 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of Oakland, California.

How about bidswanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it? If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

Building & Engineering News

Contractors will be restricted as to the length of time they may retain these plans and specifications to Fifteen (15) days. Deposits of contractors failing to return said plans and specifications in good condition within said time limit will immediately become forfeited to the County of Alameda.

Each bid must be accompanied by a check for at least Ten (10%) per cent of the total amount of the bid or proposal, certified to by some responsible bank and made payable to Geo. E. Gross, Clerk of the Board of Supervisors, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the said contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the Contract.

The Board reserves the right to reject any and all bids.

Dated October 18, 1926.

GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County, California.

NOTICE TO CONTRACTORS

(Gymnasium—Yuba City Union High School District)

Notice is hereby given that sealed bids will be received by the Yuba City Union High School District, Sutter County, California, at the present High School Building, Yuba City, California, **until two o'clock P. M., November 6, 1926,** for the erection of a Gymnasium Building to be erected on the present High School site at Yuba City, California, according to plans and specifications prepared for the same by George C. Selion & Company, the authorized Architects.

Bids will be received for the General Construction with alternate propositions.

Plans and specifications can be seen during office hours at the office of the Clerk of said Board at Yuba City, California, and may be seen at or obtained from the office of the Architects, 1415 California State Life Building, Sacramento, California.

A cash deposit of $25.00 will be required from all prospective bidders on all copies of plans and specifications loaned out, as a guarantee of the return of same.

All bids must be presented on blank forms which may be procured from the office of the Architects.

Each bid must be accompanied by a certified check on some responsible California bank for a sum of not less than ten per centum (10%) of the amount of the bid, made payable to V. W. Cooley, Clerk of the Board of Trustees, as a guarantee of good faith that the party to whom the contract may be awarded will, within ten days after the award is made, enter into the necessary agreement and furnish the necessary bonds for the faithful performance of said work, and in case the bidder to whom the contract is awarded fails or refuses to enter into said agreement, or to furnish said bonds, said check will be forfeited to the said School District, in the manner provided by law. The Board of Trustees will not accept a Bidder's Bond in lieu of a certified check.

Each bid must be enclosed in a sealed envelope and addressed to V. W. Cooley, Clerk of the Board of Trustees Yuba City Union High School District, Sutter County, and endorsed "Proposal for Building Gymnasium."

The Board of Trustees expressly reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of Board of Trustees, Yuba City Union High School District.

By V. W. COOLEY,
Clerk.

NOTICE TO CONTRACTORS

(Goleta Union High School District)

Plans and specifications necessary for the supplying of labor and materials necessary for the construction of the Goleta Union School, Goleta, California, may be obtained on and after October 27, 1926 by application to Louis N. Crawford, Architect, 8 Jones Building, Santa Maria, California.

Plans and specifications provided must be returned at the time of submitting proposal in order for proposal to be considered.

Separate proposals numbered 1 to 6, inclusive, are required, as follows: (1) General Construction; (2) Plumbing and Sheet Metal; (3) Electric Work; (4) Painting; (5) Tile Roofing; (6) Built Up Roofing.

Each proposal must be accompanied by a certified check to the amount of ten per cent (10%) of the proposal price.

Surety bond to the total amount of the proposal price will be required of the successful bidders.

Sealed proposals will be received by the Clerk of the Board of School Trustees, Wm. T. Lillard, Jr., Goleta Union School District, Goleta, California, on or before 7:30 p. m., Wednesday, November 17th, 1926, at a meeting to be held in the Goleta Grammar School, Goleta, California, at which time and place bids for the erection of the Goleta Union School will be considered.

The Board of School Trustees above mentioned, reserves the right to reject any proposal not in compliance with the conditions above stated, or to reject all proposals, or to accept any proposal which it considers to be in the best interests of the Goleta Union School District.

By order of the Board of School Trustees, Goleta Union School District, Goleta, California.

WM. T. LILLARD, JR.,
Clerk.

NOTICE TO BIDDERS

Heating—Modesto Junior College No. 2

Notice is hereby given that the Board of Education of the Modesto City School District, County of Stanislaus, State of California, will be at the offices of said Board at the Capitol School Building on Fourteenth Street, between H and I Sts., Modesto, California, on the **8th day of November 1926, at 8 o'clock P. M.,** of that day to receive and consider sealed bids on the following:

The necessary electric heating units to be used in heating the building known as unit number two of the Modesto Junior College. Plans of the building and other necessary information for bidders may be obtained in the office of the secretary of said Board of Education.

All bids must be sealed and filed with the Secretary of the Modesto City Board of Education prior to 8:00 P. M., on the 8th day of November, 1926, and be accompanied by a certified check on some solvent bank of the State of California for ten per cent of the amount of the bid submitted, which check shall be made payable to the Modesto City Board of Education, which check is required as guarantee that the successful bidder will within two days after the notice of award of contract to him enter into a satisfactory contract with the Board of Education, the amount thereof to be retained as liquidated damages in event said contract is not entered into by such contractor.

The Board of Education reserves the right to accept or reject any and all bids.

Modesto City Board of Education.
E. D. ABBOTT, Secretary.

NOTICE TO BIDDERS

(School Furniture—Oakland)

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District and Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211 City Hall, Oakland, California, **until Tuesday, the 9th day of November, 1926, at 9:30 A. M.,** at which time and place said bids will be opened for: School Furniture, consisting of School Desks, Teachers' Desks, Oak Chairs, Folding Chairs, and Kindergarten Chairs.

These bids shall be presented in accordance with the specifications on file in the office of the Assistant Business Manager, City Hall, Oakland.

Price, fitness and quality being equal, preference will be given to the products of the State of California.

Persons or firms desiring to be on the mailing list of the Oakland Board of Education may list themselves with the Purchasing Department.

JOHN W. EDGEMOND,
Secretary of the Board of Education of Oakland, California.

NOTICE TO CONTRACTORS

(Power House and Laundry—King's County)

Sealed proposals addressed to the Board of Supervisors, County of Kings, State of California, for the construction of a Power House and Laundry Buildings, near the County Hospital Building, as per plans and specifications on file, will be received by the Board in its chambers in the Court House at Hanford until **ten o'clock A.M. of the 17th day of November, 1926,** and at that time and place will be publicly opened and read.

Plans, specifications and blank forms of proposal for work may be obtained at the office of the Clerk of the Board of Supervisors or at the office of the architect, Anton Johnson, 528 Call Building, San Francisco, California, on deposit of Ten Dollars ($10.00), (returnable upon return of plans in good condition). All proposals must be made on said blank forms, must give the price proposed, both in writing and figures, and must be signed by the bidder with his address. The phraseology of the proposal must not be changed and any alteration made by the bidder will make the proposal informal and liable to rejection.

Each bid to be presented under sealed cover and shall be accompanied by cash, a bidder's bond or a certified check made payable to the order of the Chairman of the Board of Supervisors, of the County of Kings, State of California, for an amount equal to at least ten (10 per cent of the amount of said bid, and no bid shall be considered unless such cash, bond or check is enclosed therewith, such cash bond or check to be returned to the bidder unless forfeited under the conditions herein stipulated.

A good and satisfactory surety bond will be required for the faithful performance of the contract in a sum equal to twenty-five (25) per cent of the amount of the contract and a further like bond in a sum equal to one-half of the amount of the contract must be furnished as required by the terms of an act of the legislature of the State of California, entitled, "An Act to

Secure the payment of claims of persons employed by Contractors upon Public Works, and the claims of persons who furnish materials, supplies, implements, or machinery used or consumed by such contractors in the performance of such works, and prescribing the duties of certain public officers with respect thereto," approved May 10, 1919, known as Chapter 303 of the Statutes of 1919. The sureties on both bonds must be approved by the Board of Supervisors.

Bids will be received on the following divisions of work: Division 1 — General Work. Division 2—Heating.

The bidder to whom the contract may be awarded will be required to appear at the office of the Board of Supervisors with the surety bonds offered by him, and execute a contract within ten (10) days (not including Sunday) after it is awarded to him. In case of failure or neglect to do so he may be considered as having abandoned it, and the cash, bond, or check accompanying the proposal may, at the option of the Board of Supervisors be forfeited to the County of Kings, State of California.

The Board of Supervisors reserves the right to reject any or all proposals.
BOARD OF SUPERVISORS OF THE COUNTY OF KINGS, STATE OF CALIFORNIA.
By M. C. CARTER, Chairman.
(Seal). Attest:
E. F. PICKERILL, Clerk.
Hanford, California, October 25, 1926

NOTICE TO CONTRACTORS

(Courthouse—Santa Barbara County)

Pursuant to an order of the Board of Supervisors of the County of Santa Barbara, State of California, made on the eighteenth day of October, 1926, notice is hereby given that sealed bids will be received **until 10 A. M. on the fifteenth day of November, 1926,** by the Board of Supervisors of the County of Santa Barbara, State of California, at their rooms in the County Court House, in the city of Santa Barbara, County of Santa Barbara, State of California; said bids then and there will be publicly opened and read for furnishing all paint, material and labor and doing the work required, for the construction and erection of the Court House, Hall of Records and Jail Building on the Court House site in the City of Santa Barbara, County of Santa Barbara, State of California, and all in accordance with the plans and specifications therefore, made by William Mooser Company, Architects, copies of which may be obtained on application from the Architects, Nevada Bank Building, San Francisco, California.

Such bids will be received for the work as follows: separately;

1. ONE GENERAL BID — Items listed under "Ornamental Iron."

2. ONE GENERAL BID—(A) Items listed under "Concrete Work." (B) Unit prices.

3. ONE GENERAL BID — Items listed under "Main Entrance, Arch, Stone, etc."

All proposals must be submitted on forms similar to the one here attached as prepared by the Architects, William Mooser Company, Nevada Bank Building, San Francisco, California.

Cash, a Bidder's Bond, or a Certified Check in the sum of at least Ten per centum (10%) of the amount of the bid must accompany each bid, and be payable to the Chairman of the Board of Supervisors of the County of Santa Barbara, as a guarantee that the Bidder whose proposal is accepted will enter into a contract with the County of Santa Barbara, for the work bid upon, otherwise said Cash or Bidder's Bond, or Certified Check, will be forfeited to the County of Santa Barbara.

A deposit of Fifty Dollars cash or certified check will be required for plans and specifications, the deposit to be returned immediately on the return of plans and specifications in good condition to the Clerk of the Board of Supervisors, County Court House in the City of Santa Barbara or to the Architects, William Mooser Company, Nevada Bank Building, San Francisco, State of California.

RIGHTS RESERVED

The County of Santa Barbara reserves the following rights: (a) To reject any or all proposals; (b) to waive any informalities in any proposal; (c) to award this contract to some other than the lowest bidder, as this clause expressly puts the bidder on notice that his financial and business standing and ability properly and expeditiously to carry out work hereunder, or the consideration of desired alternates, makes his proposal more advantageous to the County of Santa Barbara; (d) to accept any alternative or any independent part of any proposal submitted by the successful bidder at the price stated in such proposal for such alternate or separate parts of the work, under the provision; (e) to deduct any separate item mentioned in any proposal at the price therein stated therefor; (f) to make any additions to omissions from changes in, or substitution for the work or materials or articles called for by the contract, subject to the requirements of the paragraph thereof headed under the particular item and without notice to the sureties on this bond, if any, guaranteeing the performance of the contract.

All bids must be addressed to the County Clerk of the County of Santa Barbara in the City of Santa Barbara, State of California, and have endorsed thereon.

Proposal for Court House, Hall of Records and Jail Building, for the County of Santa Barbara, California, and the particular part of the work bid upon.

C. L. PREISKER,
Chairman of the Board of Supervisors of the County of Santa Barbara.
C. A. HUNT,
County Clerk and Clerk of the Board of Supervisors of the County of Santa Barbara.

NOTICE TO CONTRACTORS

(Millbrae School District—San Mateo County)

Notice is hereby given that the undersigned trustees of the Millbrae Grammar School District, San Mateo County, Calif., will receive sealed bids **up to the hour of eight (8:00) o'clock P. M., ou Tuesday, the 9th day of November, 1926,** at the Millbrae Grammar School, Millbrae, at which said time and place said bids will be publicly opened for the construction of additions to the Milbrae Grammar School building.

All bids will be submitted on form provided and addressed to the Clerk of the said Board of Trustees and must be accompanied by a certified check made payable to the order of aforesaid clerk in amount equal to at least ten (10%) per cent of the largest bid so submitted, and no proposal will be considered by said Board unless accompanied by such check.

The said check to be forfeited to said School District, as ascertained and liquidated damages in case the successful bidder fails or refuses to enter into a contract to perform the work and give satisfactory bonds required, within ten days after the date of the award.

The plans and specifications for said work may be examined at the office of E. L. and J. E. Norberg, architects, 407 Occidental Avenue, Burlingame, and a limited number will be loaned to contractor if a deposit of $10.00 is made.

The said Board of Trustees expressly reserves the right to reject any and all bids.

Done by the order of the Board of Trustees of the Millbrae Grammar School District, San Mateo County, California.

G. J. DAVIS,
Clerk.

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

SACRAMENTO TO ADOPT UNIFORM BUILDING CODE

An ordinance approving the new building code, recently completed by the Pacific Coast Building Officials Association after numerous conferences, will be presented to the Sacramento city council shortly by City Manager Bottorff.

Copies of the final preliminary draft have been received by the city manager. Slight changes will be made to fit local conditions but, in the main, it will be presented as drafted. After it has been presented, local building interests will be given the opportunity to review it and make suggestions.

The purpose of the code is to provide uniformity in building regulations among cities of the Pacific Coast. The officials believe it will reduce building costs materially as well as assist in avoiding confusion

COOLIDGE DAM BIDS TO BE OPENED AT LOS ANGELES

Bids for the construction of the Coolidge Dam on the San Carlos Irrigation project in Arizona will be received until 2 P. M., Nov. 10, at the district office of the Indian Irrigation Service, 311 Federal Bldg., Los Angeles. After the bids have been examined they will be forwarded to the Washington headquarters of the Indian Bureau where the most satisfactory bid will be accepted and a contract for the construction of the dam will be let to the successful bidder, according to the Interior Department.

The principal items involved in the Coolidge Dam are: excavation, about 26,000 cu. yds. of earth, sand and gravel; 14,000 cu. yds. of rock excavation in river bed; 195,000 cu. yds. of excavation stripping canyon's sides and spillway excavation; 187,000 cu. yds. of concrete; together with the placing of approximately 4,500,000 lbs of reinforcing steel; 1,400,000 lb. of structural steel, and 900,000 lb. of cast-iron gates and valves.

The Coolidge Dam is the principal irrigation structure on the San Carlos project. That project will embrace approximately 100,000 acres of irrigable land in the Florence-Casa Grande Valley in Arizona.

The construction of the dam was authorized by Congress at a cost not exceeding $5,500,000.

Sacramento building in October reached a total of $615,413, bringing the cost of all building for the year up to $7,024,063. Permits for 77 one-story frame dwellings were issued last month at a cost of $276,325.

OFFICE BUILDINGS ON PACIFIC COAST ENJOY PROSPERITY

"Office and commercial buildings of the Pacific Coast cities are in a prosperous condition and are enjoying a normal occupancy," says W. K. Bowes, vice-president of S. W. Straus & Co.

"A survey of such properties which has just been completed by S. W. Straus & Co. shows an occupancy ratio better than the 90 per cent which realtors and building owners consider a normal figure. In this survey are tabulated reports from 27 buildings of this type located in Portland, Seattle, Oakland, San Francisco and Los Angeles, which are held as security for S. W. Straus & Co. bond issues.

"Practically 100 per cent of the street floor store area of these buildings and approximately 90 per cent of the office and loft space of the upper floors is occupied. An analysis of the latter figures shows a total gross rentable upper floor area of 2,433,811 square feet, of which 2,171,034 square feet, or 89.2 per cent, was occupied on October 1.

"Taking first floor area also into consideration, the occupancy ratio will run considerably above 90 per cent. Since buildings which are accepted as security for S. W. Straus & Co. bond issues are typical of the best class of properties in these cities, an analysis of the condition of the 27 comprised in this survey may properly be considered characteristic of the better type of commercial buildings generally."

HYDRO-ELECTRIC PROJECTS CALL FOR EXPENDITURE OF $15,000,000

Rapid development of California's natural hydro-electric resources is indicated in application for authority to divert water from the state's streams for use in connection with forty-three water and power projects, with contemplated expenditures of more than $15,000,000, filed with the state division of water rights in the last thirty days, according to a report of Edward H. Hyatt Jr., chief of the division.

Twenty-four permits, calling for approximately $3,000,000 in expenditures, were approved during the month. Chief among the projects was the huge power and irrigation plant of the American River Hydro-Electric Company of San Francisco, the total estimated cost being $10,000,000.

Sponsored by Stephen E. Kieffer of San Francisco, this project contemplates development of 45,227 theoretical horsepower for domestic and industrial use in the vicinity of Sacramento, together with irrigation of 150,000 acres adjacent to Sacramento, between Lincoln, Folsom and Roseville.

Leading the other projects was the $1,170,000 power project of the Nevada-California Power Company of Riverside, which seeks development of 20,000 horsepower from water taken from Leevining creek in Mono county.

Stockton reports the issuance of 102 building permits during the month of October. Improvements undertaken were estimated to cost $126,060. October, 1925, activities totaled $233,325 when 124 permits were issued.

S. F. BUILDING IN OCTOBER TOTAL $5,649,690

Building operations undertaken in San Francisco during the month of October totaled approximately $5,649,690, according to John P. Horgan, chief inspector of buildings of the Department of Public Works. During the month, records of the department show, a total of 849 permits were issued.

October, 1925, operations totaled 1,057 permits for improvements representing an expenditure of $4,351,249. September, 1926, activities totaled 800 permits, the improvements undertaken being estimated to cost $4,001,012.

Included in the October, 1926, activities is the $1,326,852 pier to be constructed by the State Board of Harbor Commissioners and a $500,000 structure for St. Joseph's hospital.

Following is a segregated list of the operations for October, 1926, as compiled by the Department of Public Works:

	NO. OF PERMITS	EST. COST
"A"	3	$ 720,000
"C"	26	594,750
Frames	349	1,984,203
Alterations	467	611,822
Public Bldgs.	3	412,063
Harbor Bldgs.	1	1,326,852
TOTAL	849	$5,649,690

Operations for the past ten months total $49,593,398 as compared with $43,670,035 for the corresponding period in 1925.

STATE SETS RECORD FOR HOME BUILDING CONSTRUCTION

Assets of 176 building and loan associations operating in California jumped $49,499,096.93 during the last fiscal year, reflecting a sound and prosperous condition in the state's building development, A. E. Falch's, state building and loan commissioner, announces in his biennial report.

Falch placed the combined assets of the building and loan concerns at $190,106,988.02, as compared to $140,657,891.10 for the preceding year. Twenty-four new associations were formed during the year.

"California is fast becoming a state of homes," asserted Falch, "and the great majority of its prosperous and thrifty citizens are of a type who prefer to own homes. The opportunities of associations to grow are therefore almost unlimited. The building and loan surface of the state has been barely scratched. Instead of being the seventh building and loan state, California should today be at least third or fourth in the list."

CERTIFICATES GRANTED

California State Board of Architecture, Northern District, has granted certificates to the following to practice architecture in this state:

Leo J. Sharps, 2126 Bancroft Way, Berkeley; Norman W. Shaw, 71 Tunnel Road, Berkeley; John van der Linden, 1241 Carrison St., Berkeley.

L. A. Building Commission Approves Plastering Ordinance

Final draft of the proposed ordinance regulating plastering in the City of Los Angeles has been approved by the building and safety commission and sent to the City council with a recommendation for its passage. The text of the ordinance as introduced in council, is published herewith:

Sec.—. Plastering and Lathing—it shall be unlawful for any person, firm or corporation to do or cause to be done any plastering or lathing in or upon any building or structure unless said plastering and lathing shall be done in the manner and of the materials as hereinafter specified.

(A) Wood Lath—Wood lath shall be of good quality of pine, spruce or Douglas fir, free from cross grain, loose or dead knots or other detrimental features, three-eighth (⅜) inch thick by not to exceed one and five-eighths (1⅝) inches wide by four (4) feet long. Lath shall be nailed to each stud, joist or other support with not less than three penny fine blue nails, driven full length. Lath shall be spaced not less than three-eighths (⅜) of an inch apart for lime mortar and less than one-quarter (¼) of an inch apart for gypsum plaster, and vertical joints shall be broken every eighth (8) lath. No studs or joists or other lath supports shall be farther apart than sixteen (16) inches. Vertical or diagonal lathing or crooked or warped out of line lath are hereby prohibited. Lath shall be well soaked with water before being nailed in place and shall be kept wet unil plastering is applied.

(B) Plaster Boards — All plaster board used as a base or backing for plastering shall be approved by the Board of Building and Safety Commissioners, and comply with Section 202 of this Ordinance, provided, however, that plaster board lath without a mechanical key may be used in lieu of wood lath.

(C) Fiber Boards—Fiber boards or other similar boards may be used in lieu of wood lath as a base or backing for plastering providing said boards have first been approved by the Board of Building Safety Commissioners. All such approved boards shall be nailed to the studs or joists or other supports as near as may be, six (6) inches apart in one direction and as near as may be, sixteen (16) inches apart in the other direction.

(D) Metal Lath—Metal lath shall be of open hearth steel or ingot iron, copper alloyed, galvanized or dipped in an asphalt basic dip which shall be alkali-resisting lime and acid proof and with elasticity. All metal lath shall be lapped one (1) inch both horizontally and vertically and shall be held away from backing and all other supports for exterior work by galvanized furring nails or furring clips at least one-quarter (¼) of an inch, except when self-furring metal lath is used. When metal lath is applied to interior studs, joists, furring strips or other wood supports, same shall be secured with not less than six (6) penny galvanized or blued nails or one (1) inch No. 14 gauge galvanized staples. All nails, furring nails or furring clips shall be spaced, as near as may be, six (6) inches on centers, in one direction and not more than sixteen (16) inches in the other direction. Nails shall be driven to three-quarters (¾) penetration and then bent over to engage one or more strands or equivalent without breaking. Metal lath, when applied to metal supports, shall be secured with not less than No. 18 U. S. gauge galvanized annealed wire or metal clips, not more than six (6) inches on centers. The weight of metal lath shall not be less than three (3) pounds per square yard, as near as may be, for all fireproofing, suspended ceiling and exterior plastering work, herein before or hereinafter called for in the Ordinance.

(E) Plaster Reinforcing—All metal reinforcing woven wire netting, expanded metal or welded wire fabric, used for exterior stucco and plaster reinforcing shall be galvanized or dipped in an asphalt basic dip which shall be alkali-resisting lime and acid proof and with elasticity. Plaster reinforcing shall be secured, lapped and nailed in the same manner as required for metal lath work, and shall have a mesh not exceeding two (2) inches in width and not more than four (4) inches in length and containing not more than six (6) square inches and shall weigh not less than one and five-tenths (1.5) pounds per square yard.

(F) Wood and Metal Furring—Furring, except where metal studs are used, may be done with wood lath or other approved method or shall otherwise be done in accordance with the requirements of Sec. 201 and Sec. 202 of the Ordinance.

(G) Suspended Ceilings—The main suspended runners or supporting members, to be constructed of one (1) inch steel bars or steel angles, tees or channels of equal or equivalent strength, and shall weigh not less than four hundred forty-two (442) pounds per 1000 lineal feet. Such principals shall be spaced not more than fonr (4'-0") feet on centers and are to be suspended by a No. 8 U. S. gauge galvanized wire hangers four (4'-0") feet on centers. Wire hangers shall be securely fastened with clips, or bolts and nuts to the structural framing or embedded in the concrete or masonry construction. The bottom ends or wire hangers shall be secured to the runners by giving each wire a full turn around said runner and then by twisting together over the top edge or runner so as to develop the full strength of the wire. The main runners shall then be cross furred with three-quarters (¾) inch steel channels twelve (12) inches on centers, and shall weigh not less than two hundred seventy-six (276) pounds per 1000 lineal feet, secured at each runner with a double tie of not less than No. 18 U. S. gauge annealed galvanized wire. All main runners and cross furring shall be straight and true and shall be maintained in that condition. This construction shall then be lathed with metal lath of the quality and weight and in the manner called for in paragraph "C" of this section; provided, however, that other methods of suspended ceiling construction of equal or equivalent strength may be used, providing said method of construction and materials to be used are approved by the Board of Building and Safety Commissioners before any such work is commenced. All suspended ceilings shall be constructed to sustain without sign of failure a load of at least ten (10) pounds per square foot. Load tests shall be made by the owner or contractor on any portion of the suspended ceiling in the course of construction or alteration that may be designed by the Board of Building and Safety Commissioners.

(H) Sand—All sand used in plastering shall he clean, washed sand free from loam and other deleterious substances. All sand shall pass a No. 4 screen and not more than eighty (80) per cent or less than forty (40) per cent shall pass a No. 30 screen and there shall not be more than five (5) per cent by weight of silt therein.

(I) Lime—All lime shall be in the form of lime putty made by properly slaking first grade lump lime, same to be run through a fine screen after being thoroughly slaked. All lime putty thus made shall stand at least fourteen (14) days before being used in any plastering.

(J) Hydrated Lime—Hydrated lime may be used in lieu of lime putty.

(K) Keene Cement—Shall be finely and evenly ground and of uniform quality of an approved grade.

(L) Portland Cement—All Portland cement used in plastering shall comply with the requirements of Section 176 of this Ordinance.

(M) Grounds and Thickness of Plaster—Provide grounds at all windows, doors and other openings, base and mouldings, or as may be directed by superintendent of buildings, to insure the proper minimum thickness of all plaster work. Nothwithstanding thickness of plaster otherwise mentioned in this Ordinance, all plaster shall be of the following thickness:

(1) Interior plaster shall be not less than one-half (½) of an inch in thickness, measured from the face of the lath or masonry, providing, however, that the total thickness of metal lath and plaster combined for all fireproofing shall be not less than three-quarters (¾) of an inch.

(2) Exterior plaster shall be not less than seven-eighths (⅞) of an inch in thickness, measured from the face of the backing, provided, however, that exterior plastering on masonry buildings or structures may be of any thickness such as the owner or architect clects.

(N) Exterior Plastering—All exterior plastering, except on masonry buildings or structures, shall be three (3) coat work. On wood frame construction the building or structure shall be sheathed on the outside with close jointed solid wood not less than three-quarters (¾) inch in thickness, approved plaster board or reinforced waterproof paper, and ten (10) pound waterproof paper lapped to readily shed water shall be placed between wood sheathing and plaster and between wood studs or other construction and plaster boards, provided, however, that waterproof paper and sheathing may be omitted when an approved method of hack plastering is used. All exterior plaster shall be reinforced with metal lath or other approved plaster reinforcing.

First Coat

Shall be composed of one part Portland cement to three (3) parts of clean, sharp, washed sand, except on masonry buildings or structures, where composition shall be one and one-half (1½) parts of clean, washed sand to one (1) part Portland cement. To these proportions may be added not more than ten (10) per cent of lime or hydrated lime by volume of cement. The first coat shall be well forced through wire or metal fabric until plaster is solid between backing and metal fabric and shall be combed in both directions, leaving furrows to provide a good mechanical hond for a second coat. Allow this coat to stand for seven (7) days and kept moist for twenty-four (24) hours before applying next coat. No lime shall be added to this coat when approved waterproofing compounds in the r proper proportions are used. On masonry buildings or structures the surface to be plastered shall be thoroughly washed and cleaned before the first coat is applied.

Second Coat

To one part of Portland cement add three (3) parts of clean, sharp, washed sand. This coat is to be applied to true even surface. Ten (10) per cent of hydrated lime per volume of cement may be added, except where approved waterproofing compounds are used.

Third Coat

The finish and texture may be such as owner or architect elects.

(O) Interior Plastering—
First Coat

Shall be composed of one (1) part approved gypsum plaster to not more than three (3) parts of clean, washed sand; or one (1) part lime putty to two and a half (2½) parts of washed sand; or one (1) part of Portland cement to three (3) parts of clean, washed sand; or other approved plastering compounds in proper proportions. To each cubic yard of lime mortar shall be added three hundred (300) pounds Keene cement. To each of the above specified mortars add four (4) pounds of manila fiber or loosed hair to each cubic yard of mortar, same to be equally distributed throughout the mortar. This coat shall be well scored with a fork in both directions, leaving furrows to provide a good mechanical bond for second coat. Allow this coat to become thoroughly set before applying next coat.

Second Coat

Shall be composed of one (1) part approved gypsum plaster to not more than three (3) parts of clean, washed sand; or one part lime putty of three (3) parts of washed sand; or one (1) part of Portland cement to three (3) parts of clean, washed sand; or other approved plastering compounds in proper proportions. To each cubic yard of lime mortar shall be added one hundred (100) pounds Keene cement. To each of the above specified mortars add four (4) pounds of manila fiber or loosed hair to each cubic yard of mortar, same to be equally distributed throughout the mortar. Apply this coat flushed to the face of the ground and rod to true and plain surface.

Third Coat

The finish and texture may be such as owner or architect elects.

(P) Materials and Method of Applying, Not Specified—Materials and method of applying or construction not fully specified in detail in this section may be used for lathing and plastering work when approved by the Board of Building and Safety Commissioners of the city of Los Angeles; and other materials and other methods of applying or construction which, in the opinion of said board, are equivalent to the materials, methods and construction elsewhere provided for in this section, may be used when approved by the Board of Building and Safety Commissioners of the city of Los Angeles.

(Q) Tests Required—Tests of any or all materials, or combination of materials used in any lathing or plastering work shall be made by the owner or contractor at any time and in any manner, and for any purpose as may be designated by the Board of Building and Safety Commissioners.

(R) Approval Required—Whenever the word "approved" is used above it shall be construed to mean "approval required by the Board of Building and Safety Commissioners"

SECTION 201. **Metal Lath Fastenings**—All metal laths required on ceilings or soffit of stairs by this ordinance shall be securely fastened to the joists or furring strips, where such furring strips are of wood, by means of No. 18 U. S. gauge galvanized staples, not less than one (1) inch in length, and spaced or driven not more than six (6) inches apart. Where such furring strips are of metal, such metal lath shall be securely fastened to such furring strips, with not less than No. 18. U. S. gauge galvanized annealed wire or metal clips, spaced as near as may be six (6) inches on centers; provided, however, that metal lath constructed with steel ribs, not less than one-half (½) inch in width, and spaced not more than eight (8) inches apart, may be fastened to the joists by means of barbed roof nails, through said steel ribs and into the joists. Every auch nail shall be driven through to metal lath and into the joists to its head; all such nails shall be spaced not more than six (6) inches apart.

SECTION 202. **Plaster Board**—Wherever in this ordinance metal lath is required to be used, there may be used in lieu thereof plaster board, composed of pure gypsum and wood or manila fibre, and the proportions thereof shall be not less than 85% pure gypsum by weight to not more than 15% of wood or manila fibre by weight. Such plaster board shall be not less than three-eighths (⅜) of an inch in thickness and so constructed as to form a mechanical key or bond between the plaster board and the finished plaster. Such mechanical key or bond shall be equally distributed, and shall compose at least 10% of the surface of the plaster board.

Where wood joists, wood furring strips, wood studs or other wood supports are used, plaster board shall be securely fastened thereto by means of nails, of such length that the said nials shall extend at least three-fourths (¾) of an inch into the joists, furring strips, studs or other supports. Such nails shall be spaced or driven as near as may be six (6) inches apart in one direction and as near as may be sixteen (16) inches apart in the other direction.

Where the furring strips, studs or other supports are of metal, plaster board shall be securely fastened to the same with galvanized iron wire of not less than 18 U. S. gauge or with metal clips, constructed of not less than 20 gauge metal, spaced as near as may be six (6) inches in one direction and as near as may be sixteen (16) inches in the other direction. All such metal clips shall be constructed in such a manner as to closely fit both the plaster board and the carrying bar. All wire nails used for fastening plaster board shall be at least No. 11 gauge with a flat head not less than three-eights (⅜) of an inch in diameter. All such plaster board shall have applied thereon at least two (2) coats of hard wall plaster, such plaster to be not less than one-half (½) inch thickness.

Any type of plaster board desired to be used as in this section specified shall be first tested and demonstrated to the satisfaction of the Board of Building and Safety Commissioners, by such tests as the said board may demand.

Reduction Of Thickness In Paving Brick To Save Millions

An annual saving to American taxpayers of at least two million dollars will be the result of the reduction in the thickness of paving brick shown to be possible without danger of street and highway deterioration by tests recently made by the Bureau of Public Roads, United States Department of Agriculture. This should be cheering news to John Smith, taxpayer who has been called upon lately to dig rather deeply into his pocket for the cash to pay for admittedly necessary public improvements. It is also another bit of evidence of the value of the research and experimentation in highway and street construction which have been carried on actively by the Federal bureau and the State highway departments and college laboratories for the past several years.

The bureau's tests, which were conducted at Arlington, Va., were made on a circular track divided into several sections each of which was paved with a different thickness of brick. One section was paved with the 4-inch brick which has become the standard as the result of 50 years of usage. Others were paved with 3½, 3, 2½, and 2-inch sizes. In all respects other than the thickness of the brick the construction of the several sections was identical.

Heavy trucks driven around the track subjected all thicknesses of brick to the same traffic and the test was continued until each section has been subjected to 62,200 passages of the test trucks. During 22,200 passages the trucks were equipped with heavy nonskid chains on the rear wheels. As the trucks were driven constantly over a narrow band of the pavement it is estimated that the traffic to which the surfaces were subjected was equivalent to 18 years of traffic on the average highway.

The results of the test definitely prove that 2½-inch brick of the quality used, when properly supported on a firm foundation, will prove satisfactory for pavements carrying the heaviest traffic; and 2-inch brick are shown to be entirely satisfactory for streets carrying the lighter types of traffic.

It is expected that the use of 4-inch brick, the common practice for many years, will be practically abandoned as a result of the test, and that engineers, generally, will adopt the thinner types. This has already been done in some sections of the country, notably in the Southwest; but in other sections, particularly in the North where nonskid chains are used extensively in winter, road builders have been reluctant to reduce the thickness of their pavements for fear of the effect of the heavy hammering of the chain-equipped trucks.

Comparative bids received for the construction of pavements show savings by the use of 2½-inch instead of 3-inch brick ranging from 11 cents a square yard in Pittshurgh to 27 cents in Raleigh, N. C., and still larger savings compared with the 3½ and 4-inch thickness. Compared with the latter thickness the estimated saving runs as high as 51 cents per square yard.

As more than ten million square yards of brick pavements were laid in the United States in 1925 and at least 90 per cent were laid with brick of 3-inch or greater thickness, it is apparent that the use of 2½ and 2-inch pavers, shown by the bureau's tests to be adequate for heavy and light traffic, respectively, will produce a very large saving. Assuming that as little as 15 cents is saved on each square yard the annual total would be at least one and a half million dollars.

In view of the fact that about half of the brick laid last year were more than 3 inches in depth, and that the saving in the use of 2½-inch over 3-inch brick is, in many cases, more than 15 cents a square yard, the estimate of two millinn dollars as the annual saving is believed to be conservative.

Whatever saving results, the taxpayers will get the full benefit of it. On account of the highly competitive character of street and highway paving every possible economy that can be effected is passed on directly to the communities purchasing the improvement.

Berkeley building operations in October totaled $432,177 as compared with $780,205 during the same month in 1925. Home building continues to be the feature of the Berkeley construction program, fifty-one permits being issued last month for homes costing $178,800.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Inauguration of the five-day week working schedule effective November 1, is announced by the St. Petersburg (Florida), Plasterers' Union.

Solon H. Williams, former deputy state forester, died in a Sacramento hospital, Oct. 27. He was 69 years of age and was connected with the State Board of Forestry during the Stephens administration.

Harry Fell has been appointed chairman of a committee appointed by the Santa Barbara Builders' Exchange, to work on proposed revisions to the city building code. The builders contend that the zoning ordinance, fire ordinance and building ordinance conflict with one another.

In addressing the sixteenth annual Pacific Loggers' Congress at Vancouver, B. C., Oct. 28, President Minot Davis of Tacoma, declared the industry is handicapped by inadequate prices.

State highway departments spent $649,125,101 for road and bridge construction during the fiscal year ended June 30, 1926, the Agriculture Department announces. The expenditures by states include: Arizona, $2,442,947; California, $18,090,728; Idaho, $3,636,681; Nevada, $3,055,959; Oregon, $15,553,453; Washington, $7,845,466.

Kraner & Haskell of San Francisco, bidding $142,165, have been awarded a contract by the Montecito Water District in Santa Barbara county to construct a hydraulic earth fill dam. The district will furnish gate valves and pipe costing approximately $5000, not included in the contract price. The dam will be 90 feet high and will form a storage reservoir of 64,500,000 gallons.

State Department of Public Works, Division of Water Rights, is considering application of the Banta-Carbona Irrigation District, San Joaquin county, seeking to divert forty cubic feet per second of water from the San Joaquin River for irrigation purposes. The district claims to have already invested $830,000 in this development and contemplates a total investment of $1,100,000.

One of the most conscientious students of the Evening High School Spanish Classes at Santa Barbara is an Irish contractor with a decided brogue who is taking Spanish for the purpose of learning how to swear at his Mexican employees. "I can't handle the Mexicans unless I can swear at them, but they don't understand English, so I must learn Spanish," he told his professor..

Final passage of an ordinance regulating the smoke nuisance has been voted by the Oakland city council. It is effective immediately and prohibits the owners of industrial plants or others from permitting the issuance of dense volumes of smoke from chimneys for more than five minutes in any one hour. It provides for the cleaning of flues and chimneys and for inspection by the health department.

Frank Pennell, 58, Mountain View contractor, died in a San Jose hospital, Oct. 27, following a lingering illness. The direct cause of his death was tumor of the brain.

Mrs. Audrey Pavert, 416 Park Way, Piedmont, is to receive the major portion of a $100,000 estate left by her husband, R. J. Pavert, contractor who died October 24, according to a will dated October 8, 1926. A son, Frank, 2101 Harrison street, is to receive $15,000 and an expensive make of automobile, according to terms of the will.

G. C. Specht, 3274 Sixth Ave. Sacramento, represents California interests contemplating an expenditure of $16,000,000 in Northern California for the development of hydroelectric power. Specht seeks from the State Department of Public Works, Division of Water Rights, a permit to appropriate 510 cubic feet per second of water from the north fork of the Trinity river. Power generated will be sold to a New York company. The application says a dam 400 feet high, 1600 feet long at the top and 100 feet long at the bottom, will be constructed to impound 110,000 acre feet of water, which will be dropped 1750 feet through twelve miles of pipe line with a diameter of 104 inches to develop 100,000 theoretical horsepower.

TRADE NOTES

Oroville plant of the Coast Rock & Gravel Company will be closed down for the winter months, during which time the plant will be overhauled and put in condition for next year's run.

Sander Pearson, 711 Sixteenth St., Santa Monica, has returned from a year's vacation spent in Europe and will re-enter the concrete contracting field.

The Pino Grandi Logging Camp, at Placerville, which supplies the material for the Michigan-California Door Company at Camino, has closed down for the season after a successful run.

Sawmill of the Hobart Estate Company at Hobart Mills, Nevada County, has shut down for the season. The season's cut was 28,000,000 feet. The winter will be spent in putting the mill in order for the next season's run.

Carl Swenson, general contractor, formerly of Fresno, will establish an office in San Jose to operate permanently in that city. He has already taken a membership in the Building Contractors' Association of San Jose.

Announcement is made of the change of the corporate name of the Walworth-Lally Company to the Walworth California Company. This concern conducts a plumbing business with branches in Los Angeles, Oakland, Sacramento, San Jose, Stockton and Fresno.

Moore Shipbuilding & Drydock Company of San Francisco has opened a branch office at 1226 Van Ness Ave., Fresno, for refrigerator sales. George Walling is sales agent for the company at Fresno.

Reliable Plumbing Co. of Oakland has been incorporated with a capital stock of $75,000. Directors are: H. J. Knupper, J. R. Pierce and R. Madeen all of Oakland.

Prices of cement in the Los Angeles district have been stabilized, according to reports, after a long period of demoralization. The new price quoted by Los Angeles dealers at warehouse is $3.06 per bbl.

Negotiations are being completed by the C. H. Carter Company of Sacramento, wholesale electric appliance dealers, for a new home to be erected for them at 1819 Eighth St., Sacramento.

Substantially augmenting its October export trade, the Schumacher Wall Board Corp. has just shipped a large consignment of plaster wall board to Antofagasta, Chili, and a carload of the Los Angeles-made product to Shanghai, China, Earl Schmidt, sales manager, announces. The shipment to the Orient left on the Steamship West Cajoot. The sales executive pointed out that the volume of trade with Chili and Shanghai has been increasing steadily since trial orders were shipped to those points several months ago.

New prices for sand, gravel and crushed rock have been adopted by producers in the Los Angeles district. Quotations have been simplified in the new schedule, according to Walter Moore, Jr., sale manager of the Union Rock Company. Washed concrete, plaster mortar and asphalt sand, No. 5 crushed rock and waste are now quoted at 50c a ton at the quarry, and pea gravel, washed screened gravel, 1 in. to 2½-in., and Nos. 1, 2, 3 and 4 crushed rock are $1.10 a ton at the quarry. Ten cents a ton discount is allowed if bills are paid in full before the 10th of the month following shipment. Freight from quarry to Los Angeles, paid by purchaser, is 50c to 60c a ton for sand and 60c to 70c a ton for crushed rock. From the quarry to the harbor district the freight is 70c for sand and 80c for rock.

ALONG the LINE

Ashley & Clow, engineers, McKevitt Bldg., San Anselmo, announce dissolution of partnership. The business will be continued by J. K. Ashley, Jr.

Announcement is made that J. B. Lippincott, E. E. East, Wilkie Woodard, W. K. Barnard, G. C. Fitzgerald, Francis Bates and H. Z. Osborne, well known engineers, will act as consultants to the major highways committee of the Traffic Commission of Los Angeles.

A special bridge committee of the San Francisco Board of Supervisors will meet shortly to consider the appointment of engineers to be retained as advisors to the supervisors in awarding a franchise for a bridge across San Francisco Bay.

W. G. Hind, architect and Hind Building Co. have moved to new and larger quarters at 506 Grant Bldg., Seventh and Market Streets, San Francisco.

Ed. C. Dietrich, city engineer of Tucson, Ariz., under four different administrations died in Los Angeles Oct. 14 a few days after he had arrived in that city for medical treatment. Heart disease was the cause of his death. Mr. Dietrich was 45 years of age. During the world war he was with the U. S. Engineer Corps in France, having the rank of major. He was a graduate of the University of Pennsylvania. Recently when floods threatened the Santa Cruz bridge in Tucson he rose from a sick bed and directed the work to save it.

Lester S. Ready, Chief Engineer of the Railroad Commission for the last three and a half years, has submitted his resignation to the Commission, effective December 15, 1926, in order to accept the presidency of Key System Transit Company, which has been tendered him by that company. Mr. Ready has been in the employ of the Railroad Commission 13 years, having served successively as Assistant Engineer, Gas and Electrical Engineer, Assistant Chief Engineer and Chief Engineer. Mr. A. G. Mott, who has acted as Transportation Engineer of the Commission for the last three years, has been appointed Chief Engineer of the Commission to succeed Mr. Ready. Mr. A. V. Guillou, who has been Gas and Electrical Engineer of the Commission for more than three years, has been appointed Assistant Chief Engineer of the Commission.

RED MOUNTAIN MAGNESITE COMPANY PLANS EXPANSION

The production of magnesite ore on a large scale is planned by the Red Mountain Magnesite Company which is operating on property located about twenty-seven miles west of Patterson, Stanislaus County.

This is disclosed by a permit just granted to the company by Commissioner of Corporations Clifford J. MacMillan. Under the terms of this permit the company is authorized to sell 82,000 shares or $82,000 worth of its capital stock for the purpose of providing additional equipment and also new working capital.

Red Mountain Magnesite Company, which is a California corporation with a capitalization of $300,000, is acquiring property previously operated by the California Magnesite Company under a working bond and lease, the principal part of the purchase price being payable from a royalty on production. Extensive development of this property shows tonnage of approximately 20,000 to 30,000 tons of magnesite ore of a high degree of purity now available for mining, with favorable indications for a much larger tonnage.

Magnesite is used largely for refractory material and also for plaster and other like uses. The present working equipment of the company includes boilers, hoist, compressor, drills, camp buildings and a stack kiln of 15 tons daily capacity, in condition for operation on coarse ores only. This, the company proposes to place in operation and also to construct a rotary kiln of 30 to 40 tons capacity at a cost of about $42,000.

San Mateo building permits for October rolled up a total of $393,774 as compared with $288,760 during September.

Engineers Dedicate Peak On Diablo To Colonel Ransom

On Sunday, October 24th, President Glenn Ashcroft, of the Society of Engineers, dedicated a point on the peak of Mt. Diablo to the memory of Col. Leandar Ransom, pioneer engineer of California, who in 1851 established the Mt. Diablo meridian and base line for all surveys in Central California and the entire State of Nevada.

There were present at the dedication about fifty members of the society, also members of branches of Federal and State Departments. A number of Sunday tourists were also on hand.

President Ashcroft, of the Society of Engineers, gave the dedication address which was in part as followa:

"We are assembled on the summit of this huge mountain to pay tribute to an early pioneer. It is entirely fitting that an engineering society should have been selected to sponsor this occassion, for the man we are to honor was a brother engineer.

"It is right that we should revere the memory of our early pioneers, without them we probably would not be here. They came from the four corners of the earth, these pioneers, and conquered the trackless wilderness, that the ways might be made straight and the paths smoother for us all. .. .. .. "Of the better of this type of man, was the pioneer engineer whom we are to honor. Leander Ransom was born in Connecticut in the year 1800. .. .. .. "He was selected by the government to establish the public land surveys in California and arrived in San Francisco in 1851.

"Shortly thereafter he lead a party to the summit of this mountain and here laid out the initial lines on the Mount Diablo base and meridian, upon which are founded the land surveya of most of California and all Nevada.

"He passed to the great unknown in the year 1874.

"And so, to the end that his name may be more intimately associated with the place where he began his labors in the state, I now, on behalf of the Society of Engineers dedicate this spot to the memory of Leander Ransom—to be known henceforth as Ransom's Point."

Responses to President Ashcroft were made by Lewis F. Byington of the Mount Diablo Park Commission and A. C. Horton Jr., District Cadastral Engineer, General Land Survey Office, U. S. Dept. of the Interior.

The Society of Engineers will place a bronze tablet on Ransom's Point, and engrave on it the story of his achievements in the West.

Hoover Standards Saved Florida Many Millions

After an exhaustive study of the effect of the Florida hurricane on houses and other structures in its path William M. Kinney, General Manager of the Portland Cement Association, warmly praised the building standards of the U. S. Department of Commerce as a practical means of minimizing in the future the efforts of such catastrophes. Mr. Kinney has been a close student of building methods and a member of leading American technical societies for nearly twenty years.

"We have refrained from talking about Florida up to this time," said Mr. Kinney, "through a desire to wait until a thorough examination could be made and reports received from engineers sent to the scene. Unfortunately, some of the earlier statements gave the building public quite an inaccurate picture.

"Practical builders look upon any storm which approaches the intensity of the recent hurricane as almost beyond the range of human power to foresee or provide against. We are told that the barometer went lower than was ever recorded in the United States. The wind whirling along at 150 miles per hour, drove great waves seven to fifteen feet high over the area, undermined structures and drove marine craft and other heavy floating objects against the buildings with incalculable force. Seven to fifteen inches of rain fell in a few hours. While experience in previous extreme tests justified experts in their opinion that reinforced concrete construction would meet the test perfectly as it did in this case, that dwellings in any great number should withstand the onslaught may be considered remarkable.

"Therefore it is a very gratifying fact that domestic structurea built in accordance with the building code of the U. S. Department of Commerce came through the storm almost undamaged. Certainly no stronger endorsement of the expert work rendered by Secretary Hoover's Code Committee can be found than in the examination of structures known to have been built according to its requirements for residential construction.

"The most striking example in the entire storm area is found at Coral Gables, where there is a group of about 3500 residences, apartment and hotel structures, all of which have concrete block walls clad with artistic colored cement stucco. These buildings, erected under the supervision of the Coral Gables architect, in accordance with the Hoover Code, came through the storm without a single case of destruction or anything more serious than slight superficial damage. These houses were directly in the path of the hurricane, as shown by the fact that trees and landscaping in the town were damaged to the extent of over a million dollars.

"Judging by the devastation to building in communities surrounding Coral Gables on every side, the property losses prevented by the use of substantial materials and adherance to these well recognized standards, easily may he placed twenty-five to fifty million dollars for Coral Gables alone.

"Serious damage or destruction of buildings with walls of various masonry materials occurred to a lamentable extent where slipshod construction methods were tolerated. In a great proportion of these cases, weak lime mortar, which would not be permitted under the Hoover code, is largely to blame. The masonry units are being picked up intact and relaid in the walls. Brick consatruction was so sparcely used in the storm area that it is hardly a factor."

The Five Day Week In Industry

(Special Correspondence to Daily Pacific Builder from the National Association of Building Trades Employers)

Encouraged by the recent announcement of the Ford Motor Company that the five day working week was being put into operation in the various manufacturing units of that corporation the Executive Committee of the American Federation of Labor meeting last week in Detroit prior to the opening of the annual convention of the Federation, issued a statement to the effect that the 40 hour week is the next major step that organized labor of this country will undertake.

In announcing this decision, William Green, President of the Federation, said, "The five-day week seems inevitable in American labor for the simple reason that it is economically sound and profitable. It is profitable for the worker and for the employer, and has been tremendously successful in the numerous crafts in which it is already partially effective. We have consistently maintained that hours must be reduced in direct proportion to increased productivity in industry. Productivity has increased in unbelievable bounds.

"We do not, of course, want shorter hours at the expense of wages. But we know this need not be, for production increases with the shorter week. The shorter schedule is necessary because of the strain under which workers are placed in modern industry. High pressure production and the physical demands of modern industry are such that only with the shorter period can we attain notable progress in mechanical production."

Among the fields which Federation officials believe are ready for the five-day week are the automobile, build ng, mining and needle industries.

Those who have been closely studying the march of events in the building trades have for a long time been aware that sooner or later a concerted effort would be made to put the 40-hour week into operation. In a number of trades and especially in the painting and plastering industries efforts to shorten the working week have been successful in some cities.

Much has been said about the probable effect of the five day week in an industry already undermanned. Unfortunately the vast majority of the employers in the building trades have up to this time viewed the movement with but little concern, believing that organized labor would never undertake a national movement to put the 40-hour week across in this industry. With this point of view we have always differed and on numerous occasions have called attention to the grave danger of the five day week becoming a reality to the detriment of the industry generally. Now that the parent body of the organized labor movement in America has gone on record in favor of the forty-hour week we are of the opinion that it behooves every employer of labor to take a definite stand against this evil. Unless the employers in this industry act unitedly in the matter the five day week will be a reality within the next five years. There is only one way in which the movement can be effectively blocked and that is through thorough and complete organization.

Prospects Of Lien Law Revision

The agitation for a revision of mechanic's lien laws seems to be increasing. Added to that of contractors who have long suffered because of the manifestly unfair provisions of a form of State laws that bolster up the credit of those who do not deserve credit is added the activity of the Department of Commerce, which has appointed a committee to drawn up a model lien law to be used as a reference code by State Legislatures when bills for revision as put forward. The attitude of many groups of material men also seems to be changing.

Formerly material men were the most ardent supporters of the system that makes it unnecessary for any material dealer to examine the credit of a contractor, owner or speculative builder before sending out a bill of goods. There are indications now, however, that material men are no longer out to oppose all changes in these laws. Recently the material men in Ohio, allied themselves with the contractors of that State in working for a new statute. The same group in Indiana were content to have passed an amendment to the mechanics' lien laws of that State which provides that where no lien contracts are signed such contracts must be filed with the recorder of deeds within ten days after the contract is signed. This move was brought about after the courts had upheld the right of a general contractor to enter into an agreement with the owner to keep the building free from all liens and decided that such a waiver was binding upon all sub-contractors and material men also. Such a provision makes it necessary for material men to examine into the credit and responsibility of those to whom they sell materials.

Some form of lien provision is necessary if building work is not to be hampered and if contractors, workmen and material men are not to take all the risks involved in the financing peculiarities of the realty credit system. These peculiarities, caused by the frozen aspects of building investments and the difficulties involved in second mortgage floatation, make it necessary to provide some measure of relief in the form of credit security and the lien laws were passed for this purpose. Their drawbacks at present arise from the overshooting of the mark. Today such laws serve the interests of irresponsible contractors who are enabled to underbid responsible builders and are assured of creidt because the owner's building is security. They serve the interest of certain material men who do not care whether the material is used in the proper manner or whether the owner is to get a sound building free from encumbrances or not. They serve the interests of the get-rich-quick speculative builders, who can easily secure building laans on a shoestring venture so long as the financial agency is assured that the

All of which is detrimental to the building can be unloaded on a demand market.

building public, the responsible contractors, the manufacturers and dealers of reliable materials. It should be much easier today, when the examples of losses caused by this form of credit over-stimulation are so numerous, to get all these elements together for a sensible lien law that will require that all parties to a building transaction shall undertake same responsibility instead of letting the building stand as security for all the mistakes or irregularities of the entire field.

While the revision of the mechanics' lien laws as outlined above is an important activity for contractors to engage in, there is no indication that the successful passage of model statutes will eliminate all the evils that at present afflict some sections of the industry. A supplementary activity that will go a long way toward improvlng the status of the contractor is to bring public attention to the advantages of having responsible contractors on all building jobs that are contemplated.

In fact, if the public were so educated at present there would be little trouble with the lien laws as they now stand. The responsible builder does not dodge his material bills nor does he hold up payments to his responsible sub-contractors. His payroll is met promptly every week and if a lien is to be placed on a building it is then usually the fault of the owner, who may have financial troubles of his own.

But the fact remains that the public has no clear idea of the difference between buildings erected by responsible builders and those erected by speculators and fly-by-nights. When they hear of the fuss that responsible contractors make over the unethical practices of irresponsibles in the industry they are only confused to a greater extent. What is needed is a publicity campaign dircted to the building public that will clearly set forth the constructive service that real builders render to their clients as compared with what can be expected from the jerry builders.

A campaign of this sort three or four years ago would have saved hundreds of millions of dollars to investors who have put money into the creations of speculative builders and are now faced with repair bills, decreased rental values and structures that are beginning to show the shoddy manner in which they were built. It would have added an enormous amount of work to the volume that was actually built by contractors and would have added to the permanent wealth of the country a large number of structures that would still be good investments several decades hence.

Such a campaign of education would fall on fertile soil today and would prevent the repetition of the investment mistakes of the past few years. The sooner the contractors overcome their false modesty and present the public with the details of the advantages of quality work the better it will be for everybody in this country.—Builders' Bulletin (Pittsburgh).

NAPA BUILDERS BANQUET

The Napa County Builders' Exchange on Oct. 27 held its semi-annual meeting and get-together banquet. Forty-five builders, contractors, and dealers from the various towns of the county were present. The meeting was presided over by S. J. Cinnamond of Napa, president of the organization.

F. L. Tessin, Napa contractor, who recently returned from a tour of Europe, told of working conditions and wages in Germany, contrasting them with the excellent conditions and high wages enjoyed by the American workmen.

Controlling Strength Of Concrete

The quantity of mixing water has been demonstrated by many tests to be the principal factor in the control of the principal factor In the control of the concrete is workable and the aggregates are clean and structurally sound, and other conditions are maintained the same, the compressive strength is fixed by the ratio of quantity of mixing water to quantity of cement (water-ratio). Similarly the grading of the aggregate has been shown to be the factor which fixes the quantity of cement required to produce concrete of a stated strength for given conditions of workability. Consequently that grading of aggregate which will produce concrete of a given water-ratio and workability, with the least amount of cement, is the most economical, when strength is the principal requirement.

This at once suggests an easy method for comparing the economy of different clean and structurally sound aggregates, without the use of special equipment.

The only equipment required to carry out the comparison is a cubic foot box, a scale weighing to 50 or 100 pounds and accurate to at least one pound, a mixing board or pan, a shovel and miscellaneous buckets, a quantity of cement, and the aggregates to be tested.

The following outlines the different steps in the test:

1. Surface dry the aggregates to be tested. This is not absolutely necessary, as the amount of moisture in the aggregates can be determined and taken into account; however, surface drying will not be troublesome and will make the test much less complicated.

2. Weigh out a quantity of cement, say 23½ pounds (¼ sack.)

3. Add water to the cement in the proper quantity to produce concrete of the required strength and mix into a paste. Following is an approximate relation between quantity of mixing water (including the moisture in the aggregate) and the 28-day compressive strength for average conditions:

5¼ gallons per sack of cement, 3,500 lbs. per sq. in.

6 gallons per sack of cement, 3,000 lbs. per sq. in.

6¾ gallons per sack of cement, 2,500 lbs. per sq. in.

7½ gallons per sack of cement, 2000 lbs. per sq. in.

4. Add sand and gravel to the paste in a fixed proportion (say 1 part sand and 2 parts gravel) until a workable concrete of the desired consistency is obtained and determine the volume of the concrete by measurement in the cubic foot box. Record all quantities

5. Repeat with different proportions of the sand and gravel and for different gradings of material, until that combination which will produce the greatest volume of concrete for a given workability is found. That combination represents the most economical grading.

6. Check all determinations by mixing the cement and aggregate dry and then adding the water. This is desirable since delays in carrying out the first determination may have allowed the cement paste to stiffen somewhat and consequently some adjustment in the quantities may be necessary.—National Sand and Gravel Bulletin.

Reduction In Corporation Income Tax Will Relieve Fifteen Million Taxpayers

"In the past quarter the corporation income tax yield gained $88,500,000 over the corresponding quarter of 1925; yet only a year ago the Treasury convinced Congress that it was necessary to add one per cent to the corporation rate," said Wilson Compton, manager of the National Lumber Manufacturer's Association today in commenting on the Treasury report of tax collections for the third quarter of 1926.

"There could be no better corroboration," he continued, "of the validity of the demand of the business men of the country for the reduction of the corporation tax at the appro ching session of Congress. Moreover, the corporations made up 81 per cent of the entire collections gain over last year. With every indication that the treasury surplus for the fiscat year 1927 will be about $400,000,000 it is incredible that congress will not promptly act for the relief of the only part of federal taxation that has not been reduced since the war. Indeed, Congress actually increased the war rate on corporations as late as the last session, seven years after.

"While partnerships and individual businesses are paying only a normal rate of 5 per cent maximum, individuals in corporations along side of them are really paying 13½ per cent.

"Last year when Congress eliminated the capital stock tax, it increased the corporation income tax rate from 12½ to 13½ per cent to make up for the decrease in revenue of about $87,000,000 collected from the capital stock tax. That this action was unnecessary is now made evident by the constantly increasing Treasury surplus. In the third quarter alone of 1926 the additional tax paid by corporations more than made up the loss of revenue occasioned by the elimination of the Capital Stock Tax. Receipts for the quarterly period July 1 to September 30, 1926, show that of the $532,000,000 collected in income taxes, nearly 60 per cent or $319,000,000 were paid by about 225,000 corporations, while there were practically 4,000,000 partnerships and individuals who paid the remaining 40 per cent.

"When it is recalled," said Mr. Compton, "that under the 1913 Act corporations and individuals alike paid only 1 per cent income tax and that even under the 1918 act immediately following the war the corporation rate and the maximum normal rate on partnerships and individuals stood on a parity at 12 per cent, it is unreasonable for any one to hold that the present 13½ per cent corporation income tax rate, as compared with the maximum normal rate of 5 per cent on partnership or individual income, is justifiable. Under the present law a man who has his business incorporated is compelled to pay over 2½ times the tax his neighbor pays who has his business in a simple partnership. With every assurance that tax reduction can be made at the coming short session, Congress could not better benefit individuals and business generally than by reducing the corporation income tax rate to 10 per cent. It is in fact the only way in which the fifteen million citizens who have invested in corporation stocks or the vastly greater millions who buy and use the products of corporations can share in further tax reductions."

OAKLAND MAN MADE VICE-PRES. OF PORT OFFICIALS

Separation of port terminal charges from the line haul rates of carriers for handling overseas freight and the establishment of the port terminal charges on a basis consistent with the cost of the service rendered, was endorsed in a resolution adopted at the closing session of the annual convention of the American Association of Port authorities at Norfolk, Va., Oct. 22.

All officera were re-elected. St. Louis was chosen for the 1927 convention site with the understanding that Quebec would be considered for that of 1928.

The resolution, adopted after considerable debate, was offered by Colonel Marcel Garsaud, general manager of the board of commissioners of the Port of New Orleans, after a motion offered by General William L. Sibert of the Port of Mobile had been tabled because its wording was objectionable to Canadian delegates.

The officers re-elected are: J. Spencer Smith, Tenafly, N. J., president; Tiley S. McChesney, New Orleans, secretary; F. C. Marron, Seattle, treasurer, and G. B. Hegardt, Oakland, Brigadier-General T. L. Tremblay, Quebec, and William F. Williams, Boston,vice-presidents.

Major-General Edgar Jadwin, chief of the United States army engineers, was elected a director to succeed his former chief, Major-General Hardy Taylor, M. W. Oettershagen of Chicago was chosen in place of Major B. C. Allin of Houston, Texas, resigned.

J. N. EDY TO WHITE BOOK FOR CITY MANAGERS

John N. Edy, city manager of Berkeley, has been selected to prepare a "Manual of Administrative Practice" for the use of cities governed by the city manager plan.

Development of the manual waa decided on at the recent convention of the association in Colorado Springs and endorsed by Dr. A. R. Hatton, a member of the Cleveland, Ohio, City Council, and Dr. Leonard D. White of the University of Chicago, a national authority on city manager government.

The move was considered to be demanded by spread of this form of government to 358 cities with a total population of six million.

Solicitation of co-operation from outstanding business men is planned by Edy so that the method proposed may be consistent with advanced practice in successful private business.

OAKLAND BUILDING PERMITS

A. S. Holmes, building inspector of Oakland, reports the issuance of 970 building permits during the month of October. Improvements undertaken during the month are estimated to cost $1,777,085.

A complete tabulation of the October activities in Oakland are listed on page three of this issue.

Building News Section

APARTMENTS

PETALUMA, Sonoma Co., Cal.—Wm. T. Mooney, local attorney, has purchased property at 811 D strett, near 8th St., and will raze the present structures and erect a modern apartment house. Site is 100 by 150 feet.

Completing Plans.
APARTMENTS Cost, $55,000
BERKELEY, Alameda Co., Cal. Durant Ave. near Telegraph Ave.
Two-story and basement frame and stucco apartments building (12 apts. and garage).
Owner—Josie B. Perry.
Architect—Slocombe & Tuttle, 337 17th St., Oakland.
Ready for figures in about ten days.

Plans Completed.
APARTMENTS Cost, $27,500
SAN FRANCISCO, Calif. S E 26TH AVE and Lake St. 3-story and basement frame (12) apartments.
Owner—Louis D. Stoff, 26 Montgomery St.
Architect—H. C. Bauman, 251 Kearny St.

Permit Applied For
APARTMENTS Cost, $50,000
SAN FRANCISCO. W Fillmore — N Chestnut St.
Three-story frame apartments building (21) apts.)
Owner—Pierre S. Van Winkle, 181 26th Ave., San Francisco.
Architect—Albert H. Larsen, 447 Sutter St., San Francisco.

Plans Completed.
Segregated Bids To Be Taken Nov. 2.
APT BLDG. Cost, $19,000
BERKELEY, Alameda Co., Cal. Alcatraz and Dover Street.
Two-story and basement frame and stucco store and apartment bldg. (2 stores and 7 apts.)
Owner—Name withheld.
Architect—O. R. Thayer, 110 Sutter St., San Francisco.

To Be Done By Day's Work.
APARTMENTS Cost, each, $20,000
SAN FRANCISCO, Calif., W BRODERick 39 and 70 S Grove Street.
Two 3-story and basement frame apartment Bldgs (12 apts each).
Owner—V. Gullmes, 323 Chattanooga St.
Architect—H. C. Baumann, 251 Kearny St.

To Be Done By Day's Work.
BUILDINGS Cost, ea $38,000 & $30,000
SAN FRANCISCO, Calif., N. E. Frederick and Willard Sts and N Frederick 40-6 E Willard Sts.
Two 3-story and basement frame and stucco apartment bldgs (12 apts. each)
Owner—Murphy & Seitz, 105 Montgomery St.
Architect—H. C. Baumann, 251 Kearny St., S. F.

To Be Done By Day's Work.
APARTMENTS Cost, $45,000
SAN FRANCISCO, Calif., S. W. Divisadero and Chestnut Sts.
Three-story and basement frame (24) apartments.
Owner—Christiansen Bros., 687 20th Ave.
Architect—None.

To Be Done By Day's Work.
APARTMENTS Cost, $30,000
BERKELEY, Alameda Co., Calif. 2235 Hearst.
Two-story 16-room frame and stucco (8) apartments.
Owner—Harry C. Knight, 1428 Franklin St., Oakland.
Architect—None.

Contract Awarded
APARTMENTS Cost, $55,000
BERKELEY, Alameda Co., Cal. Durant Ave., near Telegraph Ave.
Two-story and basement frame and stucco apartments building (12 apts. and garage.)
Owner—Josie B. Perry.
Architect — Slocombe & Tuttle, 337 17th St., Oakland.
Contractors—D. H. McCorkle & Hill, 319 14th St., Oakland.

Contract Awarded.
APARTMENTS Cost, $37,500
MARTINEZ, Contra Costa Co., Calif. Pine St.
Three-story frame and stucco apartments (18 apartments and 4 single rooms, with baths.)
Owner—Mark R. Monze, 315 15th St., Oakland.
Architect—Robert MacFarline, 635 Main St., Martinez.
Contractor—Frank B. Gilger, Martinez.
Foundations started.

MARYSVILLE, Yuba Co., Calif.—Milton Haney, Gern Apts., Marysville, has purchased property in D Street, near 5th St., and plans to remove present structures and erect a two-story brick store and apartment building; 2 stores, one to be occupied by Skaggs Safe Way Stores Co., and Beal Furniture Co., with apartments on 2nd floor; est. cost $100,000. Steam heating plant and Frigidair system will be provided.

BONDS

SAN JOSE, Santa Clara Co., Cal.—Until Nov. 15, bids will be received by Henry A. Pfister, county clerk, for purchase of $100,000 bond issue of Jefferson Union School District; proceeds of sale to finance erection of new school, plans for which are being prepared by Architects Wolfe & Higgins, 19 North Second St., San Jose.

PITTSBURG, Contra Costa Co., Cal.—Pittsburg High School trustees call meeting for Nov. 4 to consider preliminary drawings for proposed new high school. An election will be called shortly to vote bonds to finance construction.

NEWPORT BEACH, Orange Co., Calif.—The proposed bond issue of $175,000 for erecting a municipal bathhouse failed to carry at election Friday, Oct. 29.

SAN ANDREAS, Calaveras Co., Cal.—Calaveras Union High School District votes bonds of $125,000 to finance erection of a new school building. An architect is yet to be selected.

JOOST BROTHERS
Builders' Hardware
Tools, Etc.
(Members Builders' Exchange)
1071 MARKET ST.
Phone Market 891 San Francisco

RIVERSIDE, Cal.—Bonds in the sum of $1,050,000 were voted by Riverside High School District by a vote of 3 to 1 at the special election Oct. 28. Bonds were re-voted on account of a legal technically in the previous election proceedings. Three junior high school buildings are to be erected from proceeds of bond issue and the architecte selected to design the buildings are Marston, Van Pelt & Maybury, Los Angeles and Pasadena; Alfred W. Rea and Chas. E. Garstang, Pacific South West Bank Bldg., Los Angeles, and Austin & Ashley, Los Angeles and W. Horace Austin, Long Beach, associate Architects Will proceed at once with plans for the new buildings.

SAN JOSE, Santa Clara Co., Cal.—Until Dec. 6, bids will be received by Henry A. Pfister, County Clerk, for purchase of $165,000 bond issue of Mountain View School District; proceeds of sale to finance construction of a two-story reinforced concrete school. W. H. Weeks, 369 Pine St., San Francisco, is the architect.

CHURCHES

Working Drawings To Be Prepared.
BUILDING Cost $30,000
ALBANY, Alameda County, Calif.
2-story frame and stucco community hall and educational building.
Owner—Albany Community Methodist Church.
Architect—Wythe, Blaine & Olson, 1755 Broadway, Oakland.

Completing Plans.
CHURCH Cost, $36,000
SAN LEANDRO, Alameda Co., Calif.
Frame and stucco church building.
Owner—Broadmore Methodist Church, Dutton and Breed Sts., San Leandro.
Architect—Wythe, Blaine & Olson, 1755 Broadway, Oakland
Plans will be out for figures shortly and will probably be taken in San Leandro.

BAKERSFIELD, Kern Co., Cal.—Architect Rollin S. Tuttle, Westren Pacific Bldg., has been commissioned to prepare plans for a new church building to be erected at East Bakersfield for Pilgrim Congregational Church. A building to cost $20,000 is contemplated. A site has been purchased and campaign for building funds is under way. Some funds are available from the sale of former church property.

Working Drawing Being Completed
CHURCH, ETC. Cost, $35,000
BERKELEY, Alameda Co., Cal. Russell and Claremont Blvd.
Two-story brick church, school and community house.
Owner—St. Clements Episcopal church, premises.
Architect—B. G. McDougall, 353 Sacramento St., San Francisco.
Plans ready for figures in about two weeks.

FACTORIES & WAREHOUSES

LOS ANGELES, Los Angeles Co., Calif.—W. Douglas Lee, architect and builder, 709 Textile Center Bldg., applied for bldg. permit 10-29-26 to erect 6-sto. concr. store and factory bldg. at 434 S. San Pedro St., for self.; 90x150 ft., concr. rf. and flrs., staff, steel sash, plate glass store fronts, passenger and freight elevators, fire escapes, ext. stand. pipe; $132,500.

MERCED, Merced Co., Calif.—J. W. Souther, former president of Souther Warehouse Company of San Francisco, plans erection of warehouse on Southern Pacific right-of-way to contain approx. 50,000 sq. ft. floor space, equipped for handling grain, rice and other commodities.

REDDING, Shasta Co., Cal.—Construction has been started on a two-story soda water and bottling plant for Zeis & Sons at the northwest corner of Oregon and Sacramento Sts.; will be 32 by 50 feet. E. A. Zeis is manager of the company.

SAN FRANCISCO — Bay Cities Enameling Works, 1382 Mission St., San Francisco Waterproofing Co., 1378 Mission St., Office Fixture Co., 1376 Mission St., and Swift Co., lumber and mill yard, 65 Tenth St., suffer $200,000 fire loss. Only slight damage was done at latter plant.

Contract Awarded.
WAREHOUSE Cost, $100,000
SAN FRANCISCO, Calif., 2nd and Brannan Sts.
Three-story reinf. concrete warehouse.
Owner—Crane Company, 301 Brannan St.
Architect—Lewis P. Hobart, Crocker Bldg., S. F.
Contractor—J. S. Sampson Co., Monadnock Bldg., S. F. at $92,500.
Other bids received were:
Charles Stockholm and Sons, Hearst Bldg., S. F., $97,867.
K. E. Parker Co., 135 S. Park, S. F., $99,800.
Clinton Construction Co., 923 Folsom St., S. F., $102,500.
Villadsen Bros., 417 Market St., S. F., $102,900.
MacDonald and Kahn, 130 Montgomery St., S. F., $103,935.
Monson Brothers, 251 Kearny St., S. F., $104,680.
G. P. W. Jensen, 320 Market St., S. F., $104,930.
H. L. Petersen Co., $105,464.
Lindgren-Swinerton, Inc., 225 Bush St., S. F. $110,000.
Barrett & Hilp, 918 Harrison St., S. F., $116,000.

Contract Awarded
WAREHOUSE Approx. cost, $50,000
FRESNO, Fresno Co., Calif.
One-story and basement reinforced concrete warehouse.
Owner—Bekin Van & Storage Co.
Lessee—Blake, Moffitt & Towne.
Architect—F. Eugene Barton, Crocker Bldg., S. F.
Contractor—Jolly & Jolly, 547 Echo St., Fresno.
Contract for sprinkler system will be awarded shortly.

WILMINGTON, Calif.—Shell Oil Co., of California will erect $7,000,000 refinery on a part of a 330-acre site recently purchased on Dominguez Hill.

Sub Contracts Awarded.
FACTORY Cost, approx, $100,000
PITTSBURG, Contra Costa Co., Calif.
One-story reinforced concrete factory building, 110x350.
Owner — Pioneer Rubber Mills, near Pittsburg.
Architect — Benj. G. McDougall, 353 Sacramento St., San Francisco.
Contractor — Lindgren & Swinerton, Inc., 225 Bush St., San Francisco.
Structural Steel—Judson Mfg. Co., 604 Mission St., San Francisco.
Lumber—Redwood Manufacturers Co., Hobart Bldg., S. F.
Glass—W. P. Fuller, 301 Mission St., S. F.
Steel—U. S. Metal Products Co., 330 10th St., S. F.
Reinforcing Steel—Edw. L. Soule Co., Rialto Bldg., S. F.
Pile Driving—A. Isham, Rio Vista, Calif.
Plumbing and Heating—Fearey & Moll, 1075 40th St., Oakland, Calif.
Electric Work and Automatic Fire Sprinkler System—H. C. Reid & Co., 115 Mission St., S. F.
Steel Rolling Doors—Pacific Building Materials Co., 525 Market St., S. F.
Roofing—Bender Roofing and Paving Co., 18th and Bryant Sts., S. F.
Painting and Sheet Metal—Not let.

FLATS

To Be Done By Day's Work
FLATS Cost, $11,000
SAN FRANCISCO. E 22nd Ave, 220 N Anza.
Three-story and basement frame (6) flats.
Owner—Frank Antonioli, 1525 Clement St.
Architect—None.

GARAGES

LOS ANGELES, Calif.—McClintic-Marshall Co., 602 Delta Bldg., awarded contr. at about $140,000 for furnishing and erecting structural steel for class A garage, store and loft bldg. at s. e. cor. of 9th and Hill Sts., for the May Co.; Curlett & Beelman, 408 Union Bank Bldg., archts.

Contract Awarded.
GARAGE Cost, $25,000
OAKLAND, Alameda Co., Calif., W Valdez St., 150 N 23rd St.
One-story tile garage building.
Owner—M. E. Campbell, American Bank Bldg., San Francisco.
Architect—J. J. Donovan, 1916 Broadway, Oakland.
Contractor—Chas. W. Heyer, Jr., Mills Bldg., San Francisco.

GOVERNMENT WORK AND SUPPLIES

WASHINGTON, D. C.—U. S. Shipping Board, through U. S. Shipping Board Emergency Fleet Corporation, desires bids to furnish such quantities of Topside Paints as may be required at Atlantic, Gulf and Pacific Coast ports for the period of six months beginning December 1, 1926. Full information and form of proposal may be had by communicating with Supply Department, U. S. Shipping Board Emergency Fleet Corporation, Washington. Bids will be rec. until 2 p. m., November 10.

PEARL HARBOR, T. H.—Bids will be asked shortly by Bureau of Yards ington, D. C., to construct extension to Pier at Naval Operating Base, (Navy Yard), Pearl Harbor. Plans are now available for bidders. **See notice under official proposal section in this issue.**

PAINTING CO.
1508 J ST. MAIN 445 SACRAMENTO

WATER PROOFING
DAMP PROOFING
FLOOR HARDENING

WASHINGTON, D. C.—Until Nov. 15, 10:30 A. M., bids will be rec. by Purchasing Agent, Panama Canal, under Circular No. 1765, to fur. and del. Balboa (Pacific Port): Steel, iron, corrugated roofing, pipe, boiler tubes, cable, wire, pneumatic grinder, transformers, condensers, switches, socketa, cut-outs, push buttons, tape, pressboard, chain, garbage-can covers, vises, scythe blades, crucibles, jack planes, lanterns, casters, hinges, ladders pig iron, zinc, pig tin, ferrosilicon, bricks, sand, fire clay, quicklime, ship felt, cork, lumber, and creosoted timbers. Further information obtainable from Assistant Purchasing Agent, Fort Mason, San Francisco.

WASHINGTON, D. C.—Bids are being received by Bureau of Supplies and Accounts, Navy Department, to furnish and del. materials to Navy Yards and Stations, the date of opening bids as noted as close of each paragraph. (Further information regarding the Schedule may be obtained from Navy Purchasing Office, 310 California St., San Francisco):
Sch. 6126, western yards, anvils, brackets, chain clips, screw eyes, handles, etc. Nov. 16.
Sch. 6173, Mare Island, 2,080 lbs. valve grinding compound, Nov. 16.
Sch. 6180, western yards, cocks, faucets, valves and traps, Nov. 16.
Sch. 6185, Puget Sound, 100 lbs. condenser tube packing, 350 lbs. oiled paper sheet packing; Mare Island, 2,250 lbs. asbestos wick packing; Puget Sound, 1,000 lbs. do, Nov. 16.
Sch. 6189, western yards, whisk brooms, scrub brushes, floor brushes, deck brushes and dauers, Nov. 16.
Sch. 6192, western yards, rushes and brooms, Nov. 16.
Sch. 6194, western yards, conduit pipe, Nov. 16.
Sch. 6198, Mare Island, 1,800 lbs. hide glue; Puget Sound, 300 lbs. do, Nov. 16.
Sch. 6199, Mare Island, 2,23 ft. soil pipe; Puget Sound, 132 ft water pipe, Nov. 16.

DENVER, Colo.—Following bids rec. Oct. 15 by bureau of reclamation, Denver, for automatic gate hangers:
Item 1, 2 automatic gate hangers for sluice gates at Guernsey dam; 2, 2 do for emergency gates at McKay dam.
Ogden Iron Works, $1,626, lumpsum price.
Joshua Hendy Iron Works, item 1, $1,033; 2, $1,033; lump sum, $1,916.
Baker Iron Works, item 1, $1,922; 2, $1,722; lump sum, $3,644.

MARE ISLAND, Cal.—Until Nov. 24, 11 A. M., under Specification No. 5288, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., for four 300-h. p. water tube boilers with brick settings, oil burning equipment and smoke flue between boilers and chimney at Mare Island Navy Yard Hospital. Plans obtainable from Commandant at Navy Yard on deposit of $10, returnable. **See call for bids under official proposal section in this issue.**

SAN FRANCISCO—Until Nov. 8, 11 A. M., under Order No. 7637-978, bids will be rec. by U. S. Engineer Officer, 85 2nd St., to fur. and del. Rio Vista, Solano county: wire rope and Manila rope. Spec. obtainable from above office on request.

RENO, Nevada.—Supervising Architect, Treasury Department, Washington, D. C., is preparing plans for additions and alterations to Reno Postoffice.

STOCKTON, San Joaquin Co., Cal.—Edward W. Roberts, construction engineer of Supervising Architect's Office, Treasury Department, Washington, D. C., is in Stockton to compile data necessary before the preparation of plans for new Post Office. Approximately $500,000 will be available for construction. Actual construction will not be started for about three years.

"SANDY" PRATT BUYS NEW PLANT

The Pratt Building Material Company has purchased the plant of the American River Sand & Gravel Company at Mayhew, on the American river near Sacramento. With this acquisition "Sandy" Pratt takes first place among the rock, sand and gravel suppliers of the state. — From the San Francisco Bulletin, Oct. 30, 1926.

WALLACE MASON lives in Sacramento.
HE SELLS corrugated pipe culverts.
IS A famous Sacramento Rotarian.
WALLY MASON is fast.
WITH THE trigger or tongue.
HE IS a great musician.
WITH HIS vocal "organ."
RECENTLY SANDY met Wally.
IN THE Hotel Senator lobby.
JUST AFTER Sandy announced.
FOR HIS companies.
THE PURCHASE of.
THE AMERICAN River Sand.
AND GRAVEL Company's plant.
PRODUCING SAND and gravel.
ALSO CONCRETE mix.
(SAND AND gravel mixed).
WALLY SAID, "Sandy.
YOU ARE a Rock-a-fellow."
WALLY PROBABLY means.
THAT SANDY has "rocks."
LIKE JOHN D. Rockefeller.
OR MAYBE Wally.
LIKE THE editor.
OF THE San Francisco Bulletin.
(SEE ABOVE Bulletin story).
THINKS SANDY is buying.
ALL THE sand and gravel.
IN CALIFORNIA.
IT CAN'T be done.
THERE IS.
TOO MUCH sand and rock.
IN THE world.
AND SANDY Pratt is happy.
WITH HIS present producing plants.
WHICH ARE located.
AT MARYSVILLE, Sacramento.
PRATTROCK (NEAR Folsom).
MAYHEW (SACRAMENTO County).
AND PRATTCO (Monterey County).
(CENTRAL OFFICE—San Francisco.)
"I THANK you."

The boys of '49 used to wash the sand, rock and gravel along the American and Yuba Rivers to secure the gold. They left the sand, rock and gravel and Sandy Pratt came along with the next generation and again washed the sand, rock and gravel, and now he sells it to the children and grandchildren of the '49ers.

Manufacturers of feed water heaters and purifiers for general power plant purposes; also hot water heaters for laundries, packing houses, etc., desire to secure the services of a manufacturers' agent who has had experience in the sale of power plant specialties, to represent them on a strictly commission basis in this district.

D-2239—New York, N. Y. Manufacturer of a mixing and distributing machine for griddle cakes, waffles, etc., for use in hotels, cafeterias, restaurants, bakeries, boarding houses and similar establishments, desires to appoint a sales agent to handle the sale of his apparatus here, on a commission basis.

D-2244—Pittsburgh, Pa. Firm is placing on the market a chemical device, patented, which, when bolted to the under side of the lid of a garbage can, kills all odor and life in the can. They wish to appoint a suitable agent to represent them in San Francisco.

D-2247—Danville, Penna. Dealer in used equipment and machinery offers for sale: New oil well-drilling equipment, used engines, generators, auxiliary equipment, switch boards and motors.

10856—Redfern, N. S. W. Exporters of Australian hardwoods, such as: spotted gum, iron bark or blue gum, desire to get in touch with interested San Francisco importers of these woods.

10863—Duesseldorf, Germany. Old established dealer in rosin desires to establish connections with producers of this commodity with view to representing them in Western Germany. They have connections with all the large buyers of rosin in the above territory.

10865—Courbevioe, France. Firm offers for sale 30 tons of powdered white lead. They can also export all products and raw materials for painting.

10866—Torino, Italy. Manufacturers of wood letters and justifying furnitures in wood, as well as of paper-working machinery, such as cutters, gold-embossing presses, etc., desires to establish connections with houses engaged in the sale of articles for the graphic industries, which might be interested in handling the sale of their line in this territory.

10869—Mexico, D. F. Firm wishes to get in touch with San Francisco houses selling China wood oil, wholesale, to be used in the manufacture of varnishes.

10870—Havana, Cuba. Firm wishes to communicate with San Francisco merchants interested in importing ceramic products.

ENGINEERS ELECT

Bruce B. Ellis, county engineer of Pima County, is the new president of the Engineers' Club of Tucson, Ariz. Other officers are: Geo. Foster, vice-president; James Macmillan, treasurer; Gorm Loftfield, secretary; George T. Grove, Roy Place and Paul T. Robinson, directors.

BUILDING INSPECTOR PROPOSES LICENSE LAWS

Oscar G. Knecht, Chief Building Inspector of San Diego, has proposed a new ordinance for that city regulating the business of building contracting through licensing and bonding. Knecht claims that many of the present evils of flimsy construction and unpaid material and labor bills will be eliminated. Application for license shall be on written form and accompanied by a surety bond in the amount of $2000 payable to the City of San Diego guaranteeing the completion of any construction in accordance with all laws and ordinances governing same. The building inspector shall have power to order revoked any building contractor's license upon the presentation of satisfactory evidence that the licensee is incompetent or has wilfully violated any of the provisions of the ordinance.

U. S. STEEL CORPORATION DECLARES DIVIDEND

The directors of the United States Steel Corporation on Oct. 26 declared the regular quarterly dividends.

Net earnings for the quarter ended September 30th were $352,626,826 after federal taxes but before depreciation and interest charges, against $47,814,-105 in the present quarter and $42,-400,412 in the third quarter of 1925.

Surplus was $31,709,905 after all charges, against $27,648,542 in the preceding quarter and $23,804,823 in third quarter of 1925. The September surplus is equivalent to $4.94 a share on $5,083,025 common shares, compared with $8.20 a share the preceding quarter and $3.44 a share in the third quarter of 1925.

The surplus for the first nine months equals $13.06 a share on common stock against $9.44 a share in the same period of 1925.

U. C. ENGINEER WRITES ON MINE VENTILATION

Attacking all the theoretical and practical problems of mine ventilation and bringing together modern knowledge of the subject, Professor Walter S. Weeks of the Department of Mining and Metallurgy of the University of California has just published a book on "Mine Ventilation," which is expected to be of aid to mining engineers, mine owners, and to those interested in the general subject of ventilation.

The subject of mine ventilation is of importance to operators for many reasons, says Professor Weeks.

"Unless the air in the mine is free from poisonous gases and dust, the workers became incapacitated. If heat is not removed from the mine as fast as it is generated, the miner cannot do a fair day's work. In case of fires or explosions in mines where the ventilations is not under control, many lives may be lost and the mine itself may be greatly damaged."

Due to the fact that the principles underlying the mechanical ventilation of mines are the same as those involved in ventilating auditoriums, the book will be of value to those interested in the general subject. It has just been released by the McGraw Hill Publishing Company.

HOLLOWAY JOINS G. G. ATLAS MATERIALS SALES STAFF

Chas. Holloway Jr., for ten years San Francisco branch manager of the Truscon Steel Company, has resigned his position with that concern to become general sales manager for the Golden Gate Atlas Materials Company, according to an announcement by O. C. Barrymore, vice-president of the Golden Gate Atlas Company.

Previous to his joining the Truscon forces, Holloway was president of the Holloway Expanded Metal Company.

Due to his fifteen years association with the construction interests in Central and Northern California, Holloway acquired a thorough knowledge of all types of construction and building materials which will prove invaluable to him in his new field.

Official Proposals

NOTICE TO BIDDERS

(Modesto Irrigation District, Stanislaus County, California)

Sealed proposals will be received at the office of the Modesto Irrigation District at Modesto, California, **until 2:00 o'clock P. M., November 22, 1926,** for submitting Form and Delivery Contracts or other agreements covering our requirement of electric meters and distribution transformers to be furnished in accordance with the terms of contracts covering a twelve-month period.

As a basis for comparing bids, an estimate of $10,000 for meters and $30,000 for transformers to be purchased during the said period will be used in determining the proposal most favorable to the District. Bidders will submit their prices with base and quantity discounts covering a year's supplies above specified. Bids may cover either or both classes of apparatus.

Bids on Watthour meters shall be for those used on sixty-cycle circuits and must be accompanied by the following data: Weight, dimensions, material used in base, type of cover, type of bearing, shunt coil loss, current coil loss, accuracy curves covering voltage, load and frequency, weight of moving element, and stock of the following sizes normally carried in San Francisco or Bay Region; also, in Los Angeles and North Pacific Coast Cities.

SIZES OF METERS

10 Amp 110 Volt, 2 wire, single phase
15 Amp, 110 Volt, 2 wire, single phase
20 Amp, 110 Volt, 2 wire, single phase
10 Amp, 220 Volt, 2 wire, single phase
15 Amp, 220 Volt, 2 wire, single phase
25 Amp, 220 Volt, 2 wire, single phase
10 Amp, 220 Volt, 3 wire, single phase
15 Amp, 220 Volt, 3 wire, single phase
25 Amp, 220 Volt, 3 wire, single phase
50 Amp, 220 Volt, 3 wire, single phase
5 Amp, 110 Volt, 3 wire, poly-phase
5 Amp, 220 Volt, 3 wire, poly-phase
10 Amp, 220 Volt, 3 wire, poly-phase
15 Amp, 220 Volt, 3 wire, poly-phase
25 Amp, 220 Volt, 3 wire, poly-phase
50 Amp, 220 Volt, 3 wire, poly-phase

Bids on transformers shall be for those used on sixty-cycle circuits, single phase with primary voltage of 11,500, 6,600 and 2,300. The following data for 2300-volt primary to 115-230 or 230-460 must accompany bid, weight without oil, material used in case, number and percentage of taps, copper loss, core loss, per cent regulation on one-half, three-fourths, and full load; also list of stock of the following sizes normally carried in San Francisco or Bay Region, also, in Los Angeles and North Pacific Coast Cities.

SIZES OF TRANSFORMERS

5, 7½, 10, 15, 25, 37½, 50, 75, 100, 150 kva.

The Contract will be let to the lowest responsible bidder, but the Board of Directors reserve the right to reject any or all bids.

Each proposal must be accompanied by a certified check for 5 per cent of the above amounts, payable to the order of the Treasurer of the Modesto Irrigation District for the benefit of said District as a guarantee that the bidder will, if successful, execute a satisfactory contract and furnish a bond for 10 per cent of the above amounts for the faithful performance of the terms of said contract.

Proposals must be marked "Proposal for a Twelve-Month Contract for Furnishing Transformers and Meters" and addressed to Modesto Irrigation District, Modesto, California.

Done in pursuance of the order of the Board of Directors of the Modesto Irrigation District this 25th day of October, 1926.

MODESTO IRRIGATION DISTRICT,
C. S. ABBOTT,
Secretary

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

NOTICE TO BIDDERS

(Tractor—City of Modesto)

Notice is hereby given that sealed bids or proposals will be received by the City Council of Modesto, at the Office of the City Clerk at 717 Tenth Street, **not later than seven-thirty (7:30) o'clock P. M., on Wednesday, the 10th day of November, 1926,** for one (1) "Caterpillar Thirty Tractor" complete.

All proposals or bids shall be accompanied by a certified check or bidding bond, payable to the Mayor of said City, which check or bidding bond shall be an amount not less than ten (10%) per cent of the total bid.

Bidders must submit specifications, and state time of delivery of said tractor.

The City Council reserves the right to reject any or all proposals or bids.

By order of the City Council of the City of Modesto, County of Stanislaus, State of California.

H. E. GRAGG,
City Clerk.

NOTICE TO CONTRACTORS

(Memorial Building—Chico)

Notice is hereby given by the Board of Supervisors of Butte County, California, that sealed bids will be received by the Clerk of the said Board, at his office in the Butte County Court House, in the City of Oroville, California, **up to Monday, November 22nd, 1926, at 2:00 o'clock P. M.,** for the erection of a Memorial Building, to be built in the City of Chico, California, according to plans and specifications prepared for the same by Chester Cole, architect, Chico, California.

All bidders will bid on the work as follows: General Construction as a whole, and not segregated.

Plans and specifications can be seen during office hours at the office of the aforesaid Clerk of the Board of Supervisors, and also may be seen and obtained from the office of the architect, at his office, Chico, California, in the First National Bank Building.

All bids will be presented on blank forms which may be procured from the office of the architect.

Each bid must be accompanied with a certified check on some responsible California Bank, or by a Bidder's Bond, for a sum not less than ten per cent of the amount of the bid, made payable to the Chairman of the Board of Supervisors of Butte County, California, as a guarantee of good faith, that the party to whom the contract may be awarded will, within ten days after the award is made, enter into the necessary agreement and furnish the necessary Surety Bonds for the faithful performance of the said work, and in case the bidder to whom the contract is awarded, fails or refuses to enter into the aforesaid agreement, or to furnish said bonds, said check will be forfeited to the said County of Butte, in the manner provided by law.

Each bid must be enclosed in a sealed envelope and addressed to the Clerk of the Board of Supervisors of Butte County, California, and endorsed, "Proposal for Building Memorial Building, Chico."

The Board of Supervisors expressly reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Supervisors, Butte County, California.

C. F. BELDING, Clerk.
By B. L. McCOY, Deputy Clerk.

NOTICE TO CONTRACTORS

(Sewer—City of Sacramento)

Sealed bids will be received by the undersigned for the City Council of the City of Sacramento, in his office, located in Room 203, City Hall, up to the **hour of 5 o'clock p. m. on date of November 12, 1926,** for the construction of Unit No. 1 of the 1926 Bend Sewer, consisting of certain reconstruction work on the north side of Sewage Pumping Station No. 2, including removal of portion of present input lines and construction of junction boxes, all of which work is shown on detailed plans of the project, as provided for in Plans and Specifications adopted by the City Council on date of October 28, 1926.

All such proposals must comply with the requisitions of the City ordinances applicable thereto, and the City Charter of the City of Sacramento, effective June 30, 1921, and bidders are hereby cautioned that any bid which fails to comply therewith cannot be considered.

Bids must be submitted upon printed proposal and, affidavit form, supplied by the City Clerk without charge to the prospective bidders and enclosed in an envelope marked "Sealed Proposal for the Construction of Unit No. 1 of the 1926 Bond Sewer."

At the same time with the execution of the Contract for said work, successful bidder will be required to furnish a contract bond furnished by an authorized surety company or personal sureties, who shall be freeholders or householders of the City of Sacramento, to be approved by the City Controller, for the faithful performance of the work, in the sum of 50 per cent of the amount of his contract, in addition to which Contractor will also execute a labor and material bond in sum not less than 50 per cent of the amount of contract.

A certified check made payable to the City Controller of the City of Sacramento, as prescribed in Section 256 of said Charter, for ten percent (10%) of the aggregate of the proposal must accompany each bid.

The right to reject any and all bids is reserved to the City Council by provisions of said Charter.

H. G. DENTON,
City Clerk, Room 203, City Hall.

NOTICE TO CONTRACTORS

(Boilers, Etc., Mare Island Navy Yard)

SEALED Proposals, indorsed "Proposals for Boilers, Oil Burning Equipment and Flue, Mare Island, Calif. Specifications No. 5288," will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until 11 o'clock a. m. Nov. 24, 1926, and then and there publicly opened for four 300-horse power water tube boilers with brick settings, oil burning equipment and smoke flue between boilers and chimney at the Navy Yard (Hospital), Mare Island, Calif. Specification No. 5288 and accompanying drawings may be obtained on application to the Bureau or to the Commandant, Navy Yard, Mare Island, Calif. Deposit of a check or postal money order for $10, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawings and specification. L. E. GREGORY, Chief of Bureau. October 2, 1926.

NOTICE TO CONTRACTORS

(General Work)

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, **up to 2 o'clock P. M., November 30th, 1926,** said bids then and there to be publicly opened and read, for furnishing all plant, materials, and labor required for the erection and completion of the **General Work,** Science Building, San Francisco State Teachers' College, Buchanan and Haight Streets, San Francisco, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

General Work includes all manner of work except Painting, Plumbing, Heating and Electrical Work.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five ($25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for General Work, Science Building, San Francisco, California." STATE DEPARTMENT OF PUBLIC WORKS DIVISION OF ARCHITECTURE

GEO. B. McDOUGALL,
State Architect.
PAUL BAILEY,
Director of Public Works.

NOTICE TO CONTRACTORS

(Mechanical Work)

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, **up to and including 12 o'clock noon, Tuesday, November 30th, 1926,** said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the **Mechanical Work,** Science Building, San Francisco State Teachers' College, Buchanan and Haight Streets, San Francisco, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

Mechanical Work includes Plumbing, Heating and Electrical Work, and separate bids will be received for each branch of the work. Combined bids will also be received covering two or all three branches of the work. Bids must be submitted on forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five ($25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Mechanical Work, Science Building, San Francisco, California." STATE DEPARTMENT OF PUBLIC WORKS DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

(Pier Extension—Pearl Harbor, T. H.)

The Bureau of Yards and Docks, invites attention to Specification No. 5210, Extension to Pier, Naval Operating Base (Navy Yard), Pearl Harbor, T. H. The pier will comprise an extension to a similar existing structure and will consist of a reinforced concrete deck of beams, girders, and floor slab supported and braced by composite piles of wood and precast reinforced concrete. The work also includes the removal of pile dolphins, cleats, guard timbers and fender system at end of existing pier; the furnishing and installing of cleats, bitts, cover frames and covers, track drains, bolts, washers and all fittings required to complete the work; pile dolphins; fender system, and crossover between railroad tracks; and the extension of railroad tracks, of steel conduits for power, lighting and telephone systems, and of oil, air, fresh and salt water pipe lines including their supports and connections to existing service lines.

In the event that this work is of interest to your firm you should forward to the Bureau, to the Commandant, Naval Operating Base, Pearl Harbor, T. H., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for $10 payable to the Chief of the Bureau of Yards and Docks as security for the safe return of the drawings and specification.

Inasmuch as the specifications and accompanying drawings are nearing completion, it is suggested that you submit your application as soon as practicable in order that the bidding data may be forwarded when the specifications are received from the printer.

Prospective bidders on the West Coast should make application at the Navy Yard, Mare Island, Calif., for the bidding data.

NOTICE TO CONTRACTORS

(Tulare County Hospital)

NOTICE IS HEREBY GIVEN: That sealed bids will be received by the Clerk of the Board of Supervisors of the County of Tulare, at his office in the courthouse in the city of Visalia, above county and state, **up to the hour of 2 o'clock p. m., November 23, 1926,** for the furnishing of all labor and materials necessary in the erection, construction and completion of a General Hospital Building and Power House, known as Job No. 1302, including works according to plans and specifications prepared for the same by Kump & Johnson, Architects & Engineers in strict accordance with bid proposals and alternate bids asked for in specifications, under segregated contracts particularly described as follows:

Contract A—General Construction consisting of Excavating and grading, Concrete and Cement Work, Glass and Glazing, Carpentry, (the placement of Finished Hardware, Structural Steel, Miscellaneous & Ornamental Iron, Steel Partitions and Sash) Rough Hardware, Metal Doors, Frames and Sash.

Contract B—Masonry.
Contract C—Steel and Iron.
Contract D—Roofing.
Contract E—Plastering.
Contract F—Tile and Marble.
Contract G—Painting.
Contract H—Sheet Metal.
Contract I—Plumbing.
Contract J—Heating.
Contract K—Refrigerating Plant.
Contract L—Linoleum.
Contract M.—Finished Hardware.
Contract N—Electric Work.
Contract P—Elevators.

EACH BID PROPOSAL: Must be accompanied by a certified or cashier's check equal to at least 10% (ten per cent) of the total amount of the bid to do the work mentioned, payable to the Chairman of the Board of Supervisors of the County of Tulare. Such check is to be received on the condition that if the proposal of the bidder be accepted, he will enter into and execute a contract for the faithful performance of the work described in the plans and specifications and file required bonds within ten days from and after notice of award. Plans and specifications for this work are on file in the office of the Board of Supervisors and also in the office of Kump & Johnson, Architects and Engineers, City of Fresno, 532 Rowell Bldg., at which latter place copies must be obtained.

ALL BIDS: are to be made out on blank forms furnished by the Architects. The sucessful bidder will have to give surety bonds in the sum of 50% (fifty per cent) for the protection of material, men and labor and 25% (twenty-five cent) bond guaranteeing faithful performance of contract, as required by the terms of an Act of Legislature of the State of California entitled, "An Act to secure the payment of claims of persons employed by contractors upon public works and that claims of persons who furnish materials, supplies, teams, implements and machinery used or consumed by such contractors in the performance of such works, and prescribing the duties of certain public officers with respect thereto." Approved May 10, 1919. (Stats. 1919. p 487, and acts amendatory thereto). All bid proposal blanks in accordance with Building Form 3-8 incl. adopted by the Board of Supervisors, copies of which are on file in the office of the Board of Supervisors and also in the office of the Architects at which latter place copies must be obtained.

The Board of Supervisors of the County of Tulare reserve the right to reject any and all proposals or to accept the proposal considered by them best for said County of Tulare. By order of the Board of Supervisors.

GLADYS STEWART.
County Clerk and ex-officio Clerk. of the Board of Supervisors.
(SEAL) By A. W. FROST, Deputy.

NOTICE TO CONTRACTORS

(Power House and Laundry—King's County)

Sealed proposals addressed to the Board of Supervisors, County of Kings, State of California, for the construction of a Power House and Laundry Buildings, near the County Hospital Building, as per plans and specifications on file, will be received by the Board in its chambers in the Court

House at Hanford until **ten o'clock A.M. of the 17th day of November, 1926,** and at that time and place will be publicly opened and read.

Plans, specifications and blank forms of proposal for work may be obtained at the office of the Clerk of the Board of Supervisors or at the office of the architect, Anton Johnson, 528 Call Building, San Francisco, California, on deposit of Ten Dollars ($10.00), (returnable upon return of plans in good condition). All proposals must be made on said blank forms, must give the price proposed, both in writing and figures, and must be signed by the bidder with his address. The phraseology of the proposal must not be changed and any alteration made by the bidder will make the proposal informal and liable to rejection.

Each bid to be presented under sealed cover and shall be accompanied by cash, a bidder's bond or a certified check made payable to the order of the Chairman of the Board of Supervisors, of the County of Kings, State of California, for an amount equal to at least ten (10 per cent of the amount of said bid, and no bid shall be considered unless such cash, bond or check is enclosed therewith, such cash bond or check to be returned to the bidder unless forfeited under the conditions herein stipulated.

A good and satisfactory surety bond will be required for the faithful performance of the contract in a sum equal to twenty-five (25) per cent of the amount of the contract and a further like bond in a sum equal to one-half of the amount of the contract must be furnished as required by the terms of an act of the legislature of the State of California, entitled, "An Act to Secure the payment of claims of persons employed by Contractors upon Public Works, and the claims of persons who furnish materials, supplies, implements, or machinery used or consumed by such contractors in the performance of such works, and prescribing the duties of certain public officers with respect thereto," approved May 10, 1919, known as Chapter 303 of the Statutes of 1919. The suretles on both bonds must be approved by the Board of Supervisors.

Bids will be received on the following divisions of work: Division 1 — General Work. Division 2—Heating.

The bidder to whom the contract may be awarded will be required to appear at the office of the Board of Supervisors with the surety bonds offered by him, and execute a contract within ten (10) days (not including Sunday) after it is awarded to him. In case of failure or neglect to do so he may be considered as having abandoned it, and the cash, bond, or check accompanying the proposal may, at the option of the Board of Supervisors be forfeited to the County of Kings, State of California.

The Board of Supervisors reserves the right to reject any or all proposals.
BOARD OF SUPERVISORS OF THE COUNTY OF KINGS, STATE OF CALIFORNIA.
By M. C. CARTER, Chairman.
(Seal). Attest:
E. F. PICKERILL, Clerk.
Hanford, California, October 25, 1926

NOTICE TO CONTRACTORS

(Courthouse—Santa Barbara County)

Pursuant to an order of the Board of Supervisors of the County of Santa Barbara, State of California, made on the eighteenth day of October, 1926, notice is hereby given that sealed bids will be received **until 10 A. M. on the fifteenth day of November, 1926,** by the Board of Supervisors of the County of Santa Barbara, State of California, at their rooms in the County Court House, in the city of Santa Barbara, County of Santa Barbara, State of California; said bids then and there will be publicly opened and read for furnishing all paint, material and labor and doing the work required, for the construction and erection of the Court House, Hall of Records and Jail Building on the Court House site in the City of Santa Barbara, County of Santa Barbara, State of California, and all in accordance with the plans and specifications therefore, made by William Mooser Company, Architects, copies of which may be obtained on application from the Architects, Nevada Bank Building, San Francisco, California.

Such bids will be received for the work as follows: separately;

1. ONE GENERAL BID — Items listed under "Ornamental Iron."

2. ONE GENERAL BID—(A) Items listed under "Concrete Work." (B) Unit prices.

3. ONE GENERAL BID — Iteme listed under "Main Entrance, Arch, Stone, etc."

All proposals must be submitted on forms similar to the one here attached as prepared by the Architects, William Mooser Company, Nevada Bank Building, San Francisco, California.

Cash, a Bidder's Bond, or a Certified Check in the sum of at least Ten per centum (10%) of the amount of the bid must accompany each bid, and be payable to the Chairman of the Board of Supervisors of the County of Santa Barbara, as a guarantee that the Bidder whose proposal is accepted will enter into a contract with the County of Santa Barbara, for the work bid upon, otherwise said Cash or Bidder's Bond, or Certified Check, will be forfeited to the County of Santa Barbara.

A deposit of Fifty Dollars cash or certified check will be required for plans and specifications, the deposit to be returned immediately on the return of plans and specifications in good condition to the Clerk of the Board of Supervisors, County Court House in the City of Santa Barbara or to the Architects, William Mooser Company, Nevada Bank Building, San Francisco, State of California.

RIGHTS RESERVED

The County of Santa Barbara reserves the following rights: (a) To reject any or all proposals; (b) to waive any informalities in any proposal; (c) to award this contract to some other than the lowest bidder, as this clause expressly puts the bidder on notice that his financial and business standing and ability properly and expeditiously to carry out work hereunder, or the consideration of desired alternates, makes his proposal more advantageous to the County of Santa Barbara; (d) to accept any alternative or any independent part of any proposal submitted by the successful bidder at the price stated in such proposal for such alternate or separate parts of the work, under the provision; (e) to deduct any separate item mentioned in any proposal at the price therein stated therefor; (f) to make any additions to omissions from changes in, or substitution for the work or materials or articles called for by the contract, subject to the requirements of the paragraph thereof headed under the particular item and without notice to the sureties on this bond, if any, guaranteeing the performance of the contract.

All bids must be addressed to the County Clerk of the County of Santa Barbara in the City of Santa Barbara, State of California, and have endorsed thereon.

Proposal for Court House, Hall of Records and Jail Building, for the County of Santa Barbara, California, and the particular part of the work bid upon.

C. L. PREISKER,
Chairman of the Board of Supervisors of the County of Santa Barbara.
C. A. HUNT,
County Clerk and Clerk of the Board of Supervisors of the County of Santa Barbara.

1926 Edition

San Francisco Building Laws

Ready For Distribution

With the issuance of this 1926 edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

This 1926 edition contains all revisions and additions to the code up to and including June 1926.

In addition to the Building Laws of San Francisco, the 1926 edition contains the FIRE ORDINANCES as regards the construction industry, the ELECTRICAL ORDINANCES, the SIGN ORDINANCE, the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price $1.00 per copy.

WORK PROGRESSING ON HUGE LUMBER TERMINAL

A huge deep water ship terminal costing $2,500,000, consisting of docks, steel cranes, electric tram movers and rail facilities, is about to be constructed at California City, on the eastern shore of Marin county.

This big development will be the enterprise of Finkbind-Guild Lumber Company.

Over $40,000,000 in redwood timber will be shipped from this terminal annually to southern mills and midwestern markets. Fifteen ocean-going steamers, eight of which will be big cargo carrier, and seven coastwise craft, will utilize this new big terminal.

Timber will be brought to the terminal from the redwood forests of northern Mendocino county, near Rockport. Until rail facilities are available and forty miles of new tracks are built in the virgin forests, steam schooners of the Charles R. McCormick Line will feed the terminal with timbers to California City for reloading to the larger craft, which in turn will carry the cargoes to mills in the Mississippi.

Six hundred feet of berthing space has already been provided at the terminal, and three acres have been constructed for storage. Nine additional acres are now being excavated for further storage, buildings and sheds. Four powerful electric cranes have been ordered to expedite the handling of the cargoes.—Marin Journal.

Portland, Ore., reports the issuance of 1229 building permits in October for improvements valued at $2,623,065 as compared with 1441 permits for projects costing $2,295,000 during the same period in 1925.

BOND ISSUE PROPOSED FOR MUNY RAILWAY SYSTEM

Recommendation that a special bond election be called shortly after the first of next year to authorize a $3,000,000 bond issue for extensions and improvements of the San Francisco Municipal Railway System, is made by City Engineer M. M. O'Shaughnessy in a report to the Public Utilities Committee of the Board of Supervisors.

Engineer O'Shaughnessy lists eight changes as vital to present conditions. They are:

1.—Erection of a car repair shop; cost, $250,000.

2.—Garage for motor buses; cost, $60,000.

3.—Marina tract line, 0.6 mile; cost, $94,000.

4.—Sunset line, 1.71 miles from Market Street to ocean via Irving street, Ninth avenue and Judah street; cost, $1,602,000.

5.—Excelsior line, 2.82 miles; cost, $1,245,000.

6.—Balboa line, 2.79 miles; cost, $540,000.

7.—Taraval extension, 0.6 mile; cost, $50,000.

8.—Twenty buses; cost, $150,000.

The total cost of these improvements is $3,991,000, of which $500,000 has already been appropriated.

BRICK MEN TO MEET

The forty-first annual convention of the National Brick Manufacturers' Association will be held at Columbus, O., Jan. 11 to 13, inclusive. The Common Brick Manufacturers' Association will hold its annual convention at Chicago Feb. 21 to 25 inclusive.

L. A. BUILDING IN OCTOBER TOTALS $9,950,229

Los Angeles' building total for October, 1926, which fell slightly under ten million dollars, is very close to the monthly average for the year, according to Southwest Builder and Contractor. The number of permits issued, 3482 is the largest for any month of the year except March, and the estimated valuation is $9,950,229. For September, 1926, the number of permits issued was 3335 with an estimated valuation of $8,163,581, and for October of last year the number of permits was 3882 with an estimated valuation of $11,655,786.

Construction during October, 1926, was somewhat better balanced than during the preceding month. Class A construction embraced four buildings estimated to cost $1,622,000; Class B construction two buildings estimated to cost $275,000; Class C construction 66 buildings estimated to cost $1,100,473, and Class D all-frame construction 2304 buildings, estimated to cost $5,550,369.

For 10 months of the current year Los Angeles' building total was $104,228,089, as compared with $127,423,319 for the corresponding period last year.

Housing operations during October, 1926, were the heaviest for any month of the current year since April. They comprised permits for 1084 dwellings and apartment houses estimated to cost $5,680,755, or 31.1 per cent of the entire number of permits and 57 per cent of the total valuation for the month. Accommodations were provided for 1837 families.

Los Angeles' building for November has a good start, the records showing for the first two days 195 permits with an estimated valuation of $1,751,344, as compared with 272 permits with an estimated valuation of $627,563 for the corresponding period in October and 289 permits with an estimated valuation of $581,392 for the first two days of November, 1925. The total for November, 1925, was $13,583,575. It is not likely this figure will be equalled by the record for the current month. Los Angeles' building total for the current year up to and including Nov. 2 was $105,979,433 as compared with $128,004,711 for the corresponding period in 1925.

SACHAMENTO PLUMBERS SEEK CHANGE IN LAWS

In the hope of clearing up a number of minor ambiguities in the Sacramento plumbing regulations, a committee representing the Master Plumbers' Association of Sacramento held a conference with City Manager Bottorff. The plumbers sought to have the changes they are asking incorporated in an ordinance. They were represented by Attorney Harry Seymour. Bottorff took the matter under advisement.

SHEET METAL ASSOCIATION APPOINTS SECRETARY

Appointment of W. C. Markle of Pittsburgh, Pa., as the new secretary of the National Association of Sheet Metal Contractors is announced by that organization. Mr. Markel succeeds Edwin L. Seabrook, who was secretary of the national organization for twenty-one and a half years.

CLINKER BRICK POPULAR

Ten years ago the clinker brick, so called because it frequently came out of the kiln with the fused appearance of a real furnace clinker, was a total loss to the manufacturer and usually was chucked into the rubbish heap or the dump. Today clinker brick are used in the construction of the most attractive brick houses and sell at a higher price than the run of kiln bricks. The percentage in any kiln is small and they are so difficult to obtain that some manufacturers are experimenting with a view to increasing their clinker brick output.

OAKLAND TO VOTE ON HARBOR COMMISSION PROPOSAL

A proposal to create a board of harbor commissioners will be presented to the voters of Oakland at a special election Dec 21. The new board, which would have complete charge of the development and operation of the port, would be composed of five members to be appointed by the commissioner of public works, subject to the approval of the city council.

Under the original proposal, a number of the employees of the port department would be exempt from civil service regulation, but this was changed to make the part manager, his assistant and two or three others the ones who would not have to be under civil service regulations.

City Commissioner Goodrich explains that it is necessary to get the proposal before the voters at the earliest possible date so that there would be no delay in having the charter amendment ratified by the state legislature, which meets early in January.

N. A. BOWERS ELECTED HEAD OF S. F. ENGINEERS' CLUB

The San Francisco Engineers' Club has elected Dr. Nathan A. Bowers, Pacific coast editor for the "Engineering News-Record," as president for the coming year. Other officers elected were E. M. Breed of the Pelton Water Wheel Company, vice president; G. R. Kingsland of the Otis Elevator Company, secretary, and A. D. Oliver of the Wells Fargo Bank and Union Trust Company, treasurer.

Announcement is made that a lease had been signed for new quarters to occupy the entire fourteenth and fifteenth floors of the new building at Sansome and Pine streets, which will be ready for occupancy next September.

ELECTRICAL MEN OF SANTA CLARA COUNTY ELECT

The Electrical Development League of Santa Clara County at a recent meeting elected the following officers: E. J. Kingsley, president; Chester Hershey, first vice-president; Daniel Coyle, second vice-president; B. A. Miller, secretary, and John S. C. Ross, treasurer.

The League is completing arrangements for the electrical exhibition to be held in San Jose in December.

Credit Control System For Construction Industry Urged

Address delivered by W. H. Graham, plumbing and heating contractor of Oakland and an official of an East Bay building and loan association, before fellow members of the California Sanitation Development League at a recent meeting of that organization held in San Francisco. It is hoped that this talk will prove to be the means of opening a campaign to secure the co-operation of the various craft organizations in the construction industry to the end of establishing a very necessary credit protection.—Editor.

A very interesting story is told by a prominent San Francisco attorney, who, at one time, was counsel for a large transcontinental railroad system. The story runs—two railway executives, one the chairman of the Board; the other, President of the Western Division, were riding in their private car with this attorney when the conversation turned to a discussion of a certain man in their employ. The chairman said to his western executive, "Where did this man come from and who is he?" The westerner gave rather a complete history of the man under discussion and stated they were paying him $25,000 per year. Promptly, the chairman of the board said, "We must discharge that man". The local president was non-plussed and explained to his superior that this individual had been a most valuable employee in another railway system and his service had been secured with the idea that he could render the same valuable service in this same line to their road. The chairman responded that this in theory sounded very good but that the employee was totally incompetent for the responsibilities of a position of this character. He stated that during a visit to this man's office he had discovered him buried in a mass of detail correspondence and had immediately concluded that a man who would bury himself in such a mass of detail was not the proper one for the executive position he was expected to fill.

The chairman said that the type of man the road required in that position was one who would have an absolutely clear desk top; who would lean back in his chair—smoke a good cigar—and THINK.

Now, particularly the members of the jobbing fraternity who are present tonight, I want you to put your feet on top of the desk, smoke a good cigar and think; think this problem over which I am about to put before you. We, in the retail plumbing business find it impossible to devote the time necessary to such a thorough mental process, therefore, I am going to leave some of it to you.

Need of Credit Control

The building business of any growing locality is always the largest individual class of business in that community. This is unquestionably a fact as effects the Bay District. Hundreds of millions of dollars of building business is done in the State of California, the greater portion of which is done without any credit information whatever regarding the individual to whom we, the retail dealers, are asked to give credit. This is a universal problem in the building business; it matters not whether it be California, New York, Illinois or Utah; it is the same. To localize the question before us the greatest evidence of the need of credit control may be shown by the number of liens filed in one county of this State. Take, for instance, Alameda County. During four years, a total of $642,000 in liens have been filed as a result of building operations in this county. This represents about 1900 individual liens which cost the owners on an average of $60 each to file and defend, a total of $114,000 or $28,500 each year, which does not take into consideration at all the worry, trouble and lost time involved.

Bungalow Costs Noted

Strange as it may seem, the smaller dwellings; that is five and six room bungalows, flat buildings, etc., constitute 70 per cent of the bulk of the building business in that community, and for your information, and as a basis for our analysis, I want to analyze for you an actual construction problem on a bungalow which cost $4,250.

Contract for building, Total		$4250.00
Paid out in 4 equal payments of each		$1062.50
Payment No. 1		$1062.50
Excavating	$ 32.50	
Concrete	78.60	
Rf. lumber	520.70	
Rf. plumbing	190.00	
Rf. hardware	50.90	
Electric wiring	34.50	
Rf. labor	150.00	$1057.20
CREDIT BALANCE over and above bldg. cost up to this time		5.30
		$1062.50
		$1067.80
Payment No. 2:		
Window frames	$154.10	
Roofing	96.50	
Plastering	310.80	
Patent chimney	43.50	
Brick chimney	165.00	
Rf. labor	150.00	$ 819.90
CREDIT BALANCE over and above bldg. cost up to this time		247.90
Payments Nos. 3 & 4 $1062.50 Each		2125.00
		$2372.90
Millwork	$600.00	
Mantel	45.00	
Tile work	65.00	
Hardwood floors	213.00	
Finish plumbing	125.00	
Finish hardware	60.00	
Painting	235.00	
Electric fixtures	62.50	
Shades	33.00	
Sewer	60.00	
Fence	47.25	
Walks	40.00	
Incidentals	113.20	
Finish labor	250.00	1948.95
GROSS PROFIT		$ 423.95

NOTE:

Surplus after 2nd payment	$247.90
Rough lumber payment order accepted for payment out of 3rd or 4th payment	$520.70
	$768.60

This $768.60 used to purchase a new sedan or a fur coat for friend wife.

Wild Financing

You will note as you make an analysis of these figures that the maximum capital required by the builder who is to ask for credit of $4250 to operate is $150. The amount of the rough labor involved up to the time his first payment is due or when the frame of the building is up. You will also note as you study the figures that to the time of the receipt of the second payment he has received in excess of the total cost of everything that has entered into the construction of the building the sum of $247.90. What does this mean? Simply this—that this builder can abandon the job at this time and still have had enough profit to satisfy himself for the amount of time involved. You will further notice by the balance of the figures submitted that the excess of $176.05 is still left from the 3rd and 4th payments as a profit to the builder at the end of the building operation, making his total profit on this job $423.95. The reason for this detailed analysis is to show to you what a wild system of financing goes on in the building business.

I want to draw your attention also to the common practice among lumber dealers, who think they are doing something to help this builder along, when they agree to accept the payment for the rough lumber by an order payable out of the 3rd and 4th payment of the contract. You can see what happens when this occurs. At the time of the second payment the contractor has in his pocket an unexpended amount of $768.60 which he uses for various purposes, foolishly believing that this money is his, when he is really only the trustee of money which should be used for completion payments. If this builder is erecting a number of houses, the amount involved is very large, and if the man walks out he leaves you and I to work the situation out as best we can. If he is incompetent or unwise, and there are many of both types, he uses this money to buy a nice sedan, or his wife a fur coat, while you and I whistle for our money.

I make this very definite statement. Any one of us can enter the building business on this method of credit granting and within a period of ninety days can steal $50,000 within the law.

Some Credit

I want to bring another problem to your attention which is much larger in scope than the one just presented. It is the case of fifty units instead of one unit which has been the subject of our discussion thus far. A certain builder came into Oakland about one year ago and purchased fifty lots at wholesale for $50,000. He paid the owner of the land $10,000 and gave in return a second deed of trust, subject to first mortgages for building purposes, in the sum of $40,000. This party next proceeded to secure $5,000 mortgages for the building of fifty bungalows upon these fifty lots. He was successful in floating the loans and proceeded with the building. And now realize for a minute just what happened. This operator has secured $250,000 in cash for building purposes and during the period that this $250,000 is being used, we, of the building business have involved $250,000 of our money. That makes $500,000! This, with the $40,000 second mortgages accepted as payment for the lots means that this party has moved 540,000 good American dollars with only $10,000 down payment—a credit business on the basis of 54 to 1. I will leave it to you,—is that good business?

With these typical cases, let us look at our problem a little closer. In want of a better method of explanation, I am going to refer to the building business as a "four square business" and I am going to chart for you four square gospel of the build ng business. When I mention four-square gospel I do so with apologies to Aimee Mc herson.

Four Square Gospel

Let us view the first square of this gospel. We will call this square US; that is all of us who are engaged in the building business. We are anxious to gather in business and so doing we give service and secure the business on the basis of price and quality. The second square we will call THEY; our clients, either the owner or a general contractor. These two types fall into a number of classes; they may be the investor or the speculator, the competent or the incompetent; the fortunate or the unfortunate; the honest or the dishonest. They have the vision of the building. The cost is known to them if they have entered into a contract or is unknown if they propose to build on the basis of day labor or per centage. With this vision of the building before them they start in search of credit. Then squares one and two, WE and THEY, meet and agree; one to do the work that is wanted—the other to pay the price of the work finished. These contracts are entered upon in good faith from our standpoint but are they entered upon in such good faith on the part of our clients? Our contract binds us to deliver a certain piece of workmanship. Does their bind them to anything? What do we do? We proceed to seek out some credit information to determine if the parties we are about to do business with are a safe business risk. Where do we go? We go to the standard credit reports or we go to the specific building reports. What do we find? Little that is of any avail to us in the building business. Let us look at a couple of specific cases without mentioning names.

Worthless Credit Reports

A firm of operators from San Francisco who have been in the business for perhaps thirty years, and have a high credit reputation at all times proceeded with a large building scheme in the East Bay. Credit reports were asked of these people showing them worth approximately $400,000. With such a reputation and financial standing, which one of you would not have accepted a contract for $75,000 on such a credit rate? The facts were that in five months after this rating and before the first building was completed something happened; what it was, no one knows, and none of the bills were paid. After eleven months and after a searching inquiry into the affairs of this concern, it was found that their liabilities were over a half million dollars with practically no assets. The question in everybody's mind who were involved in this problem was,—what became of this half million dollars and the $400,000 which was shown as assets eleven months previous? This is absolute proof of the worthlessness of standard credit reports as they affect the building business. Specific building reports do give you the record of the property today and tell you the amount of the loans placed there against, but what does this tell? You have go to go behind the scenes again and see what these mortgage figures represent.. Let me give you a typical case:

A has a lot valued at $1500. B wants to build a building to the value of $3500. A and B agree. B gets a first mortgage of $3500 to build the building, and A takes a second mortgage of $1500 for the value of his lot. The building B proposes to erect for $3500 generally exceeds his estimate all the way from 10% to 20 % and on top of this he has overlooked a series of fixed charges which are inevitable:

Loan broker 3% of $3500	$105.00
Appraisal fee	10.00
Inspection charge	10.00
Insurance	30.00
Three months interest	60.00
Search	27.50
Recordation	10.00
TOTAL	$252.50

Add this amount to a minimum excess cost of 10% of the building and the building loan is short from the very beginning over $600. This is not a hypothetical statement; it is a statement of actual fact which has been observed by me in my position as inspector for a building loan association in a vast amount of loans which have passed under my observation. I make this statement to make clear the fact that standard or building credit reports cannot give any sound information until the information is to late to be of value. They can only give expression to experiences which are like unto the tail lights of a disappearing vehicle.

Finance or Cash

Let us now look at the third square of this gospel, representing the finance or cash. We have entered into a contract with the owner to secure in return for our service, cash. Under existing conditions we have only his word that he has sufficient cash in the depository to pay the amount of the contract entered into between us. We have no means of knowing if this he a fact or fiction. We have no contact whatseever with this third square—the cash. The owner is the only one who has that contact. We have 100% interest in the amount of our credit. The owner generally has less than 20% interest in the total claim because as is generally known, all buildings are built largely on borrowed money. We can only know the gross loan. Even though we search the records we have no conception of the discounts and brokerages that may he taken from that loan before any balance is left to meet the current expenses of the job. I ask you then again, why all this unlimited credit? We MUST produce, they MAY produce.

We now have our three squares upon the blackboard and if we stop at this point we may well convert the three squares into three balls and be real pawnbrokers. We must go further.

Builders' Clearing House is Solution

To complete the four square gospel we need the last square, and for want of a better name I have named it the BUILDERS' CLEARING HOUSE. I spoke to you earlier in the evening about the man who put his feet on top of the desk and smoked a good cigar and thought. Right here I want to compliment one of that type of man, who was at one time Secretary of the East Bay Master Plumber's Association, George E. Rodman. Mr. Rodman was a keen thinker and after a number of years as Secretary of the M. P. A. seeing the tremendous losses experienced by our members and the seeming utter hopelessness of any means of correction, he, being an attorney admitted to practice in the high courts of the United States, but who liked his work with us better than that of the legal profession, put his feet on top of his desk one day, smoked a good cigar and thought. As a result of his thought, the idea of a Builders' Clearing House was given birth.

Mr Rodman submitted the proposition to me, as an official of a Building and Loan Association, and asked me if I would permit its trial as it applied to loans traveling through our Association. I was permitted by the Association to make the trial, and we found the results satisfactory in the extreme. Other financial institutions gave it a trial, and I have in my possession a number of letters from these institutions expressing their sincere appreciation of the merits of the Builders Clearing House.

Further a number of owners allowed their buildings to be constructed through the Builders' Clearing House. I have a number of letters on file expressing their keenest satisfaction for the services of the Builders' Clearing House as it affected their particular building project.

System of Operation

How would the Builders' Clearing House operate? In the first place it is absolutely square to all—contractor, owner and depository of cash. The Builders' Clearing House is merely a record keeper for each particular job. It starts the record of the job through the filing at the time of the commencement of a tabulated list of all items entering into the cost of the building. Naturally, when all these items are tabulated and compiled we have the exact cost of the building. It becomes a simple budget system for the financial control of the operation. The contract between the builder and the owner is signed in triplicate; one copy being given to the clearing house for its records, the other two copies going to the owner and the builder. The clearing house record is absolutely governed by this contract. Its operation is in this fashion. The owner by agreement with the clearing house designates a depository where the cash for the building will be held. It is only necessary that sufficient cash be impounded to cover the progress of the work from time to time; it not being necessary to impound the total amount of the building cost until such time as this money is required. Upon the completion of the contract and to the satisfaction of the owner a draft is made through the clearing house upon the cash in the designated depository, and after the owner's signature is upon the draft the counter signature of the manager of the clearing house is required before it will be honored.

This is how a builder protects himself under this system. Before his work is done his contract is filed with the clearing house. Take the case of a plumbing contract of $300, $180 of which is payable upon the completion of the rough work; the balance upon the completion of the entire job. Immediately the clearing house knows that the rough payment for plumbing is payable out of the second payment upon the building, and an amount sufficient to cover this contract is allocated from this payment and cannot be diverted. If perchance a dispute arises between the owner and the contractor, during the time that the dispute remains unsettled, the money remains impounded and does not fade away, as so often is the case at the present time and which fact in itself causes us many times to surrender our well substantiated rights rather than face the chances of having our money disapper in thin air during the argument. These are just the high spots of the possibilities of that fourth square. You men who can put your feet on top of the desk, smoke a good cigar and think, think a little bit about it now and offer whatever resistance you can to such a plan because I am most certain that sooner or later some such plan will be adopted and put into effect to straighten out a most abused business; one that has the darkest pages in the book of American business—the financial difficulties of the building business.

Co-Operation Required
